#	ARTICLE	IF	CITATIONS
1	Moving on trial: protocol for a pilot randomised controlled trial of models of housing and support to reduce risks of COVID-19 infection and homelessness. Pilot and Feasibility Studies, 2022, 8, 23.	1.2	0
2	Understanding the support experiences of families of children with autism and sensory processing difficulties: A qualitative study. Health Expectations, 2022, 25, 1118-1130.	2.6	5
3	Sensory integration therapy for children with autism and sensory processing difficulties: the SenITA RCT. Health Technology Assessment, 2022, 26, 1-140.	2.8	10
4	Lifestyle, exercise and activity package for people living with progressive multiple sclerosis (LEAP-MS): protocol for a single-arm feasibility study. Pilot and Feasibility Studies, 2021, 7, 111.	1.2	3
5	Process evaluation in intellectual disability research: A case study and the need for adaptation of frameworks. Journal of Applied Research in Intellectual Disabilities, 2021, , .	2.0	0
6	Protocol for an open label: phase I trial within a cohort of foetal cell transplants in people with Huntingtonâ€™s disease. Brain Communications, 2021, 3, fcaa230.	3.3	12
7	Trainer and support staffâ€™s experiences of engaging with the Whoâ€™s Challenging Who? challenging behaviour training course. Journal of Intellectual Disabilities, 2020, 24, 367-380.	1.4	4
8	Sensory integration therapy versus usual care for sensory processing difficulties in autism spectrum disorder in children: study protocol for a pragmatic randomised controlled trial. Trials, 2019, 20, 113.	1.6	16
9	Whoâ€™s Challenging Who?: a co-produced approach for training staff in learning disability services about challenging behaviour. Tizard Learning Disability Review, 2019, 24, 192-199.	0.4	2
10	Current practices in clinical neurofeedback with functional MRIâ€™ Analysis of a survey using the TIDieR checklist. European Psychiatry, 2018, 50, 28-33.	0.2	32
11	Is the amount of exposure to aggressive challenging behaviour related to staff work-related well-being in intellectual disability services? Evidence from a clustered research design. Research in Developmental Disabilities, 2018, 81, 155-161.	2.2	11
12	Who's challenging who training for staff empathy towards adults with challenging behaviour: cluster randomised controlled trial. Journal of Intellectual Disability Research, 2018, 62, 798-813.	2.0	19
13	Effectiveness of the â€˜Whoâ€™s Challenging Whoâ€™ support staff training intervention to improve attitudes and empathy towards adults with intellectual disability and challenging behaviours: study protocol for a cluster randomised controlled trial. Trials, 2017, 18, 460.	1.6	11
14	A pilot randomised controlled trial of community-led ANTipsychotic Drug REDuction for Adults with Learning Disabilities. Health Technology Assessment, 2017, 21, 1-92.	2.8	23
15	The use of everolimus in the treatment of neurocognitive problems in tuberous sclerosis (TRON): study protocol for a randomised controlled trial. Trials, 2016, 17, 398.	1.6	11
16	Eligibility for interventions, co-occurrence and risk factors for unhealthy behaviours in patients consulting for routine primary care: results from the Pre-Empt study. BMC Family Practice, 2015, 16, 133.	2.9	10
17	Challenges of a community based pragmatic, randomised controlled trial of weight loss maintenance. BMC Research Notes, 2015, 8, 802.	1.4	6
18	A feasibility randomised controlled trial of a motivational interviewing-based intervention for weight loss maintenance in adults. Health Technology Assessment, 2015, 19, 1-378.	2.8	40

#	ARTICLE	IF	CITATIONS
19	Training practitioners to deliver opportunistic multiple behaviour change counselling in primary care: a cluster randomised trial. <i>BMJ</i> , The, 2013, 346, f1191-f1191.	6.0	106
20	Preventing disease through opportunistic, rapid engagement by primary care teams using behaviour change counselling (PRE-EMPT): protocol for a general practice-based cluster randomised trial. <i>BMC Family Practice</i> , 2010, 11, 69.	2.9	20
