#	ARTICLE	IF	CITATIONS
1	Enhancement of hydrogen radical density in atmospheric pressure plasma jet by a burst of nanosecond pulses at 1 MHz. <i>Plasma Sources Science and Technology</i> , 2022, 31, 025019.	1.3	16
2	Emission of fused silica and KBr samples in the UV and visible spectral ranges under irradiation with 2.7 MeV electrons. <i>Matter and Radiation at Extremes</i> , 2022, 7, 026901.	1.5	1
3	Degradation of Sulfamethoxazole by Double Cylindrical Dielectric Barrier Discharge System combined with Ti /C-N-TiO ₂ supported Nanocatalyst. <i>Journal of Hazardous Materials Advances</i> , 2022, 5, 100051.	1.2	3
4	Influence of Nanoparticles and Metal Vapors on the Color of Laboratory and Atmospheric Discharges. <i>Nanomaterials</i> , 2022, 12, 652.	1.9	6
5	Analysis of Dynamics of Atmospheric Discharges Using Data on Cylindrically and Spherically Shaped Streamers. <i>Atmospheric and Oceanic Optics</i> , 2022, 35, 164-167.	0.6	1
6	A Three-Section Subnanosecond Electron Accelerator. <i>Instruments and Experimental Techniques</i> , 2022, 65, 433-439.	0.1	0
7	Removal of Pharmaceutical Residues from Water and Wastewater Using Dielectric Barrier Discharge Methods – A Review. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 1683.	1.2	45
8	Gas lasers pumped by runaway electrons preionized diffuse discharge. <i>Progress in Quantum Electronics</i> , 2021, 76, 100314.	3.5	11
9	Generation of runaway electrons in plasma after a breakdown of a gap with a sharply non-uniform electric field strength distribution. <i>Journal Physics D: Applied Physics</i> , 2021, 54, 304001.	1.3	15
10	Main modes of runaway electron generation during a breakdown of high-pressure gases in an inhomogeneous electric field. <i>Applied Physics Letters</i> , 2021, 118, .	1.5	8
11	Modeling of transient luminous events in Earth's middle atmosphere with apokamp discharge. <i>Physics-Uspexhi</i> , 2021, 64, 191-210.	0.8	10
12	Wide Emission Bands of Plasma of a Sub-Nanosecond Discharge in Xenon and Inaccuracies in Their Measurements. <i>IEEE Transactions on Plasma Science</i> , 2021, 49, 1614-1620.	0.6	4
13	Modes of runaway electron beams during formation of diffuse discharges in air and nitrogen. <i>Uspehi Prikladnoj Fiziki</i> , 2021, 9, 202-215.	0.3	0
14	A critical review on ozone and co-species, generation and reaction mechanisms in plasma induced by dielectric barrier discharge technologies for wastewater remediation. <i>Journal of Environmental Chemical Engineering</i> , 2021, 9, 105758.	3.3	50
15	On the Mechanism of the Generation of Runaway Electrons after a Breakdown of a Gap. <i>JETP Letters</i> , 2021, 113, 129-134.	0.4	8
16	Different modes of runaway electron beams generated in high-pressure gases. <i>Journal of Physics: Conference Series</i> , 2021, 2064, 012001.	0.3	1
17	Measurement of the duration of runaway current pulses using measuring equipment with bandwidths up to 50 GHz. <i>Journal of Physics: Conference Series</i> , 2021, 2064, 012009.	0.3	2
18	Time behavior of an electron beam current pulse in the axial and peripheral zones of an anode in vacuum and gas-filled diodes. <i>Journal of Physics: Conference Series</i> , 2021, 2064, 012031.	0.3	0

#	ARTICLE	IF	CITATIONS
19	Generation of Two Pulses of Runaway Electron Beam Current. <i>Technical Physics</i> , 2021, 66, 548-559.	0.2	3
20	Vavilov's Cherenkov Radiation and Pulsed Cathodoluminescence in Poly(methyl methacrylate) Excited by a Subnanosecond Electron Beam. <i>Technical Physics Letters</i> , 2021, 47, 313-316.	0.2	2
21	Spectral and Amplitude-Time Characteristics of the Cherenkov Radiation upon Excitation of Transparent Materials by an Electron Beam. <i>Optics and Spectroscopy (English Translation of Optika i Tj ETQq1 1 00784314 r#BT /Over</i>		
22	High-Voltage Nanosecond Discharge as a Means of Fast Energy Switching. <i>Energies</i> , 2021, 14, 8449.	1.6	1
23	Generation mode of runaway electron beams with high amplitude in atmospheric pressure air. , 2021, , .		0
24	Runaway electrons in diffuse gas discharges. <i>Plasma Sources Science and Technology</i> , 2020, 29, 034001.	1.3	79
25	Whether and how the vapors of Al, Cu, Fe, and W influence the dynamics of apokamps. <i>Journal of Physics: Conference Series</i> , 2020, 1499, 012051.	0.3	1
26	Study of Pulsed Cathodoluminescence of Calcium, Barium, Lithium, and Magnesium Fluorides. <i>Russian Physics Journal</i> , 2020, 63, 831-836.	0.2	1
27	Barrier Discharge Excilamps with a Small-Diameter Exit Window and Their Application. <i>Instruments and Experimental Techniques</i> , 2020, 63, 607-610.	0.1	0
28	Laboratory Simulation of the Effect of Volcanic Material on the Formation of Transient Phenomena Near the Boundary between the Middle and Lower Atmosphere. <i>Atmospheric and Oceanic Optics</i> , 2020, 33, 419-423.	0.6	1
29	Experimental modelling of apokamp discharge formation under outer electric field. <i>Journal of Physics: Conference Series</i> , 2020, 1499, 012016.	0.3	0
30	Pulsed X-Ray and Cathodoluminescence of Pure and Alloyed Zinc Selenide Single Crystals. <i>Russian Physics Journal</i> , 2020, 63, 311-316.	0.2	2
31	Computational and Experimental Study of Time-Averaged Characteristics of Positive and Negative DC Corona Discharges in Point-Plane Gaps in Atmospheric Air. <i>IEEE Transactions on Plasma Science</i> , 2020, 48, 4080-4088.	0.6	16
32	A New Models of Barrier Discharge Excilamps for Liquid Penetrant Inspection. , 2020, , .		0
33	Electrons accelerator for research Cherenkov radiation in different specimens. <i>Journal of Physics: Conference Series</i> , 2020, 1499, 012043.	0.3	0
34	Yttrium Sesquioxide Ceramics Glow Under Irradiation with an Electron Beam. <i>Russian Physics Journal</i> , 2020, 63, 1150-1156.	0.2	1
35	Measuring and Modeling Streamer Velocity at an Air Discharge in a Highly Inhomogeneous Electric Field. <i>Plasma Physics Reports</i> , 2020, 46, 320-327.	0.3	9
36	The relaxation of electrophysical properties HgCdTe epitaxial films affected by plasma of high frequency nanosecond volume discharge in atmospheric-pressure air. <i>Surface and Coatings Technology</i> , 2020, 387, 125527.	2.2	4

#	ARTICLE	IF	CITATIONS
37	Formation of a Negative Streamer in a Sharply Nonuniform Electric Field and the Time of Generation of Runaway Electrons. Russian Physics Journal, 2020, 62, 1967-1975.	0.2	4
38	Cherenkov radiation and cathodoluminescence in sapphire, quartz, and diamond under the excitation of an electron beam. Japanese Journal of Applied Physics, 2020, 59, SHHD01.	0.8	4
39	A Nanosecond Electron Accelerator with a Heterogeneous Transmission Line and a Gas-Filled Diode. Instruments and Experimental Techniques, 2020, 63, 359-363.	0.1	2
40	Apokamp-type gas discharge phenomenon: Experimental and theoretical backgrounds. Europhysics Letters, 2020, 129, 15002.	0.7	1
41	Diffuse and Volume Discharges in High-Pressure Gas Lasers Pumped by Transverse Discharge (A Review). Plasma Physics Reports, 2020, 46, 850-858.	0.3	4
42	Vavilovâ€™Cherenkov Radiation in the Region 200â€™300 nm in the Earthâ€™s Atmosphere. Atmospheric and Oceanic Optics, 2020, 33, 195-197.	0.6	1
43	Efficient lasing in mixtures of helium and fluorine in diffuse discharges formed by runaway electrons. Quantum Electronics, 2020, 50, 900-903.	0.3	5
44	Ignition Different Mode of Corona Discharge in Air at Atmospheric Pressure. , 2020, , .		0
45	Atmospheric Pressure Corona Discharge in the Needle-Plane Electrode System: Influence of Field Peaking on Electrophysical Parameters. , 2020, , .		0
46	Morphology of Destructions of Solid Bodies under Irradiation by a High-Current Electron Beam in Filamented and Self-Focused Mode. , 2020, , .		0
47	Generation of Runaway Electrons and X-ray at a Microsecond Voltage Rise Time in Different Gases. , 2020, , .		1
48	Efficient N2 laser pumped by nanosecond diffuse discharge. Optics Communications, 2019, 430, 210-218.	1.0	8
49	Emission of diamonds, leucosapphire, and KU-1 quartz in the range of 200â€™800â€™nm excited by electron beams with a pulse duration of 0.5 and 12â€™ns. Journal of Applied Physics, 2019, 125, .	1.1	12
50	Effect of Air Pressure on Parameters of Beam Current and X-Ray Radiation Generated in a Gas Diode. Technical Physics, 2019, 64, 1200-1204.	0.2	1
51	Cherenkov Radiation in the Visible and Ultraviolet Spectral Ranges from 6-MeV Electrons Passing through a Quartz Plate. JETP Letters, 2019, 109, 564-568.	0.4	9
52	Observation of Streamer Coronas Preceding the Formation of an Apokampic Discharge. Russian Physics Journal, 2019, 62, 992-995.	0.2	2
53	Cumulation of a High-Current Electron Beam During a Nanosecond High-Voltage Discharge in a Low-Pressure Diode. Russian Physics Journal, 2019, 62, 996-1000.	0.2	1
54	The Initial Stage of Diffuse Jet Formation in a Pulsed Discharge with a Non-Uniform Electric Field in Air. Atmospheric and Oceanic Optics, 2019, 32, 607-611.	0.6	0

#	ARTICLE	IF	CITATIONS
55	Role of Streamers in the Formation of a Corona Discharge in a Highly Nonuniform Electric Field. JETP Letters, 2019, 110, 85-89.	0.4	12
56	On Pulsed Modes of the Glowing Corona Region. Russian Physics Journal, 2019, 62, 893-899.	0.2	5
57	Experimental Determination of the Generation Moment of Runaway Electrons. IEEE Transactions on Plasma Science, 2019, 47, 4521-4524.	0.6	10
58	Beaded Discharges Formed under Pulsed Breakdowns of Air and Nitrogen. Plasma Physics Reports, 2019, 45, 387-396.	0.3	1
59	Filamentation and Self-Focusing of Electron Beams in Vacuum and Gas Diodes. Technical Physics Letters, 2019, 45, 309-313.	0.2	6
60	Spectral and amplitude-time characteristics of crystals excited by a runaway electron beam. Matter and Radiation at Extremes, 2019, 4, .	1.5	6
61	Effect of cathode and anode materials on the high-energy electron beam in the nanosecond-pulse breakdown in gas-filled diodes. Journal Physics D: Applied Physics, 2019, 52, 275202.	1.3	11
62	Features of streamer formation in a sharply non-uniform electric field. Journal of Applied Physics, 2019, 125, .	1.1	29
63	Generators of Atmospheric Pressure Diffuse Discharge Plasma and Their Use for Surface Modification. Plasma, 2019, 2, 27-38.	0.7	7
64	Applied optical properties of diamond. AIP Conference Proceedings, 2019, , .	0.3	4
65	E-beam generation in discharges initiated by voltage pulses with a rise time of 200 ns at an air pressure of 12.5â€“100 kPa. Plasma Science and Technology, 2019, 21, 044007.	0.7	7
66	On the influence of a cathode shape on the parameters of current pulses of runaway electron beams in a gas discharge when applying voltage pulses with a rise time of 200 ns. Journal of Physics: Conference Series, 2019, 1393, 012004.	0.3	2
67	Generation of direct and reverse runaway electron beams in atmospheric air using anodes made of different metals. Journal of Physics: Conference Series, 2019, 1393, 012031.	0.3	0
68	The energy input mode influence on the efficiency of plasma water treatment in a bubble chamber. Journal of Physics: Conference Series, 2019, 1393, 012104.	0.3	0
69	Atmospheric pressure diffuse discharge treatment of aqueous solution of methylenum coeruleum. Journal of Physics: Conference Series, 2019, 1393, 012123.	0.3	2
70	Streamer Breakdown with Runaway Electrons Forming Diffuse Discharges in an Inhomogeneous Electric Field. Russian Physics Journal, 2019, 62, 1171-1180.	0.2	3
71	On the Influence of Electron Energy on Characteristics of the Cherenkov Radiation and Cathodoluminescence. Russian Physics Journal, 2019, 62, 1181-1190.	0.2	4
72	Apokampic Discharge: Formation Conditions and Mechanisms. Russian Physics Journal, 2019, 62, 1289-1297.	0.2	6

#	ARTICLE	IF	CITATIONS
73	A Determination of the Relationship between Energies of Vavilov's Cherenkov Radiation and Cathodoluminescence Excited by an Electron Beam in Diamond. Optics and Spectroscopy (English) Tj ETQq1 1 0.784314 rgBT /Overlo	0.7	14
74	Laboratory Simulation of Blue Jets with Apokampic Discharge in the Hz Frequency Range. Atmospheric and Oceanic Optics, 2019, 32, 710-715.	0.6	4
75	Formation of a small "bead lightning" in a half-microsecond discharge in air. Physics Letters, Section A: General, Atomic and Solid State Physics, 2019, 383, 351-357.	0.9	2
76	Conversion of propane-butane fraction into arenes on MFI zeolites activated by diffuse discharge plasma. , 2019, , .		0
77	ArF*, KrF*, and FI lasers pumped by double discharge from generator with semiconductor opening switch. , 2019, , .		0
78	A new excimer lamp model of Institute of High Current Electronics. , 2019, , .		0
79	Runaway electrons and x-ray emission in air and other gases during discharges with long rise time of voltage pulses. , 2019, , .		0
80	Apokamp discharge as a laboratory analogue of the transient luminous events of middle atmosphere. , 2019, , .		0
81	Cumulation effect of an electron beam generated in a high-voltage nanosecond discharge plasma in vacuum and gas diodes. , 2019, , .		0
82	Radiation in diamond, leucosapphire, and quartz under the excitation of electron beam with an energy of up to 400 keV. , 2019, , .		0
83	A Planar Source of Atmospheric-Pressure Plasma Jet. Plasma Physics Reports, 2018, 44, 153-156.	0.3	3
