| #  | Article   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | Evolution and the Flexible Organism. American Scientist, 2022, 110, 94.   | 0.1 | Ο         |
| 2  | Microevolutionary change in mimicry? Potential erosion of rattling behaviour among nonvenomous snakes on islands lacking rattlesnakes. Ethology Ecology and Evolution, 2021, 33, 125-136.   | 1.4 | 3         |
| 3  | A condition-dependent male sexual signal predicts adaptive predator-induced plasticity in offspring.<br>Behavioral Ecology and Sociobiology, 2021, 75, 1.   | 1.4 | 8         |
| 4  | Evolutionary rescue via transgenerational plasticity: Evidence and implications for conservation.<br>Evolution & Development, 2021, 23, 292-307.  | 2.0 | 13        |
| 5  | Adaptive Plasticity as a Fitness Benefit of Mate Choice. Trends in Ecology and Evolution, 2021, 36, 294-307.  | 8.7 | 3         |
| 6  | Innovation and Diversification Via Plasticity-Led Evolution. , 2021, , 211-240.   |     | 14        |
| 7  | Transcriptomic bases of a polyphenism. Journal of Experimental Zoology Part B: Molecular and Developmental Evolution, 2021, 336, 482-495.   | 1.3 | 3         |
| 8  | Plasticityâ€led evolution: A survey of developmental mechanisms and empirical tests. Evolution & Development, 2020, 22, 71-87.  | 2.0 | 46        |
| 9  | An experimental investigation of how intraspecific competition and phenotypic plasticity can promote the evolution of novel, complex phenotypes. Biological Journal of the Linnean Society, 2020, 131, 76-87.                         | 1.6 | 9         |
| 10 | Identification of candidate loci for adaptive phenotypic plasticity in natural populations of spadefoot<br>toads. Ecology and Evolution, 2020, 10, 8976-8988.   | 1.9 | 6         |
| 11 | Character displacement. Current Biology, 2020, 30, R1023-R1024.   | 3.9 | 4         |
| 12 | Carryover effects and the evolution of polyphenism. Biological Journal of the Linnean Society, 2020, 131, 622-631.  | 1.6 | 8         |
| 13 | Dead Spadefoot Tadpoles Adaptively Modify Development in Future Generations: A Novel Form of<br>Nongenetic Inheritance?. Copeia, 2020, 108, 116.  | 1.3 | 4         |
| 14 | Phenotypic plasticity and the origins of novelty. , 2020, , 443-458.  |     | 1         |
| 15 | Evolution: Ancestral Plasticity Promoted Extreme Temperature Adaptation in Thermophilic Bacteria.<br>Current Biology, 2020, 30, R68-R70.  | 3.9 | 3         |
| 16 | Multiple models generate a geographical mosaic of resemblance in a Batesian mimicry complex.<br>Proceedings of the Royal Society B: Biological Sciences, 2019, 286, 20191519.   | 2.6 | 4         |
| 17 | Male sexual signal predicts phenotypic plasticity in offspring: implications for the evolution of<br>plasticity and local adaptation. Philosophical Transactions of the Royal Society B: Biological Sciences,<br>2019, 374, 20180179. | 4.0 | 15        |
| 18 | Plasticity-led evolution: evaluating the key prediction of frequency-dependent adaptation.<br>Proceedings of the Royal Society B: Biological Sciences, 2019, 286, 20182754.   | 2.6 | 33        |

| #  | Article   | IF   | CITATIONS |
|----|---|------|-----------|
| 19 | How stabilizing selection and nongenetic inheritance combine to shape the evolution of phenotypic plasticity. Journal of Evolutionary Biology, 2019, 32, 706-716.                                 | 1.7  | 10        |
| 20 | Genome of <i>Spea multiplicata</i> , a Rapidly Developing, Phenotypically Plastic, and Desert-Adapted<br>Spadefoot Toad. G3: Genes, Genomes, Genetics, 2019, 9, 3909-3919.                        | 1.8  | 23        |
| 21 | Phenotypic plasticity, canalization, and the origins of novelty: Evidence and mechanisms from amphibians. Seminars in Cell and Developmental Biology, 2019, 88, 80-90.                            | 5.0  | 56        |
| 22 | Evaluating the utility of camera traps in field studies of predation. PeerJ, 2019, 7, e6487.  | 2.0  | 19        |
| 23 | Morphological novelty emerges from pre-existing phenotypic plasticity. Nature Ecology and Evolution, 2018, 2, 1289-1297.  | 7.8  | 96        |
| 24 | Coevolutionary arms races in Batesian mimicry? A test of the chase-away hypothesis. Biological<br>Journal of the Linnean Society, 2018, 124, 668-676.   | 1.6  | 13        |
| 25 | The emergence of performance tradeâ€offs during local adaptation: insights from experimental evolution. Molecular Ecology, 2017, 26, 1720-1733.   | 3.9  | 99        |
| 26 | Intraspecific adaptive radiation: Competition, ecological opportunity, and phenotypic diversification within species. Evolution; International Journal of Organic Evolution, 2017, 71, 2496-2509. | 2.3  | 24        |
| 27 | To mimicry and back again. Nature, 2016, 534, 184-185.  | 27.8 | 7         |
| 28 | Evaluating â€~Plasticity-First' Evolution in Nature: Key Criteria and Empirical Approaches. Trends in Ecology and Evolution, 2016, 31, 563-574.   | 8.7  | 364       |
| 29 | Behavioral Plasticity and the Origins of Novelty: The Evolution of the Rattlesnake Rattle. American<br>Naturalist, 2016, 188, 475-483.  | 2.1  | 23        |
| 30 | Genetic assimilation: a review of its potential proximate causes and evolutionary consequences.<br>Annals of Botany, 2016, 117, 769-779.  | 2.9  | 145       |
| 31 | An inducible offense: carnivore morph tadpoles induced by tadpole carnivory. Ecology and Evolution, 2015, 5, 1405-1411.   | 1.9  | 30        |
| 32 | Evolutionary rescue and the coexistence of generalist and specialist competitors: an experimental test. Proceedings of the Royal Society B: Biological Sciences, 2015, 282, 20151932.             | 2.6  | 24        |
| 33 | Constraints on the evolution of phenotypic plasticity: limits and costs of phenotype and plasticity.<br>Heredity, 2015, 115, 293-301.   | 2.6  | 469       |
| 34 | Batesian mimicry promotes pre- and postmating isolation in a snake mimicry complex. Evolution;<br>International Journal of Organic Evolution, 2015, 69, 1085-1090.                                | 2.3  | 11        |
| 35 | Sexual selection's impacts on ecological specialization: an experimental test. Proceedings of the Royal<br>Society B: Biological Sciences, 2015, 282, 20150217.                                   | 2.6  | 2         |
| 36 | More than mimicry? Evaluating scope for flicker-fusion as a defensive strategy in coral snake mimics.<br>Environmental Epigenetics, 2014, 60, 123-130.  | 1.8  | 26        |

| #  | Article  | IF   | CITATIONS |
|----|--|------|-----------|
| 37 | Cryptic Genetic Variation in Natural Populations: A Predictive Framework. Integrative and Comparative Biology, 2014, 54, 783-793.                                  | 2.0  | 60        |
| 38 | Towards a gene regulatory network perspective on phenotypic plasticity, genetic accommodation and genetic assimilation. Molecular Ecology, 2014, 23, 4438-4440.    | 3.9  | 47        |
| 39 | Evolutionary Change in Continuous Reaction Norms. American Naturalist, 2014, 183, 453-467.   | 2.1  | 114       |
| 40 | Mimicry's palette: widespread use of conserved pigments in the aposematic signals of snakes.<br>Evolution & Development, 2014, 16, 61-67.                          | 2.0  | 16        |
| 41 | Brotherly love benefits females. Nature, 2014, 505, 626-627.   | 27.8 | 4         |
| 42 | Rapid evolution of mimicry following local model extinction. Biology Letters, 2014, 10, 20140304.  | 2.3  | 22        |
| 43 | The role of transgenerational epigenetic inheritance in diversification and speciation. Non-Genetic<br>Inheritance, 2013, 1, .                                     | 0.8  | 20        |
| 44 | Imperfect Mimicry and the Limits of Natural Selection. Quarterly Review of Biology, 2013, 88, 297-315.   | 0.1  | 117       |
| 45 | Competition and the origins of novelty: experimental evolution of niche-width expansion in a virus.<br>Biology Letters, 2013, 9, 20120616.                         | 2.3  | 62        |
