#	ARTICLE	IF	CITATIONS
1	Impact of heat treatment, casein/whey protein ratio and protein concentration on rheological properties of milk protein concentrates used for cheese production. <i>Journal of Food Engineering</i> , 2022, 312, 110745.	2.7	16
2	Freeze-thaw stability of emulsions made with native and enzymatically modified egg yolk fractions. <i>Food Hydrocolloids</i> , 2022, 123, 107109.	5.6	7
3	Influence of pH and ionic strength on the thermal gelation behaviour of pea protein. <i>Food Hydrocolloids</i> , 2022, 123, 106903.	5.6	53
4	Sustainable Processing: Energy Conservation in Dairy Processing. , 2022, , 836-845.		0
5	Understanding the fouling mitigation mechanisms of alternating crossflow during cell-protein fractionation by microfiltration. <i>Food and Bioproducts Processing</i> , 2022, 131, 136-143.	1.8	5
6	Effect of flow channel number in multi-channel tubular ceramic microfiltration membranes on flux and small protein transmission in milk protein fractionation. <i>Journal of Membrane Science</i> , 2022, 644, 120153.	4.1	5
7	Hydro- and aerogels from ethanolic potato and whey protein solutions: Influence of temperature and ethanol concentration on viscoelastic properties, protein interactions, and microstructure. <i>Food Hydrocolloids</i> , 2022, 125, 107424.	5.6	11
8	Structure-property relations of β -lactoglobulin/ β -carrageenan mixtures in aqueous foam. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2022, 640, 128267.	2.3	10
9	Sensomics-Assisted Aroma Decoding of Pea Protein Isolates (<i>Pisum sativum</i> L.). <i>Foods</i> , 2022, 11, 412.	1.9	13
10	Influence of extraction method on the aggregation of pea protein during thermo-mechanical treatment. <i>Food Hydrocolloids</i> , 2022, 127, 107514.	5.6	4
11	Preservation by lyophilization of a human intestinal microbiota: influence of the cultivation pH on the drying outcome and re-establishment ability. <i>Microbial Biotechnology</i> , 2022, 15, 886-900.	2.0	2
12	Critical assessment of methods for measurement of temperature profiles and heat load history in microwave heating processes – A review. <i>Comprehensive Reviews in Food Science and Food Safety</i> , 2022, 21, 2118-2148.	5.9	9
13	Compositional analysis of dairy side streams and assessment of their applicability as diafiltration media. <i>International Journal of Dairy Technology</i> , 2022, 75, 479-489.	1.3	2
14	Concentration, purification and quantification of milk protein residues following cleaning processes using a combination of SPE and RP-HPLC. <i>MethodsX</i> , 2022, 9, 101695.	0.7	8
15	Compositional changes of casein micelles induced by calcium or chelating addition at threefold and natural casein concentration. <i>International Dairy Journal</i> , 2022, 130, 105365.	1.5	7
16	Dilatational rheology-property relationships of β -lactoglobulin /high methoxyl pectin mixtures in aqueous foams. <i>Food Hydrocolloids</i> , 2022, 130, 107683.	5.6	9
17	Influence of Pea and Potato Protein Microparticles on Texture and Sensory Properties in a Fat-Reduced Model Milk Dessert. <i>ACS Food Science & Technology</i> , 2022, 2, 169-179.	1.3	8
18	Transcriptome and fatty-acid signatures of adipocyte hypertrophy and its non-invasive MR-based characterization in human adipose tissue. <i>EBioMedicine</i> , 2022, 79, 104020.	2.7	16

#	ARTICLE	IF	CITATIONS
19	Heat-induced aggregation kinetics of potato protein " Investigated by chromatography, calorimetry, and light scattering. <i>Food Chemistry</i> , 2022, 389, 133114.	4.2	5
20	Determination of Compressibility and Relaxation Behavior of Yeast Cell Sediments by Analytical Centrifugation and Comparison with Deposit Formation on Membrane Surfaces. <i>Membranes</i> , 2022, 12, 603.	1.4	1
21	Effect of low-frequency pulsatile crossflow microfiltration on flux and protein transmission in milk protein fractionation. <i>Separation Science and Technology</i> , 2021, 56, 1112-1127.	1.3	14
22	Towards recombinantly produced milk proteins: Physicochemical and emulsifying properties of engineered whey protein beta-lactoglobulin variants. <i>Food Hydrocolloids</i> , 2021, 110, 106132.	5.6	28
23	Microstructures of potato protein hydrogels and aerogels produced by thermal crosslinking and supercritical drying. <i>Food Hydrocolloids</i> , 2021, 112, 106305.	5.6	33
24	Impact of hollow fiber membrane length on the milk protein fractionation. <i>Journal of Membrane Science</i> , 2021, 620, 118834.	4.1	9
25	Importance of process conditions in the displacement of protein concentrates from spiral-wound membrane modules. <i>Food and Bioprocess Technology</i> , 2021, 126, 51-61.	1.8	2
26	Flow-through enzymatic reactors using polymer monoliths: From motivation to application. <i>Electrophoresis</i> , 2021, 42, 2599-2614.	1.3	7
27	Separation of aggregated β -lactoglobulin with optimised yield in a decanter centrifuge. <i>International Dairy Journal</i> , 2021, 114, 104918.	1.5	5
28	Effects of selective layer properties of ceramic multi-channel microfiltration membranes on the milk protein fractionation. <i>Separation and Purification Technology</i> , 2021, 259, 118050.	3.9	11
29	Quantification of protein-protein interactions in highly denatured whey and potato protein gels. <i>MethodsX</i> , 2021, 8, 101243.	0.7	17
30	Comparative Assessment of Tubular Ceramic, Spiral Wound, and Hollow Fiber Membrane Microfiltration Module Systems for Milk Protein Fractionation. <i>Foods</i> , 2021, 10, 692.	1.9	10
31	Model representation of flow patterns in the displacement of non-Newtonian products from spiral-wound membranes. <i>Journal of Membrane Science</i> , 2021, 624, 118983.	4.1	0
32	Effect of Temperature, Added Calcium and pH on the Equilibrium of Caseins between Micellar State and Milk Serum. <i>Foods</i> , 2021, 10, 822.	1.9	15
33	Influence of pH, Temperature and Protease Inhibitors on Kinetics and Mechanism of Thermally Induced Aggregation of Potato Proteins. <i>Foods</i> , 2021, 10, 796.	1.9	23
34	Interactions of sugar alcohol, di-saccharides and polysaccharides with polysorbate 80 as surfactant in the stabilization of foams. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2021, 616, 126349.	2.3	7
35	Foam Structure Preservation during Microwave-Assisted Vacuum Drying: Significance of Interfacial and Dielectric Properties of the Bulk Phase of Foams from Polysorbate 80 " Maltodextrin Dispersions. <i>Foods</i> , 2021, 10, 1163.	1.9	4
36	Effects of conventional processing methods on whey proteins in production of native whey powder. <i>International Dairy Journal</i> , 2021, 116, 104959.	1.5	9

#	ARTICLE	IF	CITATIONS
37	Three-dimensional numerical investigation of the displacement of shear-thinning milk protein concentrates in spacer-filled channel. <i>Journal of Food Engineering</i> , 2021, 296, 110459.	2.7	3
38	Establishment of an In Vitro System of the Human Intestinal Microbiota: Effect of Cultivation Conditions and Influence of Three Donor Stool Samples. <i>Microorganisms</i> , 2021, 9, 1049.	1.6	5
39	Effect of Pre-Heating Prior to Low Temperature 0.1 μm -Microfiltration of Milk on Casein/Whey Protein Fractionation. <i>Foods</i> , 2021, 10, 1090.	1.9	3
40	Effect of heating by solid-state microwave technology at fixed frequencies or by frequency sweep loops on heating profiles in model food samples. <i>Food and Bioprocess Processing</i> , 2021, 127, 328-337.	1.8	24
41	Sensomics-Assisted Flavor Decoding of Dairy Model Systems and Flavor Reconstitution Experiments. <i>Journal of Agricultural and Food Chemistry</i> , 2021, 69, 6588-6600.	2.4	12
42	Correlation between Physico-Chemical Characteristics of Particulated β -Lactoglobulin and Its Behavior at Air/Water and Oil/Water Interfaces. <i>Foods</i> , 2021, 10, 1426.	1.9	4
43	Comparative Assessment of Thermal Aggregation of Whey, Potato, and Pea Protein under Shear Stress for Microparticulation. <i>ACS Food Science & Technology</i> , 2021, 1, 975-985.	1.3	12
44	Alteration of Intestinal Microbiome of <i>Clostridioides difficile</i> -Infected Hamsters during the Treatment with Specific Cow Antibodies. <i>Antibiotics</i> , 2021, 10, 724.	1.5	1
45	Functionality of MC88- and MPC85-Enriched Skim Milk: Impact of Shear Conditions in Rotor/Stator Systems and High-Pressure Homogenizers on Powder Solubility and Rennet Gelation Behavior. <i>Foods</i> , 2021, 10, 1361.	1.9	5
46	A novel approach for characterisation of stabilising bonds in milk protein deposit layers on microfiltration membranes. <i>International Dairy Journal</i> , 2021, 118, 105044.	1.5	4
47	Pulsatile crossflow improves microfiltration fractionation of cells and proteins. <i>Journal of Membrane Science</i> , 2021, 629, 119295.	4.1	17
48	Influence of pH and calcium concentration on milk protein fractionation by 0.1 μm microfiltration at low temperatures. <i>International Dairy Journal</i> , 2021, 118, 105048.	1.5	7
49	Cold-Renneted Milk Powders for Cheese Production: Impact of Casein/Whey Protein Ratio and Heat on the Gelling Behavior of Reconstituted Rennet Gels and on the Survival Rate of Integrated Lactic Acid Bacteria. <i>Foods</i> , 2021, 10, 1606.	1.9	6
50	Viscoelasticity and Protein Interactions of Hybrid Gels Produced from Potato and Whey Protein Isolates. <i>ACS Food Science & Technology</i> , 2021, 1, 1304-1315.	1.3	8
51	Effect of Vertical and Horizontal Sample Orientations on Uniformity of Microwave Heating Produced by Magnetron and Solid-State Generators. <i>Foods</i> , 2021, 10, 1986.	1.9	4
52	Effect of pentasodium triphosphate concentration on physicochemical properties, microstructure, and formation of casein fibrils in model processed cheese. <i>Journal of Dairy Science</i> , 2021, 104, 11442-11456.	1.4	2
53	Stability of Foams in Vacuum Drying Processes. Effects of Interactions between Sugars, Proteins, and Surfactants on Foam Stability and Dried Foam Properties. <i>Foods</i> , 2021, 10, 1876.	1.9	7
54	Influence of Cultivation pH on Composition, Diversity, and Metabolic Production in an In Vitro Human Intestinal Microbiota. <i>Fermentation</i> , 2021, 7, 156.	1.4	5

#	ARTICLE	IF	CITATIONS
55	On the effect of flow reversal during crossflow microfiltration of a cell and protein mixture. Food and Bioproducts Processing, 2021, 129, 24-33.	1.8	9
56	Submerged Bioreactor Production of Geobacillus stearothermophilus ATCC 7953 Spores for Use as Bioindicators to Validate Hydrogen Peroxide Inactivation Processes. Methods and Protocols, 2021, 4, 63.	0.9	4
57	Effect of changes in ionic composition induced by different diafiltration media on deposited layer properties and separation efficiency in milk protein fractionation by microfiltration. International Dairy Journal, 2021, 120, 105089.	1.5	8
58	Molecular Analytical Assessment of Thermally Precipitated $\hat{\pm}$ -Lactalbumin after Resolubilization. Foods, 2021, 10, 2231.	1.9	2
59	Mechanisms of structure formation underlying the creaming reaction in a processed cheese model system as revealed by light and transmission electron microscopy. Journal of Dairy Science, 2021, 104, 9505-9520.	1.4	7
60	Influence of interfacial characteristics and dielectric properties on foam structure preservation during microwave-assisted vacuum drying of whey protein isolate-maltodextrin dispersions. Journal of Food Engineering, 2021, 308, 110691.	2.7	6
61	Effect of sporulation conditions following solid-state cultivation on the resistance of Geobacillus stearothermophilus spores for use as bioindicators testing inactivation by H ₂ O ₂ . LWT - Food Science and Technology, 2021, 151, 112078.	2.5	5
62	Impact of feed concentration on milk protein fractionation by hollow fiber microfiltration membranes in diafiltration mode. Separation and Purification Technology, 2021, 276, 119278.	3.9	3
63	Pea protein microparticulation using extrusion cooking: Influence of extrusion parameters and drying on microparticle characteristics and sensory by application in a model milk dessert. Innovative Food Science and Emerging Technologies, 2021, 74, 102851.	2.7	8
64	Technofunctionality of \hat{I}^2 -Lg and \hat{I}^2 -Lg Nanosized Particles at Air/Water and Oil/Water Interfaces as a Function of Structural and Surface Characteristics. ACS Food Science & Technology, 2021, 1, 2152-2161.	1.3	0
65	Continuous centrifugal separation of selectively precipitated $\hat{\pm}$ -lactalbumin. International Dairy Journal, 2020, 101, 104566.	1.5	14
66	Storage stability of dried raspberry foam as a snack product: Effect of foam structure and microwave-assisted freeze drying on the stability of plant bioactives and ascorbic acid. Journal of Food Engineering, 2020, 270, 109779.	2.7	28
67	Semi-quantitative, spatially resolved analysis of protein deposit layers on membrane surfaces. MethodsX, 2020, 7, 100780.	0.7	3
68	Milk protein fractionation by spiral-wound microfiltration membranes in diafiltration mode - Influence of feed protein concentration and composition on the filtration performance. International Dairy Journal, 2020, 102, 104606.	1.5	20
69	In-vitro-digestion and swelling kinetics of whey protein, egg white protein and sodium caseinate aerogels. Food Hydrocolloids, 2020, 101, 105534.	5.6	41
70	Kinetics of denaturation and aggregation of highly concentrated \hat{I}^2 -Lactoglobulin under defined thermomechanical treatment. Journal of Food Engineering, 2020, 274, 109825.	2.7	15
71	Impact of temperature and high pressure homogenization on the solubility and rheological behavior of reconstituted dairy powders of different composition. Powder Technology, 2020, 376, 285-295.	2.1	12
72	Effect of Ethanol on the Textural Properties of Whey Protein and Egg White Protein Hydrogels during Water-Ethanol Solvent Exchange. Molecules, 2020, 25, 4417.	1.7	10

#	ARTICLE	IF	CITATIONS
73	Water Vapor Pathways during Freeze-Drying of Foamed Product Matrices Stabilized by Maltodextrin at Different Concentrations. <i>Processes</i> , 2020, 8, 1463.	1.3	3
74	Assessment of uniformity of microwave-based heating profiles generated by solid-state and magnetron systems using various shapes of test samples. <i>Food and Bioproducts Processing</i> , 2020, 124, 121-130.	1.8	22
75	Effect of Sporulation Conditions Following Submerged Cultivation on the Resistance of <i>Bacillus atrophaeus</i> Spores against Inactivation by H ₂ O ₂ . <i>Molecules</i> , 2020, 25, 2985.	1.7	9
76	$\hat{\Gamma}^2$ -Lactoglobulin Adsorption Layers at the Water/Air Surface: 4. Impact on the Stability of Foam Films and Foams. <i>Minerals (Basel, Switzerland)</i> , 2020, 10, 636.	0.8	7
77	Invited review: Heat stability of milk and concentrated milk: Past, present, and future research objectives. <i>Journal of Dairy Science</i> , 2020, 103, 10986-11007.	1.4	55
78	Impact of cultivation strategy, freeze-drying process, and storage conditions on survival, membrane integrity, and inactivation kinetics of <i>Bifidobacterium longum</i> . <i>Folia Microbiologica</i> , 2020, 65, 1039-1050.	1.1	16
79	Processing of raspberries to dried fruit foam: impact on major odorants. <i>European Food Research and Technology</i> , 2020, 246, 2537-2548.	1.6	6
80	Influence of Thermomechanical Treatment and Ratio of $\hat{\Gamma}^2$ -Lactoglobulin and $\hat{\Gamma}^{\pm}$ -Lactalbumin on the Denaturation and Aggregation of Highly Concentrated Whey Protein Systems. <i>Foods</i> , 2020, 9, 1196.	1.9	5
81	Effect of Temperature-Dependent Bacterial Growth during Milk Protein Fractionation by Means of 0.1 $\hat{\text{A}}\mu\text{M}$ Microfiltration on the Length of Possible Production Cycle Times. <i>Membranes</i> , 2020, 10, 326.	1.4	15
82	RP-HPLC method for simultaneous quantification of free and total thiol groups in native and heat aggregated whey proteins. <i>MethodsX</i> , 2020, 7, 101112.	0.7	6
83	Milk protein fractionation by custom-made prototypes of spiral-wound microfiltration membranes operated at extreme crossflow velocities. <i>Journal of Membrane Science</i> , 2020, 605, 118110.	4.1	11
84	Assessment of heating profiles in model food systems heated by different microwave generators: Solid-state (semiconductor) versus traditional magnetron technology. <i>Innovative Food Science and Emerging Technologies</i> , 2020, 63, 102376.	2.7	28
85	On the reversibility of deposit formation in low temperature milk microfiltration with ceramic membranes depending on mode of adjustment of transmembrane pressure and wall shear stress. <i>Separation and Purification Technology</i> , 2020, 247, 116962.	3.9	15
86	Synchrotron micro-CT for studying coarsening in milk protein-stabilized foams in situ. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2020, 601, 124832.	2.3	6
87	Impact of different aqueous phases on casein micelles: Kinetics of physicochemical changes under variation of water hardness and diafiltration conditions. <i>International Dairy Journal</i> , 2020, 109, 104776.	1.5	10
88	Tryptic hydrolysis of $\hat{\Gamma}^2$ -lactoglobulin: A generic approach to describe the hydrolysis kinetic and release of peptides. <i>International Dairy Journal</i> , 2020, 105, 104666.	1.5	7
89	Effect of thermomechanical treatment on the aggregation behaviour and colloidal functionality of $\hat{\Gamma}^2$ -Lactoglobulin at high concentrations. <i>International Dairy Journal</i> , 2020, 104, 104654.	1.5	8
90	A methodological framework for comparing fractionated and non-fractionated products in life cycle assessments: The case of milk concentrates. <i>Journal of Cleaner Production</i> , 2020, 257, 120478.	4.6	4

#	ARTICLE	IF	CITATIONS
91	Effects of conventional and nonconventional drying on the stability of <i>Bifidobacterium animalis</i> subsp. <i>lactis</i> INL1. <i>International Journal of Dairy Technology</i> , 2020, 73, 625-633.	1.3	3
92	Surface and foaming properties of potato proteins: Impact of protein concentration, pH value and ionic strength. <i>Food Hydrocolloids</i> , 2020, 107, 105981.	5.6	40
93	Influence of Spacer Design and Module Geometry on the Filtration Performance during Skim Milk Microfiltration with Flat Sheet and Spiral-Wound Membranes. <i>Membranes</i> , 2020, 10, 57.	1.4	9
94	Structural Characterisation of Deposit Layer during Milk Protein Microfiltration by Means of In-Situ MRI and Compositional Analysis. <i>Membranes</i> , 2020, 10, 59.	1.4	9
95	Influence of extraction conditions on the conformational alteration of pea protein extracted from pea flour. <i>Food Hydrocolloids</i> , 2020, 107, 105949.	5.6	102
96	Spore inactivation on solid surfaces by vaporized hydrogen peroxide—Influence of carrier material surface properties. <i>Journal of Food Science</i> , 2020, 85, 1536-1541.	1.5	5
97	Impact of hydrocolloid addition and microwave processing condition on drying behavior of foamed raspberry puree. <i>Journal of Food Engineering</i> , 2019, 240, 83-91.	2.7	32
98	Novel technique for measurement of coating layer thickness of fine and porous particles using focused ion beam. <i>Particuology</i> , 2019, 42, 190-198.	2.0	12
99	Data concerning the fractionation of individual whey proteins and casein micelles by microfiltration with ceramic gradient membranes. <i>Data in Brief</i> , 2019, 25, 104102.	0.5	5
100	The Concept of Microwave Foam Drying Under Vacuum: A Gentle Preservation Method for Sensitive Biological Material. <i>Journal of Food Science</i> , 2019, 84, 1682-1691.	1.5	17
101	Technical Concepts for the Investigation of Spatial Effects in Spiral-Wound Microfiltration Membranes. <i>Membranes</i> , 2019, 9, 80.	1.4	16
102	Interrelations between consecutive process steps: Using the example of the displacement of dispersions subsequently to the filtration. <i>Journal of Food Engineering</i> , 2019, 263, 155-164.	2.7	4
103	Impact of oil type and pH value on oil-in-water emulsions stabilized by egg yolk granules. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2019, 581, 123788.	2.3	28
104	Investigation on the spatial filtration performance in spiral-wound membranes—Influence and length-dependent adjustment of the transmembrane pressure. <i>Journal of Membrane Science</i> , 2019, 591, 117311.	4.1	11
105	Ultra- and Microfiltration in Dairy Technology. , 2019, , 1-28.		5
106	Effect of hydrocolloid addition and microwave-assisted freeze drying on the characteristics of foamed raspberry puree. <i>Innovative Food Science and Emerging Technologies</i> , 2019, 56, 102183.	2.7	39
107	Investigation on the influence of high protein concentrations on the thermal reaction behaviour of β -lactoglobulin by experimental and numerical analyses. <i>International Dairy Journal</i> , 2019, 97, 99-110.	1.5	17
108	Milk Protein Fractionation by Means of Spiral-Wound Microfiltration Membranes: Effect of the Pressure Adjustment Mode and Temperature on Flux and Protein Permeation. <i>Foods</i> , 2019, 8, 180.	1.9	39
