#	Article	IF	Citations
1	A systematic review of one-legged balance performance and falls risk in community-dwelling adults. Ageing Research Reviews, 2022, 73, 101501.	5.0	7
2	The consequences of early menopause and menopause symptoms for labour market participation. Social Science and Medicine, 2022, 293, 114676.	1.8	6
3	Study protocol: MyoFit46â€"the cardiac sub-study of the MRC National Survey of Health and Development. BMC Cardiovascular Disorders, 2022, 22, 140.	0.7	4
4	Is carotid artery atherosclerosis associated with poor cognitive function assessed using the Mini-Mental State Examination? A systematic review and meta-analysis. BMJ Open, 2022, 12, e055131.	0.8	3
5	Association between carotid atherosclerosis and brain activation patterns during the Stroop task in older adults: An fNIRS investigation. NeuroImage, 2022, 257, 119302.	2.1	3
6	Polygenic and socioeconomic risk for high body mass index: 69 years of follow-up across life. PLoS Genetics, 2022, 18, e1010233.	1.5	11
7	Childhood correlates of adult positive mental well-being in three British longitudinal studies. Journal of Epidemiology and Community Health, 2021, 75, jech-2019-213709.	2.0	5
8	Socioeconomic inequalities across life and premature mortality from 1971 to 2016: findings from three British birth cohorts born in 1946, 1958 and 1970. Journal of Epidemiology and Community Health, 2021, 75, jech-2020-214423.	2.0	3
9	Bidirectional associations between word memory and one-legged balance performance in mid and later life. Experimental Gerontology, 2021, 144, 111176.	1.2	4
10	Exposure to multiple childhood social risk factors and adult body mass index trajectories from ages 20 to 64 years. European Journal of Public Health, 2021, 31, 385-390.	0.1	2
11	Longitudinal birth cohort study finds that life-course frailty associates with later-life heart size and function. Scientific Reports, 2021, 11, 6272.	1.6	6
12	Distinct Body Mass Index Trajectories to Young-Adulthood Obesity and Their Different Cardiometabolic Consequences. Arteriosclerosis, Thrombosis, and Vascular Biology, 2021, 41, 1580-1593.	1.1	14
13	Investigating the relationship between BMI across adulthood and late life brain pathologies. Alzheimer's Research and Therapy, 2021, 13, 91.	3.0	7
14	Life course socioeconomic position and DNA methylation age acceleration in mid-life. Journal of Epidemiology and Community Health, 2021, 75, 1084-1090.	2.0	17
15	Associations of Word Memory, Verbal Fluency, Processing Speed, and Crystallized Cognitive Ability With One-Legged Balance Performance in Mid- and Later Life. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2021, , .	1.7	0
16	Socioeconomic position and body composition in childhood in high- and middle-income countries: a systematic review and narrative synthesis. International Journal of Obesity, 2021, 45, 2316-2334.	1.6	19
17	Life course socioeconomic position and body composition in adulthood: a systematic review and narrative synthesis. International Journal of Obesity, 2021, 45, 2300-2315.	1.6	18
18	Area-level and family-level socioeconomic position and body composition trajectories: longitudinal analysis of the UK Millennium Cohort Study. Lancet Public Health, The, 2021, 6, e598-e607.	4.7	13

#	Article	IF	Citations
19	Early adulthood socioeconomic trajectories contribute to inequalities in adult cardiovascular health, independently of childhood and adulthood socioeconomic position. Journal of Epidemiology and Community Health, 2021, 75, 1172-1180.	2.0	1
20	Childhood growth and development and DNA methylation age in mid-life. Clinical Epigenetics, 2021, 13, 155.	1.8	5
21	Changes in the body mass index and blood pressure association across time: Evidence from multiple cross-sectional and cohort studies. Preventive Medicine, 2021, 153, 106825.	1.6	4
22	Childhood Bradycardia Associates With Atrioventricular Conduction Defects in Older Age: A Longitudinal Birth Cohort Study. Journal of the American Heart Association, 2021, 10, e021877.	1.6	0
23	1348Childhood adversities and diurnal patterns of salivary cortisol in adulthood: two UK-based prospective cohort studies. International Journal of Epidemiology, 2021, 50, .	0.9	0
24	Adverse childhood experiences and incident coronary heart disease: a counterfactual analysis in the Whitehall II prospective cohort study. American Journal of Preventive Cardiology, 2021, 7, 100220.	1.3	3
25	The relationship of childhood adversity with diurnal cortisol patterns and C-reactive protein at 60â€“64 years of age in the 1946 National Survey of Health and Development. Psychoneuroendocrinology, 2021, 132, 105362.	1.3	3
26	DNA methylation age and physical and cognitive ageing. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2020, 75, 504-511.	1.7	35
27	Childhood Cognition and Age-Related Change in Standing Balance Performance From Mid to Later Life: Findings From a British Birth Cohort. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2020, 75, 155-161.	1.7	9
28	Socioeconomic inequalities in childhood-to-adulthood BMI tracking in three British birth cohorts. International Journal of Obesity, 2020, 44, 388-398.	1.6	24
29	The Relationship of Early-Life Adversity With Adulthood Weight and Cardiometabolic Health Status in the 1946 National Survey of Health and Development. Psychosomatic Medicine, 2020, 82, 82-89.	1.3	10
30	Socioeconomic inequalities in blood pressure: co-ordinated analysis of 147,775 participants from repeated birth cohort and cross-sectional datasets, 1989 to 2016. BMC Medicine, 2020, 18, 338.	2.3	14
31	Association Between Reproductive Life Span and Incident Nonfatal Cardiovascular Disease. JAMA Cardiology, 2020, 5, 1410.	3.0	34
32	Do the associations of body mass index and waist circumference with back pain change as people age? 32 years of follow-up in a British birth cohort. BMJ Open, 2020, 10, e039197.	0.8	8
33	Life course biological trajectories: maximising the value of longitudinal studies. Annals of Human Biology, 2020, 47, 227-228.	0.4	0
34	Differences in the relationship of weight to height, and thus the meaning of BMI, according to age, sex, and birth year cohort. Annals of Human Biology, 2020, 47, 199-207.	0.4	17
35	Vasomotor menopausal symptoms and risk of cardiovascular disease: a pooled analysis of six prospective studies. American Journal of Obstetrics and Gynecology, 2020, 223, 898.e1-898.e16.	0.7	46
36	Type of menopause, age of menopause and variations in the risk of incident cardiovascular disease: pooled analysis of individual data from 10 international studies. Human Reproduction, 2020, 35, 1933-1943.	0.4	68

#	Article	IF	Citations
37	Age at period cessation and trajectories of cardiovascular risk factors across mid and later life. Heart, 2020, 106, 499-505.	1.2	20
38	Adult obesity and mid-life physical functioning in two British birth cohorts: investigating the mediating role of physical inactivity. International Journal of Epidemiology, 2020, 49, 845-856.	0.9	8
39	Motor development in infancy and spine shape in early old age: Findings from a British birth cohort study. Journal of Orthopaedic Research, 2020, 38, 2740-2748.	1.2	4
40	Associations Between Factors Across Life and One-Legged Balance Performance in Mid and Later Life: Evidence From a British Birth Cohort Study. Frontiers in Sports and Active Living, 2020, 2, 00028.	0.9	8
41	Duration of obesity exposure between ages 10 and 40 years and its relationship with cardiometabolic disease risk factors: A cohort study. PLoS Medicine, 2020, 17, e1003387.	3.9	38
42	Study Protocol â€" Insight 46 Cardiovascular: A Sub-study of the MRC National Survey of Health and Development. Artery Research, 2020, 26, 170-179.	0.3	2
43	Title is missing!. , 2020, 17, e1003387.		0
44	Title is missing!. , 2020, 17, e1003387.		0
45	Title is missing!. , 2020, 17, e1003387.		0
46	Title is missing!. , 2020, 17, e1003387.		0
47	Title is missing!. , 2020, 17, e1003387.		0
48	Title is missing!. , 2020, 17, e1003387.		0
49	Are BMI and inflammatory markers independently associated with physical fatigability in old age?. International Journal of Obesity, 2019, 43, 832-841.	1.6	47
50	A dietary pattern derived using B-vitamins and its relationship with vascular markers over the life course. Clinical Nutrition, 2019, 38, 1464-1473.	2.3	13
51	Associations between blood pressure across adulthood and late-life brain structure and pathology in the neuroscience substudy of the 1946 British birth cohort (Insight 46): an epidemiological study. Lancet Neurology, The, 2019, 18, 942-952.	4.9	178
52	Long-term and recent trends in hypertension awareness, treatment, and control in 12 high-income countries: an analysis of 123 nationally representative surveys. Lancet, The, 2019, 394, 639-651.	6.3	325
53	The effect of mid-life insulin resistance and type 2 diabetes on older-age cognitive state: the explanatory role of early-life advantage. Diabetologia, 2019, 62, 1891-1900.	2.9	11
54	The relationship between pubertal timing and markers of vascular and cardiac structure and function in men and women aged 60â€"64 years. Scientific Reports, 2019, 9, 11037.	1.6	14

#	Article	IF	Citations
55	Socioeconomic position and body composition across the life course: a systematic review protocol. Systematic Reviews, 2019, 8, 263.	2.5	5
56	Associations of medical conditions, lifestyle and unintentional weight loss in early old age: The 1946 British Birth Cohort. PLoS ONE, 2019, 14, e0211952.	1.1	3
57	Age at natural menopause and risk of incident cardiovascular disease: a pooled analysis of individual patient data. Lancet Public Health, The, 2019, 4, e553-e564.	4.7	252
58	Systemic Inflammation and Cardio-Renal Organ Damage Biomarkers in Middle Age Are Associated With Physical Capability Up to 9 Years Later. Circulation, 2019, 139, 1988-1999.	1.6	23
59	Premenopausal cardiovascular disease and age at natural menopause: a pooled analysis of over 170,000 women. European Journal of Epidemiology, 2019, 34, 235-246.	2.5	48
60	Number of children and body composition in later life among men and women: Results from a British birth cohort study. PLoS ONE, 2019, 14, e0209529.	1.1	4
61	Metabolomic correlates of central adiposity and earlier-life body mass index. Journal of Lipid Research, 2019, 60, 1136-1143.	2.0	2
62	Dysregulation of the hypothalamic pituitary adrenal (HPA) axis and cognitive capability at older ages: individual participant meta-analysis of five cohorts. Scientific Reports, 2019, 9, 4555.	1.6	26
63	Data Resource Profile: Cohort and Longitudinal Studies Enhancement Resources (CLOSER). International Journal of Epidemiology, 2019, 48, 675-676i.	0.9	13
64	Developmental factors associated with decline in grip strength from midlife to old age: a British birth cohort study. BMJ Open, 2019, 9, e025755.	0.8	20
65	81 Balance Ability and Falls in Mid-Life: Understanding Associations and Potential Diagnostic Screening. Age and Ageing, 2019, 48, iv18-iv27.	0.7	0
66	79 A Life Course Approach to Standing Balance: Risk Factors Across Life. Age and Ageing, 2019, 48, iv18-iv27.	0.7	0
67	Association of alcohol consumption with allergic disease and asthma: a multiâ€centre Mendelian randomization analysis. Addiction, 2019, 114, 216-225.	1.7	14
68	Early-life adversity, later-life mental health, and resilience resources: a longitudinal population-based birth cohort analysis. International Psychogeriatrics, 2019, 31, 1249-1258.	0.6	22
69	Age at Onset of Walking in Infancy Is Associated With Hip Shape in Early Old Age. Journal of Bone and Mineral Research, 2019, 34, 455-463.	3.1	13
70	Adherence to a Dietary Approaches to Stop Hypertension (DASH)-type diet over the life course and associated vascular function: a study based on the MRC 1946 British birth cohort. British Journal of Nutrition, 2018, 119, 581-589.	1.2	44
71	Infant weight gain and adolescent body mass index: comparison across two British cohorts born in 1946 and 2001. Archives of Disease in Childhood, 2018, 103, 974-980.	1.0	11
72	Motor performance in early life and participation in leisureâ€time physical activity up to age 68Âyears. Paediatric and Perinatal Epidemiology, 2018, 32, 327-334.	0.8	8

#	Article	IF	Citations
73	Female reproductive history and risk of type 2 diabetes: A prospective analysis of 126 721 women. Diabetes, Obesity and Metabolism, 2018, 20, 2103-2112.	2.2	31
74	Age at menopause and lifetime cognition. Neurology, 2018, 90, e1673-e1681.	1.5	50
75	Psychosocial adversity and socioeconomic position during childhood and epigenetic age: analysis of two prospective cohort studies. Human Molecular Genetics, 2018, 27, 1301-1308.	1.4	102
76	Association of Early-Life Factors With Life-Course Trajectories of Resting Heart Rate. JAMA Pediatrics, 2018, 172, e175525.	3.3	7
77	Socioeconomic inequalities in childhood and adolescent body-mass index, weight, and height from 1953 to 2015: an analysis of four longitudinal, observational, British birth cohort studies. Lancet Public Health, The, 2018, 3, e194-e203.	4.7	139
78	Fat mass and obesity-associated (FTO) rs9939609 polymorphism modifies the relationship between body mass index and affective symptoms through the life course: a prospective birth cohort study. Translational Psychiatry, 2018, 8, 62.	2.4	5
79	Modeling Exposure to Multiple Childhood Social Risk Factors and Physical Capability and Common Affective Symptoms in Later Life. Journal of Aging and Health, 2018, 30, 386-407.	0.9	20
80	Adiposity, Telomere Length, and Telomere Attrition in Midlife: the 1946 British Birth Cohort. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2018, 73, 966-972.	1.7	7
81	Leisure-time physical activity across adulthood and biomarkers of cardiovascular disease at age 60â€“64: A prospective cohort study. Atherosclerosis, 2018, 269, 279-287.	0.4	26
82	O2â€05â€01: INFLUENCES OF BLOOD PRESSURE AND BLOOD PRESSURE TRAJECTORIES ON CEREBRAL PATHOLOGY AT AGE 70: RESULTS FROM A BRITISH BIRTH COHORT. Alzheimer's and Dementia, 2018, 14, P626.	0.4	1
83	Associations between back pain across adulthood and spine shape in early old age in a British birth cohort. Scientific Reports, 2018, 8, 16309.	1.6	1
84	Relationships between intensity, duration, cumulative dose, and timing of smoking with age at menopause: A pooled analysis of individual data from 17 observational studies. PLoS Medicine, 2018, 15, e1002704.	3.9	81
85	Lifetime cognition and late midlife blood metabolites: findings from a British birth cohort. Translational Psychiatry, 2018, 8, 203.	2.4	21
86	Physical Activity, Sedentary Time, and Cardiovascular Disease Biomarkers at Age 60 to 64 Years. Journal of the American Heart Association, 2018, 7, e007459.	1.6	19
87	A Bayesian approach to investigate life course hypotheses involving continuous exposures. International Journal of Epidemiology, 2018, 47, 1623-1635.	0.9	26
88	Parental age and offspring leukocyte telomere length and attrition in midlife: Evidence from the 1946 British birth cohort. Experimental Gerontology, 2018, 112, 92-96.	1.2	7
89	Body mass index and waist circumference in early adulthood are associated with thoracolumbar spine shape at age 60-64: The Medical Research Council National Survey of Health and Development. PLoS ONE, 2018, 13, e0197570.	1.1	6
90	Childhood Exposures, Asthma, Smoking, Interactions, and the Catch-Up Hypothesis. Annals of the American Thoracic Society, 2018, 15, 1241-1242.	1.5	3

#	Article	IF	Citations
91	Patterns of adiposity, vascular phenotypes and cognitive function in the 1946 British Birth Cohort. BMC Medicine, 2018, 16, 75.	2.3	19
92	Hepatic steatosis risk is partly driven by increased de novo lipogenesis following carbohydrate consumption. Genome Biology, 2018, 19, 79.	3.8	83
93	Associations between body size, nutrition and socioeconomic position in early life and the epigenome: A systematic review. PLoS ONE, 2018, 13, e0201672.	1.1	11
94	Lifetime affective problems and later-life cognitive state: Over 50 years of follow-up in a British birth cohort study. Journal of Affective Disorders, 2018, 241, 348-355.	2.0	22
95	Intergenerational social mobility and leisure-time physical activity in adulthood: a systematic review. Journal of Epidemiology and Community Health, 2017, 71, 673-680.	2.0	22
96	Identifying low density lipoprotein cholesterol associated variants in the Annexin A2 (ANXA2) gene. Atherosclerosis, 2017, 261, 60-68.	0.4	18
97	Combined Impact of Smoking and Early-Life Exposures on Adult Lung Function Trajectories. American Journal of Respiratory and Critical Care Medicine, 2017, 196, 1021-1030.	2.5	108
98	Birth Weight, School Sports Ability, and Adulthood Leisure-Time Physical Activity. Medicine and Science in Sports and Exercise, 2017, 49, 64-70.	0.2	19
99	Causal Effect of Plasminogen Activator Inhibitor Type 1 on Coronary Heart Disease. Journal of the American Heart Association, 2017, 6, .	1.6	89
100	Statistical shape modelling of hip and lumbar spine morphology and their relationship in the <scp>MRC</scp> National Survey of Health and Development. Journal of Anatomy, 2017, 231, 248-259.	0.9	23
101	Obesity History and Daily Patterns of Physical Activity at Age 60â€“64 Years: Findings From the MRC National Survey of Health and Development. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2017, 72, 1424-1430.	1.7	10
102	Air pollution and cardiovascular mortality with over 25years follow-up: A combined analysis of two British cohorts. Environment International, 2017, 99, 275-281.	4.8	70
103	Associations between body mass index across adult life and hip shapes at age 60 to 64: Evidence from the 1946 British birth cohort. Bone, 2017, 105, 115-121.	1.4	12
104	The effect of life course socioeconomic position on crystallised cognitive ability in two large UK cohort studies: a structured modelling approach. BMJ Open, 2017, 7, e014461.	0.8	11
105	Are objective measures of physical capability related to accelerated epigenetic age? Findings from a British birth cohort. BMJ Open, 2017, 7, e016708.	0.8	36
106	Markers of pubertal timing and leisure-time physical activity from ages 36 to 68 years: findings from a British birth cohort. BMJ Open, 2017, 7, e017407.	0.8	2
107	The Persisting Challenge of Socioeconomic Inequalities in Health Across the Life Course. JAMA Pediatrics, 2017, 171, 735.	3.3	3
108	Prospective associations of psychosocial adversity in childhood with risk factors for cardiovascular disease in adulthood: the MRC National Survey of Health and Development. International Journal for Equity in Health, 2017, 16, 170.	1.5	7

#	Article	IF	Citations
109	Impact of body size, nutrition and socioeconomic position in early life on the epigenome: a systematic review protocol. Systematic Reviews, 2017, 6, 129.	2.5	2
110	Decline in Search Speed and Verbal Memory Over 26 Years of Midlife in a British Birth Cohort. Neuroepidemiology, 2017, 49, 121-128.	1.1	34
111	Socioeconomic Inequalities in Body Mass Index across Adulthood: Coordinated Analyses of Individual Participant Data from Three British Birth Cohort Studies Initiated in 1946, 1958 and 1970. PLoS Medicine, 2017, 14, e1002214.	3.9	80
112	Childhood socioeconomic position and adult mental wellbeing: Evidence from four British birth cohort studies. PLoS ONE, 2017, 12, e0185798.	1.1	20
113	Verbal memory and search speed in early midlife are associated with mortality over 25 yearsâ€™ follow-up, independently of health status and early life factors: a British birth cohort study.. International Journal of Epidemiology, 2016, 45, dyw100.	0.9	13
114	Commentary: The use and misuse of life course models. International Journal of Epidemiology, 2016, 45, 1003-1005.	0.9	20
115	Twenty-year trajectories of alcohol consumption during midlife and atherosclerotic thickening in early old age: findings from two British population cohort studies. BMC Medicine, 2016, 14, 111.	2.3	19
116	A structured approach to hypotheses involving continuous exposures over the life course. International Journal of Epidemiology, 2016, 45, dyw164.	0.9	38
117	The relationship between affective symptoms and hypertensionâ€"role of the labelling effect: the 1946 British birth cohort. Open Heart, 2016, 3, e000341.	0.9	9
118	Irregularity of energy intake at meals: prospective associations with the metabolic syndrome in adults of the 1946 British birth cohort. British Journal of Nutrition, 2016, 115, 315-323.	1.2	29
119	Is birthweight associated with total and aggressive/lethal prostate cancer risks? A systematic review and meta-analysis. British Journal of Cancer, 2016, 114, 839-848.	2.9	16
120	Pubertal timing and bone phenotype in early old age: findings from a British birth cohort study. International Journal of Epidemiology, 2016, 45, dyw131.	0.9	40
121	The InterLACE study: Design, data harmonization and characteristics across 20 studies on womenâ€™s health. Maturitas, 2016, 92, 176-185.	1.0	34
122	Relationship between mediation analysis and the structured life course approach. International Journal of Epidemiology, 2016, 45, dyw254.	0.9	21
123	Birthweight, childhood growth and left ventricular structure at age 60â€"64 years in a British birth cohort study. International Journal of Epidemiology, 2016, 45, dyw150.	0.9	24
124	Midlife blood pressure predicts future diastolic dysfunction independently of blood pressure. Heart, 2016, 102, 1380-1387.	1.2	12
125	The MRC National Survey of Health and Development reaches age 70: maintaining participation at older ages in a birth cohort study. European Journal of Epidemiology, 2016, 31, 1135-1147.	2.5	126
126	Plasma urate concentration and risk of coronary heart disease: a Mendelian randomisation analysis. Lancet Diabetes and Endocrinology,the, 2016, 4, 327-336.	5.5	122

#	Article	IF	Citations
127	Birth weight, early childhood growth and lung function in middle to early old age: 1946 British birth cohort. Thorax, 2016, 71, 916-922.	2.7	19
128	Modelling life course blood pressure trajectories using Bayesian adaptive splines. Statistical Methods in Medical Research, 2016, 25, 2767-2780.	0.7	8
129	The Presence of Chronic Mucus Hypersecretion across Adult Life in Relation to Chronic Obstructive Pulmonary Disease Development. American Journal of Respiratory and Critical Care Medicine, 2016, 193, 662-672.	2.5	137
130	Life Course Socioeconomic Position: Associations with Cardiac Structure and Function at Age 60-64 Years in the 1946 British Birth Cohort. PLoS ONE, 2016, 11, e0152691.	1.1	9
131	Investigating the associations between adiposity, life course overweight trajectories, and telomere length. Aging, 2016, 8, 2689-2701.	1.4	21
132	Letter to the Editor: Obesity Severity and Duration Are Associated With Incident Metabolic Syndrome: Evidence Against Metabolically Healthy Obesity From the Multi-Ethnic Study of Atherosclerosis. Journal of Clinical Endocrinology and Metabolism, 2016, 101, L112-L113.	1.8	0
133	The operationalisation of resilience in ageing: a systematic review. Lancet, The, 2015, 386, S32.	6.3	1
134	Pubertal maturation and affective symptoms in adolescence and adulthood: Evidence from a prospective birth cohort. Development and Psychopathology, 2015, 27, 1331-1340.	1.4	14
135	Socioeconomic conditions across life related to multiple measures of the endocrine system in older adults: Longitudinal findings from a British birth cohort study. Social Science and Medicine, 2015, 147, 190-199.	1.8	19
136	Changes in testosterone related to body composition in late midlife: Findings from the 1946 British birth cohort study. Obesity, 2015, 23, 1486-1492.	1.5	28
