|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Associations of pain catastrophizing with pain-related brain structure in individuals with or at risk for knee osteoarthritis: Sociodemographic considerations. <i>Brain Imaging and Behavior</i> , 2021, 15, 1769-1777.    | 2.1 | 13        |
| 2  | Neuropathic-Like Pain Symptoms in a Community-Dwelling Sample with or at Risk for Knee Osteoarthritis. <i>Pain Medicine</i> , 2020, 21, 125-137.                                                                            | 1.9 | 22        |
| 3  | &lt;p&gt;Everyday Discrimination in Adults with Knee Pain: The Role of Perceived Stress and Pain Catastrophizing&lt;/p&gt;. <i>Journal of Pain Research</i> , 2020, Volume 13, 883-895.                                     | 2.0 | 25        |
| 4  | Psychological Predictors of Perceived Age and Chronic Pain Impact in Individuals With and Without Knee Osteoarthritis. <i>Clinical Journal of Pain</i> , 2020, 36, 569-577.                                                 | 1.9 | 4         |
| 5  | At the Intersection of Ethnicity/Race and Poverty: Knee Pain and Physical Function. <i>Journal of Racial and Ethnic Health Disparities</i> , 2019, 6, 1131-1143.                                                            | 3.2 | 21        |
| 6  | Race/Ethnicity Moderates the Association Between Psychosocial Resilience and Movementâ€Evoked Pain in Knee Osteoarthritis. <i>ACR Open Rheumatology</i> , 2019, 1, 16-25.                                                   | 2.1 | 38        |
| 7  | Resilience factors may buffer cellular aging in individuals with and without chronic knee pain. <i>Molecular Pain</i> , 2019, 15, 174480691984296.                                                                          | 2.1 | 22        |
| 8  | Omega-6:Omega-3 PUFA Ratio, Pain, Functioning, and Distress in Adults With Knee Pain. <i>Clinical Journal of Pain</i> , 2018, 34, 182-189.                                                                                  | 1.9 | 29        |
| 9  | Optimism and Psychological Resilience are Beneficially Associated With Measures of Clinical and Experimental Pain in Adults With or at Risk for Knee Osteoarthritis. <i>Clinical Journal of Pain</i> , 2018, 34, 1164-1172. | 1.9 | 42        |
| 10 | Physical performance and movement-evoked pain profiles in community-dwelling individuals at risk for knee osteoarthritis. <i>Experimental Gerontology</i> , 2017, 98, 186-191.                                              | 2.8 | 47        |
| 11 | Accelerated aging in adults with knee osteoarthritis pain: consideration for frequency, intensity, time, and total pain sites. <i>Pain Reports</i> , 2017, 2, e591.                                                         | 2.7 | 50        |
| 12 | Experimental pain phenotyping in community-dwelling individuals with knee osteoarthritis. <i>Pain</i> , 2016, 157, 2104-2114.                                                                                               | 4.2 | 63        |
| 13 | Minority Aging and Endogenous Pain Facilitatory Processes. <i>Pain Medicine</i> , 2015, 17, pnv014.                                                                                                                         | 1.9 | 8         |
| 14 | Disrupted Sleep Is Associated With Altered Pain Processing by Sex and Ethnicity in Knee Osteoarthritis. <i>Journal of Pain</i> , 2015, 16, 478-490.                                                                         | 1.4 | 34        |
| 15 | Benzodiazepine (BZD) use in community-dwelling older adults: Longitudinal associations with mobility, functioning, and pain. <i>Archives of Gerontology and Geriatrics</i> , 2014, 59, 331-337.                             | 3.0 | 10        |
| 16 | Racial and Ethnic Differences in Older Adults With Knee Osteoarthritis. <i>Arthritis and Rheumatology</i> , 2014, 66, 1800-1810.                                                                                            | 5.6 | 107       |
| 17 | Examining sex differences in knee pain: the Multicenter Osteoarthritis Study. <i>Osteoarthritis and Cartilage</i> , 2014, 22, 1100-1106.                                                                                    | 1.3 | 83        |
| 18 | Predictors of Adherence to a Brief Behavioral Insomnia Intervention: Daily Process Analysis. <i>Behavior Therapy</i> , 2014, 45, 430-442.                                                                                   | 2.4 | 26        |

| #  | ARTICLE                                                                                                                                                                                                                                                                                          | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | The Association of Greater Dispositional Optimism With Less Endogenous Pain Facilitation Is Indirectly Transmitted Through Lower Levels of Pain Catastrophizing. <i>Journal of Pain</i> , 2013, 14, 126-135.                                                                                     | 1.4 | 72        |
| 20 | Psychological Profiles and Pain Characteristics of Older Adults With Knee Osteoarthritis. <i>Arthritis Care and Research</i> , 2013, 65, 1786-1794.                                                                                                                                              | 3.4 | 123       |
| 21 | Perceived racial discrimination, but not mistrust of medical researchers, predicts the heat pain tolerance of African Americans with symptomatic knee osteoarthritis.. <i>Health Psychology</i> , 2013, 32, 1117-1126.                                                                           | 1.6 | 56        |
| 22 | Chronic Pain, Perceived Stress, and Cellular Aging: An Exploratory Study. <i>Molecular Pain</i> , 2012, 8, 1744-8069-8-12.                                                                                                                                                                       | 2.1 | 60        |
| 23 | Estimation of minimum clinically important difference for pain in fibromyalgia. <i>Arthritis Care and Research</i> , 2011, 63, 821-826.                                                                                                                                                          | 3.4 | 115       |
| 24 | Consistency of Knee Pain and Risk of Knee Replacement: The Multicenter Osteoarthritis Study. <i>Journal of Rheumatology</i> , 2011, 38, 1390-1395.                                                                                                                                               | 2.0 | 26        |
| 25 | Pain Response Profile of Patients With Fibromyalgia Treated With Duloxetine. <i>Clinical Journal of Pain</i> , 2010, 26, 498-504.                                                                                                                                                                | 1.9 | 11        |
| 26 | Effect of duloxetine in patients with fibromyalgia: tiredness subgroups. <i>Arthritis Research and Therapy</i> , 2010, 12, R141.                                                                                                                                                                 | 3.5 | 5         |
| 27 | Assessing Single Joints in Arthritis Clinical Trials. <i>Journal of Rheumatology</i> , 2009, 36, 2092-2096.                                                                                                                                                                                      | 2.0 | 11        |
| 28 | What Makes Patients with Fibromyalgia Feel Better? Correlations Between Patient Global Impression of Improvement and Changes in Clinical Symptoms and Function: A Pooled Analysis of 4 Randomized Placebo-controlled Trials of Duloxetine. <i>Journal of Rheumatology</i> , 2009, 36, 2517-2522. | 2.0 | 32        |
| 29 | Pathophysiology of Fibromyalgia. <i>American Journal of Medicine</i> , 2009, 122, S22-S30.                                                                                                                                                                                                       | 1.5 | 491       |
| 30 | Family and Genetic Influences on Fibromyalgia Syndrome. <i>Journal of Musculoskeletal Pain</i> , 2008, 16, 49-57.                                                                                                                                                                                | 0.3 | 1         |
| 31 | Lessons from Fibromyalgia: Abnormal Pain Sensitivity in Knee Osteoarthritis. <i>Novartis Foundation Symposium</i> , 2008, , 258-276.                                                                                                                                                             | 1.1 | 44        |
| 32 | Evaluating and Diagnosing Fibromyalgia and Comorbid Psychiatric Disorders. <i>Journal of Clinical Psychiatry</i> , 2008, 69, e28.                                                                                                                                                                | 2.2 | 31        |
| 33 | Multidisciplinary Care and Stepwise Treatment for Fibromyalgia. <i>Journal of Clinical Psychiatry</i> , 2008, 69, e35.                                                                                                                                                                           | 2.2 | 16        |
| 34 | Psychosocial Aspects of the Functional Gastrointestinal Disorders. <i>Gastroenterology</i> , 2006, 130, 1447-1458.                                                                                                                                                                               | 1.3 | 507       |
| 35 | Psychiatric comorbidity in fibromyalgia. <i>Current Pain and Headache Reports</i> , 2005, 9, 79-86.                                                                                                                                                                                              | 2.9 | 46        |
| 36 | Does personality at college entry predict number of reported pain conditions at mid-life? A longitudinal study. <i>Journal of Pain</i> , 2005, 6, 92-97.                                                                                                                                         | 1.4 | 28        |

| #  | ARTICLE                                                                                                                                                                                                                                  | IF  | CITATIONS |
