|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Perioperative Outcomes and Management in Pediatric Complex Cranial Vault Reconstruction. <i>Anesthesiology</i> , 2017, 126, 276-287.                                                                                                             | 2.5 | 68        |
| 2  | Safety of antifibrinolytics in cranial vault reconstructive surgery: a report from the pediatric craniofacial collaborative group. <i>Paediatric Anaesthesia</i> , 2017, 27, 271-281.                                                            | 1.1 | 67        |
| 3  | Considerations in deep brain stimulation (DBS) for pediatric secondary dystonia. <i>Child's Nervous System</i> , 2017, 33, 631-637.                                                                                                              | 1.1 | 22        |
| 4  | Predictors of perioperative complications in paediatric cranial vault reconstruction surgery: a multicentre observational study from the Pediatric Craniofacial Collaborative Group. <i>British Journal of Anaesthesia</i> , 2019, 122, 215-223. | 3.4 | 20        |
| 5  | Respiratory variation in peak aortic velocity accurately predicts fluid responsiveness in children undergoing neurosurgery under general anesthesia. <i>Journal of Clinical Monitoring and Computing</i> , 2018, 32, 221-226.                    | 1.6 | 19        |
| 6  | Robotic Stereotactic Assistance (ROSA) for Pediatric Epilepsy: A Single-Center Experience of 23 Consecutive Cases. <i>Children</i> , 2020, 7, 94.                                                                                                | 1.5 | 13        |
| 7  | Transfusion-Free Calvarial Vault Reconstruction Using Multimodal Blood Conservation Strategies in Two Pediatric Jehovah's Witness Patients With Craniosynostosis. <i>A &amp; A Case Reports</i> , 2016, 7, 33-36.                                | 0.7 | 11        |
| 8  | Behavioral and Emotional Disorders in Children and Their Anesthetic Implications. <i>Children</i> , 2020, 7, 253.                                                                                                                                | 1.5 | 8         |
| 9  | ÎµAminocaproic acid versus tranexamic acid in children undergoing complex cranial vault reconstruction for repair of craniosynostosis. <i>Pediatric Blood and Cancer</i> , 2021, 68, e29093.                                                     | 1.5 | 8         |
| 10 | Acute epiglottitis in the era of post-Haemophilus influenzae type B (HIB) vaccine. <i>Journal of Anesthesia</i> , 2013, 27, 316-317.                                                                                                             | 1.7 | 7         |
| 11 | Anesthesia Safety in Otolaryngology. <i>Otolaryngologic Clinics of North America</i> , 2019, 52, 63-73.                                                                                                                                          | 1.1 | 7         |
| 12 | Perioperative management of an anterior mediastinal teratoma in an infant: one more tool in the toolbox. <i>BMJ Case Reports</i> , 2018, 2018, bcr-2018-227022.                                                                                  | 0.5 | 6         |
| 13 | Intraoperative Management by a Craniofacial Team Anesthesiologist is Associated With Improved Outcomes for Children Undergoing Major Craniofacial Reconstructive Surgery. <i>Journal of Craniofacial Surgery</i> , 2019, 30, 418-423.            | 0.7 | 6         |
| 14 | Physiology and clinical utility of the peripheral venous waveform. <i>JRSM Cardiovascular Disease</i> , 2020, 9, 204800402097003.                                                                                                                | 0.7 | 6         |
| 15 | Endoscopic Craniosynostosis Repair. <i>International Anesthesiology Clinics</i> , 2019, 57, 61-71.                                                                                                                                               | 0.8 | 5         |
| 16 | Correction of a vertex encephalocele related to amniotic band syndrome. <i>BMJ Case Reports</i> , 2020, 13, e234735.                                                                                                                             | 0.5 | 5         |
| 17 | Dexmedetomidine as an Opioid-Sparing Agent in Pediatric Craniofacial Surgery. <i>Children</i> , 2020, 7, 68.                                                                                                                                     | 1.5 | 5         |
| 18 | Apneic oxygenation via nasal cannula for intubation of a premature neonate with multiple airway anomalies. <i>BMJ Case Reports</i> , 2019, 12, e227494.                                                                                          | 0.5 | 4         |

| #  | ARTICLE                                                                                                                                                                                                                                   | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Hot Topics in Safety for Pediatric Anesthesia. <i>Children</i> , 2020, 7, 242.                                                                                                                                                            | 1.5 | 4         |
| 20 | Non-Invasive Venous waveform Analysis (NIVA) for volume assessment during complex cranial vault reconstruction: A proof-of-concept study in children. <i>PLoS ONE</i> , 2020, 15, e0235933.                                               | 2.5 | 4         |
| 21 | Anesthesia for deep brain stimulation in traumatic brain injury-induced hemidystonia. <i>Clinical Case Reports (discontinued)</i> , 2015, 3, 492-495.                                                                                     | 0.5 | 3         |
| 22 | Neonatal airway anomaly: vallecular cyst. <i>BMJ Case Reports</i> , 2017, 2017, bcr-2017-223082.                                                                                                                                          | 0.5 | 3         |
| 23 | Pediatric Anesthesia Specialty Societies and Multi-Institutional Collaborations. <i>Children</i> , 2020, 7, 233.                                                                                                                          | 1.5 | 3         |
| 24 | Challenging airway in a paediatric patient impaled by a freezer pop stick. <i>BMJ Case Reports</i> , 2017, 2017, bcr-2017-220620.                                                                                                         | 0.5 | 1         |
| 25 | Spontaneous subdural haematoma in a paediatric patient on anticoagulant therapy. <i>BMJ Case Reports</i> , 2017, 2017, bcr-2017-223041.                                                                                                   | 0.5 | 1         |
| 26 | The Pediatric Craniofacial Collaborative Group (PCCG) Consensus Conference Methodology. <i>Paediatric Anaesthesia</i> , 2021, 31, 145-149.                                                                                                | 1.1 | 1         |
| 27 | Planning a Safe EXIT: A Multidisciplinary Approach. <i>MedEdPORTAL: the Journal of Teaching and Learning Resources</i> , 0, , .                                                                                                           | 1.2 | 1         |
| 28 | Management of Elevated ICP After Bidirectional Glenn. <i>MedEdPORTAL: the Journal of Teaching and Learning Resources</i> , 0, , .                                                                                                         | 1.2 | 1         |
| 29 | Antifibrinolytics Are Not Associated With Reduced Blood Loss in Minimally-Invasive Endoscopic-Assisted Craniectomy for Repair of Single-Suture Craniosynostosis. <i>Journal of Craniofacial Surgery</i> , 2021, Publish Ahead of Print, . | 0.7 | 1         |
| 30 | Blood Loss and Transfusion in Pediatric Craniofacial Surgery in the Antifibrinolytic Era. <i>Blood</i> , 2020, 136, 15-16.                                                                                                                | 1.4 | 1         |
| 31 | Mitochondrial Disease. , 2012, , 433-443.                                                                                                                                                                                                 |     | 0         |
| 32 | Improving the OR. <i>OR Nurse</i> , 2014, 8, 1-4.                                                                                                                                                                                         | 0.0 | 0         |
| 33 | Successful utilisation of epidural analgesia for perioperative pain management in a child with sodium voltage-gated channel alpha subunit (SCN1A) gene mutation. <i>BMJ Case Reports</i> , 2020, 13, e234314.                             | 0.5 | 0         |
| 34 | Hypoglossal nerve stimulator placement in a child with severe refractory OSA: a novel procedure in the paediatric population. <i>BMJ Case Reports</i> , 2021, 14, e242592.                                                                | 0.5 | 0         |
| 35 | How to Do a PET/CT Scan and Not Glow in the Dark. <i>MedEdPORTAL: the Journal of Teaching and Learning Resources</i> , 0, , .                                                                                                             | 1.2 | 0         |
| 36 | Seizure Surgery. , 2018, , .                                                                                                                                                                                                              |     | 0         |
