#	ARTICLE	IF	CITATIONS
1	Characterisation and mapping of the surveillance system for antimicrobial resistance and antimicrobial use in the United Kingdom. <i>Veterinary Record</i> , 2021, 188, e10.	0.3	11
2	Evaluating the Integration of One Health in Surveillance Systems for Antimicrobial Use and Resistance: A Conceptual Framework. <i>Frontiers in Veterinary Science</i> , 2021, 8, 611931.	2.2	31
3	Evaluating Integrated Surveillance for Antimicrobial Use and Resistance in England: A Qualitative Study. <i>Frontiers in Veterinary Science</i> , 2021, 8, 743857.	2.2	3
4	Exposure Pathways to Antimicrobial Resistance at the Human-Animal Interface—A Qualitative Comparison of Swiss Expert and Consumer Opinions. <i>Frontiers in Public Health</i> , 2020, 8, 345.	2.7	11
5	To Sample or Not to Sample? An Analysis of the Need for Salmonella Sampling of Smaller Poultry Processors. <i>Risk Analysis</i> , 2020, 40, 2093-2111.	2.7	0
6	Addressing Learning Needs on the Use of Metagenomics in Antimicrobial Resistance Surveillance. <i>Frontiers in Public Health</i> , 2020, 8, 38.	2.7	11
7	Overview of Evidence of Antimicrobial Use and Antimicrobial Resistance in the Food Chain. <i>Antibiotics</i> , 2020, 9, 49.	3.7	96
8	Description of surveillance components related to classical swine fever, blue tongue and rabies in selected European countries: An experts' knowledge elicitation. <i>Microbial Risk Analysis</i> , 2019, 13, 100081.	2.3	1
9	Cost-effectiveness of surveillance and biosecurity scenarios for preventing CSF in Switzerland. <i>Microbial Risk Analysis</i> , 2019, 13, 100080.	2.3	2
10	Associations between antimicrobial use and the faecal resistome on broiler farms from nine European countries. <i>Journal of Antimicrobial Chemotherapy</i> , 2019, 74, 2596-2604.	3.0	49
11	Maximising data to optimise animal disease early warning systems and risk assessment tools within Europe. <i>Microbial Risk Analysis</i> , 2019, 13, 100072.	2.3	2
12	Comparison of international legislation and standards on veterinary drug residues in food of animal origin. <i>Journal of Public Health Policy</i> , 2019, 40, 308-341.	2.0	9
13	Assessing the Adoption of Recommended Standards, Novel Approaches, and Best Practices for Animal Health Surveillance by Decision Makers in Europe. <i>Frontiers in Veterinary Science</i> , 2019, 6, 375.	2.2	0
14	The antimicrobial resistome in relation to antimicrobial use and biosecurity in pig farming, a metagenome-wide association study in nine European countries. <i>Journal of Antimicrobial Chemotherapy</i> , 2019, 74, 865-876.	3.0	63
15	Use of molecular and genomic data for disease surveillance in aquaculture: Towards improved evidence for decision making. <i>Preventive Veterinary Medicine</i> , 2019, 167, 190-195.	1.9	9
16	Evidence needed for antimicrobial resistance surveillance systems. <i>Bulletin of the World Health Organization</i> , 2019, 97, 283-289.	3.3	28
17	Improving the impact of disease control strategies with limited resources: where to invest?. <i>Veterinary Record</i> , 2018, 182, 255-256.	0.3	2
18	Using multi-criteria risk ranking methodology to select case studies for a generic risk assessment framework for exotic disease incursion and spread through Europe. <i>Preventive Veterinary Medicine</i> , 2018, 153, 47-55.	1.9	13

#	ARTICLE	IF	CITATIONS
19	Optimising cost-effectiveness of freedom from disease surveillance – Bluetongue Virus Serotype 8 as an example. <i>Preventive Veterinary Medicine</i> , 2018, 160, 145-154.	1.9	4
20	Risk Ranking of Antimicrobial-Resistant Hazards Found in Meat in Switzerland. <i>Risk Analysis</i> , 2018, 38, 1070-1084.	2.7	14
21	A One Health Evaluation of the University of Copenhagen Research Centre for Control of Antibiotic Resistance. <i>Frontiers in Veterinary Science</i> , 2018, 5, 194.	2.2	15
22	SurF: an innovative framework in biosecurity and animal health surveillance evaluation. <i>Transboundary and Emerging Diseases</i> , 2018, 65, 1545-1552.	3.0	5
23	Abundance and diversity of the faecal resistome in slaughter pigs and broilers in nine European countries. <i>Nature Microbiology</i> , 2018, 3, 898-908.	13.3	230
24	Consumer Exposure to Antimicrobial Resistant Bacteria From Food at Swiss Retail Level. <i>Frontiers in Microbiology</i> , 2018, 9, 362.	3.5	59
25	<i>Coxiella burnetii</i> Infections in Small Ruminants and Humans in Switzerland. <i>Transboundary and Emerging Diseases</i> , 2017, 64, 204-212.	3.0	22
26	Economics of zoonoses surveillance in a "One Health" context: an assessment of <i>Campylobacter</i> surveillance in Switzerland. <i>Epidemiology and Infection</i> , 2017, 145, 1148-1158.	2.1	38
27	Assessment of the risk of foodborne transmission and burden of hepatitis E in Switzerland. <i>International Journal of Food Microbiology</i> , 2017, 242, 107-115.	4.7	25
28	Epidemiological Risk Factors for Animal Influenza A Viruses Overcoming Species Barriers. <i>EcoHealth</i> , 2017, 14, 342-360.	2.0	17
29	Competencies for government veterinary services of the future: Summary of ISVEE 14 Yucatan 2015 roundtable discussion. <i>Preventive Veterinary Medicine</i> , 2017, 137, 151-153.	1.9	2
30	Active animal health surveillance in European Union Member States: gaps and opportunities. <i>Epidemiology and Infection</i> , 2017, 145, 802-817.	2.1	25
31	Profile of pig farms combining high performance and low antimicrobial usage within four European countries. <i>Veterinary Record</i> , 2017, 181, 657-657.	0.3	40
32	Herd-specific interventions to reduce antimicrobial usage in pig production without jeopardising technical and economic performance. <i>Preventive Veterinary Medicine</i> , 2017, 144, 167-178.	1.9	67
33	Assessment of biosecurity and control measures to prevent incursion and to limit spread of emerging transboundary animal diseases in Europe: An expert survey. <i>Vaccine</i> , 2017, 35, 5956-5966.	3.8	8
34	Guidance on the Selection of Appropriate Indicators for Quantification of Antimicrobial Usage in Humans and Animals. <i>Zoonoses and Public Health</i> , 2017, 64, 165-184.	2.2	171
35	Antimicrobial Usage and -Resistance in Livestock: Where Should We Focus?. <i>Frontiers in Veterinary Science</i> , 2017, 4, 148.	2.2	58
36	Economics of One Health: Costs and benefits of integrated West Nile virus surveillance in Emilia-Romagna. <i>PLoS ONE</i> , 2017, 12, e0188156.	2.5	41

#	ARTICLE	IF	CITATIONS
37	Evidence for more cost-effective surveillance options for bovine spongiform encephalopathy (BSE) and scrapie in Great Britain. <i>Eurosurveillance</i> , 2017, 22, .	7.0	9
38	Abattoir condemnation data remain under-used in decision making. <i>Veterinary Record</i> , 2017, 180, 514-515.	0.3	9
39	“Next-Generation” Surveillance: An Epidemiologists’ Perspective on the Use of Molecular Information in Food Safety and Animal Health Decision-Making. <i>Zoonoses and Public Health</i> , 2016, 63, 351-357.	2.2	12
40	The biosecurity status and its associations with production and management characteristics in farrow-to-finish pig herds. <i>Animal</i> , 2016, 10, 478-489.	3.3	83
41	Higher perceived risks of antimicrobial use are related to lower usage among pig farmers in four European countries. <i>Veterinary Record</i> , 2016, 179, 490-490.	0.3	31
42	Mass vaccination, immunity and coverage: modelling population protection against foot-and-mouth disease in Turkish cattle. <i>Scientific Reports</i> , 2016, 6, 22121.	3.3	25
43	Europe Needs Consistent Teaching of the Economics of Animal Health. <i>EuroChoices</i> , 2016, 15, 42-49.	1.7	2
44	<i>Mycobacterium avium</i> ssp . <i>paratuberculosis</i> detection in animals, food, water and other sources or vehicles of human exposure: A scoping review of the existing evidence. <i>Preventive Veterinary Medicine</i> , 2016, 132, 32-48.	1.9	47
45	Risk factors for <i>Taenia saginata</i> cysticercus infection in cattle in the United Kingdom: A farm-level case-control study and assessment of the role of movement history, age and sex. <i>Preventive Veterinary Medicine</i> , 2016, 135, 1-8.	1.9	21
46	The potential Public Health Impact of <i>Mycobacterium avium</i> ssp <i>paratuberculosis</i> : Global Opinion Survey of Topic Specialists. <i>Zoonoses and Public Health</i> , 2016, 63, 212-222.	2.2	29
47	A Comparison of Pig Farmers' and Veterinarians' Perceptions and Intentions to Reduce Antimicrobial Usage in Six European Countries. <i>Zoonoses and Public Health</i> , 2016, 63, 534-544.	2.2	53
48	Quantitative and qualitative antimicrobial usage patterns in farrow-to-finish pig herds in Belgium, France, Germany and Sweden. <i>Preventive Veterinary Medicine</i> , 2016, 130, 41-50.	1.9	98
49	Modelling the within-herd transmission of <i>Mycoplasma hyopneumoniae</i> in closed pig herds. <i>Porcine Health Management</i> , 2016, 2, 10.	2.6	3
50	Evaluation of the relationship between the biosecurity status, production parameters, herd characteristics and antimicrobial usage in farrow-to-finish pig production in four EU countries. <i>Porcine Health Management</i> , 2016, 2, 9.	2.6	93
51	Economic Assessment of Zoonoses Surveillance in a “One Health” Context: A Conceptual Framework. <i>Zoonoses and Public Health</i> , 2016, 63, 386-395.	2.2	26
52	Genetic Adaptation of Influenza A Viruses in Domestic Animals and Their Potential Role in Interspecies Transmission: A Literature Review. <i>EcoHealth</i> , 2016, 13, 171-198.	2.0	25
53	Influenza surveillance in animals: what is our capacity to detect emerging influenza viruses with zoonotic potential?. <i>Epidemiology and Infection</i> , 2015, 143, 2187-2204.	2.1	12
54	Contribution of Meat Inspection to the surveillance of poultry health and welfare in the European Union. <i>Epidemiology and Infection</i> , 2015, 143, 2459-2472.	2.1	28

#	ARTICLE	IF	CITATIONS
55	Introduction to the special issue: Diseases, dilemmas, decisions: Epidemiological tools to find answers for difficult disease control problems. SCHWABE 2014 Symposium Honoring the Legacy of Dr Roger Morris. Preventive Veterinary Medicine, 2015, 122, 211-212.	1.9	0
56	The zoonotic potential of <i>Mycobacterium avium</i> ssp. <i>paratuberculosis</i> : a systematic review and meta-analyses of the evidence. Epidemiology and Infection, 2015, 143, 3135-3157.	2.1	91
57	Modelling the species jump: towards assessing the risk of human infection from novel avian influenzas. Royal Society Open Science, 2015, 2, 150173.	2.4	10
58	SERVAL: A New Framework for the Evaluation of Animal Health Surveillance. Transboundary and Emerging Diseases, 2015, 62, 33-45.	3.0	65
59	Status Report on Education in the Economics of Animal Health: Results from a European Survey. Journal of Veterinary Medical Education, 2015, 42, 36-44.	0.6	4
60	Randomised field trial to evaluate serological response after foot-and-mouth disease vaccination in Turkey. Vaccine, 2015, 33, 805-811.	3.8	26
61	Alternatives to the use of antimicrobial agents in pig production: A multi-country expert-ranking of perceived effectiveness, feasibility and return on investment. Preventive Veterinary Medicine, 2015, 118, 457-466.	1.9	94
62	One Health surveillance – More than a buzz word?. Preventive Veterinary Medicine, 2015, 120, 124-130.	1.9	102
63	Assigning defined daily doses animal: a European multi-country experience for antimicrobial products authorized for usage in pigs *. Journal of Antimicrobial Chemotherapy, 2015, 70, 294-302.	3.0	73
64	Review: Evaluation of Foot-and-Mouth Disease Control Using Fault Tree Analysis. Transboundary and Emerging Diseases, 2015, 62, 233-244.	3.0	5
65	Emerging zoonoses: tackling the challenges. Epidemiology and Infection, 2015, 143, 2015-2017.	2.1	7
66	Perceptions of antimicrobial usage, antimicrobial resistance and policy measures to reduce antimicrobial usage in convenient samples of Belgian, French, German, Swedish and Swiss pig farmers. Preventive Veterinary Medicine, 2015, 119, 10-20.	1.9	93
67	Impact of foot-and-mouth disease on milk production on a large-scale dairy farm in Kenya. Preventive Veterinary Medicine, 2015, 120, 177-186.	1.9	34
68	Impact of foot-and-mouth disease on mastitis and culling on a large-scale dairy farm in Kenya. Veterinary Research, 2015, 46, 41.	3.0	13
69	Green offal inspection of cattle, small ruminants and pigs in the United Kingdom: Impact assessment of changes in the inspection protocol on likelihood of detection of selected hazards. Research in Veterinary Science, 2015, 100, 31-38.	1.9	12
70	The value of information: Current challenges in surveillance implementation. Preventive Veterinary Medicine, 2015, 122, 229-234.	1.9	12
71	Epidemiological analysis of an outbreak of foot-and-mouth disease (serotype SAT2) on a large dairy farm in Kenya using regular vaccination. Acta Tropica, 2015, 143, 103-111.	2.0	32
72	Retrospective evaluation of foot-and-mouth disease vaccine effectiveness in Turkey. Vaccine, 2014, 32, 1848-1855.	3.8	45

#	ARTICLE	IF	CITATIONS
73	A qualitative risk assessment for visual-only post-mortem meat inspection of cattle, sheep, goats and farmed/wild deer. <i>Food Control</i> , 2014, 38, 96-103.	5.5	27
74	Qualitative study of factors associated with antimicrobial usage in seven small animal veterinary practices in the UK. <i>Preventive Veterinary Medicine</i> , 2014, 117, 68-78.	1.9	75
75	Contagious animal diseases: The science behind trade policies and standards. <i>Veterinary Journal</i> , 2014, 202, 7-10.	1.7	4
76	Assessing the expenditure distribution of animal health surveillance: the case of Great Britain. <i>Veterinary Record</i> , 2014, 174, 16-16.	0.3	15
77	Strengths and weaknesses of meat inspection as a contribution to animal health and welfare surveillance. <i>Food Control</i> , 2014, 39, 154-162.	5.5	86
78	Model for ranking freshwater fish farms according to their risk of infection and illustration for viral haemorrhagic septicaemia. <i>Preventive Veterinary Medicine</i> , 2014, 115, 263-279.	1.9	11
79	Expert consultation on risk factors for introduction of infectious pathogens into fish farms. <i>Preventive Veterinary Medicine</i> , 2014, 115, 238-254.	1.9	28
80	Proposed terms and concepts for describing and evaluating animal-health surveillance systems. <i>Preventive Veterinary Medicine</i> , 2013, 112, 1-12.	1.9	143
81	Risk-based methods for fish and terrestrial animal disease surveillance. <i>Preventive Veterinary Medicine</i> , 2013, 112, 13-26.	1.9	67
82	Livestock Density as Risk Factor for Livestock-associated Methicillin-Resistant <i>Staphylococcus aureus</i> , the Netherlands. <i>Emerging Infectious Diseases</i> , 2013, 19, 1551-2.	4.3	3
83	Economic principles for resource allocation decisions at national level to mitigate the effects of disease in farm animal populations. <i>Epidemiology and Infection</i> , 2013, 141, 91-101.	2.1	51
84	Q fever in humans and farm animals in four European countries, 1982 to 2010. <i>Eurosurveillance</i> , 2013, 18, .	7.0	165
85	Evaluation of animal and public health surveillance systems: a systematic review. <i>Epidemiology and Infection</i> , 2012, 140, 575-590.	2.1	97
86	Evaluating surveillance programmes: ensuring value for money. <i>Veterinary Record</i> , 2012, 171, 421-422.	0.3	1
87	An economic model to evaluate the mitigation programme for bovine viral diarrhoea in Switzerland. <i>Preventive Veterinary Medicine</i> , 2012, 106, 162-173.	1.9	36
88	A Metapopulation Model to Assess the Capacity of Spread of Methicillin-Resistant <i>Staphylococcus aureus</i> ST398 in Humans. <i>PLoS ONE</i> , 2012, 7, e47504.	2.5	16
89	Economic evaluation of the surveillance and intervention programme for bluetongue virus serotype 8 in Switzerland. <i>Preventive Veterinary Medicine</i> , 2012, 103, 93-111.	1.9	40
90	A qualitative approach to measure the effectiveness of active avian influenza virus surveillance with respect to its cost: A case study from Switzerland. <i>Preventive Veterinary Medicine</i> , 2012, 105, 209-222.	1.9	9

#	ARTICLE	IF	CITATIONS
91	Implementing a probabilistic definition of freedom from infection to facilitate trade of livestock: Putting theory into praxis for the example of bovine herpes virus-1. Preventive Veterinary Medicine, 2012, 105, 195-201.	1.9	6
92	Policy-driven development of cost-effective, risk-based surveillance strategies. Preventive Veterinary Medicine, 2012, 105, 176-184.	1.9	28
93	Optimizing early detection of avian influenza H5N1 in backyard and free-range poultry production systems in Thailand. Preventive Veterinary Medicine, 2012, 105, 223-234.	1.9	20
94	First international conference on animal health surveillance (ICAHS). Preventive Veterinary Medicine, 2012, 105, 165-168.	1.9	2
95	Evidence-based use of antimicrobials in veterinary practice. In Practice, 2011, 33, 194-202.	0.2	13
96	Towards a conceptual framework to support one-health research for policy on emerging zoonoses. Lancet Infectious Diseases, The, 2011, 11, 326-331.	9.1	188
97	Assessment of Farm-Level Biosecurity Measures after an Outbreak of Avian Influenza in the United Kingdom. Transboundary and Emerging Diseases, 2011, 58, 69-75.	3.0	7
98	Antimicrobial usage in dogs and cats in first opinion veterinary practices in the UK. Journal of Small Animal Practice, 2011, 52, 515-521.	1.2	70
99	Assessment and quantification of post-weaning multi-systemic wasting syndrome severity at farm level. Preventive Veterinary Medicine, 2011, 98, 19-28.	1.9	23
100	Farm level risk factors associated with severity of post-weaning multi-systemic wasting syndrome. Preventive Veterinary Medicine, 2011, 101, 182-191.	1.9	22
101	Conceptualising the technical relationship of animal disease surveillance to intervention and mitigation as a basis for economic analysis. BMC Health Services Research, 2011, 11, 225.	2.2	61
102	Epidemiology of methicillin-resistant Staphylococcus aureus with emphasis on veterinary and community settings. Epidemiology and Infection, 2010, 138, 593-594.	2.1	1
103	Risk attribution of Campylobacter infection by age group using exposure modelling. Epidemiology and Infection, 2010, 138, 1748-1761.	2.1	23
104	Comparing the demonstration of freedom from <i>Trichinella</i> infection of domestic pigs by traditional and risk-based surveillance. Epidemiology and Infection, 2010, 138, 1242-1251.	2.1	14
105	Risks of animal-derived food in a global market – Are we ready for the challenges?. Veterinary Journal, 2010, 184, 121-123.	1.7	2
106	Evaluation of effectiveness and efficiency of wild bird surveillance for avian influenza. Veterinary Research, 2010, 41, 50.	3.0	34
107	Ducks as Sentinels for Avian Influenza in Wild Birds. Emerging Infectious Diseases, 2009, 15, 1633-1636.	4.3	41
108	Strengths, weaknesses, opportunities and threats of the pig health monitoring systems used in England. Veterinary Record, 2009, 165, 461-465.	0.3	29

#	ARTICLE	IF	CITATIONS
109	Risk scoring for setting priorities in a monitoring of antimicrobial resistance in meat and meat products. <i>International Journal of Food Microbiology</i> , 2009, 130, 94-100.	4.7	24
110	An investigation on the <i>Culicoides</i> species composition at seven sites in southern Switzerland. <i>Medical and Veterinary Entomology</i> , 2009, 23, 93-98.	1.5	23
111	A survey of small animal disease in veterinary practice in the UK. <i>Journal of Small Animal Practice</i> , 2009, 50, 504-504.	1.2	0
112	Establishing a cost-effective national surveillance system for Bluetongue using scenario tree modelling. <i>Veterinary Research</i> , 2009, 40, 57.	3.0	33
113	Estimating the temporal and spatial risk of bluetongue related to the incursion of infected vectors into Switzerland. <i>BMC Veterinary Research</i> , 2008, 4, 42.	1.9	33
114	Comparative assessment of passive surveillance in disease-free and endemic situation: Example of <i>Brucella melitensis</i> surveillance in Switzerland and in Bosnia and Herzegovina. <i>BMC Veterinary Research</i> , 2008, 4, 52.	1.9	19
115	Occurrence of antimicrobial resistance among bacterial pathogens and indicator bacteria in pigs in different European countries from year 2002 – 2004: the ARBAO-II study. <i>Acta Veterinaria Scandinavica</i> , 2008, 50, 19.	1.6	70
116	Prevalence of antimicrobial resistance among bacterial pathogens isolated from cattle in different European countries: 2002–2004. <i>Acta Veterinaria Scandinavica</i> , 2008, 50, 28.	1.6	125
117	Efficiency of risk-based vs. random sampling for the monitoring of tetracycline residues in slaughtered calves in Switzerland. <i>Food Additives and Contaminants - Part A Chemistry, Analysis, Control, Exposure and Risk Assessment</i> , 2008, 25, 566-573.	2.3	14
118	Surveillance of H5 Avian Influenza Virus in Wild Birds Found Dead. <i>Avian Diseases</i> , 2008, 52, 100-105.	1.0	20
119	Evaluation and optimization of surveillance systems for rare and emerging infectious diseases. <i>Veterinary Research</i> , 2008, 39, 57.	3.0	102
120	Evaluation of the chemical residue monitoring in animal-derived products in Switzerland. <i>Food Additives and Contaminants</i> , 2007, 24, 590-597.	2.0	3
121	Prevalence of classical swine fever, Aujeszky's disease and brucellosis in a population of wild boar in Switzerland. <i>Veterinary Record</i> , 2007, 160, 362-368.	0.3	51
122	A stochastic simulation model to determine the sample size of repeated national surveys to document freedom from bovine herpesvirus 1 (BoHV-1) infection. <i>BMC Veterinary Research</i> , 2007, 3, 10.	1.9	11
123	Bovine virus diarrhea and the vector-borne diseases Anaplasmosis and Bluetongue: a sero-surveillance in free-ranging red deer (<i>Cervus elaphus</i>) in selected areas of Switzerland. <i>European Journal of Wildlife Research</i> , 2007, 53, 226-230.	1.4	7
124	Serosurveillance for selected infectious disease agents in wild boars (<i>Sus scrofa</i>) and outdoor pigs in Switzerland. <i>European Journal of Wildlife Research</i> , 2007, 53, 212-220.	1.4	46
125	Phenon cluster analysis as a method to investigate epidemiological relatedness between sources of <i>Campylobacter jejuni</i> . <i>Journal of Applied Microbiology</i> , 2006, 100, 316-324.	3.1	13
126	Bluetongue vector species of <i>Culicoides</i> in Switzerland. <i>Medical and Veterinary Entomology</i> , 2006, 20, 239-247.	1.5	35

#	ARTICLE	IF	CITATIONS
127	Neospora caninum: Serological follow-up in dairy cows during pregnancy. <i>Veterinary Parasitology</i> , 2006, 137, 222-230.	1.8	9
128	Incidence of Neospora caninum and other intestinal protozoan parasites in populations of Swiss dogs. <i>Veterinary Parasitology</i> , 2006, 139, 84-92.	1.8	27
129	No evidence of bluetongue virus in Switzerland. <i>Veterinary Microbiology</i> , 2006, 116, 13-20.	1.9	8
130	Performance evaluation of a competitive ELISA test used for Bluetongue antibody detection in France, a recently infected area. <i>Veterinary Microbiology</i> , 2006, 118, 57-66.	1.9	12
131	Analysis of national serological surveys for the documentation of freedom from porcine reproductive and respiratory syndrome in Switzerland. <i>Veterinary Microbiology</i> , 2006, 118, 267-273.	1.9	12
132	Financial analysis of various strategies for the control of Neospora caninum in dairy cattle in Switzerland. <i>Preventive Veterinary Medicine</i> , 2006, 77, 230-253.	1.9	51
133	Simulating the impact of four control strategies on the population dynamics of Neospora caninum infection in Swiss dairy cattle. <i>Preventive Veterinary Medicine</i> , 2006, 77, 254-283.	1.9	44
134	Concepts for risk-based surveillance in the field of veterinary medicine and veterinary public health: Review of current approaches. <i>BMC Health Services Research</i> , 2006, 6, 20.	2.2	236
135	Sentinel surveillance systems with special focus on vector-borne diseases. <i>Animal Health Research Reviews</i> , 2006, 7, 71-79.	3.1	28
