Brennan C Kahan

List of Publications by Year
in descending order

29 papers	2,553 citations	516710 16 h-index	501196 28 g-index
31 all docs	31 docs citations	31 times ranked	3739 citing authors

#	Article	IF	Citations
1	Effect of an Indwelling Pleural Catheter vs Chest Tube and Talc Pleurodesis for Relieving Dyspnea in Patients With Malignant Pleural Effusion. JAMA - Journal of the American Medical Association, 2012, 307, 2383.	7.4	508
2	A No-Prophylaxis Platelet-Transfusion Strategy for Hematologic Cancers. New England Journal of Medicine, 2013, 368, 1771-1780.	27.0	384
3	Predicting survival in malignant pleural effusion: development and validation of the LENT prognostic score. Thorax, 2014, 69, 1098-1104.	5.6	324
4	The risks and rewards of covariate adjustment in randomized trials: an assessment of 12 outcomes from 8 studies. Trials, 2014, 15, 139.	1.6	291
5	Improper analysis of trials randomised using stratified blocks or minimisation. Statistics in Medicine, 2012, 31, 328-340.	1.6	235
6	Reporting and analysis of trials using stratified randomisation in leading medical journals: review and reanalysis. BMJ, The, 2012, 345, e5840-e5840.	6.0	215
7	Outpatient Talc Administration by Indwelling Pleural Catheter for Malignant Effusion. New England Journal of Medicine, 2018, 378, 1313-1322.	27.0	183
8	Evaluating the efficacy of thoracoscopy and talc poudrage versus pleurodesis using talc slurry (TAPPS trial): protocol of an open-label randomised controlled trial. BMJ Open, 2014, 4, e007045.	1.9	48
9	Choosing sensitivity analyses for randomised trials: principles. BMC Medical Research Methodology, 2014, 14, 11.	3.1	47
10	A comparison of methods to adjust for continuous covariates in the analysis of randomised trials. BMC Medical Research Methodology, 2016, 16, 42.	3.1	45
11	Bias in randomised factorial trials. Statistics in Medicine, 2013, 32, 4540-4549.	1.6	36
12	Choosing appropriate analysis methods for cluster randomised crossâ€over trials with a binary outcome. Statistics in Medicine, 2017, 36, 318-333.	1.6	30
13	Estimands in cluster-randomized trials: choosing analyses that answer the right question. International Journal of Epidemiology, 2023, 52, 107-118.	1.9	28
14	MEMPHIS: a smartphone app using psychological approaches for women with chronic pelvic pain presenting to gynaecology clinics: a randomised feasibility trial. BMJ Open, 2020, 10, e030164.	1.9	25
15	Estimands in published protocols of randomised trials: urgent improvement needed. Trials, 2021, 22, 686.	1.6	23
16	A re-randomisation design for clinical trials. BMC Medical Research Methodology, 2015, 15, 96.	3.1	21
17	Pre-specification of statistical analysis approaches in published clinical trial protocols was inadequate. Journal of Clinical Epidemiology, 2018, 101, 53-60.	5.0	19
18	Reporting of randomized factorial trials was frequently inadequate. Journal of Clinical Epidemiology, 2020, 117, 52-59.	5.0	19

#	Article	IF	Citations
19	Treatment estimands in clinical trials of patients hospitalised for COVID-19: ensuring trials ask the right questions. BMC Medicine, 2020, 18, 286.	5.5	17
20	Using re-randomization to increase the recruitment rate in clinical trials â€“ an assessment of three clinical areas. Trials, 2016, 17, 595.	1.6	10
21	A national quality improvement programme to improve survival after emergency abdominal surgery: the EPOCH stepped-wedge cluster RCT. Health Services and Delivery Research, 2019, 7, 1-96.	1.4	9
22	Smartphone App Using Mindfulness Meditation for Women With Chronic Pelvic Pain (MEMPHIS): Protocol for a Randomized Feasibility Trial. JMIR Research Protocols, 2018, 7, e8.	1.0	7
23	Thoracoscopy and talc poudrage compared with intercostal drainage and talc slurry infusion to manage malignant pleural effusion: the TAPPS RCT. Health Technology Assessment, 2020, 24, 1-90.	2.8	6
24	Independence estimators for re-randomisation trials in multi-episode settings: a simulation study. BMC Medical Research Methodology, 2021, 21, 235.	3.1	6
25	Re-randomisation trials in multi-episode settings: Estimands and independence estimators. Statistical Methods in Medical Research, 2022, 31, 1342-1354.	1.5	5
26	Re-randomization increased recruitment and provided similar treatment estimates as parallel designs in trials of febrile neutropenia. Journal of Clinical Epidemiology, 2018, 97, 14-19.	5.0	4
27	Combining factorial and multi-arm multi-stage platform designs to evaluate multiple interventions efficiently. Clinical Trials, 2022, 19, 432-441.	1.6	3
28	Estimands for factorial trials. Statistics in Medicine, 0, , .	1.6	3
29	A comparison of methods for analyzing a binary composite endpoint with partially observed components in randomized controlled trials. Statistics in Medicine, 2021, 40, 6634-6650.	1.6	2
