#	ARTICLE	IF	CITATIONS
1	Biogeochemical feedbacks may amplify ongoing and future ocean deoxygenation: a case study from the Peruvian oxygen minimum zone. <i>Biogeochemistry</i> , 2022, 159, 45-67.	1.7	8
2	Recycling and Burial of Biogenic Silica in an Open Margin Oxygen Minimum Zone. <i>Global Biogeochemical Cycles</i> , 2021, 35, e2020GB006583.	1.9	21
3	A 35-million-year record of seawater stable Sr isotopes reveals a fluctuating global carbon cycle. <i>Science</i> , 2021, 371, 1346-1350.	6.0	31
4	Interactions between deep formation fluid and gas hydrate dynamics inferred from pore fluid geochemistry at active pockmarks of the Vestnesa Ridge, west Svalbard margin. <i>Marine and Petroleum Geology</i> , 2021, 127, 104957.	1.5	9
5	Oil and gas seepage offshore Georgia (Black Sea) – Geochemical evidences for a paleogene-neogene hydrocarbon source rock. <i>Marine and Petroleum Geology</i> , 2021, 128, 104995.	1.5	8
6	Quantification of dissolved CO ₂ plumes at the Goldeneye CO ₂ -release experiment. <i>International Journal of Greenhouse Gas Control</i> , 2021, 109, 103387.	2.3	9
7	Constraining Global Marine Iron Sources and Ligand-Mediated Scavenging Fluxes With GEOTRACES Dissolved Iron Measurements in an Ocean Biogeochemical Model. <i>Global Biogeochemical Cycles</i> , 2021, 35, e2021GB006948.	1.9	14
8	Origin and Transformation of Light Hydrocarbons Ascending at an Active Pockmark on Vestnesa Ridge, Arctic Ocean. <i>Journal of Geophysical Research: Solid Earth</i> , 2020, 125, e2018JB016679.	1.4	20
9	Silicate weathering in anoxic marine sediment as a requirement for authigenic carbonate burial. <i>Earth-Science Reviews</i> , 2020, 200, 102960.	4.0	65
10	Permian–Triassic mass extinction pulses driven by major marine carbon cycle perturbations. <i>Nature Geoscience</i> , 2020, 13, 745-750.	5.4	78
11	Geochemical characterization of deep-sea sediments on the Azores Plateau – From diagenesis to hydrothermal activity. <i>Marine Geology</i> , 2020, 429, 106291.	0.9	7
12	Formation pathways of light hydrocarbons in deep sediments of the Danube deep-sea fan, Western Black Sea. <i>Marine and Petroleum Geology</i> , 2020, 122, 104627.	1.5	14
13	Serpentine alteration as source of high dissolved silicon and elevated $\delta^{30}\text{Si}$ values to the marine Si cycle. <i>Nature Communications</i> , 2020, 11, 5123.	5.8	24
14	Development, test, and evaluation of exploitation technologies for the application of gas production from natural gas hydrate reservoirs and their potential application in the Danube Delta, Black Sea. <i>Marine and Petroleum Geology</i> , 2020, 120, 104488.	1.5	23
15	Cretaceous oceanic anoxic events prolonged by phosphorus cycle feedbacks. <i>Climate of the Past</i> , 2020, 16, 757-782.	1.3	27
16	Impact of ambient conditions on the Si isotope fractionation in marine pore fluids during early diagenesis. <i>Biogeosciences</i> , 2020, 17, 1745-1763.	1.3	26
17	Sediment release of dissolved organic matter to the oxygen minimum zone off Peru. <i>Biogeosciences</i> , 2020, 17, 4663-4679.	1.3	9
18	Simulating and Quantifying Multiple Natural Subsea CO ₂ Seeps at Panarea Island (Aeolian) Tj ETQq0 0 0 rgBT /Overlock 10 Science & Technology, 2019, 53, 10258-10268.	4.6	19

#	ARTICLE	IF	CITATIONS
19	Origin of High Mg and SO ₄ Fluids in Sediments of the Terceira Rift, Azores—Indications for Caminite Dissolution in a Waning Hydrothermal System. <i>Geochemistry, Geophysics, Geosystems</i> , 2019, 20, 6078-6094.	1.0	3
20	Ocean phosphorus inventory: large uncertainties in future projections on millennial timescales and their consequences for ocean deoxygenation. <i>Earth System Dynamics</i> , 2019, 10, 539-553.	2.7	9
21	Footprint and detectability of a well leaking CO ₂ in the Central North Sea: Implications from a field experiment and numerical modelling. <i>International Journal of Greenhouse Gas Control</i> , 2019, 84, 190-203.	2.3	33
22	Periodic changes in the Cretaceous ocean and climate caused by marine redox see-saw. <i>Nature Geoscience</i> , 2019, 12, 456-461.	5.4	17
23	Oxygen minimum zone-type biogeochemical cycling in the Cenomanian-Turonian Proto-North Atlantic across Oceanic Anoxic Event 2. <i>Earth and Planetary Science Letters</i> , 2019, 517, 50-60.	1.8	18
24	Carbon isotope exchange during anaerobic oxidation of methane (AOM) in sediments of the northeastern South China Sea. <i>Geochimica Et Cosmochimica Acta</i> , 2019, 246, 138-155.	1.6	47
25	Isotopic fingerprints of benthic nitrogen cycling in the Peruvian oxygen minimum zone. <i>Geochimica Et Cosmochimica Acta</i> , 2019, 245, 406-425.	1.6	15
26	Dissolved benthic phosphate, iron and carbon fluxes in the Mauritanian upwelling system and implications for ongoing deoxygenation. <i>Deep-Sea Research Part I: Oceanographic Research Papers</i> , 2019, 143, 70-84.	0.6	15
27	In Situ Temperature Measurements at the Svalbard Continental Margin: Implications for Gas Hydrate Dynamics. <i>Geochemistry, Geophysics, Geosystems</i> , 2018, 19, 1165-1177.	1.0	18
28	Gas hydrate dissociation off Svalbard induced by isostatic rebound rather than global warming. <i>Nature Communications</i> , 2018, 9, 83.	5.8	97
29	Genesis of mud volcano fluids in the Gulf of Cadiz using a novel basin-scale model approach. <i>Geochimica Et Cosmochimica Acta</i> , 2018, 243, 186-204.	1.6	9
30	3D basin-scale reconstruction of natural gas hydrate system of the Green Canyon, Gulf of Mexico. <i>Geochemistry, Geophysics, Geosystems</i> , 2017, 18, 1959-1985.	1.0	36
31	Shallow Gas Migration along Hydrocarbon Wells—An Unconsidered, Anthropogenic Source of Biogenic Methane in the North Sea. <i>Environmental Science & Technology</i> , 2017, 51, 10262-10268.	4.6	21
32	Benthic phosphorus cycling in the Peruvian oxygen minimum zone. <i>Biogeosciences</i> , 2016, 13, 1367-1386.	1.3	27
33	Effects of eustatic sea-level change, ocean dynamics, and nutrient utilization on atmospheric CO ₂ and seawater composition over the last 130,000 years: a model study. <i>Climate of the Past</i> , 2016, 12, 339-375.	1.3	22
34	Stable silicon isotope signatures of marine pore waters—Biogenic opal dissolution versus authigenic clay mineral formation. <i>Geochimica Et Cosmochimica Acta</i> , 2016, 191, 102-117.	1.6	80
35	A model for microbial phosphorus cycling in bioturbated marine sediments: Significance for phosphorus burial in the early Paleozoic. <i>Geochimica Et Cosmochimica Acta</i> , 2016, 189, 251-268.	1.6	38
36	Biological nitrate transport in sediments on the Peruvian margin mitigates benthic sulfide emissions and drives pelagic N loss during stagnation events. <i>Deep-Sea Research Part I: Oceanographic Research Papers</i> , 2016, 112, 123-136.	0.6	36

#	ARTICLE	IF	CITATIONS
37	3-D numerical modelling of methane hydrate accumulations using PetroMod. <i>Marine and Petroleum Geology</i> , 2016, 71, 288-295.	1.5	29
38	A revised global estimate of dissolved iron fluxes from marine sediments. <i>Global Biogeochemical Cycles</i> , 2015, 29, 691-707.	1.9	126
39	Quantification of methane emissions at abandoned gas wells in the Central North Sea. <i>Marine and Petroleum Geology</i> , 2015, 68, 848-860.	1.5	69
40	Organic carbon production, mineralisation and preservation on the Peruvian margin. <i>Biogeosciences</i> , 2015, 12, 1537-1559.	1.3	81
41	Freshening of the Marmara Sea prior to its post-glacial reconnection to the Mediterranean Sea. <i>Earth and Planetary Science Letters</i> , 2015, 413, 176-185.	1.8	22
42	Estimating the time of pockmark formation in the SW Xisha Uplift (South China Sea) using reaction-transport modeling. <i>Marine Geology</i> , 2015, 364, 21-31.	0.9	32
43	Quantification of methane emission from bacterial mat sites at Quepos Slide offshore Costa Rica. <i>International Journal of Earth Sciences</i> , 2014, 103, 1817-1829.	0.9	9
44	Is late Quaternary climate change governed by self-sustained oscillations in atmospheric CO ₂ ?. <i>Geochimica Et Cosmochimica Acta</i> , 2014, 132, 413-439.	1.6	17
45	The Phanerozoic ⁸⁸ 86Sr record of seawater: New constraints on past changes in oceanic carbonate fluxes. <i>Geochimica Et Cosmochimica Acta</i> , 2014, 128, 249-265.	1.6	101
46	Benthic nitrogen fluxes and fractionation of nitrate in the Mauritanian oxygen minimum zone (Eastern Tropical North Atlantic). <i>Geochimica Et Cosmochimica Acta</i> , 2014, 134, 234-256.	1.6	49
47	Atlantic cooling associated with a marine biotic crisis during the mid-Cretaceous period. <i>Nature Geoscience</i> , 2013, 6, 558-561.	5.4	110
48	Relating sulfate and methane dynamics to geology: Accretionary prism offshore SW Taiwan. <i>Geochemistry, Geophysics, Geosystems</i> , 2013, 14, 2523-2545.	1.0	57
49	Modeling benthic pelagic nutrient exchange processes and porewater distributions in a seasonally hypoxic sediment: evidence for massive phosphate release by <i>Beggiatoa</i> ?. <i>Biogeosciences</i> , 2013, 10, 629-651.	1.3	57
50	Estimation of the global inventory of methane hydrates in marine sediments using transfer functions. <i>Biogeosciences</i> , 2013, 10, 959-975.	1.3	145
51	Methane-Carbon Flow into the Benthic Food Web at Cold Seeps – A Case Study from the Costa Rica Subduction Zone. <i>PLoS ONE</i> , 2013, 8, e74894.	1.1	70
52	The Global Inventory of Methane Hydrate in Marine Sediments: A Theoretical Approach. <i>Energies</i> , 2012, 5, 2449-2498.	1.6	240
53	Controls on organic carbon and molybdenum accumulation in Cretaceous marine sediments from the Cenomanian–Turonian interval including Oceanic Anoxic Event 2. <i>Chemical Geology</i> , 2012, 324-325, 28-45.	1.4	20
54	Simple transfer functions for calculating benthic fixed nitrogen losses and C:N:P regeneration ratios in global biogeochemical models. <i>Global Biogeochemical Cycles</i> , 2012, 26, .	1.9	55

#	ARTICLE	IF	CITATIONS
55	Factors influencing the distribution of epibenthic megafauna across the Peruvian oxygen minimum zone. <i>Deep-Sea Research Part I: Oceanographic Research Papers</i> , 2012, 68, 123-135.	0.6	61
56	Benthic iron and phosphorus fluxes across the Peruvian oxygen minimum zone. <i>Limnology and Oceanography</i> , 2012, 57, 851-867.	1.6	130
57	Rising Arctic Ocean temperatures cause gas hydrate destabilization and ocean acidification. <i>Geophysical Research Letters</i> , 2011, 38, n/a-n/a.	1.5	247
58	Sources of fluids and gases expelled at cold seeps offshore Georgia, eastern Black Sea. <i>Geochimica Et Cosmochimica Acta</i> , 2011, 75, 3250-3268.	1.6	52
59	Estimation of the global amount of submarine gas hydrates formed via microbial methane formation based on numerical reaction-transport modeling and a novel parameterization of Holocene sedimentation. <i>Geochimica Et Cosmochimica Acta</i> , 2011, 75, 4562-4576.	1.6	143
60	Early diagenesis of redox-sensitive trace metals in the Peru upwelling area – response to ENSO-related oxygen fluctuations in the water column. <i>Geochimica Et Cosmochimica Acta</i> , 2011, 75, 7257-7276.	1.6	223
61	Benthic nitrogen cycling traversing the Peruvian oxygen minimum zone. <i>Geochimica Et Cosmochimica Acta</i> , 2011, 75, 6094-6111.	1.6	90
62	Simulating the biogeochemical effects of volcanic CO ₂ degassing on the oxygen-state of the deep ocean during the Cenomanian/Turonian Anoxic Event (OAE ₂). <i>Earth and Planetary Science Letters</i> , 2011, 305, 371-384.	1.8	55
63	Cool episodes in the Cretaceous – Exploring the effects of physical forcings on Antarctic snow accumulation. <i>Earth and Planetary Science Letters</i> , 2011, 307, 279-288.	1.8	33
64	Rates and regulation of nitrogen cycling in seasonally hypoxic sediments during winter (Boknis Eck, Tj ETQq0 0 0 rgBT /Overlock 10 Tf 5 14-28.	0.9	47
65	A transfer function for the prediction of gas hydrate inventories in marine sediments. <i>Biogeosciences</i> , 2010, 7, 2925-2941.	1.3	26
66	Controls on authigenic carbonate precipitation at cold seeps along the convergent margin off Costa Rica. <i>Geochemistry, Geophysics, Geosystems</i> , 2010, 11, .	1.0	43
67	Constraining the marine strontium budget with natural strontium isotope fractionations (⁸⁷ Sr/ ⁸⁶ Sr [∞]), Tj ETQq1 1 0.784314 rgBT / 2010, 74, 4097-4109.	1.6	154
68	Pathways and regulation of carbon, sulfur and energy transfer in marine sediments overlying methane gas hydrates on the Opouawe Bank (New Zealand). <i>Geochimica Et Cosmochimica Acta</i> , 2010, 74, 5763-5784.	1.6	32
69	The influence of volcanic ash alteration on the REE composition of marine pore waters. <i>Journal of Geochemical Exploration</i> , 2010, 106, 176-187.	1.5	39
70	Phosphorus imbalance in the global ocean?. <i>Global Biogeochemical Cycles</i> , 2010, 24, .	1.9	75
71	Vodyanitskii mud volcano, Sorokin trough, Black Sea: Geological characterization and quantification of gas bubble streams. <i>Marine and Petroleum Geology</i> , 2009, 26, 1799-1811.	1.5	93
72	The thermal structure of the Dvurechenskii mud volcano and its implications for gas hydrate stability and eruption dynamics. <i>Marine and Petroleum Geology</i> , 2009, 26, 1812-1823.	1.5	25

#	ARTICLE	IF	CITATIONS
73	Intercalibration of Bruevich's method to determine the total alkalinity in seawater. <i>Oceanology</i> , 2008, 48, 438-443.	0.3	46
74	Liverworts and all. <i>Nature Geoscience</i> , 2008, 1, 14-15.	5.4	5
75	Phanerozoic evolution of atmospheric methane. <i>Global Biogeochemical Cycles</i> , 2008, 22, .	1.9	18
76	Hydrogeological system of erosional convergent margins and its influence on tectonics and interplate seismogenesis. <i>Geochemistry, Geophysics, Geosystems</i> , 2008, 9, .	1.0	159
77	Halogen and ¹²⁹ I systematics in gas hydrate fields at the northern Cascadia margin (IODP Tj ETQq1 1.0, 784314, rgBT /Ov	1.0	29
78	Cold seeps along the main Marmara Fault in the Sea of Marmara (Turkey). <i>Deep-Sea Research Part I: Oceanographic Research Papers</i> , 2008, 55, 552-570.	0.6	86
79	Silicate weathering in anoxic marine sediments. <i>Geochimica Et Cosmochimica Acta</i> , 2008, 72, 2895-2918.	1.6	194
80	Volcanogenic sediment-seawater interactions and the geochemistry of pore waters. <i>Chemical Geology</i> , 2008, 249, 321-338.	1.4	32
81	Effects of Ca-enrichment on authigenic carbonate formation at cold vent sites off Costa Rica: a numerical model approach. <i>Mineralogical Magazine</i> , 2008, 72, 325-327.	0.6	0
82	Origin of salt-enriched pore fluids in the northern Gulf of Mexico. <i>Earth and Planetary Science Letters</i> , 2007, 259, 266-282.	1.8	31
83	Consequences of moderate $\sim 1/4$ 25,000-yr lasting emission of light CO ₂ into the mid-Cretaceous ocean. <i>Earth and Planetary Science Letters</i> , 2007, 259, 200-211.	1.8	52
84	Bubble-induced porewater mixing: A 3-D model for deep porewater irrigation. <i>Geochimica Et Cosmochimica Acta</i> , 2007, 71, 5135-5154.	1.6	89
85	Calcium isotope record of Phanerozoic oceans: Implications for chemical evolution of seawater and its causative mechanisms. <i>Geochimica Et Cosmochimica Acta</i> , 2007, 71, 5117-5134.	1.6	211
86	Old iodine in fluids venting along the Central American convergent margin. <i>Geophysical Research Letters</i> , 2007, 34, .	1.5	8
87	Distribution and accumulation rate of Hg in the upper quaternary sediments of the Deryugin Basin, Sea of Okhotsk. <i>Geochemistry International</i> , 2007, 45, 47-61.	0.2	17
88	The oxygen isotope evolution of seawater: A critical review of a long-standing controversy and an improved geological water cycle model for the past 3.4-billion years. <i>Earth-Science Reviews</i> , 2007, 83, 83-122.	4.0	295
89	Nucleation of calcium carbonate on bacterial nanoglobules. <i>Geology</i> , 2006, 34, 1017.	2.0	151
90	Methane discharge into the Black Sea and the global ocean via fluid flow through submarine mud volcanoes. <i>Earth and Planetary Science Letters</i> , 2006, 248, 545-560.	1.8	92

#	ARTICLE	IF	CITATIONS
91	Paleoclimates, ocean depth, and the oxygen isotopic composition of seawater. <i>Earth and Planetary Science Letters</i> , 2006, 252, 82-93.	1.8	205
92	Kinetics of organic matter degradation, microbial methane generation, and gas hydrate formation in anoxic marine sediments. <i>Geochimica Et Cosmochimica Acta</i> , 2006, 70, 3905-3927.	1.6	181
93	The contribution of organic matter to the alkaline reserve of natural waters. <i>Oceanology</i> , 2006, 46, 192-199.	0.3	26
94	Structure and thermal expansion of natural gas clathrate hydrates. <i>Chemical Engineering Science</i> , 2006, 61, 2670-2674.	1.9	85
95	The physicochemical habitat of <i>Sclerolinum</i> sp. at Hook Ridge hydrothermal vent, Bransfield Strait, Antarctica. <i>Limnology and Oceanography</i> , 2005, 50, 598-606.	1.6	45
96	Methane hydrate accumulation in Mound 11 mud volcano, Costa Rica forearc. <i>Marine Geology</i> , 2005, 216, 83-100.	0.9	74
97	Simulation of long-term feedbacks from authigenic carbonate crust formation at cold vent sites. <i>Chemical Geology</i> , 2005, 216, 157-174.	1.4	62
98	Calculation of the stability and solubility of methane hydrate in seawater. <i>Chemical Geology</i> , 2005, 219, 37-52.	1.4	210
99	In situ benthic fluxes from an intermittently active mud volcano at the Costa Rica convergent margin. <i>Earth and Planetary Science Letters</i> , 2005, 235, 79-95.	1.8	78
100	Methane formation at Costa Rica continental margin constraints for gas hydrate inventories and cross-columnar fluid flow. <i>Earth and Planetary Science Letters</i> , 2005, 236, 41-60.	1.8	63
101	Reply to comment on: Gas hydrate growth, methane transport and chloride enrichment at the southern summit of Hydrate Ridge, Cascadia Margin off Oregon. <i>Earth and Planetary Science Letters</i> , 2005, 239, 168-175.	1.8	12
102	Calcium isotope ($\delta^{44}/40\text{Ca}$) variations of Neogene planktonic foraminifera. <i>Paleoceanography</i> , 2005, 20, n/a-n/a.	3.0	94
103	Fluid venting activity on the Costa Rica margin: new results from authigenic carbonates. <i>International Journal of Earth Sciences</i> , 2004, 93, 596.	0.9	96
104	Fluid flow through active mud dome Mound Culebra offshore Nicoya Peninsula, Costa Rica: evidence from heat flow surveying. <i>Marine Geology</i> , 2004, 207, 145-157.	0.9	48
105	Evidence for the submarine weathering of silicate minerals in Black Sea sediments: Possible implications for the marine Li and B cycles. <i>Geochemistry, Geophysics, Geosystems</i> , 2004, 5, n/a-n/a.	1.0	41
106	Impact of atmospheric CO ₂ and galactic cosmic radiation on Phanerozoic climate change and the marine $\delta^{18}\text{O}$ record. <i>Geochemistry, Geophysics, Geosystems</i> , 2004, 5, .	1.0	56
107	Chemical, biological and hydrological controls on the ¹⁴ C content of cold seep carbonate crusts: numerical modeling and implications for convection at cold seeps. <i>Chemical Geology</i> , 2004, 213, 359-383.	1.4	41
108	The effect of dissolved barium on biogeochemical processes at cold seeps. <i>Geochimica Et Cosmochimica Acta</i> , 2004, 68, 1735-1748.	1.6	100

109	Rising methane gas bubbles form massive hydrate layers at the seafloor. <i>Geochimica Et Cosmochimica Acta</i> , 2004, 68, 4335-4345.	1.6	162
110	Title is missing!. <i>Earth and Planetary Science Letters</i> , 2004, 225, 347-363.	1.8	13
111	Gas hydrate growth, methane transport, and chloride enrichment at the southern summit of Hydrate Ridge, Cascadia margin off Oregon. <i>Earth and Planetary Science Letters</i> , 2004, 226, 225-241.	1.8	264
112	Numerical modeling of carbonate crust formation at cold vent sites: significance for fluid and methane budgets and chemosynthetic biological communities. <i>Earth and Planetary Science Letters</i> , 2004, 221, 337-353.	1.8	178
113	Fluid expulsion from the Dvurechenskii mud volcano (Black Sea)Part I. Fluid sources and relevance to Li, B, Sr, I and dissolved inorganic nitrogen cycles. <i>Earth and Planetary Science Letters</i> , 2004, 225, 347-363.	1.8	66
114	Fluid expulsion related to mud extrusion off Costa Ricaâ€”A window to the subducting slab. <i>Geology</i> , 2004, 32, 201.	2.0	221
115	Geochemistry of gas hydrate accumulation offshore NE Sakhalin Island (the Sea of Okhotsk): results from the KOMEX-2002 cruise. <i>Geo-Marine Letters</i> , 2003, 23, 278-288.	0.5	25
116	Isotopic evidence (He, B, C) for deep fluid and mud mobilization from mud volcanoes in the Caucasus continental collision zone. <i>International Journal of Earth Sciences</i> , 2003, 92, 407-425.	0.9	50
117	Feedbacks between oceanic redox states and marine productivity: A model perspective focused on benthic phosphorus cycling. <i>Global Biogeochemical Cycles</i> , 2003, 17, n/a-n/a.	1.9	98
118	Fluid flow, methane fluxes, carbonate precipitation and biogeochemical turnover in gas hydrate-bearing sediments at Hydrate Ridge, Cascadia Margin: numerical modeling and mass balances. <i>Geochimica Et Cosmochimica Acta</i> , 2003, 67, 3403-3421.	1.6	329
119	Cretaceous and Cenozoic evolution of seawater composition, atmospheric O ₂ and CO ₂ : A model perspective. <i>Numerische Mathematik</i> , 2003, 303, 94-148.	0.7	111
120	Anaerobic oxidation of methane above gas hydrates at Hydrate Ridge, NE Pacific Ocean. <i>Marine Ecology - Progress Series</i> , 2003, 264, 1-14.	0.9	296
121	Dissolution kinetics of biogenic silica from the water column to the sediments. <i>Geochimica Et Cosmochimica Acta</i> , 2002, 66, 439-455.	1.6	147
122	Sedimentation and formation of secondary minerals in the hypersaline Discovery Basin, eastern Mediterranean. <i>Marine Geology</i> , 2002, 186, 9-28.	0.9	29
123	The geological water cycle and the evolution of marine $\delta^{18}O$ values. <i>Geochimica Et Cosmochimica Acta</i> , 2001, 65, 2469-2485.	1.6	189
124	Controls on the cretaceous and cenozoic evolution of seawater composition, atmospheric CO ₂ and climate. <i>Geochimica Et Cosmochimica Acta</i> , 2001, 65, 3005-3025.	1.6	250
125	Hot vents in an ice-cold ocean: Indications for phase separation at the southernmost area of hydrothermal activity, Bransfield Strait, Antarctica. <i>Earth and Planetary Science Letters</i> , 2001, 193, 381-394.	1.8	34
126	Robust and fast FORTRAN and MATLAB® libraries to calculate pH distributions in marine systems. <i>Computers and Geosciences</i> , 2001, 27, 157-169.	2.0	36

#	ARTICLE	IF	CITATIONS
127	Pore-water distribution and quantification of diffusive benthic fluxes of silicic acid, nitrate and phosphate in surface sediments of the deep Arabian Sea. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2000, 47, 2707-2734.	0.6	39
128	Stable sulfur isotopes indicate net sulfate reduction in near-surface sediments of the deep Arabian Sea. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2000, 47, 2769-2783.	0.6	34
129	Distribution, biomass and diversity of benthic foraminifera in relation to sediment geochemistry in the Arabian Sea. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2000, 47, 2913-2955.	0.6	94
130	Numerical modeling of benthic processes in the deep Arabian Sea. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2000, 47, 3039-3072.	0.6	61
131	Gas hydrate destabilization: enhanced dewatering, benthic material turnover and large methane plumes at the Cascadia convergent margin. <i>Earth and Planetary Science Letters</i> , 1999, 170, 1-15.	1.8	386
132	Hydrothermal activity at Hook Ridge in the Central Bransfield Basin, Antarctica. <i>Geo-Marine Letters</i> , 1998, 18, 277-284.	0.5	31
133	Fluid venting in the eastern Aleutian Subduction Zone. <i>Journal of Geophysical Research</i> , 1998, 103, 2597-2614.	3.3	123
134	Iron species determination to investigate early diagenetic reactivity in marine sediments. <i>Geochimica Et Cosmochimica Acta</i> , 1997, 61, 63-72.	1.6	89
135	Quantifying fluid flow, solute mixing, and biogeochemical turnover at cold vents of the eastern Aleutian subduction zone. <i>Geochimica Et Cosmochimica Acta</i> , 1997, 61, 5209-5219.	1.6	143
136	Salty brines on the Mediterranean sea floor. <i>Nature</i> , 1997, 387, 31-32.	13.7	68
137	The Influence of Diagenetic Processes on the Exchange of Trace Contaminants at the Sediment-Water Interface. , 1996, , 37-50.		3
138	Early diagenetic processes, fluxes, and reaction rates in sediments of the South Atlantic. <i>Geochimica Et Cosmochimica Acta</i> , 1994, 58, 2041-2060.	1.6	184
139	Studies on the adsorption of cadmium on hydrous iron(III) oxides in oxic sediments. <i>Analytica Chimica Acta</i> , 1993, 273, 323-327.	2.6	18
140	Artifacts in the Determination of Trace Metal Binding Forms in Anoxic Sediments by Sequential Extraction. <i>International Journal of Environmental Analytical Chemistry</i> , 1993, 51, 187-200.	1.8	73
141	New procedure for determining reactive Fe(III) and Fe(II) minerals in sediments. <i>Limnology and Oceanography</i> , 1993, 38, 1803-1812.	1.6	96
142	Remobilization events involving Cd and Zn from intertidal flat sediments in the elbe estuary during the tidal cycle. <i>Estuarine, Coastal and Shelf Science</i> , 1992, 35, 371-393.	0.9	59
143	Solubility of cadmium and cobalt in a post-oxic or sub-oxic sediment suspension. <i>Hydrobiologia</i> , 1992, 235-236, 611-622.	1.0	8
144	Strong and Dynamic Benthic-Pelagic Coupling and Feedbacks in a Coastal Upwelling System (Peruvian) Tj ETQq0 0 0,rgBT /Overlock 10	1.28	20
