David G Tarboton

List of Publications by Year
in descending order

110 papers	9,687 citations	57758 44 h-index	37204 96 g-index
133 all docs	133 docs citations	133 times ranked	9014 citing authors

#	Article	IF	Citations
1	A comparison of National Water Model retrospective analysis snow outputs at snow telemetry sites across the Western United States. Hydrological Processes, 2022, 36, e14469.	2.6	13
2	Variable Streamflow Response to Forest Disturbance in the Western US: A Large‐Sample Hydrology Approach. Water Resources Research, 2022, 58, .	4.2	6
3	Measuring success for a future vision: Defining impact in science gateways/virtual research environments. Concurrency Computation Practice and Experience, 2021, 33, e6099.	2.2	12
4	Toward open and reproducible environmental modeling by integrating online data repositories, computational environments, and model Application Programming Interfaces. Environmental Modelling and Software, 2021, 135, 104888.	4.5	24
5	Engineering Students' Perceptions of Mathematical Modeling in a Learning Module Centered on a Hydrologic Design Case Study. International Journal of Research in Undergraduate Mathematics Education, 2021, 7, 351-377.	1.8	8
6	An open web‐based module developed to advance data‐driven hydrologic process learning. Hydrological Processes, 2021, 35, e14273.	2.6	9
7	HydroDS: Data services in support of physically based, distributed hydrological models. Environmental Modelling and Software, 2020, 125, 104623.	4.5	18
8	UEB parallel: Distributed snow accumulation and melt modeling using parallel computing. Environmental Modelling and Software, 2020, 125, 104614.	4.5	4
9	Integrating hydrologic modeling web services with online data sharing to prepare, store, and execute hydrologic models. Environmental Modelling and Software, 2020, 130, 104731.	4.5	27
10	Fast summarizing algorithm for polygonal statistics over a regular grid. Computers and Geosciences, 2020, 142, 104524.	4.2	4
11	A taxonomy for reproducible and replicable research in environmental modelling. Environmental Modelling and Software, 2020, 134, 104753.	4.5	19
12	Forests and Water Yield: A Synthesis of Disturbance Effects on Streamflow and Snowpack in Western Coniferous Forests. Journal of Forestry, 2020, 118, 172-192.	1.0	88
13	The Next Frontier: Making Research More Reproducible. Journal of Water Resources Planning and Management - ASCE, 2020, 146, .	2.6	19
14	Collaborative sharing of multidimensional space-time data in a next generation hydrologic information system. Environmental Modelling and Software, 2020, 129, 104706.	4.5	5
15	Stone Content Influence on Land Surface Model Simulation of Soil Moisture and Evapotranspiration at Reynolds Creek Watershed. Journal of Hydrometeorology, 2020, 21, 1889-1904.	1.9	4
16	Reproducible Hydrological Modeling with CyberGIS-Jupyter. , 2019, , .		5
17	Terrain Analysis Enhancements to the Height Above Nearest Drainage Flood Inundation Mapping Method. Water Resources Research, 2019, 55, 7983-8009.	4.2	41
18	Twenty-three unsolved problems in hydrology (UPH) – a community perspective. Hydrological Sciences Journal, 2019, 64, 1141-1158.	2.6	474

#	Article	IF	Citations
19	Enabling Collaborative Numerical Modeling in Earth Sciences using Knowledge Infrastructure. Environmental Modelling and Software, 2019, 120, 104424.	4.5	19
20	Ensemble Streamflow Forecasting Using an Energy Balance Snowmelt Model Coupled to a Distributed Hydrologic Model with Assimilation of Snow and Streamflow Observations. Water Resources Research, 2019, 55, 10813-10838.	4.2	17
21	Estimating actual evapotranspiration from stony-soils in montane ecosystems. Agricultural and Forest Meteorology, 2019, 265, 183-194.	4.8	21
22	Map based discovery of hydrologic data in the HydroShare collaboration environment. Environmental Modelling and Software, 2019, 111, 24-33.	4.5	8
23	Advancing distributed data management for the HydroShare hydrologic information system. Environmental Modelling and Software, 2018, 102, 233-240.	4.5	9
24	GeoFlood: Large-Scale Flood Inundation Mapping Based on High-Resolution Terrain Analysis. Water Resources Research, 2018, 54, 10,013.	4.2	55
25	River Channel Geometry and Rating Curve Estimation Using Height above the Nearest Drainage. Journal of the American Water Resources Association, 2018, 54, 785-806.	2.4	74
26	A CyberGIS Integration and Computation Framework for High-Resolution Continental-Scale Flood Inundation Mapping. Journal of the American Water Resources Association, 2018, 54, 770-784.	2.4	54
27	Design of a metadata framework for environmental models with an example hydrologic application in HydroShare. Environmental Modelling and Software, 2017, 93, 13-28.	4.5	40
28	Potential Effects of Climate Change on Ecologically Relevant Streamflow Regimes. River Research and Applications, 2016, 32, 1827-1840.	1.7	32
29	A tool for downscaling weather data from large-grid reanalysis products to finer spatial scales for distributed hydrological applications. Environmental Modelling and Software, 2016, 84, 50-69.	4.5	41
30	A Scalable High-performance Topographic Flow Direction Algorithm for Hydrological Information Analysis. , 2016, , .		5
31	Accelerating TauDEM for Extracting Hydrology Information from National-Scale High Resolution Topographic Dataset. , 2016, , .		2
32	HydroShare: Sharing Diverse Environmental Data Types and Models as Social Objects with Application to the Hydrology Domain. Journal of the American Water Resources Association, 2016, 52, 873-889.	2.4	73
33	An overview of current applications, challenges, and future trends in distributed process-based models in hydrology. Journal of Hydrology, 2016, 537, 45-60.	5.4	349
34	Observations Data Model 2: A community information model for spatially discrete Earth observations. Environmental Modelling and Software, 2016, 79, 55-74.	4.5	40
35	Stimulating Active Learning in Hydrology Using Research-Driven, Web-based Learning Modules. , 2015, , 26.1400.1.		0
36	DigitalCrust â€" a 4D data system of material properties for transforming research on crustal fluid flow. Geofluids, 2015, 15, 372-379.	0.7	13

#	Article	IF	Citations
37	How Do Changes to the Railroad Causeway in Utah's Great Salt Lake Affect Water and Salt Flow?. PLoS ONE, 2015, 10, e0144111.	2.5	21
38	Analyzing high resolution topography for advancing the understanding of mass and energy transfer through landscapes: A review. Earth-Science Reviews, 2015, 148, 174-193.	9.1	251
39	A unified approach for process‐based hydrologic modeling: 2. Model implementation and case studies. Water Resources Research, 2015, 51, 2515-2542.	4.2	173
40	A virtual tile approach to raster-based calculations of large digital elevation models in a shared-memory system. Computers and Geosciences, 2015, 82, 78-88.	4.2	24
41	Integration of an energy balance snowmelt model into an open source modeling framework. Environmental Modelling and Software, 2015, 68, 205-218.	4.5	10
42	Modeling the snow surface temperature with a one-layer energy balance snowmelt model. Hydrology and Earth System Sciences, 2014, 18, 5061-5076.	4.9	14
43	Leveraging XSEDE HPC resources to address computational challenges with high-resolution topography data. , 2014, , .		6
44	Managing a community shared vocabulary for hydrologic observations. Environmental Modelling and Software, 2014, 52, 62-73.	4.5	15
45	An integrated modeling system for estimating glacier and snow melt driven streamflow from remote sensing and earth system data products in the Himalayas. Journal of Hydrology, 2014, 519, 1859-1869.	5.4	63
46	Simulated watershed responses to land cover changes using the Regional Hydro-Ecological Simulation System. Hydrological Processes, 2014, 28, 4511-4528.	2.6	9
47	Representation of canopy snow interception, unloading and melt in a parsimonious snowmelt model. Hydrological Processes, 2014, 28, 6320-6336.	2.6	49
48	Accelerating TauDEM as a Scalable Hydrological Terrain Analysis Service on XSEDE. , 2014, , .		5
49	Adaptable web modules to stimulate active learning in engineering hydrology using data and model simulations. , 2014, , .		0
50	Testing above‐and below‐canopy representations of turbulent fluxes in an energy balance snowmelt model. Water Resources Research, 2013, 49, 1107-1122.	4.2	82
51	Building and Sustaining Community Cyber-Infrastructure for the Hydrologic Sciences. Eos, 2013, 94, 435-435.	0.1	1
52	CI-WATER: Cyberinfrastructure to Advance High Performance Water Resource Modeling. , 2013, , .		0
53	Canopy radiation transmission for an energy balance snowmelt model. Water Resources Research, 2012, 48, .	4.2	46
54	An examination of the sensitivity of the Great Salt Lake to changes in inputs. Water Resources Research, 2012, 48, .	4.2	50

#	Article	IF	Citations
55	Hydrologic controls on equilibrium soil depths. Water Resources Research, 2011, 47, .	4.2	28
56	On the interaction between bathymetry and climate in the system dynamics and preferred levels of the Great Salt Lake. Water Resources Research, 2011, 47, .	4.2	23
57	Developing community cyberinfrastructure for integrating water data. Eos, 2011, 92, 399-399.	0.1	0
58	Natural flow regime, temperature and the composition and richness of invertebrate assemblages in streams of the western United States. Freshwater Biology, 2011, 56, 1248-1265.	2.4	65
59	Extraction of hydrological proximity measures from DEMs using parallel processing. Environmental Modelling and Software, 2011, 26, 1696-1709.	4.5	115
60	Components of an environmental observatory information system. Computers and Geosciences, 2011, 37, 207-218.	4.2	50
61	A sensor network for high frequency estimation of water quality constituent fluxes using surrogates. Environmental Modelling and Software, 2010, 25, 1031-1044.	4.5	88
62	Evaluation of alternative formulae for calculation of surface temperature in snowmelt models using frequency analysis of temperature observations. Hydrology and Earth System Sciences, 2010, 14, 535-543.	4.9	40
63	An integrated system for publishing environmental observations data. Environmental Modelling and Software, 2009, 24, 879-888.	4.5	124
64	Modeling soil depth from topographic and land cover attributes. Water Resources Research, 2009, 45, .	4.2	133
65	A relational model for environmental and water resources data. Water Resources Research, 2008, 44, .	4.2	118
66	New Software Architecture for Integrated Water Modeling: CUAHSI/OpenMI Workshop for Integrating Water Models; Wallingford, United Kingdom, 7-10 April 2008. Eos, 2008, 89, 420-420.	0.1	0
67	Hydrology's efforts toward the cyberfrontier. Eos, 2006, 87, 2.	0.1	14
68	A new method for determination of most likely landslide initiation points and the evaluation of digital terrain model scale in terrain stability mapping. Hydrology and Earth System Sciences, 2006, 10, 663-677.	4.9	110
69	Reply to comment by Jonathan J. Rhodes on â€œModeling of the interactions between forest vegetation, disturbances, and sediment yieldsâ€. Journal of Geophysical Research, 2005, 110, .	3.3	1
70	River restoration. Water Resources Research, 2005, 41, .	4.2	452
71	The application of depletion curves for parameterization of subgrid variability of snow. Hydrological Processes, 2004, 18, 1409-1422.	2.6	81
72	Modeling of the interactions between forest vegetation, disturbances, and sediment yields. Journal of Geophysical Research, 2004, 109, .	3.3	70

#	Article	IF	Citations
73	Application of TOPNET in the distributed model intercomparison project. Journal of Hydrology, 2004, 298, 178-201.	5.4	104
74	A sediment transport model for incision of gullies on steep topography. Water Resources Research, 2003, 39, .	4.2	61
75	A probabilistic approach for channel initiation. Water Resources Research, 2002, 38, 61-1-61-14.	4.2	92
76	Testing a blowing snow model against distributed snow measurements at Upper Sheep Creek, Idaho, United States of America. Water Resources Research, 2001, 37, 1341-1356.	4.2	55
77	Advances in the Mapping of Flow Networks from Digital Elevation Data. , 2001, , 1.		76
78	Is There Synchronicity in Nitrogen Input and Output Fluxes at the Noland Divide Watershed, a Small N-Saturated Forested Catchment in the Great Smoky Mountains National Park?. Scientific World Journal, The, 2001, 1, 480-492.	2.1	25
79	Characteristic length scale of input data in distributed models: implications for modeling grid size. Journal of Hydrology, 2000, 227, 128-139.	5.4	20
80	The ABC's of snowmelt: a topographically factorized energy component snowmelt model. Hydrological Processes, 1999, 13, 1905-1920.	2.6	34
81	Sub-grid parameterization of snow distribution for an energy and mass balance snow cover model. Hydrological Processes, 1999, 13, 1921-1933.	2.6	131
82	Subâ€grid parameterization of snow distribution for an energy and mass balance snow cover model. Hydrological Processes, 1999, 13, 1921-1933.	2.6	3
83	The influence of the spatial distribution of snow on basin-averaged snowmelt. Hydrological Processes, 1998, 12, 1671-1683.	2.6	187
84	Kernel bandwidth selection for a first order nonparametric streamflow simulation model. Stochastic Hydrology & Hydraulics, 1998, 12, 33-52.	0.5	36
85	Disaggregation procedures for stochastic hydrology based on nonparametric density estimation. Water Resources Research, 1998, 34, 107-119.	4.2	129
86	The influence of the spatial distribution of snow on basinâ€averaged snowmelt. Hydrological Processes, 1998, 12, 1671-1683.	2.6	3
87	Streamflow simulation: A nonparametric approach. Water Resources Research, 1997, 33, 291-308.	4.2	196
88	A new method for the determination of flow directions and upslope areas in grid digital elevation models. Water Resources Research, 1997, 33, 309-319.	4.2	1,813
89	Multivariate nonparametric resampling scheme for generation of daily weather variables. Stochastic Hydrology & Hydraulics, 1997, 11, 65-93.	0.5	41
90	Evaluation of kernel density estimation methods for daily precipitation resampling. Stochastic Hydrology & Hydraulics, 1997, 11, 523-547.	0.5	39

#	Article	IF	Citations
91	A Nonparametric Wet/Dry Spell Model for Resampling Daily Precipitation. Water Resources Research, 1996, 32, 2803-2823.	4.2	123
92	On Hack's Law. Water Resources Research, 1996, 32, 3367-3374.	4.2	202
93	Fractal river networks, Horton's laws and Tokunaga cyclicity. Journal of Hydrology, 1996, 187, 105-117.	5.4	102
94	Nonhomogeneous Markov Model for Daily Precipitation. Journal of Hydrologic Engineering - ASCE, 1996, 1, 33-40.	1.9	57
95	HYDROLOGIC SCENARIOS FOR SEVERE SUSTAINED DROUGHT IN THE SOUTHWESTERN UNITED STATES. Journal of the American Water Resources Association, 1995, 31, 803-813.	2.4	36
96	Physical hydrology. Eos, 1995, 76, 316-316.	0.1	1
97	The source hydrology of severe sustained drought in the southwestern United States. Journal of Hydrology, 1994, 161, 31-69.	5.4	19
98	UNDERSTANDING COMPLEXITY IN THE STRUCTURE OF RAINFALL. Fractals, 1993, 01, 606-616.	3.7	8
99	A physical basis for drainage density. Geomorphology, 1992, 5, 59-76.	2.6	218
100	Precipitation in topographically diverse regions. Eos, 1992, 73, 185-185.	0.1	4
101	Power law distributions of discharge mass and energy in river basins. Water Resources Research, 1992, 28, 1089-1093.	4.2	226
102	On the extraction of channel networks from digital elevation data. Hydrological Processes, 1991, 5, 81-100.	2.6	898
103	Comment on â€œOn the fractal dimension of stream networksâ€•by Paolo La Barbera and Renzo Rosso. Water Resources Research, 1990, 26, 2243-2244.	4.2	15
104	Comment on "On the fractal dimension of stream networks". Water Resources Research, 1990, 26, 2243-2244.	4.2	74
105	Scaling and elevation in river networks. Water Resources Research, 1989, 25, 2037-2051.	4.2	202
106	Hydrologic sampling â€" A characterization in terms of rainfall and basin properties. Journal of Hydrology, 1988, 102, 113-135.	5.4	12
107	The fractal nature of river networks. Water Resources Research, 1988, 24, 1317-1322.	4.2	422
108	Combined hydrologic sampling criteria for rainfall and streamflow. Journal of Hydrology, 1987, 95, 323-339.	5.4	13

#	Article	IF	Citations
109	Development of Student-centered Modules to Support Active Learning in Hydrology. , 0, , .		0
110	Sharing Experiences in Designing Professional Learning to Support Hydrology and Water Resources Instructors to Create High-Quality Curricular Materials. Frontiers in Education, 0, 7, .	2.1	2
