#	ARTICLE	IF	CITATIONS
1	The three-dimensional construction of leaves is coordinated with water use efficiency in conifers. <i>New Phytologist</i> , 2022, 233, 851-861.	3.5	9
2	Foliar water uptake does not contribute to embolism repair in beech (<i>Fagus sylvatica</i> L.). <i>Annals of Botany</i> , 2022, , .	1.4	5
3	Structural organization of the spongy mesophyll. <i>New Phytologist</i> , 2022, 234, 946-960.	3.5	29
4	Desiccation of the leaf mesophyll and its implications for CO ₂ diffusion and light processing. <i>Plant, Cell and Environment</i> , 2022, 45, 1362-1381.	2.8	15
5	Pathogen-induced hydraulic decline limits photosynthesis and starch storage in grapevines (<i>Vitis</i> sp.). <i>Plant, Cell and Environment</i> , 2022, 45, 1829-1842.	2.8	5
6	Conduit position and connectivity affect the likelihood of xylem embolism during natural drought in evergreen woodland species. <i>Annals of Botany</i> , 2022, 130, 431-444.	1.4	5
7	Leaf cell-specific and single-cell transcriptional profiling reveals a role for the palisade layer in UV light protection. <i>Plant Cell</i> , 2022, 34, 3261-3279.	3.1	31
8	Differences in grapevine rootstock sensitivity and recovery from drought are linked to fine root cortical lacunae and root tip function. <i>New Phytologist</i> , 2021, 229, 272-283.	3.5	50
9	Xylem network connectivity and embolism spread in grapevine (<i>Vitis vinifera</i> L.). <i>Plant Physiology</i> , 2021, 186, 373-387.	2.3	32
10	Diversification, disparification and hybridization in the desert shrubs <i>Encelia</i> . <i>New Phytologist</i> , 2021, 230, 1228-1241.	3.5	10
11	Hydraulic consequences of enzymatic breakdown of grapevine pit membranes. <i>Plant Physiology</i> , 2021, 186, 1919-1931.	2.3	9
12	By the narrowest of margins: nano-scale modification of pit membranes and the fate of plants during drought. A commentary on: "Intervessel pit membrane thickness best explains variation in embolism resistance amongst stems of <i>Arabidopsis thaliana</i> accessions". <i>Annals of Botany</i> , 2021, 128, iii-v.	1.4	0
13	Linking xylem network failure with leaf tissue death. <i>New Phytologist</i> , 2021, 232, 68-79.	3.5	64
14	Ecologically driven selection of nonstructural carbohydrate storage in oak trees. <i>New Phytologist</i> , 2021, 232, 567-578.	3.5	9
15	Desiccation and rehydration dynamics in the epiphytic resurrection fern <i>Pleopeltis polypodioides</i> . <i>Plant Physiology</i> , 2021, 187, 1501-1518.	2.3	11
16	Maximum CO ₂ diffusion inside leaves is limited by the scaling of cell size and genome size. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2021, 288, 20203145.	1.2	52
17	The Scaling of Genome Size and Cell Size Limits Maximum Rates of Photosynthesis with Implications for Ecological Strategies. <i>International Journal of Plant Sciences</i> , 2020, 181, 75-87.	0.6	96
18	Seasonal coordination of leaf hydraulics and gas exchange in a wintergreen fern. <i>AoB PLANTS</i> , 2020, 12, plaa048.	1.2	9

#	ARTICLE	IF	CITATIONS
19	Anatomical and hydraulic responses to desiccation in emergent conifer seedlings. <i>American Journal of Botany</i> , 2020, 107, 1177-1188.	0.8	5
20	Digitally deconstructing leaves in 3D using X-ray microcomputed tomography and machine learning. <i>Applications in Plant Sciences</i> , 2020, 8, e11380.	0.8	23
21	Xylem Embolism Spreads by Single-Conduit Events in Three Dry Forest Angiosperm Stems. <i>Plant Physiology</i> , 2020, 184, 212-222.	2.3	33
22	Identifying the pathways for foliar water uptake in beech (<i>Fagus sylvatica</i> L.): a major role for trichomes. <i>Plant Journal</i> , 2020, 103, 769-780.	2.8	41
23	Natural selection maintains species despite frequent hybridization in the desert shrub <i>Encelia</i> . <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 33373-33383.	3.3	21
24	Coordinated decline of leaf hydraulic and stomatal conductances under drought is not linked to leaf xylem embolism for different grapevine cultivars. <i>Journal of Experimental Botany</i> , 2020, 71, 7286-7300.	2.4	18
25	The functional implications of tracheary connections across growth rings in four northern hardwood trees. <i>Annals of Botany</i> , 2019, 124, 297-306.	1.4	11
26	Hydraulic conductance, resistance, and resilience: how leaves of a tropical epiphyte respond to drought. <i>American Journal of Botany</i> , 2019, 106, 943-957.	0.8	12
27	Influence of dry season on <i>Quercus suber</i> L. leaf traits in the Iberian Peninsula. <i>American Journal of Botany</i> , 2019, 106, 656-666.	0.8	5
28	Functional Status of Xylem Through Time. <i>Annual Review of Plant Biology</i> , 2019, 70, 407-433.	8.6	79
29	The Spatial Distribution of Chlorophyll in Leaves. <i>Plant Physiology</i> , 2019, 180, 1406-1417.	2.3	36
30	Spatiotemporal Coupling of Vessel Cavitation and Discharge of Stored Xylem Water in a Tree Sapling. <i>Plant Physiology</i> , 2019, 179, 1658-1668.	2.3	39
31	Hydraulic traits are more diverse in flowers than in leaves. <i>New Phytologist</i> , 2019, 223, 193-203.	3.5	42
32	Seedling Survival at Timberline Is Critical to Conifer Mountain Forest Elevation and Extent. <i>Frontiers in Forests and Global Change</i> , 2019, 2, .	1.0	40
33	In vivo pressure gradient heterogeneity increases flow contribution of small diameter vessels in grapevine. <i>Nature Communications</i> , 2019, 10, 5645.	5.8	41
34	Embracing 3D Complexity in Leaf Carbon-Water Exchange. <i>Trends in Plant Science</i> , 2019, 24, 15-24.	4.3	55
35	Water uptake can occur through woody portions of roots and facilitates localized embolism repair in grapevine. <i>New Phytologist</i> , 2018, 218, 506-516.	3.5	28
36	In vivo quantification of plant starch reserves at micrometer resolution using X-ray micro-CT imaging and machine learning. <i>New Phytologist</i> , 2018, 218, 1260-1269.	3.5	38

#	ARTICLE	IF	CITATIONS
37	Hydraulic safety margins and air-seeding thresholds in roots, trunks, branches and petioles of four northern hardwood trees. <i>New Phytologist</i> , 2018, 219, 77-88.	3.5	47
38	Water relations of <i>Calycanthus</i> flowers: Hydraulic conductance, capacitance, and embolism resistance. <i>Plant, Cell and Environment</i> , 2018, 41, 2250-2262.	2.8	39
39	<i>In vivo</i> visualization of the final stages of xylem vessel refilling in grapevine (<i>Vitis</i>). <i>Journal of Experimental Botany</i> , 2018, 69, 1077-1088.	8.5	56
40	Laser surgery reveals the biomechanical and chemical signaling functions of aphid siphunculi (cornicles). <i>PLoS ONE</i> , 2018, 13, e0204984.	1.1	3
41	The Causes of Leaf Hydraulic Vulnerability and Its Influence on Gas Exchange in <i>Arabidopsis thaliana</i> . <i>Plant Physiology</i> , 2018, 178, 1584-1601.	2.3	50
42	Triggers of tree mortality under drought. <i>Nature</i> , 2018, 558, 531-539.	13.7	957
43	Variations in xylem embolism susceptibility under drought between intact saplings of three walnut species. <i>Tree Physiology</i> , 2018, 38, 1180-1192.	1.4	25
44	Whole root system water conductance responds to both axial and radial traits and network topology over natural range of trait variation. <i>Journal of Theoretical Biology</i> , 2018, 456, 49-61.	0.8	22
45	Beyond Porosity: 3D Leaf Intercellular Airspace Traits That Impact Mesophyll Conductance. <i>Plant Physiology</i> , 2018, 178, 148-162.	2.3	75
46	Outside-Xylem Vulnerability, Not Xylem Embolism, Controls Leaf Hydraulic Decline during Dehydration. <i>Plant Physiology</i> , 2017, 173, 1197-1210.	2.3	195
47	Excess Diffuse Light Absorption in Upper Mesophyll Limits CO ₂ Drawdown and Depresses Photosynthesis. <i>Plant Physiology</i> , 2017, 174, 1082-1096.	2.3	28
48	Storage Compartments for Capillary Water Rarely Refill in an Intact Woody Plant. <i>Plant Physiology</i> , 2017, 175, 1649-1660.	2.3	31
49	MicroCT imaging as a tool to study vessel endings in situ. <i>American Journal of Botany</i> , 2017, 104, 1424-1430.	0.8	13
50	The bias of a two-dimensional view: comparing two-dimensional and three-dimensional mesophyll surface area estimates using noninvasive imaging. <i>New Phytologist</i> , 2017, 215, 1609-1622.	3.5	57
51	Leaf vein xylem conduit diameter influences susceptibility to embolism and hydraulic decline. <i>New Phytologist</i> , 2017, 213, 1076-1092.	3.5	102
52	The Parenchyma of Secondary Xylem and Its Critical Role in Tree Defense against Fungal Decay in Relation to the CODIT Model. <i>Frontiers in Plant Science</i> , 2016, 7, 1665.	1.7	79
53	Embolism spread in the primary xylem of <i>Polystichum munitum</i> : implications for water transport during seasonal drought. <i>Plant, Cell and Environment</i> , 2016, 39, 338-346.	2.8	9
54	Bark water uptake promotes localized hydraulic recovery in coastal redwood crown. <i>Plant, Cell and Environment</i> , 2016, 39, 320-328.	2.8	84

#	ARTICLE	IF	CITATIONS
55	Grapevine petioles are more sensitive to drought induced embolism than stems: evidence from <i>in vivo</i> MRI and microcomputed tomography observations of hydraulic vulnerability segmentation. <i>Plant, Cell and Environment</i> , 2016, 39, 1886-1894.	2.8	82
56	Hydraulic conductance and the maintenance of water balance in flowers. <i>Plant, Cell and Environment</i> , 2016, 39, 2123-2132.	2.8	56
57	Finding support for theoretical tradeoffs in xylem structure and function. <i>New Phytologist</i> , 2016, 209, 8-10.	3.5	26
58	Mechanical Failure of Fine Root Cortical Cells Initiates Plant Hydraulic Decline during Drought. <i>Plant Physiology</i> , 2016, 172, 1669-1678.	2.3	120
59	In Situ Visualization of the Dynamics in Xylem Embolism Formation and Removal in the Absence of Root Pressure: A Study on Excised Grapevine Stems. <i>Plant Physiology</i> , 2016, 171, 1024-1036.	2.3	85
60	New frontiers in the three-dimensional visualization of plant structure and function. <i>American Journal of Botany</i> , 2016, 103, 184-188.	0.8	81
61	The use of laser light to enhance the uptake of foliar-applied substances into citrus (<i>Citrus</i>). <i>Journal of Horticultural Science and Biotechnology</i> , 2016, 147, 107-114.	0.8	21
62	Synchrotron X-ray microtomography of xylem embolism in <i>Sequoia sempervirens</i> saplings during cycles of drought and recovery. <i>New Phytologist</i> , 2015, 205, 1095-1105.	3.5	127
63	Direct X-Ray Microtomography Observation Confirms the Induction of Embolism upon Xylem Cutting under Tension. <i>Plant Physiology</i> , 2015, 167, 40-43.	2.3	156
64	Grapevine species from varied native habitats exhibit differences in embolism formation/repair associated with leaf gas exchange and root pressure. <i>Plant, Cell and Environment</i> , 2015, 38, 1503-1513.	2.8	85
65	The Structure and Function of Xylem in Seed-Free Vascular Plants: An Evolutionary Perspective. <i>Plant Physiology</i> , 2015, 167, 1-37.		20
66	Patterns of drought-induced embolism formation and spread in living walnut saplings visualized using X-ray microtomography. <i>Tree Physiology</i> , 2015, 35, 744-755.	1.4	53
67	Cavitation Resistance in Seedless Vascular Plants: The Structure and Function of Interconduit Pit Membranes. <i>Plant Physiology</i> , 2014, 165, 895-904.	2.3	53
68	Contrasting hydraulic architecture and function in deep and shallow roots of tree species from a semi-arid habitat. <i>Annals of Botany</i> , 2014, 113, 617-627.	1.4	22
69	Phloem Production in Huanglongbing-affected Citrus Trees. <i>Hortscience: A Publication of the American Society for Horticultural Science</i> , 2014, 49, 59-64.	0.5	34
70	Visualizing water transport in roots: advanced imaging tools for an expanding field. <i>Plant and Soil</i> , 2013, 366, 29-32.	1.8	5
71	Analysis of HRCT-derived xylem network reveals reverse flow in some vessels. <i>Journal of Theoretical Biology</i> , 2013, 333, 146-155.	0.8	25
72	Xylem vessel relays contribute to radial connectivity in grapevine stems (<i>Vitis vinifera</i> and <i>V. rotundifolia</i>). <i>Plant Physiology</i> , 2013, 161, 107-114.	0.8	60

#	ARTICLE	IF	CITATIONS
73	Visualizing wood anatomy in three dimensions with high-resolution X-ray micro-tomography (µCT) – a review. IAWA Journal, 2013, 34, 408-424.	2.7	64
74	The physiological resilience of fern sporophytes and gametophytes: advances in water relations offer new insights into an old lineage. Frontiers in Plant Science, 2013, 4, 285.	1.7	79
75	Maintenance of xylem Network Transport Capacity: A Review of Embolism Repair in Vascular Plants. Frontiers in Plant Science, 2013, 4, 108.	1.7	248
76	In Vivo Visualizations of Drought-Induced Embolism Spread in <i>Vitis vinifera</i> . Plant Physiology, 2013, 161, 1820-1829.	2.3	179
77	Using High Resolution Computed Tomography to Visualize the Three Dimensional Structure and Function of Plant Vasculature. Journal of Visualized Experiments, 2013, , .	0.2	32
78	X-ray micro-tomography at the Advanced Light Source. Proceedings of SPIE, 2012, , .	0.8	54
79	Centrifuge technique consistently overestimates vulnerability to water stress-induced cavitation in grapevines as confirmed with high-resolution computed tomography. New Phytologist, 2012, 196, 661-665.	3.5	50
80	The physiological implications of primary xylem organization in two ferns. Plant, Cell and Environment, 2012, 35, 1898-1911.	2.8	42
81	Automated analysis of three-dimensional xylem networks using high-resolution computed tomography. New Phytologist, 2011, 191, 1168-1179.	3.5	122
82	Measurement of vulnerability to water stress-induced cavitation in grapevine: a comparison of four techniques applied to a long-veesled species. Plant, Cell and Environment, 2010, 33, no-no.	2.8	175
83	Measurement of the Optical Properties of Leaves Under Diffuse Light. Photochemistry and Photobiology, 2010, 86, 1076-1083.	1.3	55
84	Do changes in light direction affect absorption profiles in leaves?. Functional Plant Biology, 2010, 37, 403.	1.1	185
85	The Dynamics of Embolism Repair in Xylem: In Vivo Visualizations Using High-Resolution Computed Tomography. Plant Physiology, 2010, 154, 1088-1095.	2.3	335
86	A new paradigm in leaf-level photosynthesis: direct and diffuse lights are not equal. Plant, Cell and Environment, 2008, 31, 159-164.	2.8	136
87	Genetic variation in photosynthetic characteristics among invasive and native populations of reed canarygrass (<i>Phalaris arundinacea</i>). Biological Invasions, 2008, 10, 1317-1325.	1.2	38
88	Do epidermal lens cells facilitate the absorptance of diffuse light?. American Journal of Botany, 2007, 94, 1061-1066.	0.8	94
89	Photosynthesis during an Episodic Drought in <i>Abies lasiocarpa</i> and <i>Picea engelmannii</i> across an Alpine Treeline. Arctic, Antarctic, and Alpine Research, 2006, 38, 34-41.	0.4	28
90	Leaf architecture and direction of incident light influence mesophyll fluorescence profiles. American Journal of Botany, 2005, 92, 1425-1431.	0.8	62

#	ARTICLE	IF	CITATIONS
91	Integrated plant temperature measurement using heat-sensitive paint and colour image analysis. <i>Functional Ecology</i> , 2004, 18, 148-153.	1.7	6
