#	Article	IF	Citations
1	Integrating DNA Methylation Measures of Biological Aging into Social Determinants of Health Research. Current Environmental Health Reports, 2022, 9, 196-210.	6.7	35
2	Longitudinal developmental trajectories do not follow cross-sectional age associations in hippocampal subfield and memory development. Developmental Cognitive Neuroscience, 2022, 54, 101085.	4.0	8
3	An in-laboratory stressor reveals unique genetic variation in child cortisol output.. Developmental Psychology, 2022, 58, 1832-1848.	1.6	5
4	Weak and uneven associations of home, neighborhood, and school environments with stress hormone output across multiple timescales. Molecular Psychiatry, 2021, 26, 4823-4838.	7.9	8
5	Socioeconomic Disadvantage and the Pace of Biological Aging in Children. Pediatrics, 2021, 147, .	2.1	59
6	Polygenic Scores in Developmental Psychology: Invite Genetics In, Leave Biodeterminism Behind. Annual Review of Developmental Psychology, 2020, 2, 389-411.	2.9	22
7	Effects of stress on 6- and 7-year-old childrenâ€™s emotional memory differs by gender. Journal of Experimental Child Psychology, 2020, 199, 104924.	1.4	5
8	Hair cortisol concentrations are associated with hippocampal subregional volumes in children. Scientific Reports, 2020, 10, 4865.	3.3	17
9	Stable longitudinal associations of family income with childrenâ€™s hippocampal volume and memory persist after controlling for polygenic scores of educational attainment. Developmental Cognitive Neuroscience, 2019, 40, 100720.	4.0	22
10	Blunted cortisol stress reactivity in lowâ€“income children relates to lower memory function. Psychoneuroendocrinology, 2018, 90, 110-121.	2.7	48
11	Cognitive control moderates parenting stress effects on children's diurnal cortisol. PLoS ONE, 2018, 13, e0191215.	2.5	12
12	Income gains predict cognitive functioning longitudinally throughout later childhood in poor children.. Developmental Psychology, 2018, 54, 1232-1243.	1.6	7
