#	ARTICLE	IF	CITATIONS
1	Evidence of large systematic differences between countries in assigning ischaemic heart disease deaths to myocardial infarction: the contrasting examples of Russia and Norway. <i>International Journal of Epidemiology</i> , 2022, 50, 2082-2090.	0.9	12
2	Factors associated with excess all-cause mortality in the first wave of the COVID-19 pandemic in the UK: A time series analysis using the Clinical Practice Research Datalink. <i>PLoS Medicine</i> , 2022, 19, e1003870.	3.9	12
3	Seroprevalence of SARS-Cov-2 Antibodies in Adults, Arkhangelsk, Russia. <i>Emerging Infectious Diseases</i> , 2022, 28, 463-465.	2.0	3
4	Mortality among Care Home Residents in England during the first and second waves of the COVID-19 pandemic: an observational study of 4.3 million adults over the age of 65. <i>Lancet Regional Health - Europe, The</i> , 2022, 14, 100295.	3.0	38
5	Excess mortality in Russia and its regions compared to high income countries: An analysis of monthly series of 2020. <i>SSM - Population Health</i> , 2022, 17, 101006.	1.3	16
6	Comparison of methods for predicting COVID-19-related death in the general population using the OpenSAFELY platform. <i>Diagnostic and Prognostic Research</i> , 2022, 6, 6.	0.8	2
7	Deep neural networks reveal novel sex-specific electrocardiographic features relevant for mortality risk. <i>European Heart Journal Digital Health</i> , 2022, 3, 245-254.	0.7	6
8	Seroprevalence of antibodies against SARS-CoV-2 in the adult population during the pre-vaccination period, Norway, winter 2020/21. <i>Eurosurveillance</i> , 2022, 27, .	3.9	13
9	The Russian invasion of Ukraine and its public health consequences. <i>Lancet Regional Health - Europe, The</i> , 2022, 15, 100358.	3.0	29
10	Nitrate and nitrite contamination in drinking water and cancer risk: A systematic review with meta-analysis. <i>Environmental Research</i> , 2022, 210, 112988.	3.7	107
11	Socioeconomic inequalities in physiological risk biomarkers and the role of lifestyles among Russians aged 35-69 years. <i>International Journal for Equity in Health</i> , 2022, 21, 51.	1.5	3
12	Comparing prevalence of chronic kidney disease and its risk factors between population-based surveys in Russia and Norway. <i>BMC Nephrology</i> , 2022, 23, 145.	0.8	0
13	What should be the baseline when calculating excess mortality? New approaches suggest that we have underestimated the impact of the COVID-19 pandemic and previous winter peaks. <i>SSM - Population Health</i> , 2022, 18, 101118.	1.3	16
14	What online searches tell us about public interest and potential impact on behaviour in response to minimum unit pricing of alcohol in Scotland. <i>Addiction</i> , 2021, 116, 2008-2015.	1.7	0
15	What factors explain the much higher diabetes prevalence in Russia compared with Norway? Major sex differences in the contribution of adiposity. <i>BMJ Open Diabetes Research and Care</i> , 2021, 9, e002021.	1.2	4
16	External validation of a deep learning electrocardiogram algorithm to detect ventricular dysfunction. <i>International Journal of Cardiology</i> , 2021, 329, 130-135.	0.8	36
17	Heavy alcohol drinking and subclinical echocardiographic abnormalities of structure and function. <i>Open Heart</i> , 2021, 8, e001457.	0.9	1
18	Socio-demographic, behavioural and psycho-social factors associated with depression in two Russian cities. <i>Journal of Affective Disorders</i> , 2021, 290, 202-210.	2.0	6

#	ARTICLE	IF	CITATIONS
19	The short-term mortality fluctuation data series, monitoring mortality shocks across time and space. <i>Scientific Data</i> , 2021, 8, 235.	2.4	29
20	Where Do People Live Longer in Russia in the 21st Century? Life Expectancy across Urban and Rural areas. <i>Population and Development Review</i> , 2021, 47, 1049-1074.	1.2	3
21	Between-study differences in grip strength: a comparison of Norwegian and Russian adults aged 40-69 years. <i>Journal of Cachexia, Sarcopenia and Muscle</i> , 2021, 12, 2091-2100.	2.9	5
22	Widening life expectancy inequalities across small areas of England. <i>Lancet Public Health</i> , The, 2021, 6, e783-e784.	4.7	1
23	Long-term trends in blood pressure and hypertension in Russia: an analysis of data from 14 health surveys conducted in 1975-2017. <i>BMC Public Health</i> , 2021, 21, 2226.	1.2	3
24	Hospital admissions and mortality in the 15 years after a first-time hospital contact with an alcohol problem: a prospective cohort study using the entire Danish population. <i>International Journal of Epidemiology</i> , 2020, 49, 94-102.	0.9	13
25	Evidence for a Direct Harmful Effect of Alcohol on Myocardial Health: A Large Cross-sectional Study of Consumption Patterns and Cardiovascular Disease Risk Biomarkers From Northwest Russia, 2015 to 2017. <i>Journal of the American Heart Association</i> , 2020, 9, e014491.	1.6	22
26	Global myocardial longitudinal strain in a general population's associations with blood pressure and subclinical heart failure: The TromsÅ Study. <i>International Journal of Cardiovascular Imaging</i> , 2020, 36, 459-470.	0.7	11
27	Prevalence of symptoms, ever having received a diagnosis and treatment of depression and anxiety, and associations with health service use amongst the general population in two Russian cities. <i>BMC Psychiatry</i> , 2020, 20, 537.	1.1	6
28	Quantifying the contribution of established risk factors to cardiovascular mortality differences between Russia and Norway. <i>Scientific Reports</i> , 2020, 10, 20796.	1.6	3
29	Impact of alcohol on mortality in Eastern Europe: Trends and policy responses. <i>Drug and Alcohol Review</i> , 2020, 39, 785-789.	1.1	5
30	Primary care use and cardiovascular disease risk in Russian 40-69 year olds: a cross-sectional study. <i>Journal of Epidemiology and Community Health</i> , 2020, 74, jech-2019-213549.	2.0	7
31	Why does Russia have such high cardiovascular mortality rates? Comparisons of blood-based biomarkers with Norway implicate non-ischaemic cardiac damage. <i>Journal of Epidemiology and Community Health</i> , 2020, 74, jech-2020-213885.	2.0	10
32	Pharmacological management of modifiable cardiovascular risk factors (blood pressure and lipids) following diagnosis of myocardial infarction, stroke and diabetes: comparison between population-based studies in Russia and Norway. <i>BMC Cardiovascular Disorders</i> , 2020, 20, 234.	0.7	0
33	Effect of adiposity on differences in carotid plaque burden in studies conducted in Norway and Russia: a cross-sectional analysis of two populations at very different risk of cardiovascular mortality. <i>BMJ Open</i> , 2020, 10, e036583.	0.8	3
34	Management of patients with acute ST-segment elevation myocardial infarction in Russian hospitals adheres to international guidelines. <i>Open Heart</i> , 2020, 7, e001134.	0.9	9
35	Untreated hypertension in Russian 35-69 year olds - a cross-sectional study. <i>PLoS ONE</i> , 2020, 15, e0233801.	1.1	10
36	Self-reported health as a predictor of mortality: A cohort study of its relation to other health measurements and observation time. <i>Scientific Reports</i> , 2020, 10, 4886.	1.6	105

#	ARTICLE	IF	CITATIONS
37	The association between anthropometric measures of adiposity and the progression of carotid atherosclerosis. <i>BMC Cardiovascular Disorders</i> , 2020, 20, 138.	0.7	8
38	Uncontrolled and apparent treatment resistant hypertension: a cross-sectional study of Russian and Norwegian 40-69-year olds. <i>BMC Cardiovascular Disorders</i> , 2020, 20, 135.	0.7	12
39	The changing relation between alcohol and life expectancy in Russia in 1965-2017. <i>Drug and Alcohol Review</i> , 2020, 39, 790-796.	1.1	19
40	COVID-19: a need for real-time monitoring of weekly excess deaths. <i>Lancet</i> , The, 2020, 395, e81.	6.3	173
41	Time trends in smoking in Russia in the light of recent tobacco control measures: synthesis of evidence from multiple sources. <i>BMC Public Health</i> , 2020, 20, 378.	1.2	27
42	Untreated hypertension in Russian 35-69 year olds - a cross-sectional study. , 2020, 15, e0233801.		0
43	Untreated hypertension in Russian 35-69 year olds - a cross-sectional study. , 2020, 15, e0233801.		0
44	Untreated hypertension in Russian 35-69 year olds - a cross-sectional study. , 2020, 15, e0233801.		0
45	Untreated hypertension in Russian 35-69 year olds - a cross-sectional study. , 2020, 15, e0233801.		0
46	Low Maternal Capital Predicts Life History Trade-Offs in Daughters: Why Adverse Outcomes Cluster in Individuals. <i>Frontiers in Public Health</i> , 2019, 7, 206.	1.3	27
47	The prevalence of wholly attributable alcohol conditions in the United Kingdom hospital system: a systematic review, meta-analysis and meta-regression. <i>Addiction</i> , 2019, 114, 1726-1737.	1.7	22
48	Adherence to antihypertensive medication in Russia: a scoping review of studies on levels, determinants and intervention strategies published between 2000 and 2017. <i>Archives of Public Health</i> , 2019, 77, 43.	1.0	14
49	Trends in life expectancy and age-specific mortality in England and Wales, 1970-2016, in comparison with a set of 22 high-income countries: an analysis of vital statistics data. <i>Lancet Public Health</i> , The, 2019, 4, e575-e582.	4.7	66
50	Left atrial diameter, left ventricle filling indices, and association with all-cause mortality: Results from the population-based TromsÅ Study. <i>Echocardiography</i> , 2019, 36, 439-450.	0.3	12
51	Reflection on modern methods: calculating a sample size for a repeatability sub-study to correct for measurement error in a single continuous exposure. <i>International Journal of Epidemiology</i> , 2019, 48, 1721-1726.	0.9	6
52	Patterns in the relationship between life expectancy and gross domestic product in Russia in 2005-15: a cross-sectional analysis. <i>Lancet Public Health</i> , The, 2019, 4, e181-e188.	4.7	37
53	A Changeable Relation Between Alcohol and Life Expectancy in Russia. <i>Journal of Studies on Alcohol and Drugs</i> , 2019, 80, 501-502.	0.6	5
54	Availability and Affordability of Medicines for the Treatment of Cardiovascular Diseases in Pharmacies in Six Regions of the Russian Federation. <i>Rational Pharmacotherapy in Cardiology</i> , 2019, 14, 804-815.	0.3	7

#	ARTICLE	IF	CITATIONS
55	Adiposity in middle and old age and risk of death from dementia: 40-year follow-up of 19,000 men in the Whitehall study. <i>Age and Ageing</i> , 2019, 48, 247-253.	0.7	10
56	Number of hospital contacts with alcohol problems predicts later risk of alcoholic liver cirrhosis. <i>Scandinavian Journal of Public Health</i> , 2019, 47, 417-419.	1.2	4
57	A measure of alcohol consumption in late adolescence associated with liver disease after 39 years of follow-up is insufficient to guide alcohol safe limits. <i>Journal of Hepatology</i> , 2018, 69, 251-252.	1.8	2
58	The contribution of obesity to carotid atherosclerotic plaque burden in a general population sample in Norway: The TromsÅ Study. <i>Atherosclerosis</i> , 2018, 273, 15-20.	0.4	9
59	Risk thresholds for alcohol consumption: combined analysis of individual-participant data for 599 912 current drinkers in 83 prospective studies. <i>Lancet</i> , 2018, 391, 1513-1523.	6.3	858
60	Association of BMI with overall and cause-specific mortality: a population-based cohort study of 3.6 million adults in the UK. <i>Lancet Diabetes and Endocrinology</i> , 2018, 6, 944-953.	5.5	665
61	Hospital Stage of Myocardial Infarction Treatment in 13 Regions of Russian Federation by Results of the International Research. <i>Rational Pharmacotherapy in Cardiology</i> , 2018, 14, 474-487.	0.3	6
62	Reply to: "Anthropometric measures in the risk assessment of obese individuals". <i>Atherosclerosis</i> , 2018, 275, 449.	0.4	0
63	Sex-specific relevance of diabetes to occlusive vascular and other mortality: a collaborative meta-analysis of individual data from 980 793 adults from 68 prospective studies. <i>Lancet Diabetes and Endocrinology</i> , 2018, 6, 538-546.	5.5	147
64	Reducing geographic inequalities in access times for acute treatment of myocardial infarction in a large country: the example of Russia. <i>International Journal of Epidemiology</i> , 2018, 47, 1594-1602.	0.9	17
65	Know Your Heart: Rationale, design and conduct of a cross-sectional study of cardiovascular structure, function and risk factors in 4500 men and women aged 35-69 years from two Russian cities, 2015-18. <i>Wellcome Open Research</i> , 2018, 3, 67.	0.9	40
66	Know Your Heart: Rationale, design and conduct of a cross-sectional study of cardiovascular structure, function and risk factors in 4500 men and women aged 35-69 years from two Russian cities, 2015-18. <i>Wellcome Open Research</i> , 2018, 3, 67.	0.9	29
67	Ethnic differences in the clustering and outcomes of health behaviours during pregnancy: results from the Born in Bradford cohort. <i>Journal of Public Health</i> , 2017, 39, 514-522.	1.0	3
68	Physical assault in the previous year and total and cause-specific mortality in Russia: a case-control study of men aged 25-54 years. <i>International Journal of Epidemiology</i> , 2017, 46, dyw301.	0.9	2
69	How has the management of acute coronary syndrome changed in the Russian Federation during the last 10 years?. <i>Health Policy</i> , 2017, 121, 1274-1279.	1.4	16
70	A systematic review of allostatic load in relation to socioeconomic position: Poor fidelity and major inconsistencies in biomarkers employed. <i>Social Science and Medicine</i> , 2017, 192, 66-73.	1.8	101
71	Risk for alcoholic liver cirrhosis after an initial hospital contact with alcohol problems: A nationwide prospective cohort study. <i>Hepatology</i> , 2017, 65, 929-937.	3.6	31
72	Hospital contacts with alcohol problems prior to liver cirrhosis or pancreatitis diagnosis. <i>World Journal of Hepatology</i> , 2017, 9, 1332-1339.	0.8	6

#	ARTICLE	IF	CITATIONS
73	The management of acute myocardial infarction in the Russian Federation: protocol for a study of patient pathways. Wellcome Open Research, 2017, 2, 89.	0.9	3
74	Pharmacological treatment of hypertension and hyperlipidemia in Izhevsk, Russia. BMC Cardiovascular Disorders, 2016, 16, 122.	0.7	12
75	Recessions and mortality: subtle but informative effects. Lancet, The, 2016, 388, 2572-2573.	6.3	1
76	Metabolic profiling of alcohol consumption in 9778 young adults. International Journal of Epidemiology, 2016, 45, 1493-1506.	0.9	90
77	Disparities in length of life across developed countries: measuring and decomposing changes over time within and between country groups. Population Health Metrics, 2016, 14, 29.	1.3	27
78	Adult height, coronary heart disease and stroke: a multi-locus Mendelian randomization meta-analysis. International Journal of Epidemiology, 2016, 45, 1927-1937.	0.9	94
79	Self-reported symptoms of chronic cough and breathlessness in working-age men in the city of Izhevsk, Russia: associations with cardiovascular disease risk factors and comorbidities. BMJ Open Respiratory Research, 2015, 2, e000104.	1.2	3
80	Social Factors Influencing Russian Male Alcohol Use over the Life Course: A Qualitative Study Investigating Age Based Social Norms, Masculinity, and Workplace Context. PLoS ONE, 2015, 10, e0142993.	1.1	15
81	High cardiovascular mortality in Russia: role of alcohol versus smoking, blood pressure, and treatment. Nature Reviews Cardiology, 2015, 12, 740-740.	6.1	2
82	Contributions of risk factors and medical care to cardiovascular mortality trends. Nature Reviews Cardiology, 2015, 12, 508-530.	6.1	243
83	Self-reported school experience as a predictor of self-harm during adolescence: A prospective cohort study in the South West of England (ALSPAC). Journal of Affective Disorders, 2015, 173, 163-169.	2.0	45
84	Imagining a better place: trust, care, and progress in medicine. Lancet, The, 2015, 385, 1263-1264.	6.3	0
85	The impact of alcohol consumption on patterns of union formation in Russia 1998-2010: An assessment using longitudinal data. Population Studies, 2014, 68, 283-303.	1.1	7
86	Testing for non-linear causal effects using a binary genotype in a Mendelian randomization study: application to alcohol and cardiovascular traits. International Journal of Epidemiology, 2014, 43, 1781-1790.	0.9	57
87	Completeness and usability of ethnicity data in UK-based primary care and hospital databases. Journal of Public Health, 2014, 36, 684-692.	1.0	296
88	Intergenerational determinants of offspring size at birth: a life course and graphical analysis using the Aberdeen Children of the 1950s Study (ACONF). International Journal of Epidemiology, 2014, 43, 749-759.	0.9	19
89	Acute alcohol-related dysfunction as a predictor of employment status in a longitudinal study of working-age men in Izhevsk, Russia. Addiction, 2014, 109, 44-54.	1.7	6
90	Prevalence of alcohol-related pathologies at autopsy: Estonian forensic study of alcohol and premature death. Addiction, 2014, 109, 2018-2026.	1.7	13

#	ARTICLE	IF	CITATIONS
91	Body-mass index and risk of 22 specific cancers: a population-based cohort study of 5.24 million UK adults. <i>Lancet, The</i> , 2014, 384, 755-765.	6.3	1,255
92	Association between alcohol and cardiovascular disease: Mendelian randomisation analysis based on individual participant data. <i>BMJ, The</i> , 2014, 349, g4164-g4164.	3.0	528
93	Women's Risk of Repeat Abortions Is Strongly Associated with Alcohol Consumption: A Longitudinal Analysis of a Russian National Panel Study, 1994-2009. <i>PLoS ONE</i> , 2014, 9, e90356.	1.1	26
94	Hazardous alcohol consumption is associated with increased levels of B-type natriuretic peptide: evidence from two population-based studies. <i>European Journal of Epidemiology</i> , 2013, 28, 393-404.	2.5	19
95	Life Study: a UK-wide birth cohort study of environment, development, health, and wellbeing. <i>Lancet, The</i> , 2013, 382, S31.	6.3	1
96	Prevalence and sociodemographic determinants of tobacco use among adults in Pakistan: findings of a nationwide survey conducted in 2012. <i>Population Health Metrics</i> , 2013, 11, 16.	1.3	41
97	Health and health systems in the Commonwealth of Independent States. <i>Lancet, The</i> , 2013, 381, 1145-1155.	6.3	60
98	Alcohol consumption and self-reported (SF 12) physical and mental health among working-aged men in a typical Russian city: a cross-sectional study. <i>Addiction</i> , 2013, 108, 1905-1914.	1.7	16
99	Comparative performance of biomarkers of alcohol consumption in a population sample of working-aged men in Russia: the Izhevsk Family Study. <i>Addiction</i> , 2013, 108, 1579-1589.	1.7	16
100	Representativeness and optimal use of body mass index (BMI) in the UK Clinical Practice Research Datalink (CPRD). <i>BMJ Open</i> , 2013, 3, e003389.	0.8	121
101	Longitudinal Prediction of Divorce in Russia: The Role of Individual and Couple Drinking Patterns. <i>Alcohol and Alcoholism</i> , 2013, 48, 737-742.	0.9	10
102	Cancer incidence in South Asian migrants to England, 1986-2004: Unraveling ethnic from socioeconomic differentials. <i>International Journal of Cancer</i> , 2013, 132, 1886-1894.	2.3	37
103	Paternal and Maternal Influences on Differences in Birth Weight between Europeans and Indians Born in the UK. <i>PLoS ONE</i> , 2013, 8, e61116.	1.1	36
