#	Article	IF	Citations
1	More green, less lonely? A longitudinal cohort study. International Journal of Epidemiology, 2022, 51, 99-110.	1.9	60
2	Is urban green space associated with lower mental healthcare expenditure?. Social Science and Medicine, 2022, 292, 114503.	3.8	14
3	Residential green space and age at menarche in German and Australian adolescent girls: A longitudinal study. International Journal of Hygiene and Environmental Health, 2022, 240, 113917.	4.3	1
4	Green space quality and adolescent mental health: do personality traits matter?. Environmental Research, 2022, 206, 112591.	7.5	21
5	Is prosocial behaviour a missing link between green space quality and child health-related outcomes?. Social Psychiatry and Psychiatric Epidemiology, 2022, 57, 775.	3.1	4
6	Paths through the woods. International Journal of Epidemiology, 2022, 51, 1-5.	1.9	14
7	Types and Aspects of Front-of-Package Labeling Preferred by Parents: Insights for Policy Making in China. Nutrients, 2022, 14, 800.	4.1	6
8	Personalising activity to target peak hyperglycaemia and improve cardiometabolic health in people with type 2 diabetes: protocol for a randomised controlled trial. BMJ Open, 2022, 12, e057183.	1.9	1
9	Weekly green space visit duration is positively associated with favorable health outcomes in people with hypertension: Evidence from Shenzhen, China. Environmental Research, 2022, 212, 113228.	7.5	7
10	Perceived green space quality, child biomarkers and health-related outcomes: A longitudinal study. Environmental Pollution, 2022, 303, 119075.	7.5	8
11	Caregiver perceptions of neighbourhood green space quality, heavy traffic conditions, and asthma symptoms: Group-based trajectory modelling and multilevel longitudinal analysis of 9,589 Australian children. Environmental Research, 2022, 212, 113187.	7.5	4
12	The nexus between urban green space, housing type, and mental health. Social Psychiatry and Psychiatric Epidemiology, 2022, 57, 1917-1923.	3.1	15
13	Association between built environments and weight status: evidence from longitudinal data of 9589 Australian children. International Journal of Obesity, 2022, 46, 1534-1543.	3.4	2
14	Nature prescriptions for community and planetary health: unrealised potential to improve compliance and outcomes in physiotherapy. Journal of Physiotherapy, 2022, 68, 151-152.	1.7	7
15	Perceived Qualities, Visitation and Felt Benefits of Preferred Nature Spaces during the COVID-19 Pandemic in Australia: A Nationally-Representative Cross-Sectional Study of 2940 Adults. Land, 2022, 11, 904.	2.9	17
16	Mental health cliniciansâ€™ perceptions of nature-based interventions within community mental health services: evidence from Australia. BMC Health Services Research, 2022, 22, .	2.2	14
17	Urban green space quality and older adult recreation: an international comparison. Cities and Health, 2021, 5, 329-349.	2.6	8
18	Association between green space quality and prosocial behaviour: A 10-year multilevel longitudinal analysis of Australian children. Environmental Research, 2021, 196, 110334.	7.5	33

#	Article	IF	Citations
19	Dietary patterns and their associations with overweight/obesity among preschool children in Dongcheng District of Beijing: a cross-sectional study. BMC Public Health, 2021, 21, 223.	2.9	18
20	Multilevel modeling of geographic variation in general practice consultations. Health Services Research, 2021, 56, 1252-1261.	2.0	1
21	Time for â€˜Greenâ€™ during COVID-19? Inequities in Green and Blue Space Access, Visitation and Felt Benefits. International Journal of Environmental Research and Public Health, 2021, 18, 2757.	2.6	73
22	Which Green Space Metric Best Predicts a Lowered Odds of Type 2 Diabetes?. International Journal of Environmental Research and Public Health, 2021, 18, 4088.	2.6	7
23	Behavioural change, weight loss and risk of dementia: A longitudinal study. Preventive Medicine, 2021, 145, 106386.	3.4	6
24	Association between caregiver perceived green space quality and the development of prosocial behaviour from childhood to adolescence: Latent class trajectory and multilevel longitudinal analyses of Australian children over 10 years. Journal of Environmental Psychology, 2021, 74, 101579.	5.1	13
25	Green space and cardiovascular health in people with type 2 diabetes. Health and Place, 2021, 69, 102554.	3.3	23
26	Greener neighbourhoods, healthier birth outcomes? Evidence from Australia. Environmental Pollution, 2021, 278, 116814.	7.5	4
27	Perceived built environment and type 2 diabetes incidence: Exploring potential mediating pathways through physical and mental health, and behavioural factors in a longitudinal study. Diabetes Research and Clinical Practice, 2021, 176, 108841.	2.8	7
28	1058Association between loneliness and residential green space: a longitudinal study of Australian adults. International Journal of Epidemiology, 2021, 50, .	1.9	0
29	Green Space and Health in Mainland China: A Systematic Review. International Journal of Environmental Research and Public Health, 2021, 18, 9937.	2.6	12
30	Association between green space, outdoor leisure time and physical activity. Urban Forestry and Urban Greening, 2021, 66, 127349.	5.3	19
31	Health promoting green infrastructure associated with green space visitation. Urban Forestry and Urban Greening, 2021, 64, 127237.	5.3	14
32	Ethnic inequalities in green space availability: Evidence from Australia. Urban Forestry and Urban Greening, 2021, 64, 127235.	5.3	19
33	Do physical activity, social interaction, and mental health mediate the association between green space quality and child prosocial behaviour?. Urban Forestry and Urban Greening, 2021, 64, 127264.	5.3	24
34	Green Space Quality and Health: A Systematic Review. International Journal of Environmental Research and Public Health, 2021, 18, 11028.	2.6	107
35	Role of perceived neighbourhood crime in the longitudinal association between perceived built environment and type 2 diabetes mellitus: a moderated mediation analysis. Journal of Epidemiology and Community Health, 2021, 75, jech-2020-214175.	3.7	3
36	Imputing pre-diagnosis health behaviour in cancer registry data and investigating its relationship with oesophageal cancer survival time. PLoS ONE, 2021, 16, e0261416.	2.5	1

#	Article	IF	Citations
37	Does sleep grow on trees? A longitudinal study to investigate potential prevention of insufficient sleep with different types of urban green space. SSM - Population Health, 2020, 10, 100497.	2.7	40
38	Urban green space, tree canopy and prevention of cardiometabolic diseases: a multilevel longitudinal study of 46Â786 Australians. International Journal of Epidemiology, 2020, 49, 926-933.	1.9	83
39	Urban green space, tree canopy and 11-year risk of dementia in a cohort of 109,688 Australians. Environment International, 2020, 145, 106102.	10.0	57
40	Impact of Residential Green Space on Sleep Quality and Sufficiency in Children and Adolescents Residing in Australia and Germany. International Journal of Environmental Research and Public Health, 2020, 17, 4894.	2.6	23
41	Greener neighbourhoods, better memory? A longitudinal study. Health and Place, 2020, 65, 102393.	3.3	26
42	The Relationship Between Green Space and Prosocial Behaviour Among Children and Adolescents: A Systematic Review. Frontiers in Psychology, 2020, 11, 859.	2.1	59
43	Response: Lind KE, Jorgensen ML. (2019). Clearing the air: why a link between Alzheimer's disease and air quality cannot be validly determined using prescription data in Australia. Health and Place, 2020, 62, 102195.	3.3	0
44	Augmenting cancer registry data with health survey data with no cases in common: the relationship between pre-diagnosis health behaviour and post-diagnosis survival in oesophageal cancer. BMC Cancer, 2020, 20, 496.	2.6	1
45	30+ years of media analysis of relevance to chronic disease: a scoping review. BMC Public Health, 2020, 20, 364.	2.9	8
46	A Systematic Review and Meta-Analysis of Associations between Green and Blue Spaces and Birth Outcomes. International Journal of Environmental Research and Public Health, 2020, 17, 2949.	2.6	66
47	Urban green space and health in low and middle-income countries: A critical review. Urban Forestry and Urban Greening, 2020, 52, 126662.	5.3	44
48	Associations between greenspace and mortality vary across contexts of community change: a longitudinal ecological study. Journal of Epidemiology and Community Health, 2020, 74, jech-2019-213443.	3.7	12
49	Using estimated probability of pre-diagnosis behavior as a predictor of cancer survival time: an example in esophageal cancer. BMC Medical Research Methodology, 2020, 20, 74.	3.1	2
50	Rates of Attrition and Dropout in App-Based Interventions for Chronic Disease: Systematic Review and Meta-Analysis. Journal of Medical Internet Research, 2020, 22, e20283.	4.3	220
51	775-P: Mobile Self-Management Apps to Manage Diabetes and Chronic Disease: A Systematic Review and Meta-analysis into Dropout and Attrition Rates. Diabetes, 2020, 69, 775-P.	0.6	0
52	Association of Urban Green Space With Mental Health and General Health Among Adults in Australia. JAMA Network Open, 2019, 2, e198209.	5.9	216
53	National Trends in American Heart Association Revised Life's Simple 7 Metrics Associated With Risk of Mortality Among US Adults. JAMA Network Open, 2019, 2, e1913131.	5.9	73
54	Trends in Self-perceived Weight Status, Weight Loss Attempts, and Weight Loss Strategies Among Adults in the United States, 1999-2016. JAMA Network Open, 2019, 2, e1915219.	5.9	35

#	Article	IF	Citations
55	The nexus between air pollution, green infrastructure and human health. Environment International, 2019, 133, 105181.	10.0	249
56	Urban green space, tree canopy, and prevention of heart disease, hypertension, and diabetes: a longitudinal study. Lancet Planetary Health, The, 2019, 3, S16.	11.4	10
57	Residential self-selection, perceived built environment and type 2 diabetes incidence: A longitudinal analysis of 36,224 middle to older age adults. Health and Place, 2019, 58, 102154.	3.3	27
58	Natureâ€"Based Interventions for Improving Health and Wellbeing: The Purpose, the People and the Outcomes. Sports, 2019, 7, 141.	1.7	143
59	Detecting the hidden burden of pre-diabetes and diabetes in Western Sydney. Diabetes Research and Clinical Practice, 2019, 151, 247-251.	2.8	8
60	Can green space quantity and quality help prevent postpartum weight gain? A longitudinal study. Journal of Epidemiology and Community Health, 2019, 73, 295-302.	3.7	27
61	Associations between access to healthcare, environmental quality, and end-stage renal disease survival time: Proportional-hazards models of over 1,000,000 people over 14 years. PLoS ONE, 2019, 14, e0214094.	2.5	5
62	Ambient air pollution and risk of type 2 diabetes in the Chinese. Environmental Science and Pollution Research, 2019, 26, 16261-16273.	5.3	24
63	Does social capital and a healthier lifestyle increase mental health resilience to disability acquisition? Group-based discrete trajectory mixture models of pre-post longitudinal data. Social Science and Medicine, 2019, 235, 112143.	3.8	11
64	Social and spatial inequalities in allostatic load among adults in China: a multilevel longitudinal study. BMJ Open, 2019, 9, e031366.	1.9	3
65	Residential and school greenspace and academic performance: Evidence from the GINIplus and LISA longitudinal studies of German adolescents. Environmental Pollution, 2019, 245, 71-76.	7.5	40
66	Does body mass index and adult height influence cancer incidence among Chinese living with incident type 2 diabetes?. Cancer Epidemiology, 2018, 53, 187-194.	1.9	8
67	Modest ratios of fast food outlets to supermarkets and green grocers are associated with higher body mass index: Longitudinal analysis of a sample of 15,229 Australians aged 45 years and older in the Australian National Liveability Study. Health and Place, 2018, 49, 101-110.	3.3	28
68	Clustering of unhealthy lifestyle behaviours and associations with perceived and actual weight status among primary school children in China: A nationally representative cross-sectional study. Preventive Medicine, 2018, 112, 6-14.	3.4	11
69	A qualitative investigation of the perceived influence of adolescentsâ€™ motivation on relationships between domain-specific physical activity and positive and negative affect. Mental Health and Physical Activity, 2018, 14, 113-120.	1.8	20
70	Geographical Inequality in Tobacco Control in China: Multilevel Evidence From 98â€…058 Participants. Nicotine and Tobacco Research, 2018, 20, 755-765.	2.6	24
71	Effects of physical activity and breaks on mathematics engagement in adolescents. Journal of Science and Medicine in Sport, 2018, 21, 63-68.	1.3	17
72	Regular Physical Activity and Educational Outcomes in Youth: A Longitudinal Study. Journal of Adolescent Health, 2018, 62, 334-340.	2.5	21

#	Article	IF	Citations
73	Geographical variations in hypertension prevalence, awareness, treatment and control in China. Journal of Hypertension, 2018, 36, 178-187.	0.5	58
74	Residential green space quantity and quality and symptoms of psychological distress: a 15-year longitudinal study of 3897 women in postpartum. BMC Psychiatry, 2018, 18, 348.	2.6	51
75	Geographic variation in the impact of a type 2 diabetes diagnosis on behavioural change: A longitudinal study using random effects within-between (REWB) models. Health and Place, 2018, 54, 164-169.	3.3	4
76	Is the risk of developing Alzheimer's disease really higher in rural areas? A multilevel longitudinal study of 261,669 Australians aged 45 years and older tracked over 11 years. Health and Place, 2018, 54, 132-137.	3.3	14
77	Effectiveness of joint specialist case conferences for building general practice capacity to enhance diabetes care. Journal of Integrated Care, 2018, 26, 199-210.	0.5	10
78	Domain-specific physical activity and affective wellbeing among adolescents: an observational study of the moderating roles of autonomous and controlled motivation. International Journal of Behavioral Nutrition and Physical Activity, 2018, 15, 87.	4.6	38
79	Communicating the benefits of population health interventions: The health effects can be on par with those of medication. SSM - Population Health, 2018, 6, 54-62.	2.7	2
80	Environmental Risk Factors for Developing Type 2 Diabetes Mellitus: A Systematic Review. International Journal of Environmental Research and Public Health, 2018, 15, 78.	2.6	260
81	Do Natural Experiments of Changes in Neighborhood Built Environment Impact Physical Activity and Diet? A Systematic Review. International Journal of Environmental Research and Public Health, 2018, 15, 217.	2.6	110
82	Gender Differences in the Prevalence of Overweight and Obesity, Associated Behaviors, and Weight-related Perceptions in a National Survey of Primary School Children in China. Biomedical and Environmental Sciences, 2018, 31, 1-11.	0.2	25
83	Abstract P067: Long-term Exposure to Ambient Air Pollution and Type 2 Diabetes Incidence: A Time Series Analysis. Circulation, 2018, 137, .	1.6	0
84	Potatoes Consumption and Risk of Type 2 Diabetes: A Meta-analysis. Iranian Journal of Public Health, 2018, 47, 1627-1635.	0.5	9
85	Domain-Specific Physical Activity and Mental Health: A Meta-analysis. American Journal of Preventive Medicine, 2017, 52, 653-666.	3.0	386
86	Lifting the lid on geographic complexity in the relationship between body mass index and education in China. Health and Place, 2017, 46, 1-5.	3.3	6
87	Area-level socio-economic disparities in active and sedentary transport: Investigating the role of population density in Australia. Journal of Transport and Health, 2017, 6, 282-288.	2.2	8
88	Determinants of hyperhomocysteinemia in healthy and hypertensive subjects: A population-based study and systematic review. Clinical Nutrition, 2017, 36, 1215-1230.	5.0	34
89	Integrated mental health atlas of the Western Sydney Local Health District: gaps and recommendations. Australian Health Review, 2017, 41, 38.	1.1	29
90	Impact of a type 2 diabetes diagnosis on mental health, quality of life, and social contacts: a longitudinal study. BMJ Open Diabetes Research and Care, 2017, 5, e000198.	2.8	50

#	Article	IF	Citations
91	Indicators of a healthâ€promoting local food environment: a conceptual framework to inform urban planning policy and practice. Health Promotion Journal of Australia, 2017, 28, 82-84.	1.2	16
92	Residential Green Space Quantity and Quality and Child Well-being: A Longitudinal Study. American Journal of Preventive Medicine, 2017, 53, 616-624.	3.0	99
93	Do greener areas promote more equitable child health?. Health and Place, 2017, 46, 267-273.	3.3	36
94	Stunting and severe stunting among children under-5Âyears in Nigeria: A multilevel analysis. BMC Pediatrics, 2017, 17, 15.	1.7	147
95	Exploring pathways linking greenspace to health: Theoretical and methodological guidance. Environmental Research, 2017, 158, 301-317.	7.5	1,384
96	Suicide by pesticide poisoning remains a priority for suicide prevention in China: Analysis of national mortality trends 2006â€“2013. Journal of Affective Disorders, 2017, 208, 418-423.	4.1	120
97	Is Neighborhood Green Space Protective against Associations between Child Asthma, Neighborhood Traffic Volume and Perceived Lack of Area Safety? Multilevel Analysis of 4447 Australian Children. International Journal of Environmental Research and Public Health, 2017, 14, 543.	2.6	47
98	The Relationship between Neighbourhood Green Space and Child Mental Wellbeing Depends upon Whom You Ask: Multilevel Evidence from 3083 Children Aged 12â€“13 Years. International Journal of Environmental Research and Public Health, 2017, 14, 235.	2.6	61
99	The built environment and sexual and reproductive health. Australian and New Zealand Journal of Public Health, 2017, 41, 458-459.	1.8	2
100	Perceived public transport infrastructure modifies the association between public transport use and mental health: Multilevel analyses from the United Kingdom. PLoS ONE, 2017, 12, e0180081.	2.5	2
101	Lifestyle behaviours of Lebanese-Australians: Cross-sectional findings from The 45 and Up Study. PLoS ONE, 2017, 12, e0181217.	2.5	9
102	Is More Area-Level Crime Associated With More Sitting and Less Physical Activity? Longitudinal Evidence From 37,162 Australians. American Journal of Epidemiology, 2016, 184, 913-921.	3.4	5
103	Spatiotemporal Variations in Lung Cancer Mortality in China between 2006 and 2012: A Multilevel Analysis. International Journal of Environmental Research and Public Health, 2016, 13, 1252.	2.6	31
104	Temporal Trends and Geographic Variations in Dementia Mortality in China Between 2006 and 2012. Alzheimer Disease and Associated Disorders, 2016, 30, 348-353.	1.3	14
105	Does retirement mean more physical activity? A longitudinal study. BMC Public Health, 2016, 16, 605.	2.9	25
106	Analysis of health service amenable and non-amenable mortality before and since China's expansion of health coverage in 2009. BMJ Open, 2016, 6, e009370.	1.9	5
107	Large-scale investment in green space as an intervention for physical activity, mental and cardiometabolic health: study protocol for a quasi-experimental evaluation of a natural experiment. BMJ Open, 2016, 6, e009803.	1.9	14
108	Physical Activity and School Engagement in Youth: A Systematic Review and Meta-Analysis. Educational Psychologist, 2016, 51, 129-145.	9.0	91

#	Article	IF	Citations
109	Does area of residence influence weight loss following a diagnosis of type 2 diabetes? Fixed effects longitudinal analysis of 54,707 middle-to-older aged Australians. Diabetes Research and Clinical Practice, 2016, 116, 123-126.	2.8	4
110	What types of social interactions reduce the risk of psychological distress? Fixed effects longitudinal analysis of a cohort of 30,271 middle-to-older aged Australians. Journal of Affective Disorders, 2016, 204, 99-102.	4.1	15
111	Does Living Closer to a University Increase Educational Attainment? A Longitudinal Study of Aspirations, University Entry, and Elite University Enrolment of Australian Youth. Journal of Youth and Adolescence, 2016, 45, 1156-1175.	3.5	32
112	Reimagining health professional socialisation: an interactionist study of interprofessional education. Health Sociology Review, 2016, 25, 92-107.	2.8	10
113	Spatiotemporal Variations in Chronic Obstructive Pulmonary Disease Mortality in China: Multilevel Evidence from 2006 to 2012. COPD: Journal of Chronic Obstructive Pulmonary Disease, 2016, 13, 339-344.	1.6	7
114	Diabetes case finding in the emergency department, using HbA1c: an opportunity to improve diabetes detection, prevention, and care. BMJ Open Diabetes Research and Care, 2016, 4, e000191.	2.8	21
115	Spatiotemporal variation and social determinants of suicide in China, 2006â€“2012: findings from a nationally representative mortality surveillance system. Psychological Medicine, 2015, 45, 3259-3268.	4.5	50
116	Neighborhood walkability, fear and risk of falling and response to walking promotion: The Easy Steps to Health 12-month randomized controlled trial. Preventive Medicine Reports, 2015, 2, 704-710.	1.8	24
117	Health reform and mortality in China: Multilevel time-series analysis of regional and socioeconomic inequities in a sample of 73 million. Scientific Reports, 2015, 5, 15038.	3.3	9
118	Geographical variation and correlates of tobacco smoking, second-hand smoke exposure, workplace tobacco prohibition, and pro-tobacco and counter-tobacco advertising in mainland China: a cross-sectional study of 98â€˜058 participants. Lancet, The, 2015, 386, S17.	13.7	3
119	The influence of neighbourhood green space on childrenâ€™s physical activity and screen time: findings from the longitudinal study of Australian children. International Journal of Behavioral Nutrition and Physical Activity, 2015, 12, 126.	4.6	75
120	Propensity score weighting for addressing under-reporting in mortality surveillance: a proof-of-concept study using the nationally representative mortality data in China. Population Health Metrics, 2015, 13, 16.	2.7	47
121	Geographic inequity in healthy food environment and type 2 diabetes: can we please turn off the tap?. Medical Journal of Australia, 2015, 203, 246-248.	1.7	16
122	Flooding and Mental Health: A Systematic Mapping Review. PLoS ONE, 2015, 10, e0119929.	2.5	188
123	Green Space and Child Weight Status: Does Outcome Measurement Matter? Evidence from an Australian Longitudinal Study. Journal of Obesity, 2015, 2015, 1-8.	2.7	24
124	Area-Level Disparities of Public Open Space: A Geographic Information Systems Analysis in Metropolitan Melbourne. Urban Policy and Research, 2015, 33, 306-323.	1.3	35
125	The impact of interventions to promote physical activity in urban green space: A systematic review and recommendations for future research. Social Science and Medicine, 2015, 124, 246-256.	3.8	287
126	Greener neighbourhoods, slimmer children? Evidence from 4423 participants aged 6 to 13 years in the Longitudinal Study of Australian children. International Journal of Obesity, 2015, 39, 1224-1229.	3.4	65

#	Article	IF	Citations
127	Impact of pre-diagnosis behavior on risk of death from esophageal cancer: a systematic review and meta-analysis. Cancer Causes and Control, 2015, 26, 1365-1373.	1.8	24
128	The Determinants of young Adult Social well-being and Health (DASH) study: diversity, psychosocial determinants and health. Social Psychiatry and Psychiatric Epidemiology, 2015, 50, 1173-1188.	3.1	46
129	Does rising crime lead to increasing distress? Longitudinal analysis of a natural experiment with dynamic objective neighbourhood measures. Social Science and Medicine, 2015, 138, 68-73.	3.8	40
130	Investigating â€˜place effectsâ€™ on mental health: implications for population-based studies in psychiatry. Epidemiology and Psychiatric Sciences, 2015, 24, 27-37.	3.9	9
131	Spatiotemporal variation in diabetes mortality in China: multilevel evidence from 2006 and 2012. BMC Public Health, 2015, 15, 633.	2.9	21
132	Identification of the impact of crime on physical activity depends upon neighbourhood scale: Multilevel evidence from 203,883 Australians. Health and Place, 2015, 31, 120-123.	3.3	20
133	Geographical Variation in Diabetes Prevalence and Detection in China: Multilevel Spatial Analysis of 98,058 Adults. Diabetes Care, 2015, 38, 72-81.	8.6	99
134	Increasing Neighborhood Crime is Associated with Increasing Sedentary Time. Longitudinal Evidence from 51,222 Australians. Medicine and Science in Sports and Exercise, 2015, 47, 241.	0.4	0
135	Physical Activity Changes Among Adults Aged 50-70 in Transition Out of Full-time Employment. Medicine and Science in Sports and Exercise, 2015, 47, 240.	0.4	2
136	Ethnic And Country-of-birth Differences In Co-occurring Unhealthy Lifestyles. Medicine and Science in Sports and Exercise, 2014, 46, 783.	0.4	0
137	Is Neighborhood Green Space Associated With a Lower Risk of Type 2 Diabetes? Evidence From 267,072 Australians. Diabetes Care, 2014, 37, 197-201.	8.6	168
