#	ARTICLE	IF	CITATIONS
1	Increase in short-chain ceramides correlates with an altered lipid organization and decreased barrier function in atopic eczema patients. <i>Journal of Lipid Research</i> , 2012, 53, 2755-2766.	4.2	349
2	Causes of epidermal filaggrin reduction and their role in the pathogenesis of atopic dermatitis. <i>Journal of Allergy and Clinical Immunology</i> , 2014, 134, 792-799.	2.9	324
3	Loss-of-Function Mutations in the Filaggrin Gene Lead to Reduced Level of Natural Moisturizing Factor in the Stratum Corneum. <i>Journal of Investigative Dermatology</i> , 2008, 128, 2117-2119.	0.7	273
4	Levels of filaggrin degradation products are influenced by both filaggrin genotype and atopic dermatitis severity. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2011, 66, 934-940.	5.7	251
5	Knockdown of Filaggrin Impairs Diffusion Barrier Function and Increases UV Sensitivity in a Human Skin Model. <i>Journal of Investigative Dermatology</i> , 2010, 130, 2286-2294.	0.7	236
6	Filaggrin loss-of-function mutations are associated with enhanced expression of IL-1 cytokines in the stratum corneum of patients with atopic dermatitis and in a murine model of filaggrin deficiency. <i>Journal of Allergy and Clinical Immunology</i> , 2012, 129, 1031-1039.e1.	2.9	226
7	The effect of environmental humidity and temperature on skin barrier function and dermatitis. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2016, 30, 223-249.	2.4	205
8	Intragenic Copy Number Variation within Filaggrin Contributes to the Risk of Atopic Dermatitis with a Dose-Dependent Effect. <i>Journal of Investigative Dermatology</i> , 2012, 132, 98-104.	0.7	185
9	Loss-of-function polymorphisms in the filaggrin gene are associated with an increased susceptibility to chronic irritant contact dermatitis: a case-control study. <i>British Journal of Dermatology</i> , 2008, 159, 621-627.	1.5	176
10	Caspase-14 Is Required for Filaggrin Degradation to Natural Moisturizing Factors in the Skin. <i>Journal of Investigative Dermatology</i> , 2011, 131, 2233-2241.	0.7	167
11	Natural moisturizing factor components in the stratum corneum as biomarkers of filaggrin genotype: evaluation of minimally invasive methods. <i>British Journal of Dermatology</i> , 2009, 161, 1098-1104.	1.5	141
12	Impact of atopic dermatitis and loss-of-function mutations in the filaggrin gene on the development of occupational irritant contact dermatitis. <i>British Journal of Dermatology</i> , 2013, 168, 326-332.	1.5	125
13	Progress and future of in vitro models to study translocation of nanoparticles. <i>Archives of Toxicology</i> , 2015, 89, 1469-1495.	4.2	117
14	Percutaneous penetration of sodium lauryl sulphate is increased in uninvolved skin of patients with atopic dermatitis compared with control subjects. <i>British Journal of Dermatology</i> , 2006, 155, 104-109.	1.5	112
15	Knockdown of Filaggrin in a Three-Dimensional Reconstructed Human Epidermis Impairs Keratinocyte Differentiation. <i>Journal of Investigative Dermatology</i> , 2014, 134, 2938-2946.	0.7	111
16	Altered Penetration of Polyethylene Glycols into Uninvolved Skin of Atopic Dermatitis Patients. <i>Journal of Investigative Dermatology</i> , 2007, 127, 129-134.	0.7	108
17	Increased Sensitivity of Histidinemic Mice to UVB Radiation Suggests a Crucial Role of Endogenous Urocanic Acid in Photoprotection. <i>Journal of Investigative Dermatology</i> , 2011, 131, 188-194.	0.7	108
18	Stratum corneum cytokines and skin irritation response to sodium lauryl sulfate. <i>Contact Dermatitis</i> , 2006, 54, 325-333.	1.4	97

#	ARTICLE	IF	CITATIONS
19	Lamellar Lipid Organization and Ceramide Composition in the Stratum Corneum of Patients with Atopic Eczema. <i>Journal of Investigative Dermatology</i> , 2011, 131, 2136-2138.	0.7	96
20	Filaggrin breakdown products determine corneocyte conformation in patients with atopic dermatitis. <i>Journal of Allergy and Clinical Immunology</i> , 2015, 136, 1573-1580.e2.	2.9	93
21	Altered expression of epidermal lipid bio-synthesis enzymes in atopic dermatitis skin is accompanied by changes in stratum corneum lipid composition. <i>Journal of Dermatological Science</i> , 2017, 88, 57-66.	1.9	92
22	Skin absorption through atopic dermatitis skin: a systematic review. <i>British Journal of Dermatology</i> , 2017, 177, 84-106.	1.5	92
23	Skin barrier in atopic dermatitis. <i>Frontiers in Bioscience - Landmark</i> , 2014, 19, 542.	3.0	85
24	Skin Barrier Function in Healthy Subjects and Patients with Atopic Dermatitis in Relation to Filaggrin Loss-of-Function Mutations. <i>Journal of Investigative Dermatology</i> , 2011, 131, 540-542.	0.7	84
25	Filaggrin and Skin Barrier Function. <i>Current Problems in Dermatology</i> , 2016, 49, 1-7.	0.7	81
26	Cytokine profiles in interstitial fluid from chronic atopic dermatitis skin. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2015, 29, 2136-2144.	2.4	80
27	Clumping Factor B Promotes Adherence of <i>Staphylococcus aureus</i> to Corneocytes in Atopic Dermatitis. <i>Infection and Immunity</i> , 2017, 85, .	2.2	79
28	Absorption of chemicals through compromised skin. <i>International Archives of Occupational and Environmental Health</i> , 2009, 82, 677-688.	2.3	78
29	Wet work and hand eczema in apprentice nurses; part <sc>l</sc> of a prospective cohort study. <i>Contact Dermatitis</i> , 2014, 70, 44-55.	1.4	78
30	Cytokine gene polymorphisms and susceptibility to chronic irritant contact dermatitis. <i>Contact Dermatitis</i> , 2008, 58, 269-277.	1.4	77
31	Stratum Corneum Tape Stripping: Monitoring of Inflammatory Mediators in Atopic Dermatitis Patients Using Topical Therapy. <i>International Archives of Allergy and Immunology</i> , 2016, 170, 187-193.	2.1	75
32	WHO/ILO work-related burden of disease and injury: Protocol for systematic reviews of occupational exposure to solar ultraviolet radiation and of the effect of occupational exposure to solar ultraviolet radiation on melanoma and non-melanoma skin cancer. <i>Environment International</i> , 2019, 126, 804-815.	10.0	71
33	Systemic and stratum corneum biomarkers of severity in infant atopic dermatitis include markers of innate and T helper cell-related immunity and angiogenesis. <i>British Journal of Dermatology</i> , 2019, 180, 586-596.	1.5	70
34	Filaggrin loss-of-function mutations and atopic dermatitis as risk factors for hand eczema in apprentice nurses: part <sc>ll</sc> of a prospective cohort study. <i>Contact Dermatitis</i> , 2014, 70, 139-150.	1.4	69
35	South African amaXhosa patients with atopic dermatitis have decreased levels of filaggrin breakdown products but no loss-of-function mutations in filaggrin. <i>Journal of Allergy and Clinical Immunology</i> , 2014, 133, 280-282.e2.	2.9	67
36	Variation in barrier impairment and inflammation of human skin as determined by sodium lauryl sulphate penetration rate. <i>British Journal of Dermatology</i> , 2006, 154, 651-657.	1.5	65

#	ARTICLE	IF	CITATIONS
37	Cytokines at different stratum corneum levels in normal and sodium lauryl sulphate-irritated skin. <i>Skin Research and Technology</i> , 2007, 13, 390-398.	1.6	64
38	Current knowledge on biomarkers for contact sensitization and allergic contact dermatitis. <i>Contact Dermatitis</i> , 2017, 77, 1-16.	1.4	64
39	Adhesion of <i>Staphylococcus aureus</i> to Corneocytes from Atopic Dermatitis Patients Is Controlled by Natural Moisturizing Factor Levels. <i>MBio</i> , 2018, 9, .	4.1	64
40	Differential cytokine expression in skin after single and repeated irritation by sodium lauryl sulphate. <i>Experimental Dermatology</i> , 2007, 16, 1032-1040.	2.9	63
41	Evaluation of an HPLC Method for the Determination of Natural Moisturizing Factors in the Human Stratum Corneum. <i>Analytical Letters</i> , 2013, 46, 2133-2144.	1.8	61
42	Dermal absorption of vaporous and liquid 2-methoxyethanol and 2-ethoxyethanol in volunteers.. <i>Occupational and Environmental Medicine</i> , 1997, 54, 38-43.	2.8	58
43	Skin Barrier Integrity and Natural Moisturising Factor Levels After Cumulative Dermal Exposure to Alkaline Agents in Atopic Dermatitis. <i>Acta Dermato-Venereologica</i> , 2014, 94, 640-644.	1.3	58
44	Effect of glove occlusion on the skin barrier. <i>Contact Dermatitis</i> , 2016, 74, 2-10.	1.4	58
45	Gram-positive anaerobe cocci are underrepresented in the microbiome of filaggrin-deficient human skin. <i>Journal of Allergy and Clinical Immunology</i> , 2017, 139, 1368-1371.	2.9	57
46	In a three-dimensional reconstructed human epidermis filaggrin-2 is essential for proper cornification. <i>Cell Death and Disease</i> , 2015, 6, e1656-e1656.	6.3	56
47	A minimally invasive tool to study immune response and skin barrier in children with atopic dermatitis. <i>British Journal of Dermatology</i> , 2019, 180, 621-630.	1.5	54
48	Individual Susceptibility to Occupational Contact Dermatitis. <i>Industrial Health</i> , 2009, 47, 469-478.	1.0	49
49	In vitro percutaneous penetration and characterization of silver from silver-containing textiles. <i>International Journal of Nanomedicine</i> , 2015, 10, 1899.	6.7	48
50	Percutaneous absorption of neat and aqueous solutions of 2-butoxyethanol in volunteers. <i>International Archives of Occupational and Environmental Health</i> , 2004, 77, 79-84.	2.3	47
51	Polymorphisms in the interleukin-1 gene influence the stratum corneum interleukin-1 $\beta$ concentration in uninvolved skin of patients with chronic irritant contact dermatitis. <i>Contact Dermatitis</i> , 2008, 58, 263-268.	1.4	47
52	The role of skin barrier in occupational contact dermatitis. <i>Experimental Dermatology</i> , 2018, 27, 909-914.	2.9	47
53	A randomized controlled trial of an emollient with ceramide and filaggrin-associated amino acids for the primary prevention of atopic dermatitis in high-risk infants. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2019, 33, 2087-2094.	2.4	46
54	Early-life regional and temporal variation in filaggrin-derived natural moisturizing factor, filaggrin-processing enzyme activity, corneocyte phenotypes and plasmin activity: implications for atopic dermatitis. <i>British Journal of Dermatology</i> , 2018, 179, 431-441.	1.5	43

#	ARTICLE	IF	CITATIONS
55	Increased permeability for polyethylene glycols through skin compromised by sodium lauryl sulphate. <i>Experimental Dermatology</i> , 2006, 15, 801-807.	2.9	42
56	Altered Levels of Sphingosine, Sphinganine and Their Ceramides in Atopic Dermatitis Are Related to Skin Barrier Function, Disease Severity and Local Cytokine Milieu. <i>International Journal of Molecular Sciences</i> , 2020, 21, 1958.	4.1	41
57	Analysis, Interpretation, and Extrapolation of Dermal Permeation Data Using Diffusion-Based Mathematical Models. <i>Journal of Pharmaceutical Sciences</i> , 2007, 96, 682-703.	3.3	39
58	<i>Staphylococcus aureus</i> binds to the N-terminal region of corneodesmosin to adhere to the stratum corneum in atopic dermatitis. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2021, 118, .	7.1	33
59	Skin absorption of some vaporous solvents in volunteers. <i>International Archives of Occupational and Environmental Health</i> , 2000, 73, 415-422.	2.3	31
60	Specific barrier response profiles after experimentally induced skin irritation in vivo. <i>Contact Dermatitis</i> , 2018, 79, 59-66.	1.4	29
61	Evaluation of in-vivo animal and in-vitro models for prediction of dermal absorption in man. <i>Human and Experimental Toxicology</i> , 2008, 27, 281-288.	2.2	28
62	Tandem repeated irritation in aged skin induces distinct barrier perturbation and cytokine profile in vivo. <i>British Journal of Dermatology</i> , 2012, 167, 787-793.	1.5	28
63	Effectiveness of a skin care programme for the prevention of contact dermatitis in healthcare workers (the Healthy Hands Project): A single-centre, cluster randomized controlled trial. <i>Contact Dermatitis</i> , 2019, 80, 365-373.	1.4	28
64	Filaggrin Expression and Processing Deficiencies Impair Corneocyte Surface Texture and Stiffness in Mice. <i>Journal of Investigative Dermatology</i> , 2020, 140, 615-623.e5.	0.7	28
65	Cytokine concentration across the stratum corneum in atopic dermatitis and healthy controls. <i>Scientific Reports</i> , 2020, 10, 21895.	3.3	28
66	Determination of mandelic acid enantiomers in urine by gas chromatography and electron-capture or flame ionisation detection. <i>Biomedical Applications</i> , 2000, 738, 39-46.	1.7	27
67	Effect of allergens and irritants on levels of natural moisturizing factor and corneocyte morphology. <i>Contact Dermatitis</i> , 2017, 76, 287-295.	1.4	27
68	Skin reaction and recovery: a repeated sodium lauryl sulphate patch test vs. a 24-h patch test and tape stripping. <i>British Journal of Dermatology</i> , 2004, 150, 493-499.	1.5	26
69	Efficacy of a Cream Containing Ceramides and Magnesium in the Treatment of Mild to Moderate Atopic Dermatitis: A Randomized, Double-blind, Emollient- and Hydrocortisone-controlled Trial. <i>Acta Dermato-Venereologica</i> , 2016, 96, 948-953.	1.3	25
70	Incidence of occupational contact dermatitis in healthcare workers: a systematic review. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2021, 35, 1285-1289.	2.4	25
71	Dermal Absorption of Neat Liquid Solvents on Brief Exposures in Volunteers. <i>AIHAJ: A Journal for the Science of Occupational and Environmental Health and Safety</i> , 2001, 62, 12-18.	0.4	24
72	Free and total urinary 2-butoxyacetic acid following dermal and inhalation exposure to 2-butoxyethanol in human volunteers. <i>International Archives of Occupational and Environmental Health</i> , 2004, 77, 580-586.	2.3	24

#	ARTICLE	IF	CITATIONS
73	Mice deficient for the epidermal Dermokine $\hat{I}^2$ and $\hat{I}^3$ display transient cornification defects. <i>Journal of Cell Science</i> , 2014, 127, 2862-72.	2.0	24
74	Characterization of silver particles in the stratum corneum of healthy subjects and atopic dermatitis patients dermally exposed to a silver-containing garment. <i>Nanotoxicology</i> , 2016, 10, 1480-1491.	3.0	24
75	Changes in filaggrin degradation products and corneocyte surface texture by season. <i>British Journal of Dermatology</i> , 2018, 178, 1143-1150.	1.5	24
76	Health education decreases incidence of hand eczema in metal work apprentices: Results of a controlled intervention study. <i>Contact Dermatitis</i> , 2020, 82, 350-360.	1.4	24
77	Methods for measuring in-vivo percutaneous absorption in humans. <i>Human and Experimental Toxicology</i> , 2008, 27, 289-295.	2.2	23
78	Stratum corneum profiles of inflammatory mediators in patch test reactions to common contact allergens and sodium lauryl sulfate. <i>British Journal of Dermatology</i> , 2017, 176, 1533-1540.	1.5	23
79	Determination of natural moisturizing factors in the skin: Raman microspectroscopy versus HPLC. <i>Biomarkers</i> , 2017, 22, 502-507.	1.9	23
80	Percutaneous absorption and metabolism of 2-butoxyethanol in human volunteers: A microdialysis study. <i>Toxicology Letters</i> , 2007, 170, 97-103.	0.8	22
81	Filaggrin loss of function mutations and levels of filaggrin degradation products in adult patients with atopic dermatitis in Croatia. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2020, 34, 1789-1794.	2.4	22
82	Genetic polymorphism of metabolic enzymes modifies the risk of chronic solvent-induced encephalopathy. <i>Toxicology and Industrial Health</i> , 2006, 22, 281-289.	1.4	21
83	Barrier Function and Natural Moisturizing Factor Levels After Cumulative Exposure to Short-chain Aliphatic Alcohols and Detergents: Results of Occlusion-modified Tandem Repeated Irritation Test. <i>Acta Dermato-Venereologica</i> , 2016, 96, 880-884.	1.3	21
84	The effect of epidermal levels of urocanic acid on 25-hydroxyvitamin D synthesis and inflammatory mediators upon narrowband UVB irradiation. <i>Photodermatology Photoimmunology and Photomedicine</i> , 2016, 32, 214-223.	1.5	21
85	Transient epidermal barrier deficiency and lowered allergic threshold in filaggrin <sup>homo</sup> double-deficient mice. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2019, 74, 1327-1339.	5.7	21
86	Assessment of biomarkers in pediatric atopic dermatitis by tape strips and skin biopsies. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2022, 77, 1499-1509.	5.7	21
87	Percutaneous penetration of silver from a silver containing garment in healthy volunteers and patients with atopic dermatitis. <i>Toxicology Letters</i> , 2015, 235, 116-122.	0.8	20
88	Dermal uptake of petroleum substances. <i>Toxicology Letters</i> , 2015, 235, 123-139.	0.8	20
89	The three moments of skin cream application: an evidence-based proposal for use of skin creams in the prevention of irritant contact dermatitis in the workplace. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2017, 31, 53-64.	2.4	20
90	Research Techniques Made Simple: Stratum Corneum Tape Stripping. <i>Journal of Investigative Dermatology</i> , 2021, 141, 1129-1133.e1.	0.7	20

#	ARTICLE	IF	CITATIONS
91	Barrier function and natural moisturizing factor levels after cumulative exposure to a fruit-derived organic acid and a detergent: different outcomes in atopic and healthy skin and relevance for occupational contact dermatitis in the food industry. <i>Contact Dermatitis</i> , 2015, 73, 358-363.	1.4	18
92	Nanoscale alterations of corneocytes indicate skin disease. <i>Skin Research and Technology</i> , 2016, 22, 174-180.	1.6	18
93	Allergic contact dermatitis caused by 2-hydroxyethyl methacrylate and ethyl cyanoacrylate contained in cosmetic glues among hairdressers and beauticians who perform nail treatments and eyelash extension as well as hair extension applications: A systematic review. <i>Contact Dermatitis</i> , 2022, 86, 480-492.	1.4	18
94	Topical corticosteroids normalize both skin and systemic inflammatory markers in infant atopic dermatitis. <i>British Journal of Dermatology</i> , 2021, 185, 153-163.	1.5	17
95	Occupational Exposure of Hairdressers to Airborne Hazardous Chemicals: A Scoping Review. <i>International Journal of Environmental Research and Public Health</i> , 2022, 19, 4176.	2.6	16
96	Changes in nano-mechanical properties of human epidermal cornified cells depending on their proximity to the skin surface. <i>Journal of Molecular Recognition</i> , 2018, 31, e2722.	2.1	15
97	Effect of immunosuppressive treatment on biomarkers in adult atopic dermatitis patients. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2020, 34, 1545-1554.	2.4	15
98	Prevalence and incidence of hand eczema in hairdressers – A systematic review and meta-analysis of the published literature from 2000–2021. <i>Contact Dermatitis</i> , 2022, 86, 254-265.	1.4	15
99	Parameters in fractional laser assisted delivery of topical anesthetics: Role of laser type and laser settings. <i>Lasers in Surgery and Medicine</i> , 2018, 50, 813-818.	2.1	14
100	Metabolic capacity and interindividual variation in toxicokinetics of styrene in volunteers. <i>Human and Experimental Toxicology</i> , 2001, 20, 221-228.	2.2	13
101	The effectiveness of a skin care program for the prevention of contact dermatitis in health care workers (the Healthy Hands Project): study protocol for a cluster randomized controlled trial. <i>Trials</i> , 2017, 18, 92.	1.6	13
102	Immunoinflammatory Biomarkers in Serum Are Associated with Disease Severity in Atopic Dermatitis. <i>Dermatology</i> , 2021, 237, 513-520.	2.1	13
103	Occupational and Non-Occupational Allergic Contact Dermatitis: A Follow-Up Study. <i>Dermatology</i> , 2013, 227, 321-329.	2.1	12
104	Evaluating the effect of electronic monitoring and feedback on hand cream use in healthcare workers: Healthy Hands Project. <i>Contact Dermatitis</i> , 2019, 80, 26-34.	1.4	12
105	Percutaneous absorption of m-xylene vapour in volunteers during pre-steady and steady state. <i>Toxicology Letters</i> , 2004, 153, 273-282.	0.8	11
106	Patients with atopic dermatitis with filaggrin loss-of-function mutations show good but lower responses to immunosuppressive treatment. <i>British Journal of Dermatology</i> , 2017, 177, 1745-1746.	1.5	11
107	Effect of atopic skin stressors on natural moisturizing factors and cytokines in healthy adult epidermis. <i>British Journal of Dermatology</i> , 2018, 179, 679-688.	1.5	11
108	Concentration of filaggrin monomers, its metabolites and corneocyte surface texture in individuals with a history of atopic dermatitis and controls. <i>Journal of the European Academy of Dermatology and Venereology</i> , 2018, 32, 796-804.	2.4	11
