#	Article	IF	CITATIONS
1	The multigene family of fatty acid-binding proteins (FABPs): Function, structure and polymorphism. Journal of Applied Genetics, 2006, 47, 39-48.	1.9	584
2	Fetal programming: link between early nutrition, DNA methylation, and complex diseases. Nutrition Reviews, 2010, 68, 87-98.	5.8	174
3	Guide for Current Nutrigenetic, Nutrigenomic, and Nutriepigenetic Approaches for Precision Nutrition Involving the Prevention and Management of Chronic Diseases Associated with Obesity. Journal of Nutrigenetics and Nutrigenomics, 2017, 10, 43-62.	1.3	118
4	Weight loss and metabolic health effects from energy-restricted Mediterranean and Central-European diets in postmenopausal women: A randomized controlled trial. Scientific Reports, 2018, 8, 11170.	3.3	39
5	Short Communication: Effect of Leptin Gene Polymorphisms on Breeding Value for Milk Production Traits. Journal of Dairy Science, 2004, 87, 3925-3927.	3.4	35
6	Dietary, anthropometric, and biochemical factors influencing plasma choline, carnitine, trimethylamine, and trimethylamine- <i>N</i> -oxide concentrations. International Journal of Food Sciences and Nutrition, 2017, 68, 488-495.	2.8	32
7	Folate and choline absorption and uptake: Their role in fetal development. Biochimie, 2019, 158, 10-19.	2.6	32
8	Protein and folic acid content in the maternal diet determine lipid metabolism and response to high-fat feeding in rat progeny in an age-dependent manner. Genes and Nutrition, 2012, 7, 223-234.	2. 5	30
9	30-Day spexin treatment of mice with diet-induced obesity (DIO) and type 2 diabetes (T2DM) increases insulin sensitivity, improves liver functions and metabolic status. Molecular and Cellular Endocrinology, 2021, 536, 111420.	3.2	30
10	Elderly women: Homocysteine reduction by short-term folic acid supplementation resulting in increased glucose concentrations and affecting lipid metabolism (C677T MTHFR polymorphism). Nutrition, 2013, 29, 841-844.	2.4	29
11	One-Carbon Metabolism and Nonalcoholic Fatty Liver Disease: The Crosstalk between Nutrients, Microbiota, and Genetics. Lifestyle Genomics, 2020, 13, 53-63.	1.7	29
12	Cytogenetic mapping of DGAT1, PPARA, ADIPOR1 and CREB genes in the pig. Journal of Applied Genetics, 2007, 48, 73-76.	1.9	28
13	Polymorphism of genes encoding homocysteine metabolism–related enzymes and risk for cardiovascular disease. Nutrition Research, 2009, 29, 685-695.	2.9	28
14	Low folate intake and serum levels are associated with higher body mass index and abdominal fat accumulation: a case control study. Nutrition Journal, 2020, 19, 53.	3.4	28
15	Transgenerational effects of prenatal restricted diet on gene expression and histone modifications in the rat. PLoS ONE, 2018, 13, e0193464.	2.5	23
16	TAS2R38 and CA6 genetic polymorphisms, frequency of bitter food intake, and blood biomarkers among elderly woman. Appetite, 2017, 116, 57-64.	3.7	22
17	Sex reversal syndrome (64,XY; SRY-positive) in a mare demonstrating masculine behaviour. Journal of Animal Breeding and Genetics, 2005, 122, 60-63.	2.0	19
18	Genetics of fat intake in the determination of body mass. Nutrition Research Reviews, 2017, 30, 106-117.	4.1	17

#	Article	IF	Citations
19	Use of a Smartphone Application Can Improve Assessment of High-Fat Food Consumption in Overweight Individuals. Nutrients, 2018, 10, 1692.	4.1	17
20	Association of a New SNP in Promoter Region of the PorcineFABP3Gene with Fatness Traits in a Polish Synthetic Line. Animal Biotechnology, 2007, 18, 37-44.	1.5	16
21	Cytogenetic mapping of eight genes encoding fatty acid binding proteins (FABPs) in the pig genome. Cytogenetic and Genome Research, 2007, 118, 63-66.	1.1	16
22	Prenatal caloric restriction alters lipid metabolism but not hepatic Fasn gene expression and methylation profiles in rats. BMC Genetics, 2017, 18, 78.	2.7	16
23	Mothers' cafeteria diet induced sex-specific changes in fat content, metabolic profiles, and inflammation outcomes in rat offspring. Scientific Reports, 2021, 11, 18573.	3.3	14
24	Polymorphism of intronic microsatellites in the <i>A-FABP</i> and <i>LEPR</i> genes and its association with productive traits in the pig. Journal of Animal and Feed Sciences, 2004, 13, 615-624.	1.1	14
25	The Effect of Habitual Fat Intake, IL6 Polymorphism, and Different Diet Strategies on Inflammation in Postmenopausal Women with Central Obesity. Nutrients, 2019, 11, 1557.	4.1	13
26	Dietary patterns associated with obesity and overweight: When should misreporters be included in analysis?. Nutrition, 2020, 70, 110605.	2.4	13
27	Polymorphism of CD36 Determines Fat Discrimination but Not Intake of High-Fat Food in 20- to 40-Year-Old Adults. Journal of Nutrition, 2020, 150, 2016-2022.	2.9	12
28	Inflammatory Potential of Diet Is Associated with Biomarkers Levels of Inflammation and Cognitive Function among Postmenopausal Women. Nutrients, 2021, 13, 2323.	4.1	12
29	The Central European diet as an alternative to the Mediterranean diet in atherosclerosis prevention in postmenopausal obese women with a high risk of metabolic syndrome - a randomized nutrition-al trial. Acta Scientiarum Polonorum, Technologia Alimentaria, 2018, 17, 399-407.	0.3	12
30	Maternal protein and folic acid intake during gestation does not program leptin transcription or serum concentration in rat progeny. Genes and Nutrition, 2012, 7, 217-222.	2.5	11
31	Ex vivo folate production by fecal bacteria does not predict human blood folate status: Associations between dietary patterns, gut microbiota, and folate metabolism. Food Research International, 2022, 156, 111290.	6.2	11
32	Chromosomal localization of nine porcine genes encoding transcription factors involved in adipogenesis. Cytogenetic and Genome Research, 2008, 121, 50-54.	1.1	10
33	Associations between Fatty Acid Intake and Status, Desaturase Activities, and FADS Gene Polymorphism in Centrally Obese Postmenopausal Polish Women. Nutrients, 2018, 10, 1068.	4.1	10
34	PPARG and FTO polymorphism can modulate the outcomes of a central European diet and a Mediterranean diet in centrally obese postmenopausal women. Nutrition Research, 2019, 69, 94-100.	2.9	10
35	Betaine Supplementation Moderately Increases Total Cholesterol Levels: A Systematic Review and Meta-Analysis. Journal of Dietary Supplements, 2021, 18, 105-117.	2.6	10
36	Folic Acid and Protein Content in Maternal Diet and Postnatal High-Fat Feeding Affect the Tissue Levels of Iron, Zinc, and Copper in the Rat. Biological Trace Element Research, 2011, 144, 885-893.	3.5	9

3

#	Article	IF	CITATIONS
37	Effect of rye bread enriched with tomato pomace on fat absorption and lipid metabolism in rats fed a highâ€fat diet. Journal of the Science of Food and Agriculture, 2015, 95, 1918-1924.	3.5	9
38	Folic Acid Affects Iron Status in Female Rats with Deficiency of These Micronutrients. Biological Trace Element Research, 2020, 195, 551-558.	3.5	9
39	Simultaneous supplementation with iron and folic acid can affect <i>Slc11a2</i> and <i>Slc46a1</i> transcription and metabolite concentrations in rats. British Journal of Nutrition, 2020, 123, 264-272.	2.3	9
40	Metabolic syndrome in postmenopausal women is associated with lower erythrocyte PUFA/MUFA and n-3/n-6 ratio: A case-control study. Prostaglandins Leukotrienes and Essential Fatty Acids, 2020, 159, 102155.	2.2	9
41	Mitochondrial DNA and Epigenetics: Investigating Interactions with the One-Carbon Metabolism in Obesity. Oxidative Medicine and Cellular Longevity, 2022, 2022, 1-12.	4.0	9
42	Human gut microbiota composition and its predicted functional properties in people with western and healthy dietary patterns. European Journal of Nutrition, 2022, 61, 3887-3903.	3.9	8
43	Associations of plasma betaine, plasma choline, choline intake, and <i>MTHFR</i> polymorphism (rs1801133) with anthropometric parameters of healthy adults are sexâ€dependent. Journal of Human Nutrition and Dietetics, 2022, 35, 701-712.	2.5	8
44	Homocysteine homeostasis in the rat is maintained by compensatory changes in cystathionine β-synthase, betaine-homocysteine methyltransferase, and phosphatidylethanolamine N-methyltransferase gene transcription occurring in response to maternal protein and folic acid intake during pregnancy and fat intake after weaning. Nutrition Research, 2011, 31, 572-578.	2.9	7
45	Caloric restriction can affect one-carbon metabolism during pregnancy in the rat: A transgenerational model. Biochimie, 2018, 152, 181-187.	2.6	7
46	Associations between folate and choline intake, homocysteine metabolism, and genetic polymorphism of <i>MTHFR, BHMT</i> and <i>PEMT</i> in healthy pregnant Polish women. Nutrition and Dietetics, 2020, 77, 368-372.	1.8	7
47	Human Serum Betaine and Associated Biomarker Concentrations Following a 14 Day Supplemental Betaine Loading Protocol and during a 28 Day Washout Period: A Pilot Investigation. Nutrients, 2022, 14, 498.	4.1	7
48	Snacking may improve dietary fiber density and is associated with a lower body mass index in postmenopausal women. Nutrition, 2021, 83, 111063.	2.4	6
49	Hedonic Hunger Is Associated with Intake of Certain High-Fat Food Types and BMI in 20- to 40-Year-Old Adults. Journal of Nutrition, 2021, 151, 820-825.	2.9	6
50	Comparison of Associations between One-Carbon Metabolism, Lipid Metabolism, and Fatty Liver Markers in Normal-Weight and Overweight People Aged 20–40 Years. Annals of Nutrition and Metabolism, 2021, 77, 221-230.	1.9	6
51	The Central European diet as an alternative to the Mediterranean diet in atherosclerosis prevention in postmenopausal obese women with a high risk of metabolic syndrome - a randomized nutrition-al trial [pdf]. Acta Scientiarum Polonorum, Technologia Alimentaria, 2018, 17, 399-407.	0.3	6
52	The State of Nutrigenomic Education in Poland. Lifestyle Genomics, 2018, 11, 90-98.	1.7	5
53	Hepatic DNA methylation and expression profiles under prenatal restricted diet in three generations of female rat fetuses. PLoS ONE, 2019, 14, e0215471.	2.5	5
54	Greater self-reported preference for fat taste and lower fat restraint are associated with more frequent intake of high-fat food. Appetite, 2021, 159, 105053.	3.7	5

#	Article	IF	Citations
55	Effect of Iron and Folic Acid Supplementation on the Level of Essential and Toxic Elements in Young Women. International Journal of Environmental Research and Public Health, 2021, 18, 1360.	2.6	5
56	Identification of target sequences for association studies - analysis of the pig <i>FABP3</i> and <i>FABP4</i> loci using comparative genomics methods. Journal of Animal and Feed Sciences, 2008, 17, 191-201.	1.1	5
57	FADS1 and FADS2 polymorphism are associated with changes in fatty acid concentrations after calorie-restricted Central European and Mediterranean diets. Menopause, 2019, 26, 1415-1424.	2.0	4
58	Iron and Folic Acid Supplementation Affects Mineral Status in Female Rats with a Deficiency of These Micronutrients. Biological Trace Element Research, 2021, 199, 3393-3401.	3 . 5	4
59	Allergic Inflammation Alters microRNA Expression Profile in Adipose Tissue in the Rat. Genes, 2020, 11, 1034.	2.4	4
60	Coffee and tea choices and intake patterns in 20-to-40Âyear old adults. Food Quality and Preference, 2021, 90, 104115.	4.6	4
61	\hat{l}^2 -glucuronidase activity is associated with carbohydrate metabolism but not with androgen status in overweight and obese women with polycystic ovary syndrome. Nutrition, 2022, 97, 111606.	2.4	4
62	Lower plasma glutathione, choline, and betaine concentrations are associated with fatty liver in postmenopausal women. Nutrition Research, 2022, 101, 23-30.	2.9	4
63	Molecular evolution of the leptin exon 3 in some species of the family Canidae. Genetics Selection Evolution, 2003, 35, 573-80.	3.0	3
64	Determinants favoring weight regain after weight-loss therapy among postmenopausal women. Scientific Reports, 2020, 10 , 17713 .	3.3	3
65	Diet, Trimethylamine Metabolism, and Mitochondrial DNA: An Observational Study. Molecular Nutrition and Food Research, 2022, , 2200003.	3.3	3
66	PEMT rs12325817 and PCYT1A rs7639752 polymorphisms are associated with betaine but not choline concentrations in pregnant women. Nutrition Research, 2018, 56, 61-70.	2.9	2
67	Role of Slc19a1 and Tfr2 in liver transport of iron and folate: A rat model of folate/iron deficiency followed by supplementation. Journal of Trace Elements in Medicine and Biology, 2020, 62, 126568.	3.0	2
68	Diet quality, anthropometrics, and gut microbiota composition in healthy adults. Proceedings of the Nutrition Society, 2020, 79 , .	1.0	1
69	Associations between choline intake, body composition, lipid profile, and liver status in healthy adults. Proceedings of the Nutrition Society, 2020, 79, .	1.0	1
70	The effects of folate and iron deficiency followed by supplementation on blood morphology and inflammation biomarkers in rats. Acta Scientiarum Polonorum, Technologia Alimentaria, 2021, 20, 213-222.	0.3	1
71	Polymorphism of TAS2R3, TAS2R5, TAS2R19, and TAS2R50 genes and bitter food intake frequency inelderly woman [pdf]. Acta Scientiarum Polonorum, Technologia Alimentaria, 2020, 19, 109-122.	0.3	1
72	Effects of unextruded and extruded cranberry pomace on selected metabolic parameters in high-fat diet fed rats [pdf]. Acta Scientiarum Polonorum, Technologia Alimentaria, 2018, 17, 91-100.	0.3	1

#	Article	IF	Citations
73	Effects of unextruded and extruded cranberry pomace on selected metabolic parameters in high-fat diet fed rats. Acta Scientiarum Polonorum, Technologia Alimentaria, 2018, 17, 91-100.	0.3	1
74	Polymorphism of TAS2R3, TAS2R5, TAS2R19, and TAS2R50 genes and bitter food intake frequency inelderly woman. Acta Scientiarum Polonorum, Technologia Alimentaria, 2020, 19, 109-122.	0.3	1
75	Coffee and nonalcoholic fatty liver disease: A review. Acta Scientiarum Polonorum, Technologia Alimentaria, 2020, 19, 245-254.	0.3	1
76	The Association between Fat Taste Sensitivity, Eating Habits, and Metabolic Health in Menopausal Women. Nutrients, 2021, 13, 4506.	4.1	1
77	Protein- and cysteine-deficient diet of the dam influences growth patterns and methylation of the PPARα gene in rat offspring. Journal of Applied Animal Research, 2011, 39, 41-43.	1.2	0
78	Author response. Nutrition, 2013, 29, 1171-1172.	2.4	0
79	Metabolic response to dietary supplementation with iron and folic acid in the rat. Proceedings of the Nutrition Society, 2020, 79, .	1.0	0
80	Fatty Acid and Liver Status in Postmenopausal Women With and Without Metabolic Syndrome. Proceedings of the Nutrition Society, 2020, 79, .	1.0	0
81	Associations between B vitamin and amino acid intake, <i>MTHFR</i> genotype, atherogenic indices, and homocysteine levels in postmenopausal women. Proceedings of the Nutrition Society, 2020, 79, .	1.0	0
82	Associations between folate intake, body composition, and liver status in healthy adults. Proceedings of the Nutrition Society, 2020, 79, .	1.0	0
83	Effect of Maternal Nonalcoholic Fatty Liver Disease and Dietary Choline Status on Body Mass and Lipid Profile in Rat Offspring. Proceedings of the Nutrition Society, 2020, 79, .	1.0	0
84	Fatty acid sensitivity, intake of high-fat foods, gene polymorphism, and body mass. Proceedings of the Nutrition Society, 2020, 79, .	1.0	0
85	The effects of folate and iron deficiency followed by supplementation on blood morphology and inflammation biomarkers in rats [pdf]. Acta Scientiarum Polonorum, Technologia Alimentaria, 2021, 20, 213-222.	0.3	0
86	Polymorphism of the pig <i>LMX1A</i> gene, localized within the FAT1 region, is not associated with growth and fatness. Journal of Animal and Feed Sciences, 2010, 19, 564-569.	1.1	0
87	Rs6586282 of the CBS Gene: Its Lack of Eff ect on Homocysteine Concentrations, and Interaction Eff ects on Body Weight in Elderly Women. International Journal for Vitamin and Nutrition Research, 2016, 86, 235-241.	1.5	0
88	Energy-restricted Central-European diet stimulates liver microsomal function in obese postmenopausal women - a randomized nutritional trial with a comparison to energy-restricted Mediterranean diet. European Review for Medical and Pharmacological Sciences, 2020, 24, 11165-11171.	0.7	0
89	Functional single nucleotide polymorphism (rs762551) in CYP1A2 gene affects white coffee intake in healthy 20–40 years old adults. Nutrition Research, 2022, , .	2.9	0
