#	ARTICLE	IF	CITATIONS
1	An Update on Laboratory Diagnostics in Haemophilia A and B. <i>Hamostaseologie</i> , 2022, 42, 248-260.	0.9	8
2	Anti-human platelet antigen β antibodies and fetal and neonatal alloimmune thrombocytopenia; incidental association or cause and effect?. <i>British Journal of Haematology</i> , 2022, , .	1.2	8
3	Characterization of CD177-reactive iso- and auto-antibodies. <i>Transfusion</i> , 2021, 61, 1916-1922.	0.8	7
4	Prothrombotic immune thrombocytopenia after COVID-19 vaccination. <i>Blood</i> , 2021, 138, 350-353.	0.6	145
5	Antibody-mediated procoagulant platelets in SARS-CoV-2-vaccination associated immune thrombotic thrombocytopenia. <i>Haematologica</i> , 2021, 106, 2170-2179.	1.7	101
6	Recommendations for the clinical and laboratory diagnosis of VITT against COVID-19: Communication from the ISTH SSC Subcommittee on Platelet Immunology. <i>Journal of Thrombosis and Haemostasis</i> , 2021, 19, 1585-1588.	1.9	127
7	The use of IV immunoglobulin in the treatment of vaccine-induced immune thrombotic thrombocytopenia. <i>Blood</i> , 2021, 138, 992-996.	0.6	37
8	PF4-Dependent Immunoassays in Patients with Vaccine-Induced Immune Thrombotic Thrombocytopenia: Results of an Interlaboratory Comparison. <i>Thrombosis and Haemostasis</i> , 2021, 121, 1622-1627.	1.8	36
9	The SSC platelet immunology register of VITT and VIITP: Toward standardization of laboratory and clinical parameters. <i>Journal of Thrombosis and Haemostasis</i> , 2021, 19, 2094-2095.	1.9	4
10	Transfusion of target antigens to preimmunized recipients: a new mechanism in transfusion-related acute lung injury. <i>Blood Advances</i> , 2021, 5, 3975-3985.	2.5	10
11	A point mutation c.473A>G of ITGB3 is responsible for the formation of the W_{α} human platelet alloantigen. <i>Transfusion</i> , 2020, 60, E5-E6.	0.8	1
12	Incidental diagnosis of leukocyte adhesion deficiency type II following ABO typing. <i>Clinical Immunology</i> , 2020, 221, 108599.	1.4	5
13	Piperacillin-dependent anti-platelet antibodies are a relevant, easy to confirm differential diagnosis in patients with rapid-onset thrombocytopenia. <i>British Journal of Haematology</i> , 2020, 190, e320-e321.	1.2	3
14	Non-invasive risk-assessment and bleeding prophylaxis with IVIG in pregnant women with a history of fetal and neonatal alloimmune thrombocytopenia: management to minimize adverse events. <i>Archives of Gynecology and Obstetrics</i> , 2020, 302, 355-363.	0.8	4
15	Primary structure of human neutrophil antigens 1a and 1b. <i>Transfusion</i> , 2020, 60, 815-821.	0.8	3
16	Prospects for risk stratification of anti-HPA-1a alloimmunized pregnant women. <i>Transfusion and Apheresis Science</i> , 2020, 59, 102709.	0.5	6
17	Fc γ RI and Fc γ RIII on splenic macrophages mediate phagocytosis of anti-glycoprotein IIb/IIIa autoantibody-opsonized platelets in immune thrombocytopenia. <i>Haematologica</i> , 2020, 106, 250-254.	1.7	36
18	Maternal antibodies against paternal class I human leukocyte antigens are not associated with foetal and neonatal alloimmune thrombocytopenia. <i>British Journal of Haematology</i> , 2020, 189, 751-759.	1.2	14

#	ARTICLE	IF	CITATIONS
19	Current Anti-HPA-1a Standard Antibodies React with the α 2b Integrin Subunit but not with α IIb β 3 and α v β 3 Complexes. <i>Thrombosis and Haemostasis</i> , 2019, 119, 1807-1815.	1.8	8
20	Diagnosing Immune Thrombocytopenia. <i>Hamostaseologie</i> , 2019, 39, 250-258.	0.9	9
21	Defective Zn ²⁺ homeostasis in mouse and human platelets with α - and β -storage pool diseases. <i>Scientific Reports</i> , 2019, 9, 8333.	1.6	20
22	Be alert to leukocyte antibodies when prescribing granulocyte transfusions. <i>Transfusion</i> , 2019, 59, 2174-2174.	0.8	2
23	The nonconservative <i>CD177</i> single-nucleotide polymorphism c.1291G>A is a genetic determinant for human neutrophil antigen α 2 atypical/low expression and deficiency. <i>Transfusion</i> , 2019, 59, 1836-1842.	0.8	18
24	Glycoprotein V is a relevant immune target in patients with immune thrombocytopenia. <i>Haematologica</i> , 2019, 104, 1237-1243.	1.7	26
25	Increased prevalence of anti-DFS70 antibodies in young females: experience from a large international multi-center study on blood donors. <i>Clinical Chemistry and Laboratory Medicine</i> , 2019, 57, 999-1005.	1.4	21
26	An international external quality assessment for laboratory diagnosis of heparin-induced thrombocytopenia. <i>Journal of Thrombosis and Haemostasis</i> , 2019, 17, 525-531.	1.9	23
27	Improvement of monoclonal antibody-immobilized granulocyte antigen assay for the detection of anti-HNA1 alloantibodies. <i>Transfusion</i> , 2018, 58, 200-207.	0.8	3
28	Molecular and Functional Characterization of Fc γ 3 Receptor IIIb-Ligand Interaction: Implications for Neutrophil-Mediated Immune Mechanisms in Malaria. <i>Infection and Immunity</i> , 2018, 86, .	1.0	4
29	Transfusion of Soluble Target Antigens to Pre-Immunized Recipients: A Previously Overlooked Mechanism in Transfusion-Related Acute Lung Injury. <i>Blood</i> , 2018, 132, 524-524.	0.6	0
30	HLA-DRB3*01:01 is a predictor of immunization against human platelet antigen α 1a but not of the severity of fetal and neonatal alloimmune thrombocytopenia. <i>Transfusion</i> , 2017, 57, 533-540.	0.8	26
31	Red blood cell alloimmunization in neonates and children up to 3 years of age. <i>Transfusion</i> , 2017, 57, 2720-2726.	0.8	16
32	Thrombozytenzerstörung bei ITP. <i>Hamostaseologie</i> , 2016, 36, 187-194.	0.9	10
33	Immunisation against α IIb β 3 and α v β 3 in a type 1 variant of Glanzmann's thrombasthenia caused by a missense mutation Gly540Asp on α 2b. <i>Thrombosis and Haemostasis</i> , 2016, 116, 262-271.	1.8	12
34	Update on the nomenclature of human neutrophil antigens and alleles. <i>Transfusion</i> , 2016, 56, 1477-1479.	0.8	35
35	Transfusion-related lung injury. , 2016, , 667-679.		0
36	Antiendothelial α v β 3 Antibodies Are a Major Cause of Intracranial Bleeding in Fetal/Neonatal Alloimmune Thrombocytopenia. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2016, 36, 1517-1524.	1.1	79

#	ARTICLE	IF	CITATIONS
37	A sequence-specific polymerase chain reaction method for HNA ² genotyping: homozygous c.843A>T mutation predicts the absence of CD177. <i>Transfusion</i> , 2016, 56, 2127-2132.	0.8	23
38	A bead-based assay in the work-up of suspected platelet alloimmunization. <i>Transfusion</i> , 2016, 56, 115-118.	0.8	12
39	Alloantibody against new platelet alloantigen (Lap ^a) on glycoprotein IIb is responsible for a case of fetal and neonatal alloimmune thrombocytopenia. <i>Transfusion</i> , 2015, 55, 2920-2929.	0.8	9
40	Single amino acid charge switch defines clinically distinct proline-serine-threonine phosphatase-interacting protein 1 (PSTPIP1)-associated inflammatory diseases. <i>Journal of Allergy and Clinical Immunology</i> , 2015, 136, 1337-1345.	1.5	103
41	Platelet-activating protamine-heparin-antibodies lead to higher protamine demand in patients undergoing cardiac surgery. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2015, 150, 967-973.e1.	0.4	14
42	Choline Transporter-Like Protein-2. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2015, 35, 1616-1622.	1.1	33
43	Effectiveness of vitamin K in anticoagulation reversal for hip fracture surgery – A prospective observational study. <i>Thrombosis Research</i> , 2014, 133, 42-47.	0.8	22
44	Rapid enzyme-linked immunosorbent assay for the detection of antibodies against human neutrophil antigens α 1a, α 1b, and α 1c. <i>Transfusion</i> , 2013, 53, 193-201.	0.8	13
45	Fetal/neonatal alloimmune thrombocytopenia. <i>Thrombosis Research</i> , 2013, 131, S42-S46.	0.8	22
46	Anti-Human Neutrophil Antigen-3a Induced Transfusion-Related Acute Lung Injury in Mice by Direct Disturbance of Lung Endothelial Cells. <i>Arteriosclerosis, Thrombosis, and Vascular Biology</i> , 2013, 33, 2538-2548.	1.1	53
47	HNA ^{1d} : a new human neutrophil antigen located on Fc γ 3 receptor IIIb associated with neonatal immune neutropenia. <i>Transfusion</i> , 2013, 53, 2145-2151.	0.8	34
48	Anti-protamine-heparin antibodies: incidence, clinical relevance, and pathogenesis. <i>Blood</i> , 2013, 121, 2821-2827.	0.6	64
49	Glycosylation of autoantibodies: Insights into the mechanisms of immune thrombocytopenia. <i>Thrombosis and Haemostasis</i> , 2013, 110, 1259-1266.	1.8	19
50	A point mutation in the EGF-4 domain of β 3 integrin is responsible for the formation of the Seca platelet alloantigen and affects receptor function. <i>Thrombosis and Haemostasis</i> , 2012, 107, 80-87.	1.8	12
51	Autoantibody-mediated complement activation on platelets is a common finding in patients with immune thrombocytopenic purpura (ITP). <i>European Journal of Haematology</i> , 2012, 88, 167-174.	1.1	116
52	Low-avidity anti-HPA ^{1a} alloantibodies are capable of antigen-positive platelet destruction in the NOD/SCID mouse model of alloimmune thrombocytopenia. <i>Transfusion</i> , 2011, 51, 2455-2461.	0.8	36
53	Recent insights into the mechanism of transfusion-related acute lung injury. <i>Current Opinion in Hematology</i> , 2011, 18, 436-442.	1.2	50
54	Evaluation of a new nanoparticle-based lateral-flow immunoassay for the exclusion of heparin-induced thrombocytopenia (HIT). <i>Thrombosis and Haemostasis</i> , 2011, 106, 1197-1202.	1.8	19

#	ARTICLE	IF	CITATIONS
55	Lung Endothelial Injury Induced by HNA-3a Antibodies in TRALI. Blood, 2011, 118, 40-40.	0.6	5
56	Non-infectious serious hazards in plasma transfusion. Transfusion and Apheresis Science, 2010, 43, 381-386.	0.5	13
57	GP IIb/IIIa-Dependent Complement Activation Is Common In Patients with Immune Thrombocytopenic Purpura.. Blood, 2010, 116, 1430-1430.	0.6	0
58	The Neutrophil Specific CD177 Is a Novel Counter-Receptor for Endothelial PECAM-1.. Blood, 2006, 108, 1635-1635.	0.6	8
59	TRALI after the transfusion of cross-match-positive granulocytes. Transfusion, 2003, 43, 1683-1686.	0.8	69
