| #  | Article                                                                                                                                                                                                                                    | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | A Guideline for Reporting Mediation Analyses of Randomized Trials and Observational Studies. JAMA -<br>Journal of the American Medical Association, 2021, 326, 1045.                                                                       | 7.4 | 169       |
| 2  | Mediation analysis methods used in observational research: a scoping review and recommendations.<br>BMC Medical Research Methodology, 2021, 21, 226.                                                                                       | 3.1 | 77        |
| 3  | Comparison of logistic-regression based methods for simple mediation analysis with a dichotomous outcome variable. BMC Medical Research Methodology, 2019, 19, 19.                                                                         | 3.1 | 71        |
| 4  | Causal Mediation Programs in R, M <i>plus</i> , SAS, SPSS, and Stata. Structural Equation Modeling, 2020, 27, 975-984.                                                                                                                     | 3.8 | 70        |
| 5  | Transitions across cognitive states and death among older adults in relation to education: A<br>multistate survival model using data from six longitudinal studies. Alzheimer's and Dementia, 2018, 14,<br>462-472.                        | 0.8 | 47        |
| 6  | Comparison of methods for the analysis of relatively simple mediation models. Contemporary Clinical<br>Trials Communications, 2017, 7, 130-135.                                                                                            | 1.1 | 46        |
| 7  | Intention-to-treat analysis when only a baseline value is available. Contemporary Clinical Trials<br>Communications, 2020, 20, 100684.                                                                                                     | 1.1 | 27        |
| 8  | Family integrated care in single family rooms for preterm infants and late-onset sepsis: a retrospective study and mediation analysis. Pediatric Research, 2020, 88, 593-600.                                                              | 2.3 | 25        |
| 9  | The Use of Traditional and Causal Estimators for Mediation Models with a Binary Outcome and Exposure-Mediator Interaction. Structural Equation Modeling, 2021, 28, 345-355.                                                                | 3.8 | 25        |
| 10 | Statistical Mediation Analysis for Models with a Binary Mediator and a Binary Outcome: the<br>Differences Between Causal and Traditional Mediation Analysis. Prevention Science, 2023, 24, 408-418.                                        | 2.6 | 20        |
| 11 | Association of a Zero-Separation Neonatal Care Model With Stress in Mothers of Preterm Infants.<br>JAMA Network Open, 2022, 5, e224514.                                                                                                    | 5.9 | 18        |
| 12 | Decreased Pain and Improved Dynamic Knee Instability Mediate the Beneficial Effect of Wearing a Soft<br>Knee Brace on Activity Limitations in Patients With Knee Osteoarthritis. Arthritis Care and Research,<br>2019, 71, 1036-1043.      | 3.4 | 17        |
| 13 | Dietary intake of heme iron is associated with ferritin and hemoglobin levels in Dutch blood donors:<br>results from Donor InSight. Haematologica, 2020, 105, 2400-2406.                                                                   | 3.5 | 15        |
| 14 | Association of a Family Integrated Care Model With Paternal Mental Health Outcomes During<br>Neonatal Hospitalization. JAMA Network Open, 2022, 5, e2144720.                                                                               | 5.9 | 15        |
| 15 | Performance of methods to conduct mediation analysis with timeâ€ŧoâ€event outcomes. Statistica<br>Neerlandica, 2019, 74, 72.                                                                                                               | 1.6 | 11        |
| 16 | Distress, Work Satisfaction, and Work Ability are Mediators of the Relation Between Psychosocial<br>Working Conditions and Mental Health-Related Long-Term Sickness Absence. Journal of Occupational<br>Rehabilitation, 2021, 31, 419-430. | 2.2 | 9         |
| 17 | Explaining the association between frailty and mortality in older adults: The mediating role of<br>lifestyle, social, psychological, cognitive, and physical factors. Preventive Medicine Reports, 2021, 24,<br>101589.                    | 1.8 | 6         |
| 18 | Causal mediation effects in single case experimental designs Psychological Methods, 2023, 28, 488-506.                                                                                                                                     | 3.5 | 4         |

| #  | Article                                                                                                                                                                                                          | IF          | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|-----------|
| 19 | Assessing the Robustness of Mediation Analysis Results Using Multiverse Analysis. Prevention Science, 2021, , 1.                                                                                                 | 2.6         | 2         |
| 20 | O3â€02â€03: FACTORS AND TRANSITIONS BETWEEN COGNITIVE STATES: A MULTIâ€5TUDY APPROACH USING I<br>FROM SIX INTERNATIONAL LONGITUDINAL STUDIES OF AGEING. Alzheimer's and Dementia, 2018, 14, P1012.               | DATA<br>0.8 | 0         |
| 21 | Commentary: Explaining intervention and exposure effects: an introduction to mediation analysis.<br>Seminars in Thoracic and Cardiovascular Surgery, 2021, , .                                                   | 0.6         | 0         |
| 22 | Comparative study of two birth cohorts: did the explanatory role of behavioural, social and<br>psychological factors in educational inequalities in mortality change over time?. BMJ Open, 2022, 12,<br>e052204. | 1.9         | 0         |
