#	ARTICLE	IF	CITATIONS
1	Measuring Vaccine Efficacy Against Infection and Disease in Clinical Trials: Sources and Magnitude of Bias in Coronavirus Disease 2019 (COVID-19) Vaccine Efficacy Estimates. <i>Clinical Infectious Diseases</i> , 2022, 75, e764-e773.	2.9	5
2	SARS-CoV-2 infection and vaccine effectiveness in England (REACT-1): a series of cross-sectional random community surveys. <i>Lancet Respiratory Medicine</i> , 2022, 10, 355-366.	5.2	39
3	Rapid increase in Omicron infections in England during December 2021: REACT-1 study. <i>Science</i> , 2022, 375, 1406-1411.	6.0	99
4	Population antibody responses following COVID-19 vaccination in 212,102 individuals. <i>Nature Communications</i> , 2022, 13, 907.	5.8	94
5	Global, regional, and national minimum estimates of children affected by COVID-19-associated orphanhood and caregiver death, by age and family circumstance up to Oct 31, 2021: an updated modelling study. <i>The Lancet Child and Adolescent Health</i> , 2022, 6, 249-259.	2.7	46
6	Clinical characteristics, risk factors and outcomes in patients with severe COVID-19 registered in the International Severe Acute Respiratory and Emerging Infection Consortium WHO clinical characterisation protocol: a prospective, multinational, multicentre, observational study. <i>ERJ Open Research</i> , 2022, 8, 00552-2021.	1.1	33
7	Fundamental limits on inferring epidemic resurgence in real time using effective reproduction numbers. <i>PLoS Computational Biology</i> , 2022, 18, e1010004.	1.5	11
8	Breakthrough SARS-CoV-2 infections in double and triple vaccinated adults and single dose vaccine effectiveness among children in Autumn 2021 in England: REACT-1 study. <i>EClinicalMedicine</i> , 2022, 48, 101419.	3.2	8
9	Analysis of a double Poisson model for predicting football results in Euro 2020. <i>PLoS ONE</i> , 2022, 17, e0268511.	1.1	3
10	Twin peaks: The Omicron SARS-CoV-2 BA.1 and BA.2 epidemics in England. <i>Science</i> , 2022, 376, .	6.0	78
11	Are Epidemic Growth Rates More Informative than Reproduction Numbers?. <i>Journal of the Royal Statistical Society Series A: Statistics in Society</i> , 2022, 185, S5-S15.	0.6	23
12	Appropriately smoothing prevalence data to inform estimates of growth rate and reproduction number. <i>Epidemics</i> , 2022, 40, 100604.	1.5	15
13	A Comparative Analysis of Statistical Methods to Estimate the Reproduction Number in Emerging Epidemics, With Implications for the Current Coronavirus Disease 2019 (COVID-19) Pandemic. <i>Clinical Infectious Diseases</i> , 2021, 73, e215-e223.	2.9	28
14	COVID-19 and the difficulty of inferring epidemiological parameters from clinical data – Authors' reply. <i>Lancet Infectious Diseases</i> , 2021, 21, 28.	4.6	10
15	Serial interval distribution of SARS-CoV-2 infection in Brazil. <i>Journal of Travel Medicine</i> , 2021, 28, .	1.4	32
16	Database of epidemic trends and control measures during the first wave of COVID-19 in mainland China. <i>International Journal of Infectious Diseases</i> , 2021, 102, 463-471.	1.5	12
17	The J-IDEA Pandemic Planner. <i>Medical Care</i> , 2021, 59, 371-378.	1.1	7
18	SARS-CoV-2 antibody prevalence in England following the first peak of the pandemic. <i>Nature Communications</i> , 2021, 12, 905.	5.8	168

#	ARTICLE	IF	CITATIONS
19	Reduction in mobility and COVID-19 transmission. <i>Nature Communications</i> , 2021, 12, 1090.	5.8	394
20	Early Transmission Dynamics, Spread, and Genomic Characterization of SARS-CoV-2 in Panama. <i>Emerging Infectious Diseases</i> , 2021, 27, 612-615.	2.0	24
21	Successive use of shared space by badgers and cattle: implications for <i>Mycobacterium bovis</i> transmission. <i>Journal of Zoology</i> , 2021, 314, 132-142.	0.8	5
22	Better educational signage could reduce disturbance of resting dolphins. <i>PLoS ONE</i> , 2021, 16, e0248732.	1.1	2
23	Modelling intensive care unit capacity under different epidemiological scenarios of the COVID-19 pandemic in three Western European countries. <i>International Journal of Epidemiology</i> , 2021, 50, 753-767.	0.9	24
24	Genetic evidence for the association between COVID-19 epidemic severity and timing of non-pharmaceutical interventions. <i>Nature Communications</i> , 2021, 12, 2188.	5.8	23
25	Resurgence of SARS-CoV-2: Detection by community viral surveillance. <i>Science</i> , 2021, 372, 990-995.	6.0	91
26	Interventions targeting non-symptomatic cases can be important to prevent local outbreaks: SARS-CoV-2 as a case study. <i>Journal of the Royal Society Interface</i> , 2021, 18, 20201014.	1.5	25
27	Prevalence of antibody positivity to SARS-CoV-2 following the first peak of infection in England: Serial cross-sectional studies of 365,000 adults. <i>Lancet Regional Health - Europe</i> , The, 2021, 4, 100098.	3.0	91
28	Descriptive analysis of surveillance data for Zika virus disease and Zika virus-associated neurological complications in Colombia, 2015–2017. <i>PLoS ONE</i> , 2021, 16, e0252236.	1.1	6
29	Key epidemiological drivers and impact of interventions in the 2020 SARS-CoV-2 epidemic in England. <i>Science Translational Medicine</i> , 2021, 13, .	5.8	89
30	SARS-CoV-2 antibody dynamics and transmission from community-wide serological testing in the Italian municipality of Voë™. <i>Nature Communications</i> , 2021, 12, 4383.	5.8	33
31	Modelling the influence of naturally acquired immunity from subclinical infection on outbreak dynamics and persistence of rabies in domestic dogs. <i>PLoS Neglected Tropical Diseases</i> , 2021, 15, e0009581.	1.3	3
32	Spatial and temporal invasion dynamics of the 2014–2017 Zika and chikungunya epidemics in Colombia. <i>PLoS Computational Biology</i> , 2021, 17, e1009174.	1.5	5
33	Global minimum estimates of children affected by COVID-19-associated orphanhood and deaths of caregivers: a modelling study. <i>Lancet</i> , The, 2021, 398, 391-402.	6.3	172
34	Reservoir dynamics of rabies in south-east Tanzania and the roles of cross-species transmission and domestic dog vaccination. <i>Journal of Applied Ecology</i> , 2021, 58, 2673-2685.	1.9	10
35	Comparing the responses of the UK, Sweden and Denmark to COVID-19 using counterfactual modelling. <i>Scientific Reports</i> , 2021, 11, 16342.	1.6	26
36	Comparison of machine learning methods for estimating case fatality ratios: An Ebola outbreak simulation study. <i>PLoS ONE</i> , 2021, 16, e0257005.	1.1	1

#	ARTICLE	IF	CITATIONS
37	Identifying counties at risk of high overdose mortality burden during the emerging fentanyl epidemic in the USA: a predictive statistical modelling study. <i>Lancet Public Health</i> , The, 2021, 6, e720-e728.	4.7	22
38	Geographical drivers and climate-linked dynamics of Lassa fever in Nigeria. <i>Nature Communications</i> , 2021, 12, 5759.	5.8	30
39	A Quantitative Framework for Defining the End of an Infectious Disease Outbreak: Application to Ebola Virus Disease. <i>American Journal of Epidemiology</i> , 2021, 190, 642-651.	1.6	17
40	Transmission of community- and hospital-acquired SARS-CoV-2 in hospital settings in the UK: A cohort study. <i>PLoS Medicine</i> , 2021, 18, e1003816.	3.9	35
41	Disease transmission and control modelling at the scienceâ€“policy interface. <i>Interface Focus</i> , 2021, 11, 20210013.	1.5	12
42	Estimating vaccination threshold and impact in the 2017â€“2019 hepatitis A virus outbreak among persons experiencing homelessness or who use drugs in Louisville, Kentucky, United States. <i>Vaccine</i> , 2021, 39, 7182-7190.	1.7	7
43	COVID-19â€“Associated Orphanhood andÂ“Caregiver Death in the UnitedÂ“States. <i>Pediatrics</i> , 2021, 148, .	1.0	129
44	Exponential growth, high prevalence of SARS-CoV-2, and vaccine effectiveness associated with the Delta variant. <i>Science</i> , 2021, 374, eabl9551.	6.0	111
45	Communicating uncertainty in epidemic models. <i>Epidemics</i> , 2021, 37, 100520.	1.5	9
46	Ten months of temporal variation in the clinical journey of hospitalised patients with COVID-19: An observational cohort. <i>ELife</i> , 2021, 10, .	2.8	9
47	Deciphering early-warning signals of SARS-CoV-2 elimination and resurgence from limited data at multiple scales. <i>Journal of the Royal Society Interface</i> , 2021, 18, 20210569.	1.5	22
48	Case Fatality Ratio Estimates for the 2013â€“2016 West African Ebola Epidemic: Application of Boosted Regression Trees for Imputation. <i>Clinical Infectious Diseases</i> , 2020, 70, 2476-2483.	2.9	21
49	Preparedness for emerging epidemic threats: a Lancet Infectious Diseases Commission. <i>Lancet Infectious Diseases</i> , The, 2020, 20, 17-19.	4.6	50
50	An assessment of risk compensation and spillover behavioural adaptations associated with the use of vaccines in animal disease management. <i>Vaccine</i> , 2020, 38, 1065-1075.	1.7	1
51	Clinical and Serological Findings of Madariaga and Venezuelan Equine Encephalitis Viral Infections: A Follow-up Study 5 Years After an Outbreak in Panama. <i>Open Forum Infectious Diseases</i> , 2020, 7, ofaa359.	0.4	12
52	Potential impact of the COVID-19 pandemic on HIV, tuberculosis, and malaria in low-income and middle-income countries: a modelling study. <i>The Lancet Global Health</i> , 2020, 8, e1132-e1141.	2.9	573
53	Inference of COVID-19 epidemiological distributions from Brazilian hospital data. <i>Journal of the Royal Society Interface</i> , 2020, 17, 20200596.	1.5	32
54	State-level tracking of COVID-19 in the United States. <i>Nature Communications</i> , 2020, 11, 6189.	5.8	104

#	ARTICLE	IF	CITATIONS
55	Suppression of a SARS-CoV-2 outbreak in the Italian municipality of Voê™. <i>Nature</i> , 2020, 584, 425-429.	13.7	872
56	Zoonotic host diversity increases in human-dominated ecosystems. <i>Nature</i> , 2020, 584, 398-402.	13.7	475
57	Key questions for modelling COVID-19 exit strategies. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2020, 287, 20201405.	1.2	106
58	Rabies as a Public Health Concern in Indiaâ€”A Historical Perspective. <i>Tropical Medicine and Infectious Disease</i> , 2020, 5, 162.	0.9	24
59	Response to COVID-19 in South Korea and implications for lifting stringent interventions. <i>BMC Medicine</i> , 2020, 18, 321.	2.3	137
60	SARS-CoV-2 infection prevalence on repatriation flights from Wuhan City, China. <i>Journal of Travel Medicine</i> , 2020, 27, .	1.4	5
61	Adaptive Estimation for Epidemic Renewal and Phylogenetic Skyline Models. <i>Systematic Biology</i> , 2020, 69, 1163-1179.	2.7	30
62	Comparison of molecular testing strategies for COVID-19 control: a mathematical modelling study. <i>Lancet Infectious Diseases</i> , The, 2020, 20, 1381-1389.	4.6	171
63	Host or pathogen-related factors in COVID-19 severity? â€” Authors' reply. <i>Lancet</i> , The, 2020, 396, 1397.	6.3	3
64	The impact of COVID-19 and strategies for mitigation and suppression in low- and middle-income countries. <i>Science</i> , 2020, 369, 413-422.	6.0	718
65	Have deaths from COVID-19 in Europe plateaued due to herd immunity?. <i>Lancet</i> , The, 2020, 395, e110-e111.	6.3	70
66	Creating a Framework for Conducting Randomized Clinical Trials during Disease Outbreaks. <i>New England Journal of Medicine</i> , 2020, 382, 1366-1369.	13.9	63
67	Using information theory to optimise epidemic models for real-time prediction and estimation. <i>PLoS Computational Biology</i> , 2020, 16, e1007990.	1.5	41
68	A systemic approach to assess the potential and risks of wildlife culling for infectious disease control. <i>Communications Biology</i> , 2020, 3, 353.	2.0	32
69	Spatiotemporal variability in case fatality ratios for the 2013â€”2016 Ebola epidemic in West Africa. <i>International Journal of Infectious Diseases</i> , 2020, 93, 48-55.	1.5	6
70	Rabies virus-neutralising antibodies in healthy, unvaccinated individuals: What do they mean for rabies epidemiology?. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0007933.	1.3	42
71	Estimates of the severity of coronavirus disease 2019: a model-based analysis. <i>Lancet Infectious Diseases</i> , The, 2020, 20, 669-677.	4.6	3,036
72	REal-time Assessment of Community Transmission (REACT) of SARS-CoV-2 virus: Study protocol. <i>Wellcome Open Research</i> , 2020, 5, 200.	0.9	55

#	ARTICLE	IF	CITATIONS
73	Estimating the number of undetected COVID-19 cases among travellers from mainland China. Wellcome Open Research, 2020, 5, 143.	0.9	5
74	Estimating the effects of non-pharmaceutical interventions on COVID-19 in Europe. Nature, 2020, 584, 257-261.	13.7	2,558
75	Estimating the number of undetected COVID-19 cases among travellers from mainland China. Wellcome Open Research, 2020, 5, 143.	0.9	6
76	Evidence of initial success for China exiting COVID-19 social distancing policy after achieving containment. Wellcome Open Research, 2020, 5, 81.	0.9	62
77	Evidence of initial success for China exiting COVID-19 social distancing policy after achieving containment. Wellcome Open Research, 2020, 5, 81.	0.9	81
78	Anonymised and aggregated crowd level mobility data from mobile phones suggests that initial compliance with COVID-19 social distancing interventions was high and geographically consistent across the UK. Wellcome Open Research, 2020, 5, 170.	0.9	58
79	REal-time Assessment of Community Transmission (REACT) of SARS-CoV-2 virus: Study protocol. Wellcome Open Research, 2020, 5, 200.	0.9	93
80	An exact method for quantifying the reliability of end-of-epidemic declarations in real time. PLoS Computational Biology, 2020, 16, e1008478.	1.5	22
81	Endemic and Epidemic Human Alphavirus Infections in Eastern Panama: An Analysis of Population-Based Cross-Sectional Surveys. American Journal of Tropical Medicine and Hygiene, 2020, 103, 2429-2437.	0.6	20
82	Using information theory to optimise epidemic models for real-time prediction and estimation. , 2020, 16, e1007990.		0
83	Using information theory to optimise epidemic models for real-time prediction and estimation. , 2020, 16, e1007990.		0
84	Using information theory to optimise epidemic models for real-time prediction and estimation. , 2020, 16, e1007990.		0
85	Using information theory to optimise epidemic models for real-time prediction and estimation. , 2020, 16, e1007990.		0
86	Using information theory to optimise epidemic models for real-time prediction and estimation. , 2020, 16, e1007990.		0
87	Using information theory to optimise epidemic models for real-time prediction and estimation. , 2020, 16, e1007990.		0
88	Design of vaccine efficacy trials during public health emergencies. Science Translational Medicine, 2019, 11, .	5.8	41
89	Assessing effects from four years of industry-led badger culling in England on the incidence of bovine tuberculosis in cattle, 2013â€“2017. Scientific Reports, 2019, 9, 14666.	1.6	31
90	Mapping the baseline prevalence of lymphatic filariasis across Nigeria. Parasites and Vectors, 2019, 12, 440.	1.0	13

#	ARTICLE	IF	CITATIONS
91	Effect of culling on individual badger (<i>Meles meles</i>) behaviour: Potential implications for bovine tuberculosis transmission. <i>Journal of Applied Ecology</i> , 2019, 56, 2390-2399.	1.9	19
92	Worldwide Reduction in MERS Cases and Deaths since 2016. <i>Emerging Infectious Diseases</i> , 2019, 25, 1758-1760.	2.0	63
93	The social, physical and economic impact of lymphedema and hydrocele: a matched cross-sectional study in rural Nigeria. <i>BMC Infectious Diseases</i> , 2019, 19, 332.	1.3	14
94	Genetic and spatial characterization of the red fox (<i>Vulpes vulpes</i>) population in the area stretching between the Eastern and Dinaric Alps and its relationship with rabies and canine distemper dynamics. <i>PLoS ONE</i> , 2019, 14, e0213515.	1.1	16
95	Uncooked fish consumption among those at risk of <i>Opisthorchis viverrini</i> infection in central Thailand. <i>PLoS ONE</i> , 2019, 14, e0211540.	1.1	15
96	Risk of yellow fever virus importation into the United States from Brazil, outbreak years 2016–2017 and 2017–2018. <i>Scientific Reports</i> , 2019, 9, 20420.	1.6	6
97	A simple approach to measure transmissibility and forecast incidence. <i>Epidemics</i> , 2018, 22, 29-35.	1.5	63
98	Global, regional, and national age-sex-specific mortality for 282 causes of death in 195 countries and territories, 1980–2017: a systematic analysis for the Global Burden of Disease Study 2017. <i>Lancet</i> , The, 2018, 392, 1736-1788.	6.3	4,989
99	Potential inconsistencies in Zika surveillance data and our understanding of risk during pregnancy. <i>PLoS Neglected Tropical Diseases</i> , 2018, 12, e0006991.	1.3	14
100	Environmental suitability for lymphatic filariasis in Nigeria. <i>Parasites and Vectors</i> , 2018, 11, 513.	1.0	25
101	Refined efficacy estimates of the Sanofi Pasteur dengue vaccine CYD-TDV using machine learning. <i>Nature Communications</i> , 2018, 9, 3644.	5.8	15
102	Outbreak of Ebola virus disease in the Democratic Republic of the Congo, April–May, 2018: an epidemiological study. <i>Lancet</i> , The, 2018, 392, 213-221.	6.3	93
103	Computational modelling for decision-making: where, why, what, who and how. <i>Royal Society Open Science</i> , 2018, 5, 172096.	1.1	68
104	Four principles to make evidence synthesis more useful for policy. <i>Nature</i> , 2018, 558, 361-364.	13.7	97
105	Cluster-Randomized Test-Negative Design Trials: A Novel and Efficient Method to Assess the Efficacy of Community-Level Dengue Interventions. <i>American Journal of Epidemiology</i> , 2018, 187, 2021-2028.	1.6	19
106	epiflows: an R package for risk assessment of travel-related spread of disease. <i>F1000Research</i> , 2018, 7, 1374.	0.8	6
107	Assessing the interruption of the transmission of human helminths with mass drug administration alone: optimizing the design of cluster randomized trials. <i>Parasites and Vectors</i> , 2017, 10, 93.	1.0	49
108	Heterogeneities in the case fatality ratio in the West African Ebola outbreak 2013–2016. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2017, 372, 20160308.	1.8	83

#	ARTICLE	IF	CITATIONS
109	Key data for outbreak evaluation: building on the Ebola experience. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2017, 372, 20160371.	1.8	70
