#	ARTICLE	IF	CITATIONS
1	Genome-wide association study identifies 74 loci associated with educational attainment. <i>Nature</i> , 2016, 533, 539-542.	27.8	1,204
2	Genetic variants associated with subjective well-being, depressive symptoms, and neuroticism identified through genome-wide analyses. <i>Nature Genetics</i> , 2016, 48, 624-633.	21.4	870
3	GWAS of 126,559 Individuals Identifies Genetic Variants Associated with Educational Attainment. <i>Science</i> , 2013, 340, 1467-1471.	12.6	750
4	Fatigue and psychological distress in the working population. <i>Journal of Psychosomatic Research</i> , 2002, 52, 445-452.	2.6	239
5	Psychosocial Work Environment and Incidence of Severe Depressive Symptoms: Prospective Findings from a 5-Year Follow-up of the Danish Work Environment Cohort Study. <i>American Journal of Epidemiology</i> , 2006, 163, 877-887.	3.4	236
6	Polygenic prediction of educational attainment within and between families from genome-wide association analyses in 3 million individuals. <i>Nature Genetics</i> , 2022, 54, 437-449.	21.4	215
7	Measurement of prolonged fatigue in the working population: Determination of a cutoff point for the Checklist Individual Strength.. <i>Journal of Occupational Health Psychology</i> , 2000, 5, 411-416.	3.3	206
8	Physical work environment risk factors for long term sickness absence: prospective findings among a cohort of 5357 employees in Denmark. <i>BMJ: British Medical Journal</i> , 2006, 332, 449-452.	2.3	183
9	Loneliness, worries, anxiety, and precautionary behaviours in response to the COVID-19 pandemic: A longitudinal analysis of 200,000 Western and Northern Europeans. <i>Lancet Regional Health - Europe</i> , The, 2021, 2, 100020.	5.6	180
10	Interventions to improve return to work in depressed people. <i>The Cochrane Library</i> , 2014, , CD006237.	2.8	166
11	Depressive symptoms and the risk of long-term sickness absence. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2006, 41, 875-880.	3.1	141
12	Psychosocial Work Environment Exposures as Risk Factors for Long-Term Sickness Absence Among Danish Employees: Results From DWECS/DREAM. <i>Journal of Occupational and Environmental Medicine</i> , 2005, 47, 1141-1147.	1.7	140
13	Recurrence of sickness absence due to common mental disorders. <i>International Archives of Occupational and Environmental Health</i> , 2011, 84, 193-201.	2.3	131
14	Coordinated and Tailored Work Rehabilitation: A Randomized Controlled Trial with Economic Evaluation Undertaken with Workers on Sick Leave Due to Musculoskeletal Disorders. <i>Journal of Occupational Rehabilitation</i> , 2009, 19, 81-93.	2.2	128
15	A Prospective Study of Return to Work Across Health Conditions: Perceived Work Attitude, Self-efficacy and Perceived Social Support. <i>Journal of Occupational Rehabilitation</i> , 2010, 20, 104-112.	2.2	127
16	The contribution of the psychosocial work environment to sickness absence in human service workers: Results of a 3-year follow-up study. <i>Work and Stress</i> , 2007, 21, 293-311.	4.5	119
17	Behavioral Determinants as Predictors of Return to Work After Long-Term Sickness Absence: An Application of the Theory of Planned Behavior. <i>Journal of Occupational Rehabilitation</i> , 2009, 19, 166-174.	2.2	114
18	Genetic variants linked to education predict longevity. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 13366-13371.	7.1	110

#	ARTICLE	IF	CITATIONS
19	Health status, work limitations, and return-to-work trajectories in injured workers with musculoskeletal disorders. <i>Quality of Life Research</i> , 2007, 16, 1167-1178.	3.1	109
20	Mental health trajectories from childhood to young adulthood affect the educational and employment status of young adults: results from the TRAILS study. <i>Journal of Epidemiology and Community Health</i> , 2015, 69, 588-593.	3.7	104
21	Personal and Societal Impact of Low Back Pain. <i>Spine</i> , 2019, 44, E1443-E1451.	2.0	95
22	Mental Health Problems and Educational Attainment in Adolescence: 9-Year Follow-Up of the TRAILS Study. <i>PLoS ONE</i> , 2014, 9, e101751.	2.5	85
23	Occupational cognitive requirements and late-life cognitive aging. <i>Neurology</i> , 2016, 86, 1386-1392.	1.1	82
24	Socioeconomic Disparities in Chronic Kidney Disease. <i>American Journal of Preventive Medicine</i> , 2015, 48, 580-592.	3.0	79
25	The Work Role Functioning Questionnaire 2.0 (Dutch Version): Examination of its Reliability, Validity and Responsiveness in the General Working Population. <i>Journal of Occupational Rehabilitation</i> , 2013, 23, 135-147.	2.2	77
26	IGLOO: An integrated framework for sustainable return to work in workers with common mental disorders. <i>Work and Stress</i> , 2018, 32, 400-417.	4.5	74
27	Severe depressive symptoms as predictor of disability pension: a 10-year follow-up study in Denmark. <i>European Journal of Public Health</i> , 2008, 18, 232-234.	0.3	72
28	Predictors of return to work in employees sick-listed with mental health problems: findings from a longitudinal study. <i>European Journal of Public Health</i> , 2011, 21, 806-811.	0.3	72
29	Functional limitations in functional somatic syndromes and well-defined medical diseases. Results from the general population cohort LifeLines. <i>Journal of Psychosomatic Research</i> , 2015, 79, 94-99.	2.6	71
30	Long-term work retention after treatment for cancer: a systematic review and meta-analysis. <i>Journal of Cancer Survivorship</i> , 2020, 14, 135-150.	2.9	71
31	Adverse psychosocial working conditions and risk of severe depressive symptoms. Do effects differ by occupational grade?. <i>European Journal of Public Health</i> , 2013, 23, 415-420.	0.3	70
32	Bivariate genome-wide association analyses of the broad depression phenotype combined with major depressive disorder, bipolar disorder or schizophrenia reveal eight novel genetic loci for depression. <i>Molecular Psychiatry</i> , 2020, 25, 1420-1429.	7.9	68
33	Systematic Review of Intervention Practices for Depression in the Workplace. <i>Journal of Occupational Rehabilitation</i> , 2012, 22, 312-321.	2.2	67
34	Psychological Distress, Fatigue and Long-Term Sickness Absence: Prospective Results From the Maastricht Cohort Study. <i>Journal of Occupational and Environmental Medicine</i> , 2005, 47, 941-947.	1.7	66
35	Impact of Burnout and Psychosocial Work Characteristics on Future Long-Term Sickness Absence. Prospective Results of the Danish PUMA Study Among Human Service Workers. <i>Journal of Occupational and Environmental Medicine</i> , 2010, 52, 964-970.	1.7	66
36	Prevention of recurrent sickness absence in workers with common mental disorders: results of a cluster-randomised controlled trial. <i>Occupational and Environmental Medicine</i> , 2014, 71, 21-29.	2.8	65

#	ARTICLE	IF	CITATIONS
37	The association between chronic diseases and fatigue in the working population. <i>Journal of Psychosomatic Research</i> , 2003, 54, 339-344.	2.6	62
38	Interventions to improve return to work in depressed people. <i>The Cochrane Library</i> , 2020, 2020, CD006237.	2.8	62
39	The incidence of anxiety and depression among employees-the role of psychosocial work characteristics. <i>Depression and Anxiety</i> , 2009, 26, 1040-1048.	4.1	61
40	Childhood Adversities and Educational Attainment in Young Adulthood: The Role of Mental Health Problems in Adolescence. <i>Journal of Adolescent Health</i> , 2015, 57, 462-467.	2.5	59
41	Labor markets and health: an integrated life course perspective. <i>Scandinavian Journal of Work, Environment and Health</i> , 2016, 42, 346-353.	3.4	59
42	The Combined Effects of Obesity, Abdominal Obesity and Major Depression/Anxiety on Health-Related Quality of Life: the Lifelines Cohort Study. <i>PLoS ONE</i> , 2016, 11, e0148871.	2.5	58
43	Lifestyle Factors as Risk Factors for Fatigue and Psychological Distress in the Working Population: Prospective Results From the Maastricht Cohort Study. <i>Journal of Occupational and Environmental Medicine</i> , 2002, 44, 116-124.	1.7	57
44	The Impact of Health Behaviour on Long Term Sickness Absence: Results from DW ECS/DREAM. <i>Industrial Health</i> , 2007, 45, 348-351.	1.0	56
45	Health, work, and personal-related predictors of time to return to work among employees with mental health problems. <i>Disability and Rehabilitation</i> , 2012, 34, 1311-1316.	1.8	56
46	Socioeconomic Measures and CKD in the United States and The Netherlands. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2013, 8, 1685-1693.	4.5	55
47	Course, Diagnosis, and Treatment of Depressive Symptomatology in Workers following a Workplace Injury: A Prospective Cohort Study. <i>Canadian Journal of Psychiatry</i> , 2009, 54, 534-546.	1.9	54
48	Differences in Fatigue and Psychological Distress Across Occupations: Results From The Maastricht Cohort Study of Fatigue at Work. <i>Journal of Occupational and Environmental Medicine</i> , 2001, 43, 976-983.	1.7	50
49	Workplace Interventions to Prevent Disability from Both the Scientific and Practice Perspectives: A Comparison of Scientific Literature, Grey Literature and Stakeholder Observations. <i>Journal of Occupational Rehabilitation</i> , 2016, 26, 417-433.	2.2	50
50	Lifelines COVID-19 cohort: investigating COVID-19 infection and its health and societal impacts in a Dutch population-based cohort. <i>BMJ Open</i> , 2021, 11, e044474.	1.9	49
51	Towards a New Definition of Return-to-Work Outcomes in Common Mental Disorders from a Multi-Stakeholder Perspective. <i>PLoS ONE</i> , 2012, 7, e39947.	2.5	49
52	Mediators of the Association Between Low Socioeconomic Status and Chronic Kidney Disease in the United States. <i>American Journal of Epidemiology</i> , 2015, 181, 385-396.	3.4	48
53	Sleep and need for recovery in shift workers: do chronotype and age matter?. <i>Ergonomics</i> , 2016, 59, 310-324.	2.1	45
54	Predictors of recurrent sickness absence among workers having returned to work after sickness absence due to common mental disorders. <i>Scandinavian Journal of Work, Environment and Health</i> , 2014, 40, 195-202.	3.4	40

#	ARTICLE	IF	CITATIONS
55	Factors associated with first return to work and sick leave durations in workers with common mental disorders. <i>European Journal of Public Health</i> , 2012, 22, 440-445.	0.3	39
56	The impact of low education and poor health on unemployment varies by work life stage. <i>International Journal of Public Health</i> , 2017, 62, 997-1006.	2.3	39
57	Gender and age differences in the recurrence of sickness absence due to common mental disorders: a longitudinal study. <i>BMC Public Health</i> , 2010, 10, 426.	2.9	38
58	Shortened version of the work ability index to identify workers at risk of long-term sickness absence. <i>European Journal of Public Health</i> , 2016, 26, 301-305.	0.3	38
59	Work Adjustments in a Representative Sample of Employees with a Chronic Disease in the Netherlands. <i>Journal of Occupational Rehabilitation</i> , 2013, 23, 200-208.	2.2	37
60	Effects of Job Insecurity From a Workplace Closure Threat on Fatigue and Psychological Distress. <i>Journal of Occupational and Environmental Medicine</i> , 2004, 46, 443-449.	1.7	36
61	Employment status transitions in employees with and without chronic disease in the Netherlands. <i>International Journal of Public Health</i> , 2018, 63, 713-722.	2.3	36
62	Evaluation of the measurement properties of self-reported health-related work-functioning instruments among workers with common mental disorders. <i>Scandinavian Journal of Work, Environment and Health</i> , 2012, 38, 5-18.	3.4	36
63	Predicting the Two-Year Course of Unexplained Fatigue and the Onset of Long-Term Sickness Absence in Fatigued Employees: Results From the Maastricht Cohort Study. <i>Journal of Occupational and Environmental Medicine</i> , 2004, 46, 1041-1047.	1.7	35
64	The fraction of long-term sickness absence attributable to work environmental factors: prospective results from the Danish Work Environment Cohort Study. <i>Occupational and Environmental Medicine</i> , 2007, 64, 487-489.	2.8	35
65	Health-related Work Limitations Among Older Workers – the Role of Flexible Work Arrangements and Organizational Climate. <i>Gerontologist</i> , 2020, 60, 450-459.	3.9	35
66	The presence of a depressive episode predicts lower return to work rate after myocardial infarction. <i>General Hospital Psychiatry</i> , 2014, 36, 363-367.	2.4	34
67	Sleep disturbances and fatigue: independent predictors of sickness absence? A prospective study among 6538 employees. <i>European Journal of Public Health</i> , 2013, 23, 123-128.	0.3	32
68	Impact of depressive symptoms on worklife expectancy: a longitudinal study on Danish employees. <i>Occupational and Environmental Medicine</i> , 2019, 76, 838-844.	2.8	32
69	Return to work among sickness-absent Danish employees: prospective results from the Danish Work Environment Cohort Study/National Register on Social Transfer Payments. <i>International Journal of Rehabilitation Research</i> , 2006, 29, 229-235.	1.3	31
70	Educational level and risk of chronic kidney disease: longitudinal data from the PREVEND study. <i>Nephrology Dialysis Transplantation</i> , 2020, 35, 1211-1218.	0.7	31
71	Course of Depressive Symptoms Following a Workplace Injury: A 12-Month Follow-Up Update. <i>Journal of Occupational Rehabilitation</i> , 2016, 26, 204-215.	2.2	30
72	Work functioning trajectories in cancer patients: Results from the longitudinal Work Life after Cancer (WOLICA) study. <i>International Journal of Cancer</i> , 2017, 141, 1751-1762.	5.1	29

#	ARTICLE	IF	CITATIONS
73	Prevention of recurrent sickness absence among employees with common mental disorders: design of a cluster-randomised controlled trial with cost-benefit and effectiveness evaluation. <i>BMC Public Health</i> , 2010, 10, 132.	2.9	28
74	Physical and mental fatigue as predictors of sickness absence among Norwegian nurses. <i>Research in Nursing and Health</i> , 2013, 36, 453-465.	1.6	28
75	Process evaluation of a problem solving intervention to prevent recurrent sickness absence in workers with common mental disorders. <i>Social Science and Medicine</i> , 2014, 100, 123-132.	3.8	28
76	Cross-national comparisons of sickness absence systems and statistics: towards common indicators. <i>European Journal of Public Health</i> , 2014, 24, 663-666.	0.3	28
77	Are fatigue, depression and anxiety associated with labour market participation among patients diagnosed with haematological malignancies? A prospective study. <i>Psycho-Oncology</i> , 2015, 24, 408-415.	2.3	28
78	Multimorbidity and the Transition Out of Full-Time Paid Employment: A Longitudinal Analysis of the Health and Retirement Study. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2020, 75, 705-715.	3.9	28
79	The prospective association between obesity and major depression in the general population: does single or recurrent episode matter?. <i>BMC Public Health</i> , 2015, 15, 350.	2.9	27
80	A life course perspective on mental health problems, employment, and work outcomes. <i>Scandinavian Journal of Work, Environment and Health</i> , 2017, 43, 316-325.	3.4	27
81	Economic Evaluation of a Problem Solving Intervention to Prevent Recurrent Sickness Absence in Workers with Common Mental Disorders. <i>PLoS ONE</i> , 2013, 8, e71937.	2.5	26
82	Multifaceted intervention for the prevention and management of musculoskeletal pain in nursing staff: Results of a cluster randomized controlled trial. <i>PLoS ONE</i> , 2019, 14, e0225198.	2.5	26
83	Workers with health problems: three perspectives on functioning at work. <i>Disability and Rehabilitation</i> , 2013, 35, 20-26.	1.8	25
84	The development and validation of two prediction models to identify employees at risk of high sickness absence. <i>European Journal of Public Health</i> , 2013, 23, 128-133.	0.3	25
85	Employment Trajectories After Spinal Cord Injury: Results From a 5-Year Prospective Cohort Study. <i>Archives of Physical Medicine and Rehabilitation</i> , 2014, 95, 2040-2046.	0.9	25
86	Mental health among university students: The associations of effort-reward imbalance and overcommitment with psychological distress. <i>Journal of Affective Disorders</i> , 2021, 282, 953-961.	4.1	25
87	The cross-cultural adaptation of the Work Role Functioning Questionnaire to Dutch. <i>Work</i> , 2012, 43, 203-210.	1.1	24
88	Added Value of Screening for CKD among the Elderly or Persons with Low Socioeconomic Status. <i>Clinical Journal of the American Society of Nephrology: CJASN</i> , 2015, 10, 562-570.	4.5	24
89	The Work Role Functioning Questionnaire v2.0 Showed Consistent Factor Structure Across Six Working Samples. <i>Journal of Occupational Rehabilitation</i> , 2018, 28, 465-474.	2.2	24
90	Investigating young adults' mental health and early working life trajectories from a life course perspective: the role of transitions. <i>Journal of Epidemiology and Community Health</i> , 2020, 74, 179-181.	3.7	24

#	ARTICLE	IF	CITATIONS
91	Predictors of return to work 5 years after discharge for wheelchair-dependent, individuals with spinal cord, injury. <i>Journal of Rehabilitation Medicine</i> , 2014, 46, 984-990.	1.1	23
92	Work, eat and sleep: towards a healthy ageing at work program offshore. <i>BMC Public Health</i> , 2015, 16, 134.	2.9	22
93	Development and validation of a prediction model for long-term sickness absence based on occupational health survey variables. <i>Disability and Rehabilitation</i> , 2018, 40, 168-175.	1.8	22
94	Fragmentation in the future of work: A horizon scan examining the impact of the changing nature of work on workers experiencing vulnerability. <i>American Journal of Industrial Medicine</i> , 2021, 64, 649-666.	2.1	22
95	Functional health decline before and after retirement: A longitudinal analysis of the Health and Retirement Study. <i>Social Science and Medicine</i> , 2016, 170, 26-34.	3.8	21
96	Implementing sensor technology applications for workplace health promotion: a needs assessment among workers with physically demanding work. <i>BMC Public Health</i> , 2019, 19, 1100.	2.9	21
97	Sickness benefit claims due to mental disorders in Brazil: associations in a population-based study. <i>Cadernos De Saude Publica</i> , 2012, 28, 1854-1866.	1.0	20
98	Overweight, obesity and work functioning: The role of working-time arrangements. <i>Applied Ergonomics</i> , 2016, 52, 128-134.	3.1	20
99	SES, Chronic Kidney Disease, and Race in the U.S.: A Systematic Review and Meta-analysis. <i>American Journal of Preventive Medicine</i> , 2017, 53, 730-739.	3.0	20
100	Investigating daily fatigue scores during two-week offshore day shifts. <i>Applied Ergonomics</i> , 2018, 71, 87-94.	3.1	20
101	Perceived stress and sickness absence: a prospective study of 17,795 employees in Denmark. <i>International Archives of Occupational and Environmental Health</i> , 2019, 92, 821-828.	2.3	20
102	Return to work among employees with common mental disorders: Study design and baseline findings from a mixed-method follow-up study. <i>Scandinavian Journal of Public Health</i> , 2010, 38, 864-872.	2.3	19
103	Recovery and recurrence of mental sickness absence among production and office workers in the industrial sector. <i>European Journal of Public Health</i> , 2015, 25, 419-423.	0.3	19
104	Presenteeism in a Dutch hand eczema population—a cross-sectional survey. <i>Contact Dermatitis</i> , 2018, 79, 10-19.	1.4	19
105	Combining informal care and paid work: The use of work arrangements by working adult-child caregivers in the Netherlands. <i>Health and Social Care in the Community</i> , 2018, 26, e122-e131.	1.6	19
106	Quality of life of obstructive sleep apnoea patients receiving continuous positive airway pressure treatment: A systematic review and meta-analysis. <i>Heart and Lung: Journal of Acute and Critical Care</i> , 2020, 49, 10-24.	1.6	19
107	Mental health symptoms as prognostic risk markers of all-cause and psychiatric sickness absence in office workers. <i>European Journal of Public Health</i> , 2014, 24, 101-105.	0.3	18
108	Meaning and components of quality of life among individuals with spinal cord injury in Yogyakarta Province, Indonesia. <i>Disability and Rehabilitation</i> , 2018, 40, 1183-1191.	1.8	18
