## Harold Goldsmith

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/2516539/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Gender differences in temperament: A meta-analysis Psychological Bulletin, 2006, 132, 33-72.	6.1	928
2	Roundtable: What Is Temperament? Four Approaches. Child Development, 1987, 58, 505.	3.0	826
3	A zygosity questionnaire for young twins: A research note. Behavior Genetics, 1991, 21, 257-269.	2.1	387
4	Temperament and Attention Deficit Hyperactivity Disorder: The Development of a Multiple Pathway Model. Journal of Clinical Child and Adolescent Psychology, 2004, 33, 42-53.	3.4	340
5	Infant and toddler oral―and manualâ€motor skills predict later speech fluency in autism. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2008, 49, 43-50.	5.2	263
6	Exploring Risk Factors for the Emergence of Children's Mental Health Problems. Archives of General Psychiatry, 2006, 63, 1246.	12.3	185
7	Three Reasons Not to Believe in an Autism Epidemic. Current Directions in Psychological Science, 2005, 14, 55-58.	5.3	174
8	Early Risk Factors and Developmental Pathways to Chronic High Inhibition and Social Anxiety Disorder in Adolescence. American Journal of Psychiatry, 2010, 167, 40-46.	7.2	173
9	Context-Specific Freezing and Associated Physiological Reactivity as a Dysregulated Fear Response Developmental Psychology, 2004, 40, 583-594.	1.6	163
10	Empathy Is Associated With Dynamic Change in Prefrontal Brain Electrical Activity During Positive Emotion in Children. Child Development, 2009, 80, 1210-1231.	3.0	150
11	Deriving childhood temperament measures from emotion-eliciting behavioral episodes: Scale construction and initial validation Psychological Assessment, 2011, 23, 337-353.	1.5	145
12	Early Father Involvement Moderates Biobehavioral Susceptibility to Mental Health Problems in Middle Childhood. Journal of the American Academy of Child and Adolescent Psychiatry, 2006, 45, 1510-1520.	0.5	142
13	Genetic relations between effortful and attentional control and symptoms of psychopathology in middle childhood. Infant and Child Development, 2008, 17, 365-385.	1.5	102
14	Developmental Neuroscience Perspectives on Emotion Regulation. Child Development Perspectives, 2008, 2, 132-140.	3.9	102
15	Environmental influences on family similarity in afternoon cortisol levels: Twin and parent–offspring designs. Psychoneuroendocrinology, 2006, 31, 1131-1137.	2.7	94
16	Right frontal brain activity, cortisol, and withdrawal behavior in 6-month-old infants Behavioral Neuroscience, 2003, 117, 11-20.	1.2	94
17	Association of Prenatal Maternal Depression and Anxiety Symptoms With Infant White Matter Microstructure. JAMA Pediatrics, 2018, 172, 973.	6.2	93
18	The development of stranger fear in infancy and toddlerhood: normative development, individual differences, antecedents, and outcomes. Developmental Science, 2013, 16, 864-878	2.4	90

#	Article	IF	CITATIONS
19	Examining the Familial Link Between Positive Affect and Empathy Development in the Second Year. Journal of Genetic Psychology, 2007, 168, 105-130.	1.2	84
20	A longitudinal analysis of anger and inhibitory control in twins from 12 to 36 months of age. Developmental Science, 2011, 14, 112-124.	2.4	77
21	Biological sensitivity to context moderates the effects of the early teacher–child relationship on the development of mental health by adolescence. Development and Psychopathology, 2011, 23, 149-161.	2.3	75
22	Optimizing the intrinsic parallel diffusivity in NODDI: An extensive empirical evaluation. PLoS ONE, 2019, 14, e0217118.	2.5	70
23	Early temperamental and family predictors of shyness and anxiety Developmental Psychology, 2010, 46, 1192-1205.	1.6	68
24	Why Does Joint Attention Look Atypical in Autism?. Child Development Perspectives, 2008, 2, 38-45.	3.9	67
25	ls sensory overâ€responsivity distinguishable from childhood behavior problems? A phenotypic and genetic analysis. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2012, 53, 64-72.	5.2	64
26	Cardiac reactivity is associated with changes in negative emotion in 24â€monthâ€olds. Developmental Psychobiology, 2005, 46, 118-132.	1.6	63
27	Genetic and environmental influences on individual differences in cortisol level and circadian rhythm in middle childhood. Hormones and Behavior, 2012, 62, 36-42.	2.1	63
28	Genetic and environmental contributions to the development of positive affect in infancy Emotion, 2017, 17, 412-420.	1.8	55
29	The structure of temperament in preschoolers: A two-stage factor analytic approach Emotion, 2012, 12, 44-57.	1.8	53
30	Genetic associations with reflexive visual attention in infancy and childhood. Developmental Science, 2017, 20, e12371.	2.4	53
31	Childhood temperament: Passive gene–environment correlation, gene–environment interaction, and the hidden importance of the family environment. Development and Psychopathology, 2013, 25, 51-63.	2.3	48
32	The Infant Version of the Laboratory Temperament Assessment Battery (Lab-TAB): Measurement Properties and Implications for Concepts of Temperament. Frontiers in Psychology, 2017, 8, 846.	2.1	47
33	Relational and Overt Aggression in Middle Childhood: Early Child and Family Risk Factors. Early Education and Development, 2005, 16, 233-258.	2.6	44
34	Longitudinal Analyses of Affect, Temperament, and Childhood Psychopathology. Twin Research and Human Genetics, 2007, 10, 118-126.	0.6	39
35	The Unique and Shared Genetic and Environmental Contributions to Fear, Anger, and Sadness in Childhood. Child Development, 2015, 86, 1538-1556.	3.0	35
36	Selfâ€conscious Shyness: Growth during Toddlerhood, Strong Role of Genetics, and No Prediction from Fearful Shyness. Infancy, 2015, 20, 160-188.	1.6	35

#	Article	IF	CITATIONS
37	Genetic and Environmental Influences on Rumination, Distraction, and Depressed Mood in Adolescence. Clinical Psychological Science, 2013, 1, 316-322.	4.0	34
38	Early—but modest—gender differences in focal aspects of childhood temperament. Personality and Individual Differences, 2013, 55, 95-100.	2.9	33
39	The structural and rank-order stability of temperament in young children based on a laboratory-observational measure Psychological Assessment, 2015, 27, 1388-1401.	1.5	32
40	Sex, temperament, and family context: How the interaction of early factors differentially predict adolescent alcohol use and are mediated by proximal adolescent factors Psychology of Addictive Behaviors, 2011, 25, 1-15.	2.1	30
41	Wisconsin Twin Research: Early Development, Childhood Psychopathology, Autism, and Sensory Over-responsivity. Twin Research and Human Genetics, 2013, 16, 376-384.	0.6	30
42	A Twin Factor Mixture Modeling Approach to Childhood Temperament: Differential Heritability. Child Development, 2016, 87, 1940-1955.	3.0	30
43	Children's context inappropriate anger and salivary cortisol Developmental Psychology, 2009, 45, 1284-1297.	1.6	28
44	Short―and longâ€ŧerm stability of alpha asymmetry in infants: Baseline and affective measures. Psychophysiology, 2017, 54, 1100-1109.	2.4	28
45	Wisconsin Twin Panel: Current Directions and Findings. Twin Research and Human Genetics, 2006, 9, 1030-1037.	0.6	27
46	Genetic Variance for Autism Screening Items in an Unselected Sample of Toddler-Age Twins. Journal of the American Academy of Child and Adolescent Psychiatry, 2010, 49, 267-276.	0.5	27
47	Sensory Overresponsivity: Prenatal Risk Factors and Temperamental Contributions. Journal of Developmental and Behavioral Pediatrics, 2011, 32, 533-541.	1.1	27
48	The Limited Effects of Obstetrical and Neonatal Complications on Conduct and Attention-Deficit Hyperactivity Disorder Symptoms in Middle Childhood. Journal of Developmental and Behavioral Pediatrics, 2009, 30, 217-225.	1.1	25
49	Observed Profiles of Infant Temperament: Stability, Heritability, and Associations With Parenting. Child Development, 2020, 91, e563-e580.	3.0	24
50	Comparison of video- and EMG-based evaluations of the magnitude of children's emotion-modulated startle response. Behavior Research Methods, 2003, 35, 590-598.	1.3	23
51	Identification of Early Child and Family Risk Factors for Aggressive Victim Status in First Grade. Journal of Abnormal Child Psychology, 2008, 36, 513-526.	3.5	23
52	Trajectories of Sensory Over-Responsivity from Early to Middle Childhood: Birth and Temperament Risk Factors. PLoS ONE, 2015, 10, e0129968.	2.5	23
53	Brooding, Inattention, and Impulsivity as Predictors of Adolescent Suicidal Ideation. Journal of Abnormal Child Psychology, 2019, 47, 333-344.	3.5	22
54	The Capatics of Childhood Temperament 2009 251 267		22

54 The Genetics of Childhood Temperament. , 2009, , 251-267.

#	Article	IF	CITATIONS
55	Heritability of nested hierarchical structural brain network. , 2018, 2018, 554-557.		21
56	Infant stranger fear trajectories predict anxious behaviors and diurnal cortisol rhythm during childhood. Development and Psychopathology, 2017, 29, 1119-1130.	2.3	20
57	A multi-dimensional characterization of anxiety in monozygotic twin pairs reveals susceptibility loci in humans. Translational Psychiatry, 2017, 7, 1282.	4.8	20
58	Autism and Deficits in Attachment Behavior. Science, 2005, 307, 1201-1203.	12.6	19
59	Wisconsin Twin Panel: Current Directions and Findings. Twin Research and Human Genetics, 2006, 9, 1030-1037.	0.6	19
60	Context differences in delta beta coupling are associated with neuroendocrine reactivity in infants. Developmental Psychobiology, 2016, 58, 406-418.	1.6	18
61	Anxiety-related experience-dependent white matter structural differences in adolescence: A monozygotic twin difference approach. Scientific Reports, 2017, 7, 8749.	3.3	18
62	How affect regulation moderates the association between anxious attachment and neuroticism. Attachment and Human Development, 2007, 9, 95-109.	2.1	17
63	Genetic and Environmental Influences on Preschool Sibling Cooperation and Conflict. Marriage and Family Review, 2003, 33, 75-97.	1.2	16
64	The Shared Etiology of Attentional Control and Anxiety: An Adolescent Twin Study. Journal of Research on Adolescence, 2017, 27, 122-138.	3.7	16
65	Dynamic variation in pleasure in children predicts nonlinear change in lateral frontal brain electrical activity Developmental Psychology, 2009, 45, 525-533.	1.6	15
66	Genetic risk by experience interaction for childhood internalizing problems: converging evidence across multiple methods. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2011, 52, 607-618.	5.2	14
67	Genetic and Environmental Contributions to Covariation Between DHEA and Testosterone in Adolescent Twins. Behavior Genetics, 2015, 45, 324-340.	2.1	14
68	Maternal negative affect during infancy is linked to disrupted patterns of diurnal cortisol and alpha asymmetry across contexts during childhood. Journal of Experimental Child Psychology, 2016, 142, 274-290.	1.4	14
69	Parenting in context: Marital adjustment, parent affect, and child temperament in complex families Journal of Family Psychology, 2019, 33, 532-541.	1.3	13
70	Profiles of observed infant anger predict preschool behavior problems: Moderation by life stress Developmental Psychology, 2014, 50, 2343-2352.	1.6	12
71	Profiles of Social-Emotional Readiness for 4-Year-Old Kindergarten. Frontiers in Psychology, 2017, 8, 132.	2.1	12
72	Parent-Offspring Transmission of Internalizing and Sensory over-Responsivity Symptoms in Adolescence. Journal of Abnormal Child Psychology, 2018, 46, 557-567.	3.5	12

#	Article	IF	CITATIONS
73	Experience-Driven Differences in Childhood Cortisol Predict Affect-Relevant Brain Function and Coping in Adolescent Monozygotic Twins. Scientific Reports, 2016, 6, 37081.	3.3	11
74	Early microstructure of white matter associated with infant attention. Developmental Cognitive Neuroscience, 2020, 45, 100815.	4.0	11
75	Gender Differences in Emotional Reactivity of Depressed and At-Risk Preschoolers: Implications for Gender Specific Manifestations of Preschool Depression. Journal of Clinical Child and Adolescent Psychology, 2009, 38, 525-537.	3.4	10
76	Relative Influence of Genetics and Shared Environment on Child Mental Health Symptoms Depends on Comorbidity. PLoS ONE, 2014, 9, e103080.	2.5	10
77	Co-occurrence of Sensory Overresponsivity with Obsessive-Compulsive Symptoms in Childhood and Early Adolescence. Journal of Developmental and Behavioral Pediatrics, 2019, 40, 377-382.	1.1	10
78	Exact Combinatorial Inference for Brain Images. Lecture Notes in Computer Science, 2018, , 629-637.	1.3	10
79	Estimating the Effect of a Predictor Measured by Two Informants on a Continuous Outcome. Epidemiology, 2011, 22, 390-399.	2.7	9
80	Partial replication of two rumination-related candidate gene studies. Cognition and Emotion, 2017, 31, 963-971.	2.0	9
81	Autistics' Atypical Joint Attention: Policy Implications and Empirical Nuance. Child Development Perspectives, 2008, 2, 49-52.	3.9	8
82	Peer Victimization and Selective Attention in Adolescence: Evidence from a Monozygotic Twin Difference Design. Journal of Abnormal Child Psychology, 2019, 47, 1303-1313.	3.5	8
83	Attentional Control Explains Covariation Between Symptoms of Attentionâ€Deficit/Hyperactivity Disorder and Anxiety During Adolescence. Journal of Research on Adolescence, 2020, 30, 126-141.	3.7	8
84	Components of Childhood Impulsivity and Inattention: Child, Family, and Genetic Correlates. International Journal of Developmental Sciences, 2008, 2, 52-76.	0.5	5
85	Genetic and Environmental Contributions to Positive Affect: Insights from Adolescent Twins. Affective Science, 2021, 2, 289-300.	2.6	5
86	Wisconsin Twin Project Overview: Temperament and Affective Neuroscience. Twin Research and Human Genetics, 2019, 22, 794-799.	0.6	4
87	Elucidating the Links Between Mother and Father Alcohol Use Disorder and Adolescent Externalizing Psychopathology: A Test of Transmission Specificity Within Competing Factor Structures and Genetic and Environmental Liabilities. Behavior Genetics, 2021, 51, 512-527.	2.1	4
88	Persistence During Childhood Problem-Solving as a Predictor of Active Suicidal Ideation During Adolescence. Research on Child and Adolescent Psychopathology, 2021, 49, 533-543.	2.3	4
89	Sex Differences in the Relationship Between Childhood Selfâ€Regulation and Adolescent Adiposity. Obesity, 2020, 28, 1761-1769.	3.0	3
90	Reduction of Motion Artifacts in Functional Connectivity Resulting from Infrequent Large Motion. Brain Connectivity, 2022, 12, 740-753.	1.7	2

#	Article	IF	CITATIONS
91	Structural Brain Correlates of Childhood Inhibited Temperament: An ENIGMA-Anxiety Mega-analysis. Journal of the American Academy of Child and Adolescent Psychiatry, 2022, 61, 1182-1188.	0.5	2
92	Association of Prenatal Maternal Depression and Anxiety Symptoms With Infant White Matter Microstructure. Obstetrical and Gynecological Survey, 2019, 74, 138-139.	0.4	0
