|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Seroprevalence of IgG antibodies against diphtheria antitoxin among migrant workers in Singapore, 2016–2019. <i>BMC Public Health</i> , 2022, 22, 111.                                                                                                              | 2.9  | 2         |
| 2  | Prevalence of measles antibodies among migrant workers in Singapore: a serological study to identify susceptible population subgroups. <i>BMC Infectious Diseases</i> , 2022, 22, 88.                                                                               | 2.9  | 0         |
| 3  | Health-seeking behavior of COVID-19 cases during the first eight weeks of the outbreak in Singapore: differences between local community and imported cases and having visits to single or multiple healthcare providers. <i>BMC Public Health</i> , 2022, 22, 239. | 2.9  | 4         |
| 4  | Sustaining Antimicrobial Stewardship in a High–Antibiotic Resistance Setting. <i>JAMA Network Open</i> , 2022, 5, e2210180.                                                                                                                                         | 5.9  | 4         |
| 5  | Hepatitis C virus infection in HIV-infected men in Singapore, 2006–2018: incidence and associated factors. <i>Sexual Health</i> , 2021, 18, 221-231.                                                                                                                | 0.9  | 3         |
| 6  | Diagnostic performance of COVID–19 serological assays during early infection: A systematic review and meta-analysis of 11 516 samples. <i>Influenza and Other Respiratory Viruses</i> , 2021, 15, 529-538.                                                          | 3.4  | 17        |
| 7  | Epidemiological factors associated with recent HIV infection among newly-diagnosed cases in Singapore, 2013–2017. <i>BMC Public Health</i> , 2021, 21, 430.                                                                                                         | 2.9  | 6         |
| 8  | Association of SARS-CoV-2 clades with clinical, inflammatory and virologic outcomes: An observational study. <i>EBioMedicine</i> , 2021, 66, 103319.                                                                                                                | 6.1  | 21        |
| 9  | An observational study of the prevalence of metabolic syndrome in treatment-experienced people living with HIV in Singapore. <i>PLoS ONE</i> , 2021, 16, e0252320.                                                                                                  | 2.5  | 2         |
| 10 | Short-term mortality from HIV-infected persons diagnosed from 2012 to 2016. <i>Medicine (United States)</i> , 2021, 100, e26507.                                                                                                                                    | 1.0  | 8         |
| 11 | Epidemiological factors associated with the absence of previous HIV testing among HIV-positive persons in Singapore, 2012–2017. <i>BMJ Open</i> , 2021, 11, e050133.                                                                                                | 1.9  | 1         |
| 12 | Seroprevalence of vaccine-preventable diseases among children and adolescents in Singapore: Results from the National Paediatric Seroprevalence Survey 2018. <i>International Journal of Infectious Diseases</i> , 2020, 92, 234-240.                               | 3.3  | 11        |
| 13 | Effects of a major deletion in the SARS-CoV-2 genome on the severity of infection and the inflammatory response: an observational cohort study. <i>Lancet, The</i> , 2020, 396, 603-611.                                                                            | 13.7 | 394       |
| 14 | Risk Factors for Severe Disease and Efficacy of Treatment in Patients Infected With COVID-19: A Systematic Review, Meta-Analysis, and Meta-Regression Analysis. <i>Clinical Infectious Diseases</i> , 2020, 71, 2199-2206.                                          | 5.8  | 227       |
| 15 | Incidence of syphilis among HIV-infected men in Singapore, 2006–2017: temporal trends and associated risk factors. <i>Sexually Transmitted Infections</i> , 2020, 96, 293-299.                                                                                      | 1.9  | 8         |
| 16 | Investigation of three clusters of COVID-19 in Singapore: implications for surveillance and response measures. <i>Lancet, The</i> , 2020, 395, 1039-1046.                                                                                                           | 13.7 | 561       |
| 17 | Characterisation of respiratory syncytial virus activity in children and adults presenting with acute respiratory illness at primary care clinics in Singapore, 2014–2018. <i>Influenza and Other Respiratory Viruses</i> , 2020, 14, 412-419.                      | 3.4  | 5         |
| 18 | Effectiveness of a Mobile-Based Influenza-Like Illness Surveillance System (FluMob) Among Health Care Workers: Longitudinal Study. <i>JMIR MHealth and UHealth</i> , 2020, 8, e19712.                                                                               | 3.7  | 6         |

| #  | ARTICLE                                                                                                                                                                                                                                                      | IF   | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 19 | A 15-year review of dengue hospitalizations in Singapore: Reducing admissions without adverse consequences, 2003 to 2017. PLoS Neglected Tropical Diseases, 2019, 13, e0007389.                                                                              | 3.0  | 18        |
| 20 | The epidemiological signature of influenza B virus and its B/Victoria and B/Yamagata lineages in the 21st century. PLoS ONE, 2019, 14, e0222381.                                                                                                             | 2.5  | 102       |
| 21 | Factors Associated with Hepatitis B and C Co-Infection among HIV-Infected Patients in Singapore, 2006–2017. Tropical Medicine and Infectious Disease, 2019, 4, 87.                                                                                           | 2.3  | 12        |
| 22 | Force of Infection and True Infection Rate of Dengue in Singapore: Implications for Dengue Control and Management. American Journal of Epidemiology, 2019, 188, 1529-1538.                                                                                   | 3.4  | 31        |
| 23 | Differential age-specific distribution of influenza virus types and subtypes in tropical Singapore, 2011 to 2017. Journal of Medical Virology, 2019, 91, 1415-1422.                                                                                          | 5.0  | 7         |
| 24 | Epidemiological characteristics associated with uptake of pneumococcal vaccine among older adults living in the community in Singapore: Results from the National Health Surveillance Survey 2013. Scandinavian Journal of Public Health, 2018, 46, 175-181. | 2.3  | 9         |
| 25 | Estimates of global seasonal influenza-associated respiratory mortality: a modelling study. Lancet, The, 2018, 391, 1285-1300.                                                                                                                               | 13.7 | 1,870     |
| 26 | Distribution of influenza virus types by age using case-based global surveillance data from twenty-nine countries, 1999-2014. BMC Infectious Diseases, 2018, 18, 269.                                                                                        | 2.9  | 64        |
| 27 | Influenza-Associated Hospitalizations for Cardiovascular Diseases in the Tropics. American Journal of Epidemiology, 2017, 186, 202-209.                                                                                                                      | 3.4  | 21        |
| 28 | Seroprevalence of antibodies against chikungunya virus in Singapore resident adult population. PLoS Neglected Tropical Diseases, 2017, 11, e0006163.                                                                                                         | 3.0  | 25        |
| 29 | Group B <i>Streptococcus</i> Serotype III Sequence Type 283 Bacteremia Associated with Consumption of Raw Fish, Singapore. Emerging Infectious Diseases, 2016, 22, 1970-1973.                                                                                | 4.3  | 49        |
| 30 | Characterization of influenza activity based on virological surveillance of influenza-like illness in tropical Singapore, 2010–2014. Journal of Medical Virology, 2016, 88, 2069-2077.                                                                       | 5.0  | 28        |
| 31 | Seroprevalence of past dengue virus infection among children and adolescents in Singapore. Journal of Medical Virology, 2015, 87, 2159-2162.                                                                                                                 | 5.0  | 9         |
| 32 | Seroepidemiology of Coxsackievirus A6, Coxsackievirus A16, and Enterovirus 71 Infections among Children and Adolescents in Singapore, 2008-2010. PLoS ONE, 2015, 10, e0127999.                                                                               | 2.5  | 59        |
| 33 | An epidemiological assessment towards elimination of rubella and congenital rubella syndrome in Singapore. Vaccine, 2015, 33, 3150-3157.                                                                                                                     | 3.8  | 11        |
| 34 | Epidemiological and virological characteristics of influenza B: results of the Global Influenza B Study. Influenza and Other Respiratory Viruses, 2015, 9, 3-12.                                                                                             | 3.4  | 150       |
| 35 | Comparison of severely ill patients with influenza A(H1N1)pdm09 infection during the pandemic and post-pandemic periods in Singapore. Vaccine, 2015, 33, 615-620.                                                                                            | 3.8  | 2         |
| 36 | Influenza-Associated Hospitalizations, Singapore, 2004–2008 and 2010–2012. Emerging Infectious Diseases, 2014, 20, 1652-1660.                                                                                                                                | 4.3  | 40        |
