#	ARTICLE	IF	CITATIONS
1	Augmenting PTSD treatment with physical activity: study protocol of the APPART study (Augmentation) Tj ETQq1	1.0784314	4 rgBT /Ove
2	Reply to: Crossing the "Birth Border" for Epigenetic Effects. <i>Biological Psychiatry</i> , 2022, 92, e25-e26.	1.3	1
3	Adolescents' affective and neural responses to parental praise and criticism. <i>Developmental Cognitive Neuroscience</i> , 2022, 54, 101099.	4.0	12
4	Neural and Affective Responses to Prolonged Eye Contact with One's Own Adolescent Child and Unfamiliar Others. <i>NeuroImage</i> , 2022, 260, 119463.	4.2	2
5	Vicarious praise and pain: parental neural responses to social feedback about their adolescent child. <i>Social Cognitive and Affective Neuroscience</i> , 2021, 16, 406-417.	3.0	8
6	Internalizing symptoms associate with the pace of epigenetic aging in childhood. <i>Biological Psychology</i> , 2021, 159, 108021.	2.2	13
7	Neural signatures of parental empathic responses to imagined suffering of their adolescent child. <i>NeuroImage</i> , 2021, 232, 117886.	4.2	7
8	How representative are neuroimaging samples? Large-scale evidence for trait anxiety differences between fMRI and behaviour-only research participants. <i>Social Cognitive and Affective Neuroscience</i> , 2021, 16, 1057-1070.	3.0	24
9	Feeling Empathically Toward Other People and the Self: The Role of Perspective Shifting in Emotion Sharing and Self-Reassurance. <i>Clinical Psychological Science</i> , 2020, 8, 169-183.	4.0	7
10	The PedBE clock accurately estimates DNA methylation age in pediatric buccal cells. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 23329-23335.	7.1	140
11	Empathy and mentalizing abilities in relation to psychosocial stress in healthy adult men and women. <i>Heliyon</i> , 2020, 6, e04488.	3.2	12
12	Not the Root of the Problem" Hair Cortisol and Cortisone Do Not Mediate the Effect of Child Maltreatment on Body Mass Index. <i>Frontiers in Psychiatry</i> , 2020, 11, 387.	2.6	11
13	Intergenerational transmission of child maltreatment using a multi-informant multi-generation family design. <i>PLoS ONE</i> , 2020, 15, e0225839.	2.5	26
14	Maternal antenatal depression and child mental health: Moderation by genomic risk for attention-deficit/hyperactivity disorder. <i>Development and Psychopathology</i> , 2020, 32, 1810-1821.	2.3	12
15	Fetal and Infant Outcomes in the Offspring of Parents With Perinatal Mental Disorders: Earliest Influences. <i>Frontiers in Psychiatry</i> , 2019, 10, 391.	2.6	92
16	An intergenerational family study on the impact of experienced and perpetrated child maltreatment on neural face processing. <i>Psychoneuroendocrinology</i> , 2019, 103, 266-275.	2.7	7
17	Parents' experiences of childhood abuse and neglect are differentially associated with behavioral and autonomic responses to their offspring. <i>Developmental Psychobiology</i> , 2019, 61, 888-902.	1.6	13
18	The genetic and environmental etiology of child maltreatment in a parent-based extended family design. <i>Development and Psychopathology</i> , 2019, 31, 157-172.	2.3	23

#	ARTICLE	IF	CITATIONS
19	The Loss of the Self in Memory: Self-Referential Memory, Childhood Relational Trauma, and Dissociation. <i>Clinical Psychological Science</i> , 2019, 7, 265-282.	4.0	7
20	Does silence speak louder than words? The impact of oncologists's™ emotion-oriented communication on analogue patients's™ information recall and emotional stress. <i>Patient Education and Counseling</i> , 2019, 102, 43-52.	2.2	31
21	Early relational trauma and self representations: Misattributing externally derived representations as internally generated.. <i>Psychological Trauma: Theory, Research, Practice, and Policy</i> , 2019, 11, 64-72.	2.1	9
22	Patients's™ and oncologists's™ views on how oncologists may best address patients's™ emotions during consultations: An interview study. <i>Patient Education and Counseling</i> , 2018, 101, 1223-1231.	2.2	15
23	Pass it on? The neural responses to rejection in the context of a family study on maltreatment. <i>Social Cognitive and Affective Neuroscience</i> , 2018, 13, 616-627.	3.0	11
24	Are psychophysiological arousal and self-reported emotional stress during an oncological consultation related to memory of medical information? An experimental study. <i>Stress</i> , 2017, 20, 103-111.	1.8	20
25	The association of childhood maltreatment with depression and anxiety is not moderated by the oxytocin receptor gene. <i>European Archives of Psychiatry and Clinical Neuroscience</i> , 2017, 267, 517-526.	3.2	32
26	Parent-Child Agreement on Parent-to-Child Maltreatment. <i>Journal of Family Violence</i> , 2017, 32, 207-217.	3.3	29
27	Does oxytocin lead to emotional interference during a working memory paradigm?. <i>Psychopharmacology</i> , 2017, 234, 3467-3474.	3.1	4
28	A new perspective on PTSD symptoms after traumatic vs stressful life events and the role of gender. <i>HÅrre Utbildning</i> , 2017, 8, 1380470.	3.0	22
29	The value of physicians's™ affect-oriented communication for patients's™ recall of information. <i>Patient Education and Counseling</i> , 2017, 100, 2116-2120.	2.2	16
30	Mineralocorticoid receptor haplotype moderates the effects of oral contraceptives and menstrual cycle on emotional information processing. <i>Journal of Psychopharmacology</i> , 2016, 30, 1054-1061.	4.0	25
31	Analogue patients's™ self-reported engagement and psychophysiological arousal in a video-vignettes design: Patients versus disease-naïve individuals. <i>Patient Education and Counseling</i> , 2016, 99, 1724-1732.	2.2	22
32	Weakened Cognitive Empathy in Individuals with Dissociation Proneness. <i>Journal of Social and Clinical Psychology</i> , 2016, 35, 425-436.	0.5	7
33	Prolonged Non-metabolic Heart Rate Variability Reduction as a Physiological Marker of Psychological Stress in Daily Life. <i>Annals of Behavioral Medicine</i> , 2016, 50, 704-714.	2.9	47
34	Ambulatory assessed implicit affect is associated with salivary cortisol. <i>Frontiers in Psychology</i> , 2015, 6, 111.	2.1	21
35	Enhanced orienting of attention in response to emotional gaze cues after oxytocin administration in healthy young men. <i>Psychoneuroendocrinology</i> , 2013, 38, 1797-1802.	2.7	59
36	Remembering and diagnosing clients: Does experience matter?. <i>Memory</i> , 2012, 20, 266-276.	1.7	12

#	ARTICLE	IF	CITATIONS
37	Cortisol in the first year of life: Normative values and intra-individual variability. <i>Early Human Development</i> , 2010, 86, 13-16.	1.8	55
38	Affect-congruent approach and withdrawal movements of happy and angry faces facilitate affective categorisation. <i>Cognition and Emotion</i> , 2010, 24, 863-875.	2.0	26
39	Propranolol reduces emotional distraction in working memory: A partial mediating role of propranolol-induced cortisol increases?. <i>Neurobiology of Learning and Memory</i> , 2010, 93, 388-395.	1.9	39
40	Hydrocortisone reduces emotional distracter interference in working memory. <i>Psychoneuroendocrinology</i> , 2009, 34, 1284-1293.	2.7	80
41	Psychophysiological responding to emotional memories in healthy young men after cortisol and propranolol administration. <i>Psychopharmacology</i> , 2009, 203, 793-803.	3.1	38
42	Immediate and prolonged effects of cortisol, but not propranolol, on memory retrieval in healthy young men. <i>Neurobiology of Learning and Memory</i> , 2009, 91, 23-31.	1.9	91
43	Autobiographical memory after acute stress in healthy young men. <i>Memory</i> , 2009, 17, 301-310.	1.7	24
44	The effects of cortisol increase on long-term memory retrieval during and after acute psychosocial stress. <i>Acta Psychologica</i> , 2008, 127, 542-552.	1.5	71
45	Diminished cortisol responses to psychosocial stress associated with lifetime adverse events. <i>Psychoneuroendocrinology</i> , 2008, 33, 227-237.	2.7	308
46	Long-term outcomes of memory retrieval under stress.. <i>Behavioral Neuroscience</i> , 2008, 122, 697-703.	1.2	23
47	Are Retrospective Measures of Change in Quality of Life More Valid Than Prospective Measures?. <i>Medical Care</i> , 2007, 45, 199-205.	2.4	31
48	Sustained Attention and Executive Functioning Performance in Attention-Deficit/Hyperactivity Disorder. <i>Child Neuropsychology</i> , 2005, 11, 285-294.	1.3	35
