#	Article	IF	Citations
1	Fetal exposure to a maternal low protein diet impairs nephrogenesis and promotes hypertension in the rat. Life Sciences, 1999, 64, 965-974.	2.0	487
2	Protein intake in pregnancy, placental glucocorticoid metabolism and the programming of hypertension in the rat. Placenta, 1996, 17, 169-172.	0.7	393
3	Nutrition in early life and the programming of adult disease: a review. Journal of Human Nutrition and Dietetics, 2015, 28, 1-14.	1.3	333
4	Childhood obesity and risk of the adult metabolic syndrome: a systematic review. International Journal of Obesity, 2012, 36, 1-11.	1.6	299
5	Developmental programming of health and disease. Proceedings of the Nutrition Society, 2006, 65, 97-105.	0.4	287
6	Weanling Rats Exposed to Maternal Low-Protein Diets during Discrete Periods of Gestation Exhibit Differing Severity of Hypertension. Clinical Science, 1996, 91, 607-615.	1.8	245
7	Maternal Protein Restriction Influences the Programming of the Rat Hypothalamic-Pituitary-Adrenal Axis. Journal of Nutrition, 1996, 126, 1578-1585.	1.3	214
8	Prenatal exposure to a maternal low-protein diet programmes a preference for high-fat foods in the young adult rat. British Journal of Nutrition, 2004, 92, 513-520.	1.2	214
9	Increased systolic blood pressure in rats induced by a maternal low-protein diet is reversed by dietary supplementation with glycine. Clinical Science, 2002, 103, 633-639.	1.8	211
10	Periodontal disease is associated with lower antioxidant capacity in whole saliva and evidence of increased protein oxidation. Clinical Science, 2003, 105, 167-172.	1.8	205
11	Cigarette Smoking Influences Cytokine Production and Antioxidant Defences. Clinical Science, 1995, 88, 485-489.	1.8	204
12	Hypertension induced by foetal exposure to a maternal low-protein diet, in the rat, is prevented by pharmacological blockade of maternal glucocorticoid synthesis. Journal of Hypertension, 1997, 15, 537-544.	0.3	200
13	Developmental Origins of Adult Disease. Medical Principles and Practice, 2010, 19, 87-98.	1.1	195
14	Nutritional programming of disease: unravelling the mechanism. Journal of Anatomy, 2009, 215, 36-51.	0.9	194
15	Timing of the introduction of complementary feeding and risk of childhood obesity: a systematic review. International Journal of Obesity, 2013, 37, 1295-1306.	1.6	188
16	Fetal programming of cardiovascular function through exposure to maternal undernutrition. Proceedings of the Nutrition Society, 2001, 60, 505-513.	0.4	177
17	Evidence of progressive deterioration of renal function in rats exposed to a maternal low-protein dietin utero. British Journal of Nutrition, 2000, 83, 79-85.	1.2	176
18	In utero exposure to maternal low protein diets induces hypertension in weanling rats, independently of maternal blood pressure changes. Clinical Nutrition, 1994, 13, 319-324.	2.3	175

#	Article	IF	Citations
19	Critical differences between two low protein diet protocols in the programming of hypertension in the rat. International Journal of Food Sciences and Nutrition, 2000, 51, 11-17.	1.3	173
20	Childhood obesity and adult cardiovascular disease risk: a systematic review. International Journal of Obesity, 2010, 34, 18-28.	1.6	166
21	Exposure to undernutrition in fetal life determines fat distribution, locomotor activity and food intake in ageing rats. International Journal of Obesity, 2006, 30, 729-738.	1.6	165
22	Salivary antioxidants and periodontal disease status. Proceedings of the Nutrition Society, 2002, 61, 137-143.	0.4	158
23	Intergenerational programming of impaired nephrogenesis and hypertension in rats following maternal protein restriction during pregnancy. British Journal of Nutrition, 2009, 101, 1020-1030.	1.2	153
24	Early Administration of Angiotensin-Converting Enzyme Inhibitor Captopril, Prevents the Development of Hypertension Programmed by Intrauterine Exposure to a Maternal Low-Protein Diet in the Rat. Clinical Science, 1998, 94, 373-381.	1.8	146
25	Antioxidant potential of green and black tea determined using the ferric reducing power (FRAP) assay. International Journal of Food Sciences and Nutrition, 2000, 51, 181-188.	1.3	145
26	Maternal low-protein diet in rat pregnancy programs blood pressure through sex-specific mechanisms. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2005, 288, R85-R90.	0.9	144
27	Prenatal exposure to a low-protein diet programs disordered regulation of lipid metabolism in the aging rat. American Journal of Physiology - Endocrinology and Metabolism, 2007, 292, E1702-E1714.	1.8	143
28	Captopril normalises systolic blood pressure in rats with hypertension induced by fetal exposure to maternal low protein diets. Comparative Biochemistry and Physiology A, Comparative Physiology, 1995, 110, 223-228.	0.7	139
29	Association of disproportionate growth of fetal rats in late gestation with raised systolic blood pressure in later life. Reproduction, 1996, 106, 307-312.	1.1	137
30	Intrauterine programming of hypertension: the role of the renin-angiotensin system. Biochemical Society Transactions, 1999, 27, 88-93.	1.6	125
31	Antihypertensive treatment in early postnatal life modulates prenatal dietary influences upon blood pressure in the rat. Clinical Science, 2000, 98, 269-275.	1.8	125
32	Prenatal Exposure to a Maternal Low Protein Diet Shortens Life Span in Rats. Gerontology, 2001, 47, 9-14.	1.4	124
33	Prenatal programming of angiotensin II type 2 receptor expression in the rat. British Journal of Nutrition, 2004, 91, 133-140.	1.2	115
34	The types of food introduced during complementary feeding and risk of childhood obesity: a systematic review. International Journal of Obesity, 2013, 37, 477-485.	1.6	113
35	Animal models of programming: early life influences on appetite and feeding behaviour. Maternal and Child Nutrition, 2005, 1, 142-148.	1.4	108
36	Maintenance of Maternal Diet-Induced Hypertension in the Rat Is Dependent on Glucocorticoids. Hypertension, 1997, 30, 1525-1530.	1.3	106

#	Article	IF	Citations
37	Consumption of black tea elicits an increase in plasma antioxidant potential in humans. International Journal of Food Sciences and Nutrition, 2000, 51, 309-315.	1.3	102
38	Nutritional Programming of Blood Pressure and Renal Morphology. Archives of Physiology and Biochemistry, 2003, 111, 8-16.	1.0	99
39	Intrauterine Exposure to a Maternal Low Protein Diet Reduces Adult Bone Mass and Alters Growth Plate Morphology in Rats. Calcified Tissue International, 2002, 71, 493-498.	1.5	98
40	Maternal Carbenoxolone Treatment Lowers Birthweight and Induces Hypertension in the Offspring of Rats Fed a Protein-Replete Diet. Clinical Science, 1997, 93, 423-429.	1.8	95
41	Nausea and Vomiting of Pregnancy: Endocrine Basis and Contribution to Pregnancy Outcome. Obstetrical and Gynecological Survey, 2001, 56, 775-782.	0.2	94
42	Influence of maternal pre-pregnancy body composition and diet during earlyâ€“mid pregnancy on cardiovascular function and nephron number in juvenile sheep. British Journal of Nutrition, 2005, 94, 938-947.	1.2	91
43	Intrauterine Programming of Cardiovascular Disease by Maternal Nutritional Status. Nutrition, 1998, 14, 39-47.	1.1	90
44	Intrauterine programming of hypertension by glucocorticoids. Life Sciences, 1997, 60, 1213-1221.	2.0	88
45	Glucocorticoid Effects on the Programming of AT1b Angiotensin Receptor Gene Methylation and Expression in the Rat. PLoS ONE, 2010, 5, e9237.	1.1	79
46	Sex-Specific Effects of Prenatal Low-Protein and Carbenoxolone Exposure on Renal Angiotensin Receptor Expression in Rats. Hypertension, 2005, 46, 1374-1380.	1.3	78
47	Intrauterine programming of hypertension in the rat: Nutrient interactions. Comparative Biochemistry and Physiology A, Comparative Physiology, 1996, 114, 327-333.	0.7	76
48	Fetal exposure to a maternal low-protein diet is associated with altered left ventricular pressure response to ischaemiaâ€“reperfusion injury. British Journal of Nutrition, 2007, 98, 93-100.	1.2	74
49	Obesity induced by cafeteria feeding and pregnancy outcome in the rat. British Journal of Nutrition, 2009, 102, 1601.	1.2	74
50	Fetal programming of appetite by exposure to a maternal low-protein diet in the rat. Clinical Science, 2005, 109, 413-420.	1.8	73
51	Impaired growth and increased glucocorticoid-sensitive enzyme activities in tissues of rat fetuses exposed to maternal low protein diets. Life Sciences, 1998, 63, 605-615.	2.0	67
52	A common cause for a common phenotype: The gatekeeper hypothesis in fetal programming. Medical Hypotheses, 2012, 78, 88-94.	0.8	64
53	The impact of maternal cafeteria diet on anxiety-related behaviour and exploration in the offspring. Physiology and Behavior, 2011, 103, 164-172.	1.0	61
54	The association between birthweight and longevity in the rat is complex and modulated by maternal protein intake during fetal life. FEBS Letters, 2006, 580, 4150-4153.	1.3	60

#	Article	IF	Citations
55	Genome-Wide Methylation and Gene Expression Changes in Newborn Rats following Maternal Protein Restriction and Reversal by Folic Acid. PLoS ONE, 2013, 8, e82989.	1.1	56
56	Exposure to maternal consumption of cafeteria diet during the lactation period programmes feeding behaviour in the rat. International Journal of Developmental Neuroscience, 2011, 29, 785-793.	0.7	55
57	Evidence of progressive deterioration of renal function in rats exposed to a maternal low-protein diet in utero. British Journal of Nutrition, 2000, 83, 79-85.	1.2	55
58	Fetal exposure to a maternal low-protein diet during mid-gestation results in muscle-specific effects on fibre type composition in young rats. British Journal of Nutrition, 2007, 98, 292-299.	1.2	54
59	Antihypertensive treatment in early postnatal life modulates prenatal dietary influences upon blood pressure in the rat. Clinical Science, 2000, 98, 269-75.	1.8	54
60	Glucose intolerance associated with early-life exposure to maternal cafeteria feeding is dependent upon post-weaning diet. British Journal of Nutrition, 2012, 107, 964-978.	1.2	53
61	Programming of hepatic antioxidant capacity and oxidative injury in the ageing rat. Mechanisms of Ageing and Development, 2005, 126, 804-812.	2.2	51
62	Prenatal exposure to undernutrition and programming of responses to high-fat feeding in the rat. British Journal of Nutrition, 2007, 98, 517-524.	1.2	51
63	Overweight, obesity and excessive weight gain in pregnancy as risk factors for adverse pregnancy outcomes: A narrative review. Journal of Human Nutrition and Dietetics, 2022, 35, 250-264.	1.3	49
64	Relationship between maternal nutrient intakes in early and late pregnancy and infants weight and proportions at birth: prospective cohort study. Perspectives in Public Health, 2003, 123, 210-216.	0.5	48
65	Intrauterine programming of nephron number: the fetal flaw revisited. Journal of Nephrology, 2001, 14, 327-31.	0.9	48
66	Effect of Gestational Nutrition on Vascular Integrity in the Murine Placenta. Placenta, 2007, 28, 734-742.	0.7	47
67	Influence of Dietary Fats Upon Systolic Blood Pressure in the Rat. International Journal of Food Sciences and Nutrition, 1996, 47, 417-425.	1.3	46
68	Sulphur dioxide: A potent glutathione depleting agent. Comparative Biochemistry and Physiology C, Comparative Pharmacology and Toxicology, 1996, 114, 89-98.	0.5	43
69	Fetal Exposure to Low Protein Maternal Diet Alters the Susceptibility of Young Adult Rats to Sulfur Dioxide-Induced Lung Injury ,. Journal of Nutrition, 1997, 127, 202-209.	1.3	42
70	Role of glucocorticoids in programming of maternal diet-induced hypertension in the rat. Journal of Nutritional Biochemistry, 1996, 7, 173-178.	1.9	41
71	Maternal dietary ratio of linoleic acid to alpha-linolenic acid during pregnancy has sex-specific effects on placental and fetal weights in the rat. Nutrition and Metabolism, 2019, 16, 1.	1.3	41
72	Intrauterine Programming of Hypertension: Nutrient-Hormone Interactions. Nutrition Reviews, 2009, 54, 163-169.	2.6	38

#	Article	IF	Citations
73	Cell Cycle Regulation and Cytoskeletal Remodelling Are Critical Processes in the Nutritional Programming of Embryonic Development. PLoS ONE, 2011, 6, e23189.	1.1	38
74	The effect of prenatal diet and glucocorticoids on growth and systolic blood pressure in the rat. Proceedings of the Nutrition Society, 1998, 57, 235-240.	0.4	36
75	Maternal undernutrition programmes atherosclerosis in the ApoE*3-Leiden mouse. British Journal of Nutrition, 2009, 101, 1185-1194.	1.2	35
76	Fetal programming of CVD and renal disease: animal models and mechanistic considerations. Proceedings of the Nutrition Society, 2013, 72, 317-325.	0.4	35
77	Antihypertensive treatment in early postnatal life modulates prenatal dietary influences upon blood pressure in the rat. Clinical Science, 2000, 98, 269.	1.8	34
78	The impact of cafeteria diet feeding on physiology and anxiety-related behaviour in male and female Sprague–Dawley rats of different ages. Pharmacology Biochemistry and Behavior, 2014, 116, 45-54.	1.3	34
79	Limiting antenatal weight gain improves maternal health outcomes in severely obese pregnant women: findings of a pragmatic evaluation of a midwife–led intervention. Journal of Human Nutrition and Dietetics, 2015, 28, 29-37.	1.3	33
80	A holistic approach to healthy ageing: how can people live longer, healthier lives?. Journal of Human Nutrition and Dietetics, 2018, 31, 439-450.	1.3	33
81	Rats with Hypertension Induced by in utero Exposure to Maternal Low-Protein Diets Fail to Increase Blood Pressure in Response to a High Salt Intake. Annals of Nutrition and Metabolism, 1996, 40, 1-9.	1.0	32
82	Supplementation of a maternal low-protein diet in rat pregnancy with folic acid ameliorates programming effects upon feeding behaviour in the absence of disturbances to the methionine–homocysteine cycle. British Journal of Nutrition, 2010, 103, 996-1007.	1.2	32
83	Communication skills for behaviour change in dietetic consultations. Journal of Human Nutrition and Dietetics, 2009, 22, 493-500.	1.3	30
84	Use of folic acid supplements in the first trimester of pregnancy. Perspectives in Public Health, 2002, 122, 181-186.	0.5	26
85	Feeding pregnant rats a low-protein diet alters the hepatic expression of SREBP-1c in their offspring via a glucocorticoid-related mechanism. Endocrine, 2009, 36, 333-338.	1.1	26
86	Nutritional Influences in Early Life upon Obesity and Body Proportions. Novartis Foundation Symposium, 1996, 201, 118-137.	1.2	26
87	African savanna elephants (Loxodonta africana) as an example of a herbivore making movement choices based on nutritional needs. PeerJ, 2019, 7, e6260.	0.9	26
88	Antenatal weight management: Diet, physical activity, and gestational weight gain in early pregnancy. Midwifery, 2017, 49, 40-46.	1.0	24
89	Diet and the developing immune system. Lupus, 2006, 15, 746-752.	0.8	23
90	The effect of feeding a low iron diet prior to and during gestation on fetal and maternal iron homeostasis in two strains of rat. Reproductive Biology and Endocrinology, 2013, 11, 32.	1.4	23

#	Article	IF	Citations
91	Assessing communication skills in dietetic consultations: the development of the reliable and valid <scp>DIET</scp>â€<scp>COMMS</scp> tool. Journal of Human Nutrition and Dietetics, 2014, 27, 321-332.	1.3	23
92	Protective role of female gender in programmed accelerated renal aging in the rat. Physiological Reports, 2015, 3, e12342.	0.7	23
93	Enzymes of the Gamma-Glutamyl Cycle Are Programmed in utero by Maternal Nutrition. Annals of Nutrition and Metabolism, 1995, 39, 28-35.	1.0	21
94	Sex differences in sensitivity to Î²-adrenergic agonist isoproterenol in the isolated adult rat heart following prenatal protein restriction. British Journal of Nutrition, 2009, 101, 725-734.	1.2	21
95	The effect of maternal undernutrition on the rat placental transcriptome: protein restriction up-regulates cholesterol transport. Genes and Nutrition, 2016, 11, 27.	1.2	20
96	Impact of early exposure to a cafeteria diet on prefrontal cortex monoamines and novel object recognition in adolescent rats. Behavioural Brain Research, 2019, 363, 191-198.	1.2	19
97	Acute changes to breast milk composition following consumption of highâ€fat and highâ€sugar meals. Maternal and Child Nutrition, 2021, 17, e13168.	1.4	19
98	Comparison of food and nutrient intake in infants aged 6â€“12 months, following babyâ€led or traditional weaning: A crossâ€sectional study. Journal of Human Nutrition and Dietetics, 2022, 35, 310-324.	1.3	19
99	Processes Underlying the Nutritional Programming of Embryonic Development by Iron Deficiency in the Rat. PLoS ONE, 2012, 7, e48133.	1.1	18
100	Fetal origins of adult disease. British Journal of Nutrition, 1999, 81, 5-6.	1.2	17
101	Wheezing and eczema in relation to infant anthropometry: evidence of developmental programming of disease in childhood. Maternal and Child Nutrition, 2006, 2, 51-61.	1.4	17
102	Metabolic programming in pregnancy: studies in animal models. Genes and Nutrition, 2007, 2, 33-38.	1.2	17
103	Prenatal diet determines susceptibility to cardiac ischaemiaâ€“reperfusion injury following treatment with diethylmaleic acid and N-acetylcysteine. Life Sciences, 2008, 82, 149-155.	2.0	17
104	Setting targets leads to greater longâ€term weight losses and â€˜unrealisticâ€™ targets increase the effect in a large communityâ€based commercial weight management group. Journal of Human Nutrition and Dietetics, 2016, 29, 687-696.	1.3	17
105	Prenatal protein restriction leads to a disparity between aortic and peripheral blood pressure in Wistar male offspring. Journal of Physiology, 2010, 588, 3809-3818.	1.3	16
106	Impact of cafeteria feeding during lactation in the rat on novel object discrimination in the offspring. British Journal of Nutrition, 2014, 112, 1933-1937.	1.2	16
107	Exposure to maternal obesity during suckling outweighs in utero exposure in programming for post-weaning adiposity and insulin resistance in rats. Scientific Reports, 2019, 9, 10134.	1.6	16
108	Maternal protein restriction and fetal growth: lack of evidence of a role for homocysteine in fetal programming. British Journal of Nutrition, 2006, 96, 578-86.	1.2	16

#	Article	IF	Citations
109	Mitochondrial Respiration Is Decreased in Rat Kidney Following Fetal Exposure to a Maternal Low-Protein Diet. Journal of Nutrition and Metabolism, 2012, 2012, 1-10.	0.7	15
110	Exposure to maternal cafeteria diets during the suckling period has greater effects on fat deposition and Sterol Regulatory Element Binding Protein-1c (SREBP-1c) gene expression in rodent offspring compared to exposure before birth. Nutrition and Metabolism, 2018, 15, 17.	1.3	15
111	Proteinuria in aging rats due to low-protein diet during mid-gestation. Journal of Developmental Origins of Health and Disease, 2010, 1, 75-83.	0.7	14
112	The impact of maternal protein restriction during rat pregnancy upon renal expression of angiotensin receptors and vasopressin-related aquaporins. Reproductive Biology and Endocrinology, 2010, 8, 105.	1.4	14
113	Antenatal Weight Management: Womenâ€™s Experiences, Behaviours, and Expectations of Weighing in Early Pregnancy. Journal of Pregnancy, 2016, 2016, 1-9.	1.1	14
114	Protein restriction in the pregnant mouse modifies fetal growth and pulmonary development: role of fetal exposure to Î²-hydroxybutyrate. Experimental Physiology, 2011, 96, 203-215.	0.9	13
115	The impact of exposure to cafeteria diet during pregnancy or lactation on offspring growth and adiposity before weaning. Scientific Reports, 2019, 9, 14173.	1.6	12
116	Spatial geochemistry influences the home range of elephants. Science of the Total Environment, 2020, 729, 139066.	3.9	12
117	Long-Term Modification of the Excretion of Prostaglandin E₂ by Fetal Exposure to a Maternal Low Protein Diet in the Rat. Annals of Nutrition and Metabolism, 1999, 43, 98-106.	1.0	11
118	Exposure of neonatal rats to maternal cafeteria feeding during suckling alters hepatic gene expression and DNA methylation in the insulin signalling pathway. Genes and Nutrition, 2014, 9, 365.	1.2	11
119	Omega-6:Omega-3 Fatty Acid Ratio and Total Fat Content of the Maternal Diet Alter Offspring Growth and Fat Deposition in the Rat. Nutrients, 2020, 12, 2505.	1.7	11
120	Fetal programming of adult disease: an overview.. , 2004, , 1-20.		10
121	Early life programming of health and disease: The longâ€term consequences of obesity in pregnancy. Journal of Human Nutrition and Dietetics, 2022, 35, 816-832.	1.3	10
122	Nutrition, growth, and other factors associated with early cognitive and motor development in Subâ€Saharan Africa: a scoping review. Journal of Human Nutrition and Dietetics, 2020, 33, 644-669.	1.3	9
123	Influence of maternal nutrition on the metabolic syndrome and cardiovascular risk in the offspring. Clinical Lipidology, 2009, 4, 145-158.	0.4	8
124	Expression of cholesterol packaging and transport genes in human and rat placenta: impact of obesity and a high-fat diet. Journal of Developmental Origins of Health and Disease, 2020, 11, 222-227.	0.7	8
125	Nutrition screening tools: Still no consensus 40Âyears on. Journal of Human Nutrition and Dietetics, 2021, 34, 923-925.	1.3	8
126	Developmental Origins of Health and Disease. Journal of Nutrition and Metabolism, 2012, 2012, 1-2.	0.7	7
