#	ARTICLE	IF	CITATIONS
1	Species abundance and asymmetric interaction strength in ecological networks. <i>Oikos</i> , 2007, 116, 1120-1127.	2.7	497
2	Nestedness versus modularity in ecological networks: two sides of the same coin?. <i>Journal of Animal Ecology</i> , 2010, 79, 811-817.	2.8	367
3	Host specificity in phylogenetic and geographic space. <i>Trends in Parasitology</i> , 2011, 27, 355-361.	3.3	267
4	Species abundance and the distribution of specialization in host-parasite interaction networks. <i>Journal of Animal Ecology</i> , 2005, 74, 946-955.	2.8	199
5	Effect of Air Temperature and Humidity on the Survival of Pre-Imaginal Stages of Two Flea Species (Siphonaptera: Pulicidae). <i>Journal of Medical Entomology</i> , 2001, 38, 629-637.	1.8	164
6	Sex-biased parasitism, seasonality and sexual size dimorphism in desert rodents. <i>Oecologia</i> , 2005, 146, 209-217.	2.0	146
7	Phylogenetic Signal in Module Composition and Species Connectivity in Compartmentalized Host-Parasite Networks. <i>American Naturalist</i> , 2012, 179, 501-511.	2.1	127
8	THE EFFECT OF HOST DENSITY ON ECTOPARASITE DISTRIBUTION: AN EXAMPLE OF A RODENT PARASITIZED BY FLEAS. <i>Ecology</i> , 2002, 83, 164-175.	3.2	126
9	Flea species richness and parameters of host body, host geography and host "milieu". <i>Journal of Animal Ecology</i> , 2004, 73, 1121-1128.	2.8	125
10	<i>Bartonella</i> Infection in Rodents and Their Flea Ectoparasites: An Overview. <i>Vector-Borne and Zoonotic Diseases</i> , 2015, 15, 27-39.	1.5	122
11	A Tale of Two Phylogenies: Comparative Analyses of Ecological Interactions. <i>American Naturalist</i> , 2014, 183, 174-187.	2.1	110
12	Ectoparasitic "Jacks of All Trades": Relationship between Abundance and Host Specificity in Fleas (Siphonaptera) Parasitic on Small Mammals. <i>American Naturalist</i> , 2004, 164, 506-516.	2.1	101
13	Spatial variation in species diversity and composition of flea assemblages in small mammalian hosts: geographical distance or faunal similarity?. <i>Journal of Biogeography</i> , 2005, 32, 633-644.	3.0	98
14	Development rates of two <i>Xenopsylla</i> flea species in relation to air temperature and humidity. <i>Medical and Veterinary Entomology</i> , 2001, 15, 249-258.	1.5	91
15	Energy cost of ectoparasitism: the flea <i>Xenopsylla ramesis</i> on the desert gerbil <i>Gerbillus dasyurus</i> . <i>Journal of Zoology</i> , 2002, 258, 349-354.	1.7	91
16	Geographical variation in host specificity of fleas (Siphonaptera) parasitic on small mammals: the influence of phylogeny and local environmental conditions. <i>Ecography</i> , 2004, 27, 787-797.	4.5	89
17	The comparative ecology and biogeography of parasites. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2011, 366, 2379-2390.	4.0	88
18	Gender-biased parasitism in small mammals: patterns, mechanisms, consequences. <i>Mammalia</i> , 2012, 76, 1-13.	0.7	84

#	ARTICLE	IF	CITATIONS
19	Host specificity and geographic range in haematophagous ectoparasites. <i>Oikos</i> , 2005, 108, 449-456.	2.7	82
20	Habitat Dependence of a Parasite-Host Relationship: Flea (Siphonaptera) Assemblages in Two Gerbil Species of the Negev Desert. <i>Journal of Medical Entomology</i> , 1998, 35, 303-313.	1.8	76
21	Assembly rules of ectoparasite communities across scales: combining patterns of abiotic factors, host composition, geographic space, phylogeny and traits. <i>Ecography</i> , 2015, 38, 184-197.	4.5	76
22	Immune response to fleas in a wild desert rodent: effect of parasite species, parasite burden, sex of host and host parasitological experience. <i>Journal of Experimental Biology</i> , 2004, 207, 2725-2733.	1.7	74
23	Age-biased parasitism and density-dependent distribution of fleas (Siphonaptera) on a desert rodent. <i>Oecologia</i> , 2005, 146, 200-208.	2.0	72
24	Ectoparasites and age-dependent survival in a desert rodent. <i>Oecologia</i> , 2006, 148, 30-39.	2.0	71
25	Relationship between host diversity and parasite diversity: flea assemblages on small mammals. <i>Journal of Biogeography</i> , 2004, 31, 1857-1866.	3.0	70
26	Habitat-dependent differences in architecture and microclimate of the burrows of Sundevall's jird (<i>Meriones crassus</i>) (Rodentia: Gerbillinae) in the Negev Desert, Israel. <i>Journal of Arid Environments</i> , 2002, 51, 265-279.	2.4	69
27	Relationships between parasite abundance and the taxonomic distance among a parasite's host species: an example with fleas parasitic on small mammals. <i>International Journal for Parasitology</i> , 2004, 34, 1289-1297.	3.1	69
28	Similarity in ectoparasite faunas of Palaearctic rodents as a function of host phylogenetic, geographic or environmental distances: Which matters the most?. <i>International Journal for Parasitology</i> , 2010, 40, 807-817.	3.1	69
29	Decay of similarity of gamasid mite assemblages parasitic on Palaearctic small mammals: geographic distance, host-species composition or environment. <i>Journal of Biogeography</i> , 2007, 34, 1691-1700.	3.0	66
30	Sex-biased parasitism is not universal: evidence from rodent flea associations from three biomes. <i>Oecologia</i> , 2013, 173, 1009-1022.	2.0	66
31	Evolution of host specificity in fleas: Is it directional and irreversible?. <i>International Journal for Parasitology</i> , 2006, 36, 185-191.	3.1	64
32	Benefits, Costs and Constraints of Anti-Parasitic Grooming in Adult and Juvenile Rodents. <i>Ethology</i> , 2007, 113, 394-402.	1.1	64
33	Host specificity and foraging efficiency in blood-sucking parasite: feeding patterns of the flea <i>Parapulex chephrenis</i> on two species of desert rodents. <i>Parasitology Research</i> , 2003, 90, 393-399.	1.6	62
34	Potential Parasite Transmission in Multi-Host Networks Based on Parasite Sharing. <i>PLoS ONE</i> , 2015, 10, e0117909.	2.5	62
35	Annual cycles of four flea species in the central Negev desert. <i>Medical and Veterinary Entomology</i> , 2002, 16, 266-276.	1.5	60
36	Is a starving host tastier? Reproduction in fleas parasitizing food-limited rodents. <i>Functional Ecology</i> , 2005, 19, 625-631.	3.6	59

#	ARTICLE	IF	CITATIONS
37	Effects of Anthropogenic Disturbance and Climate on Patterns of Bat Fly Parasitism. PLoS ONE, 2012, 7, e41487.	2.5	59
38	Species abundance and asymmetric interaction strength in ecological networks. Oikos, 2007, 116, 1120-1127.	2.7	58
39	Density-dependent host selection in ectoparasites: An application of isodar theory to fleas parasitizing rodents. Oecologia, 2003, 134, 365-372.	2.0	57
40	Scale-dependence of phylogenetic signal in ecological traits of ectoparasites. Ecography, 2011, 34, 114-122.	4.5	57
41	The effect of vegetation cover on vigilance and foraging tactics in the fat sand rat <i>Psammomys obesus</i> . Journal of Ethology, 2001, 19, 105-113.	0.8	56
42	Host discrimination by two desert fleas using an odour cue. Animal Behaviour, 2002, 64, 33-40.	1.9	56
43	Fitness consequences of host selection in ectoparasites: testing reproductive patterns predicted by isodar theory in fleas parasitizing rodents. Journal of Animal Ecology, 2004, 73, 815-820.	2.8	56
44	Relationship between host abundance and parasite distribution: inferring regulating mechanisms from census data. Journal of Animal Ecology, 2006, 75, 575-583.	2.8	56
45	Are ectoparasite communities structured? Species co-occurrence, temporal variation and null models. Journal of Animal Ecology, 2006, 75, 1330-1339.	2.8	54
46	Larval interspecific competition in two flea species parasitic on the same rodent host. Ecological Entomology, 2005, 30, 146-155.	2.2	53
47	Average daily metabolic rate of rodents: habitat and dietary comparisons. Functional Ecology, 1998, 12, 63-73.	3.6	52
48	Co-occurrence of ectoparasites on rodent hosts: null model analyses of data from three continents. Oikos, 2010, 119, 120-128.	2.7	52
49	Immune responses to fleas in two rodent species differing in natural prevalence of infestation and diversity of flea assemblages. Parasitology Research, 2004, 94, 304-311.	1.6	51
50	Latitudinal gradients in niche breadth: empirical evidence from haematophagous ectoparasites. Journal of Biogeography, 2008, 35, 592-601.	3.0	51
51	Why apply ecological laws to epidemiology?. Trends in Parasitology, 2008, 24, 304-309.	3.3	51
52	Habitat fragmentation alters the properties of a host-parasite network: rodents and their helminths in South-East Asia. Journal of Animal Ecology, 2015, 84, 1253-1263.	2.8	51
53	Temporal dynamics of a T-cell mediated immune response in desert rodents. Comparative Biochemistry and Physiology Part A, Molecular & Integrative Physiology, 2006, 145, 554-559.	1.8	50
54	Conservatism of host specificity in parasites. Ecography, 2006, 29, 596-602.	4.5	49

#	ARTICLE	IF	CITATIONS
55	Host-parasite network structure is associated with community-level immunogenetic diversity. <i>Nature Communications</i> , 2014, 5, 5172.	12.8	49
56	Spatial patterns of rodent communities in the Ramon erosion cirque, Negev Highlands, Israel. <i>Journal of Arid Environments</i> , 1996, 32, 319-327.	2.4	47
57	Is abundance a species attribute? An example with haematophagous ectoparasites. <i>Oecologia</i> , 2006, 150, 132-140.	2.0	47
58	Energy costs of blood digestion in a host-specific haematophagous parasite. <i>Journal of Experimental Biology</i> , 2005, 208, 2489-2496.	1.7	46
59	Habitat variation in species composition of flea assemblages on small mammals in central Europe. <i>Ecological Research</i> , 2006, 21, 460-469.	1.5	46
60	Investigation of Bartonella acquisition and transmission in Xenopsylla ramesis fleas (Siphonaptera: Tj ETQq0 0 0 rgBT /Overlock 10 Tf 5	3.9	46
61	Phylogeny determines the role of helminth parasites in intertidal food webs. <i>Journal of Animal Ecology</i> , 2013, 82, 1265-1275.	2.8	46
62	Host community structure and infestation by ixodid ticks: repeatability, dilution effect and ecological specialization. <i>Oecologia</i> , 2007, 154, 185-194.	2.0	45
63	Trait-based and phylogenetic associations between parasites and their hosts: a case study with small mammals and fleas in the Palearctic. <i>Oikos</i> , 2016, 125, 29-38.	2.7	42
64	Geographical range size and host specificity in ectoparasites: a case study with Amphipsylla fleas and rodent hosts. <i>Journal of Biogeography</i> , 2007, 34, 1679-1690.	3.0	41
65	Searching for general patterns in parasite ecology: host identity versus environmental influence on gamasid mite assemblages in small mammals. <i>Parasitology</i> , 2008, 135, 229-242.	1.5	41
66	Driven to distraction: detecting the hidden costs of flea parasitism through foraging behaviour in gerbils. <i>Ecology Letters</i> , 2011, 14, 47-51.	6.4	41
67	Beta-specificity: The turnover of host species in space and another way to measure host specificity. <i>International Journal for Parasitology</i> , 2011, 41, 33-41.	3.1	41
68	Age, intensity of infestation by flea parasites and body mass loss in a rodent host. <i>Parasitology</i> , 2006, 133, 187.	1.5	40
69	Are there general rules governing parasite diversity? Small mammalian hosts and gamasid mite assemblages. <i>Diversity and Distributions</i> , 2007, 13, 353-360.	4.1	39
70	Long-term study of population dynamics and habitat selection of rodents in the Negev Desert. <i>Journal of Mammalogy</i> , 2010, 91, 776-786.	1.3	39
71	Is there sex-biased resistance and tolerance in Mediterranean wood mouse (<i>Apodemus sylvaticus</i>) populations facing multiple helminth infections?. <i>Oecologia</i> , 2012, 170, 123-135.	2.0	39
72	COEVOLUTIONARY EVENTS IN THE HISTORY OF ASSOCIATION BETWEEN JERBOAS (RODENTIA: DIPODIDAE) AND THEIR FLEA PARASITES. <i>Israel Journal of Zoology</i> , 2002, 48, 331-350.	0.2	38

#	ARTICLE	IF	CITATIONS
73	Sampling fleas: the reliability of host infestation data. <i>Medical and Veterinary Entomology</i> , 2004, 18, 232-240.	1.5	38
74	AGE-DEPENDENT FLEA (SIPHONAPTERA) PARASITISM IN RODENTS: A HOST'S LIFE HISTORY MATTERS. <i>Journal of Parasitology</i> , 2006, 92, 242-248.	0.7	38
75	Is the feeding and reproductive performance of the flea, <i>Xenopsylla ramesis</i> , affected by the gender of its rodent host, <i>Meriones crassus</i> ?. <i>Journal of Experimental Biology</i> , 2009, 212, 1429-1435.	1.7	37
76	Abundance patterns and coexistence processes in communities of fleas parasitic on small mammals. <i>Ecography</i> , 2005, 28, 453-464.	4.5	36
77	Ectoparasitism and stress hormones: strategy of host exploitation, common host's parasite history and energetics matter. <i>Journal of Animal Ecology</i> , 2014, 83, 1113-1123.	2.8	36
78	Sexual size dimorphism, morphological traits and jump performance in seven species of desert fleas (Siphonaptera). <i>Journal of Zoology</i> , 2003, 261, 181-189.	1.7	35
79	Geographical variation in the 'bottom-up' control of diversity: fleas and their small mammalian hosts. <i>Global Ecology and Biogeography</i> , 2007, 16, 179-186.	5.8	35
80	<i>Bartonella</i> Genotypes in Fleas (Insecta: Siphonaptera) Collected from Rodents in the Negev Desert, Israel. <i>Applied and Environmental Microbiology</i> , 2010, 76, 6864-6869.	3.1	34
81	Host gender and offspring quality in a flea parasitic on a rodent. <i>Journal of Experimental Biology</i> , 2010, 213, 3299-3304.	1.7	34
82	Parasite-specific variation and the extent of male-biased parasitism; an example with a South African rodent and ectoparasitic arthropods. <i>Parasitology</i> , 2010, 137, 651-660.	1.5	34
83	Ectoparasite fitness in auxiliary hosts: phylogenetic distance from a principal host matters. <i>Journal of Evolutionary Biology</i> , 2012, 25, 2005-2013.	1.7	34
84	Metabolic rate and respiratory gas-exchange patterns in tenebrionid beetles from the Negev Highlands, Israel. <i>Journal of Experimental Biology</i> , 2002, 205, 791-798.	1.7	34
85	The effect of substrate on survival and development of two species of desert fleas (Siphonaptera: Tj ETQq1 1 0.784314 rgBT/Overlo 2.0 33	1.7	34
86	Nested pattern in flea assemblages across the host's geographic range. <i>Ecography</i> , 2005, 28, 475-484.	4.5	33
87	Aggregation and species coexistence in fleas parasitic on small mammals. <i>Ecography</i> , 2006, 29, 159-168.	4.5	33
88	Temporal variation in parasite infestation of a host individual: does a parasite-free host remain uninfested permanently?. <i>Parasitology Research</i> , 2006, 99, 541-545.	1.6	33
89	Covariance in species diversity and facilitation among non-interactive parasite taxa: all against the host. <i>Parasitology</i> , 2005, 131, 557.	1.5	31
90	Deconstructing spatial patterns in species composition of ectoparasite communities: the relative contribution of host composition, environmental variables and geography. <i>Global Ecology and Biogeography</i> , 2010, 19, 515-526.	5.8	31

#	ARTICLE	IF	CITATIONS
91	Co-occurrence and phylogenetic distance in communities of mammalian ectoparasites: limiting similarity versus environmental filtering. <i>Oikos</i> , 2014, 123, 63-70.	2.7	31
92	Parasite beta diversity, host beta diversity and environment: application of two approaches to reveal patterns of flea species turnover in Mongolia. <i>Journal of Biogeography</i> , 2017, 44, 1880-1890.	3.0	31
93	Resource predictability and host specificity in fleas: the effect of host body mass. <i>Parasitology</i> , 2006, 133, 81.	1.5	30
94	Ecological characteristics of flea species relate to their suitability as plague vectors. <i>Oecologia</i> , 2006, 149, 474-481.	2.0	30
95	Stability in abundance and niche breadth of gamasid mites across environmental conditions, parasite identity and host pools. <i>Evolutionary Ecology</i> , 2009, 23, 329-345.	1.2	30
96	Intra- and interspecific variation in vigilance and foraging of two gerbillid rodents, <i>Rhombomys opimus</i> and <i>Psammomys obesus</i> : the effect of social environment. <i>Animal Behaviour</i> , 2001, 62, 965-972.	1.9	29
97	Novel case of a tenebrionid beetle using discontinuous gas exchange cycle when dehydrated. <i>Physiological Entomology</i> , 2002, 27, 79-83.	1.5	29
98	Can interaction coefficients be determined from census data? Testing two estimation methods with Negev Desert rodents. <i>Oikos</i> , 2002, 99, 47-58.	2.7	29
99	Nestedness and β -diversity in ectoparasite assemblages of small mammalian hosts: effects of parasite affinity, host biology and scale. <i>Oikos</i> , 2011, 120, 630-639.	2.7	29
100	Flea infestation and energy requirements of rodent hosts: are there general rules?. <i>Functional Ecology</i> , 2006, 20, 1028-1036.	3.6	28
101	Determinants of ectoparasite assemblage structure on rodent hosts from South American marshlands: the effect of host species, locality and season. <i>Medical and Veterinary Entomology</i> , 2010, 24, no-no.	1.5	28
102	Aggregative structure is the rule in communities of fleas: null model analysis. <i>Ecography</i> , 2011, 34, 751-761.	4.5	28
103	Patterns of diversity and abundance of fleas and mites in the Neotropics: host-related, parasite-related and environment-related factors. <i>Medical and Veterinary Entomology</i> , 2013, 27, 49-58.	1.5	28
104	Variable effects of host characteristics on species richness of flea infracommunities in rodents from three continents. <i>Parasitology Research</i> , 2014, 113, 2777-2788.	1.6	28
105	A global database for metacommunity ecology, integrating species, traits, environment and space. <i>Scientific Data</i> , 2020, 7, 6.	5.3	28
106	Metabolic rate and jump performance in seven species of desert fleas. <i>Journal of Insect Physiology</i> , 2004, 50, 149-156.	2.0	27
107	HIGH INTERVALITY EXPLAINED BY PHYLOGENETIC CONSTRAINTS IN HOST-PARASITE WEBS. <i>Ecology</i> , 2008, 89, 2043-2051.	3.2	27
108	Seasonal changes in darkling beetle communities (Coleoptera: Tenebrionidae) in the Ramon erosion cirque, Negev Highlands, Israel. <i>Journal of Arid Environments</i> , 1995, 31, 335-347.	2.4	26

#	ARTICLE	IF	CITATIONS
109	Host Specificity, Parasite Community Size and the Relation between Abundance and its Variance. <i>Evolutionary Ecology</i> , 2006, 20, 75-91.	1.2	26
