#	ARTICLE	IF	CITATIONS
1	Influenza. Nature Reviews Disease Primers, 2018, 4, 3.	30.5	880
2	Antigenic structure of influenza virus haemagglutinin defined by hybridoma antibodies. Nature, 1981, 290, 713-717.	27.8	466
3	Eight-plasmid system for rapid generation of influenza virus vaccines. Vaccine, 2002, 20, 3165-3170.	3.8	374
4	Wet marketsâ€™a continuing source of severe acute respiratory syndrome and influenza?. Lancet, The, 2004, 363, 234-236.	13.7	357
5	H5N1 Influenza â€™ Continuing Evolution and Spread. New England Journal of Medicine, 2006, 355, 2174-2177.	27.0	352
6	H5N1 Outbreaks and Enzootic Influenza. Emerging Infectious Diseases, 2006, 12, 3-8.	4.3	344
7	The duck genome and transcriptome provide insight into an avian influenza virus reservoir species. Nature Genetics, 2013, 45, 776-783.	21.4	327
8	Continuing challenges in influenza. Annals of the New York Academy of Sciences, 2014, 1323, 115-139.	3.8	300
9	Evolution of the H9N2 influenza genotype that facilitated the genesis of the novel H7N9 virus. Proceedings of the National Academy of Sciences of the United States of America, 2015, 112, 548-553.	7.1	287
10	Influenza Virus: Dealing with a Drifting and Shifting Pathogen. Viral Immunology, 2018, 31, 174-183.	1.3	232
11	The Interaction between Respiratory Pathogens and Mucus. Cell Host and Microbe, 2016, 19, 159-168.	11.0	221
12	Characterization of the Influenza A Virus Gene Pool in Avian Species in Southern China: Was H6N1 a Derivative or a Precursor of H5N1?. Journal of Virology, 2000, 74, 6309-6315.	3.4	204
13	Role of Quail in the Interspecies Transmission of H9 Influenza A Viruses: Molecular Changes on HA That Correspond to Adaptation from Ducks to Chickens. Journal of Virology, 2003, 77, 3148-3156.	3.4	199
14	Hemagglutininâ€™neuraminidase balance confers respiratory-droplet transmissibility of the pandemic H1N1 influenza virus in ferrets. Proceedings of the National Academy of Sciences of the United States of America, 2011, 108, 14264-14269.	7.1	197
15	Adaptation of Pandemic H1N1 Influenza Viruses in Mice. Journal of Virology, 2010, 84, 8607-8616.	3.4	189
16	Characterization of H5N1 Influenza Viruses That Continue To Circulate in Geese in Southeastern China. Journal of Virology, 2002, 76, 118-126.	3.4	177
17	Human mesenchymal stromal cells reduce influenza A H5N1-associated acute lung injury in vitro and in vivo. Proceedings of the National Academy of Sciences of the United States of America, 2016, 113, 3621-3626.	7.1	174
18	Structure of antigenic sites on the haemagglutinin molecule of H5 avian influenza virus and phenotypic variation of escape mutants. Journal of General Virology, 2002, 83, 2497-2505.	2.9	174

#	ARTICLE	IF	CITATIONS
19	Characterization of Influenza A/HongKong/156/97 (H5N1) Virus in a Mouse Model and Protective Effect of Zanamivir on H5N1 Infection in Mice. <i>Journal of Infectious Diseases</i> , 1998, 178, 1592-1596.	4.0	147
20	The pH of Activation of the Hemagglutinin Protein Regulates H5N1 Influenza Virus Pathogenicity and Transmissibility in Ducks. <i>Journal of Virology</i> , 2010, 84, 1527-1535.	3.4	124
21	Amantadine-Oseltamivir Combination therapy for H5N1 Influenza Virus Infection in Mice. <i>Antiviral Therapy</i> , 2007, 12, 363-370.	1.0	121
22	Recombinant anti-sialidase single-chain variable fragment antibody. Characterization, formation of dimer and higher-molecular-mass multimers and the solution of the crystal structure of the single-chain variable fragment/sialidase complex. <i>FEBS Journal</i> , 1994, 221, 151-157.	0.2	115
23	Pathobiological features of a novel, highly pathogenic avian influenza A(H5N8) virus. <i>Emerging Microbes and Infections</i> , 2014, 3, 1-13.	6.5	106
24	Molecular requirements for a pandemic influenza virus: An acid-stable hemagglutinin protein. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 1636-1641.	7.1	105
25	The importance of animal influenza for human disease. <i>Vaccine</i> , 2002, 20, S16-S20.	3.8	100
26	Immunologic Rebound After Cessation of Long-term Chemotherapy in Acute Leukemia. <i>Blood</i> , 1972, 40, 42-51.	1.4	99
27	The immunogenicity and efficacy against H5N1 challenge of reverse genetics-derived H5N3 influenza vaccine in ducks and chickens. <i>Virology</i> , 2006, 351, 303-311.	2.4	96
28	Heterologous protection against lethal A/HongKong/156/97 (H5N1) influenza virus infection in C57BL/6 mice. <i>Journal of General Virology</i> , 2000, 81, 2689-2696.	2.9	95
29	Amino Acid Residues in the Fusion Peptide Pocket Regulate the pH of Activation of the H5N1 Influenza Virus Hemagglutinin Protein. <i>Journal of Virology</i> , 2009, 83, 3568-3580.	3.4	94
30	A novel reassortant canine H3N1 influenza virus between pandemic H1N1 and canine H3N2 influenza viruses in Korea. <i>Journal of General Virology</i> , 2012, 93, 551-554.	2.9	94
31	Influenza in children and young adults with cancer. 20 cases. <i>Cancer</i> , 1977, 39, 350-353.	4.1	93
32	A comparative analysis of host responses to avian influenza infection in ducks and chickens highlights a role for the interferon-induced transmembrane proteins in viral resistance. <i>BMC Genomics</i> , 2015, 16, 574.	2.8	92
33	Mammalian adaptation of influenza A(H7N9) virus is limited by a narrow genetic bottleneck. <i>Nature Communications</i> , 2015, 6, 6553.	12.8	90
34	Influenza A viruses in feral Canadian ducks: extensive reassortment in nature. <i>Journal of General Virology</i> , 2004, 85, 2327-2337.	2.9	88
35	Live Bird Markets of Bangladesh: H9N2 Viruses and the Near Absence of Highly Pathogenic H5N1 Influenza. <i>PLoS ONE</i> , 2011, 6, e19311.	2.5	84
36	Influenza A Virus Migration and Persistence in North American Wild Birds. <i>PLoS Pathogens</i> , 2013, 9, e1003570.	4.7	83

#	ARTICLE	IF	CITATIONS
37	Increased Acid Stability of the Hemagglutinin Protein Enhances H5N1 Influenza Virus Growth in the Upper Respiratory Tract but Is Insufficient for Transmission in Ferrets. <i>Journal of Virology</i> , 2013, 87, 9911-9922.	3.4	81
38	Establishment and Lineage Replacement of H6 Influenza Viruses in Domestic Ducks in Southern China. <i>Journal of Virology</i> , 2012, 86, 6075-6083.	3.4	77
39	Antigenic and Molecular Characterization of Avian Influenza A(H9N2) Viruses, Bangladesh. <i>Emerging Infectious Diseases</i> , 2013, 19, .	4.3	70
40	Avian Influenza A(H5N1) and A(H9N2) Seroprevalence and Risk Factors for Infection Among Egyptians: A Prospective, Controlled Seroepidemiological Study. <i>Journal of Infectious Diseases</i> , 2015, 211, 1399-1407.	4.0	69
41	Insight into live bird markets of Bangladesh: an overview of the dynamics of transmission of H5N1 and H9N2 avian influenza viruses. <i>Emerging Microbes and Infections</i> , 2017, 6, 1-8.	6.5	68
42	Generation of High-Yielding Influenza A Viruses in African Green Monkey Kidney (Vero) Cells by Reverse Genetics. <i>Journal of Virology</i> , 2004, 78, 1851-1857.	3.4	66
43	Failure to Detect Hemagglutination-Inhibiting Antibodies with Intact Avian Influenza Virions. <i>Infection and Immunity</i> , 1982, 38, 530-535.	2.2	65
44	The enigma of the apparent disappearance of Eurasian highly pathogenic H5 clade 2.3.4.4 influenza A viruses in North American waterfowl. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 9033-9038.	7.1	62
45	Recombinant antineuraminidase single chain antibody: Expression, characterization, and crystallization in complex with antigen. <i>Proteins: Structure, Function and Bioinformatics</i> , 1993, 16, 57-63.	2.6	58
46	Genetic evolution of influenza H9N2 viruses isolated from various hosts in China from 1994 to 2013. <i>Emerging Microbes and Infections</i> , 2017, 6, 1-11.	6.5	56
47	Neuraminidase Inhibitor Susceptibility Network Position Statement: Antiviral Resistance in Influenza A/H5N1 Viruses. <i>Antiviral Therapy</i> , 2005, 10, 873-877.	1.0	55
48	Characterization of H5N2 influenza viruses from Italian poultry. <i>Journal of General Virology</i> , 2001, 82, 623-630.	2.9	53
49	Epistatic interactions between neuraminidase mutations facilitated the emergence of the oseltamivir-resistant H1N1 influenza viruses. <i>Nature Communications</i> , 2014, 5, 5029.	12.8	51
50	Ecosystem Interactions Underlie the Spread of Avian Influenza A Viruses with Pandemic Potential. <i>PLoS Pathogens</i> , 2016, 12, e1005620.	4.7	48
51	Combinations of Oseltamivir and T-705 Extend the Treatment Window for Highly Pathogenic Influenza A(H5N1) Virus Infection in Mice. <i>Scientific Reports</i> , 2016, 6, 26742.	3.3	48
52	Controlling avian flu at the source. <i>Nature</i> , 2005, 435, 415-416.	27.8	47
53	Genesis of avian influenza H9N2 in Bangladesh. <i>Emerging Microbes and Infections</i> , 2014, 3, 1-17.	6.5	46
54	Unique Determinants of Neuraminidase Inhibitor Resistance among N3, N7, and N9 Avian Influenza Viruses. <i>Journal of Virology</i> , 2015, 89, 10891-10900.	3.4	43

#	ARTICLE	IF	CITATIONS
55	Influenza A and B viruses with reduced baloxavir susceptibility display attenuated in vitro fitness but retain ferret transmissibility. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 8593-8601.	7.1	43
56	Multiple introductions of highly pathogenic avian influenza H5N1 viruses into Bangladesh. <i>Emerging Microbes and Infections</i> , 2014, 3, 1-14.	6.5	42
57	Genesis of Influenza A(H5N8) Viruses. <i>Emerging Infectious Diseases</i> , 2017, 23, 1368-1371.	4.3	42
58	Avian Influenza Virus (H11N9) in Migratory Shorebirds Wintering in the Amazon Region, Brazil. <i>PLoS ONE</i> , 2014, 9, e110141.	2.5	41
59	Duck Interferon-Inducible Transmembrane Protein 3 Mediates Restriction of Influenza Viruses. <i>Journal of Virology</i> , 2016, 90, 103-116.	3.4	41
60	The quail genome: insights into social behaviour, seasonal biology and infectious disease response. <i>BMC Biology</i> , 2020, 18, 14.	3.8	40
61	Antigenic evolution of H9N2 chicken influenza viruses isolated in China during 2009â€“2013 and selection of a candidate vaccine strain with broad cross-reactivity. <i>Veterinary Microbiology</i> , 2016, 182, 1-7.	1.9	37
62	IFN and cytokine responses in ducks to genetically similar H5N1 influenza A viruses of varying pathogenicity. <i>Journal of General Virology</i> , 2018, 99, 464-474.	2.9	37
63	The Continuing Evolution of H5N1 and H9N2 Influenza Viruses in Bangladesh Between 2013 and 2014. <i>Avian Diseases</i> , 2016, 60, 108-117.	1.0	35
64	Role of domestic ducks in the emergence of a new genotype of highly pathogenic H5N1 avian influenza A viruses in Bangladesh. <i>Emerging Microbes and Infections</i> , 2017, 6, 1-13.	6.5	34
65	New influenza virus in horses. <i>Nature</i> , 1991, 351, 527-527.	27.8	30
66	A single dose of whole inactivated H7N9 influenza vaccine confers protection from severe disease but not infection in ferrets. <i>Vaccine</i> , 2014, 32, 4571-4577.	3.8	30
67	Comparative analysis of virulence of a novel, avian-origin H3N2 canine influenza virus in various host species. <i>Virus Research</i> , 2015, 195, 135-140.	2.2	30
68	Duck innate immune responses to high and low pathogenicity H5 avian influenza viruses. <i>Veterinary Microbiology</i> , 2019, 228, 101-111.	1.9	29
69	The replication of Bangladeshi H9N2 avian influenza viruses carrying genes from H7N3 in mammals. <i>Emerging Microbes and Infections</i> , 2016, 5, 1-12.	6.5	28
70	Humanâ€“Animal Interface: The Case for Influenza Interspecies Transmission. <i>Advances in Experimental Medicine and Biology</i> , 2016, 972, 17-33.	1.6	26
71	Long-term surveillance of H7 influenza viruses in American wild aquatic birds: are the H7N3 influenza viruses in wild birds the precursors of highly pathogenic strains in domestic poultry?. <i>Emerging Microbes and Infections</i> , 2015, 4, 1-9.	6.5	25
72	Novel Coronavirus and Astrovirus in Delaware Bay Shorebirds. <i>PLoS ONE</i> , 2014, 9, e93395.	2.5	24

#	ARTICLE	IF	CITATIONS
73	Molecular basis of mammalian transmissibility of avian H1N1 influenza viruses and their pandemic potential. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017, 114, 11217-11222.	7.1	24
74	Potential Advantages of DNA Immunization for Influenza Epidemic and Pandemic Planning. <i>Clinical Infectious Diseases</i> , 1999, 28, 225-229.	5.8	23
75	Competitive Fitness of Influenza B Viruses with Neuraminidase Inhibitor-Resistant Substitutions in a Coinfection Model of the Human Airway Epithelium. <i>Journal of Virology</i> , 2015, 89, 4575-4587.	3.4	23
76	Continuing evolution of highly pathogenic H5N1 viruses in Bangladeshi live poultry markets. <i>Emerging Microbes and Infections</i> , 2019, 8, 650-661.	6.5	23
77	Subtype Diversity of Influenza A Virus in North American Waterfowl: a Multidecade Study. <i>Journal of Virology</i> , 2020, 94, .	3.4	23
78	Restoration of virulence of escape mutants of H5 and H9 influenza viruses by their readaptation to mice. <i>Journal of General Virology</i> , 2005, 86, 2831-2838.	2.9	22
79	Mammalian-Transmissible H5N1 Influenza: the Dilemma of Dual-Use Research. <i>MBio</i> , 2012, 3, .	4.1	21
80	HA stabilization promotes replication and transmission of swine H1N1 gamma influenza viruses in ferrets. <i>ELife</i> , 2020, 9, .	6.0	19
81	Immunogenicity of influenza A/USSR (H1N1) subunit vaccine in unprimed young adults. <i>Journal of Medical Virology</i> , 1981, 7, 135-142.	5.0	17
82	H5N1 outbreaks and enzootic influenza. <i>Biodiversity</i> , 2006, 7, 51-55.	1.1	17
83	Highly Pathogenic Reassortant Avian Influenza A(H5N1) Virus Clade 2.3.2.1a in Poultry, Bhutan. <i>Emerging Infectious Diseases</i> , 2016, 22, 2137-2141.	4.3	17
84	Influenza A virus: sampling of the unique shorebird habitat at Delaware Bay, USA. <i>Royal Society Open Science</i> , 2017, 4, 171420.	2.4	17
85	Migratory birds in southern Brazil are a source of multiple avian influenza virus subtypes. <i>Influenza and Other Respiratory Viruses</i> , 2018, 12, 220-231.	3.4	17
86	Egg-adaptive mutations in H3N2v vaccine virus enhance egg-based production without loss of antigenicity or immunogenicity. <i>Vaccine</i> , 2015, 33, 3186-3192.	3.8	16
87	Possible basis for the emergence of H1N1 viruses with pandemic potential from avian hosts. <i>Emerging Microbes and Infections</i> , 2015, 4, 1-10.	6.5	14
88	Influenza surveillance on "foie gras"™ duck farms in Bulgaria, 2008–2012. <i>Influenza and Other Respiratory Viruses</i> , 2016, 10, 98-108.	3.4	14
89	Manipulation of neuraminidase packaging signals and hemagglutinin residues improves the growth of A/Anhui/1/2013 (H7N9) influenza vaccine virus yield in eggs. <i>Vaccine</i> , 2017, 35, 1424-1430.	3.8	14
90	Potential for Low-Pathogenic Avian H7 Influenza A Viruses To Replicate and Cause Disease in a Mammalian Model. <i>Journal of Virology</i> , 2017, 91, .	3.4	14

#	ARTICLE	IF	CITATIONS
91	H9N2 influenza viruses from Bangladesh: Transmission in chicken and New World quail. <i>Influenza and Other Respiratory Viruses</i> , 2018, 12, 814-817.	3.4	14
92	Survival analysis of infected mice reveals pathogenic variations in the genome of avian H1N1 viruses. <i>Scientific Reports</i> , 2014, 4, 7455.	3.3	13
93	Replication and pathogenic potential of influenza A virus subtypes H3, H7, and H15 from free-range ducks in Bangladesh in mammals. <i>Emerging Microbes and Infections</i> , 2018, 7, 1-13.	6.5	13
94	Duck TRIM27-L enhances MAVS signaling and is absent in chickens and turkeys. <i>Molecular Immunology</i> , 2015, 67, 607-615.	2.2	12
95	An Anti-H5N1 Influenza Virus FcDART Antibody Is a Highly Efficacious Therapeutic Agent and Prophylactic against H5N1 Influenza Virus Infection. <i>Journal of Virology</i> , 2015, 89, 4549-4561.	3.4	11
96	Whole-genome analysis of influenza A(H1N1)pdm09 viruses isolated in Uganda from 2009 to 2011. <i>Influenza and Other Respiratory Viruses</i> , 2016, 10, 486-492.	3.4	11
97	Changes to the dynamic nature of hemagglutinin and the emergence of the 2009 pandemic H1N1 influenza virus. <i>Scientific Reports</i> , 2015, 5, 12828.	3.3	10
98	Genetic characterization and pathogenic potential of H10 avian influenza viruses isolated from live poultry markets in Bangladesh. <i>Scientific Reports</i> , 2018, 8, 10693.	3.3	10
99	A Novel Neuraminidase-Dependent Hemagglutinin Cleavage Mechanism Enables the Systemic Spread of an H7N6 Avian Influenza Virus. <i>MBio</i> , 2019, 10, .	4.1	10
100	Highly pathogenic avian influenza H5N1 clade 2.3.2.1 and clade 2.3.4 viruses do not induce a clade-specific phenotype in mallard ducks. <i>Journal of General Virology</i> , 2017, 98, 1232-1244.	2.9	10
101	Sialic Acid-Binding Protein <i>2CBMTD</i> Protects Mice against Lethal Challenge with Emerging Influenza A (H7N9) Virus. <i>Antimicrobial Agents and Chemotherapy</i> , 2015, 59, 1495-1504.	3.2	9
102	Antibodies to Influenza A Viruses in Gulls at Delaware Bay, USA. <i>Avian Diseases</i> , 2016, 60, 341-345.	1.0	9
103	Molecular Characterization of Subtype H11N9 Avian Influenza Virus Isolated from Shorebirds in Brazil. <i>PLoS ONE</i> , 2015, 10, e0145627.	2.5	9
104	Competitive Fitness of Influenza B Viruses Possessing E119A and H274Y Neuraminidase Inhibitor Resistance-Associated Substitutions in Ferrets. <i>PLoS ONE</i> , 2016, 11, e0159847.	2.5	9
105	Host diversity and behavior determine patterns of interspecies transmission and geographic diffusion of avian influenza A subtypes among North American wild reservoir species. <i>PLoS Pathogens</i> , 2022, 18, e1009973.	4.7	9
