#	ARTICLE	IF	CITATIONS
1	How does MobileMums work? Mediators of a physical activity intervention. <i>Psychology and Health</i> , 2020, 35, 968-983.	1.2	4
2	Preventive Health Behavior Change Text Message Interventions: A Meta-analysis. <i>American Journal of Preventive Medicine</i> , 2017, 52, 391-402.	1.6	152
3	Mediation of improvements in sun protective and skin self-examination behaviours: results from the healthy text study. <i>Psycho-Oncology</i> , 2016, 25, 28-35.	1.0	5
4	Patient Preferences for Receiving Remote Communication Support for Lifestyle Physical Activity Behaviour Change: The Perspective of Patients with Musculoskeletal Disorders from Three Hospital Services. <i>BioMed Research International</i> , 2015, 2015, 1-8.	0.9	5
5	The cost-effectiveness of the MobileMums intervention to increase physical activity among mothers with young children: a Markov model informed by a randomised controlled trial. <i>BMJ Open</i> , 2015, 5, e007226-e007226.	0.8	8
6	Can skin cancer prevention and early detection be improved via mobile phone text messaging? A randomised, attention control trial. <i>Preventive Medicine</i> , 2015, 71, 50-56.	1.6	59
7	Randomized Controlled Trial of an Improved Version of MobileMums, an Intervention for Increasing Physical Activity in Women with Young Children. <i>Annals of Behavioral Medicine</i> , 2015, 49, 487-499.	1.7	39
8	User preferences for text message-delivered skin cancer prevention and early detection. <i>Journal of Telemedicine and Telecare</i> , 2015, 21, 227-234.	1.4	4
9	Age, physical inactivity, obesity, health conditions, and health-related quality of life among patients receiving conservative management for musculoskeletal disorders. <i>Clinical Interventions in Aging</i> , 2014, 9, 1069.	1.3	35
10	Perceived barriers and facilitators to increasing physical activity among people with musculoskeletal disorders: a qualitative investigation to inform intervention development. <i>Clinical Interventions in Aging</i> , 2014, 9, 2113.	1.3	38
11	Moving MobileMums forward: protocol for a larger randomized controlled trial of an improved physical activity program for women with young children. <i>BMC Public Health</i> , 2013, 13, 593.	1.2	10
12	Associations between sitting time and health-related quality of life among older men. <i>Mental Health and Physical Activity</i> , 2013, 6, 49-54.	0.9	16
13	Depressive symptoms during pregnancy: Exploring the role of sitting. <i>Mental Health and Physical Activity</i> , 2013, 6, 36-42.	0.9	7
14	Social cognitive mediators of the effect of the MobileMums intervention on physical activity.. <i>Health Psychology</i> , 2013, 32, 729-738.	1.3	30
15	Active adults recall their physical activity differently to less active adults: test-retest reliability and validity of a physical activity survey. <i>Health Promotion Journal of Australia</i> , 2013, 24, 26-31.	0.6	41
16	Pilot Study of an Individualised Early Postpartum Intervention to Increase Physical Activity in Women with Previous Gestational Diabetes. <i>International Journal of Endocrinology</i> , 2012, 2012, 1-5.	0.6	47
17	Postpartum diet quality in Australian women following a gestational diabetes pregnancy. <i>European Journal of Clinical Nutrition</i> , 2012, 66, 1160-1165.	1.3	23
18	Personalised electronic messages to improve sun protection in young adults. <i>Journal of Telemedicine and Telecare</i> , 2012, 18, 247-252.	1.4	8

#	ARTICLE	IF	CITATIONS
19	Iterative development of MobileMums: a physical activity intervention for women with young children. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 151.	2.0	81
20	Measuring Total and Domain-Specific Sitting. <i>Medicine and Science in Sports and Exercise</i> , 2010, 42, 1094-1102.	0.2	292
21	Measuring Physical Activity Change in Broad-Reach Intervention Trials. <i>Journal of Physical Activity and Health</i> , 2010, 7, 194-202.	1.0	46
22	MobileMums: A Randomized Controlled Trial of an SMS-Based Physical Activity Intervention. <i>Annals of Behavioral Medicine</i> , 2010, 39, 101-111.	1.7	208
23	Health-enhancing physical activity behaviour and related factors in postpartum women with recent gestational diabetes mellitus. <i>Journal of Science and Medicine in Sport</i> , 2010, 13, 42-45.	0.6	38
24	Living Well with Diabetes: a randomized controlled trial of a telephone-delivered intervention for maintenance of weight loss, physical activity and glycaemic control in adults with type 2 diabetes. <i>BMC Public Health</i> , 2010, 10, 452.	1.2	46
25	Reliability and Validity of the International Physical Activity Questionnaire for Assessing Walking. <i>Research Quarterly for Exercise and Sport</i> , 2010, 81, 97-101.	0.8	64
26	Measuring physical activity change in broad-reach intervention trials. <i>Journal of Physical Activity and Health</i> , 2010, 7, 194-202.	1.0	24
27	Cost-Effectiveness of a Telephone-Delivered Intervention for Physical Activity and Diet. <i>PLoS ONE</i> , 2009, 4, e7135.	1.1	72
28	Measurement Properties of the Australian Women's Activity Survey. <i>Medicine and Science in Sports and Exercise</i> , 2009, 41, 1020-1033.	0.2	37
29	Randomized trial of a neighborhood environment-focused physical activity website intervention. <i>Preventive Medicine</i> , 2009, 48, 144-150.	1.6	71
30	Randomized trial of three strategies to promote physical activity in general practice. <i>Preventive Medicine</i> , 2009, 48, 156-163.	1.6	58
31	Behavior Change Interventions Delivered by Mobile Telephone Short-Message Service. <i>American Journal of Preventive Medicine</i> , 2009, 36, 165-173.	1.6	1,064
32	Repeatability and Accuracy of CHAMPS as a Measure of Physical Activity in a Community Sample of Older Australian Adults. <i>Journal of Physical Activity and Health</i> , 2009, 6, 221-229.	1.0	42
33	Reliability and validity of a modified self-administered version of the Active Australia physical activity survey in a sample of mid-age women. <i>Australian and New Zealand Journal of Public Health</i> , 2008, 32, 535-541.	0.8	304
34	Knowledge of and preferred sources of assistance for physical activity in a sample of urban Indigenous Australians. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2008, 5, 22.	2.0	19
35	Comparison of the Effects of a Home-Based and Group-Based Resistance Training Program on Functional Ability in Older Adults. <i>American Journal of Health Promotion</i> , 2008, 23, 13-17.	0.9	39
36	Comparative Effects of Home- and Group-Based Exercise on Balance Confidence and Balance Ability in Older Adults: Cluster Randomized Trial. <i>Gerontology</i> , 2008, 54, 272-280.	1.4	68

#	ARTICLE	IF	CITATIONS
37	Prompting Health Professionals to Be Activity Role Modelsâ€”Motivating Stair Use at the 2001 ACSM Scientific Meeting. <i>Journal of Physical Activity and Health</i> , 2008, 5, 607-618.	1.0	11
38	Exploring the meaning of, the barriers to and potential strategies for promoting physical activity among urban Indigenous Australians. <i>Health Promotion Journal of Australia</i> , 2008, 19, 102-108.	0.6	24
39	Physical Activity in Women with Young Children: How Can We Assess â€œAnything That's Not Sittingâ€?. <i>Women and Health</i> , 2007, 45, 95-116.	0.4	15
40	Should All Steps Count When Using a Pedometer as a Measure of Physical Activity in Older Adults?. <i>Journal of Physical Activity and Health</i> , 2007, 4, 305-314.	1.0	18
41	Correlates of pedometer use: Results from a community-based physical activity intervention trial (10,000 Steps Rockhampton). <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2007, 4, 31.	2.0	18
42	Measuring quality of life in older people: Reliability and validity of WHOQOLâ€œOLD. <i>Australasian Journal on Ageing</i> , 2007, 26, 162-167.	0.4	27
43	Validation of a 24-h physical activity recall in indigenous and non-indigenous Australian adolescents. <i>Journal of Science and Medicine in Sport</i> , 2007, 10, 428-435.	0.6	29
44	Measurement properties of the CHAMPS physical activity questionnaire in a sample of older Australians. <i>Journal of Science and Medicine in Sport</i> , 2006, 9, 319-326.	0.6	54
45	Retention, adherence and compliance: Important considerations for home- and group-based resistance training programs for older adults. <i>Journal of Science and Medicine in Sport</i> , 2006, 9, 402-412.	0.6	47
46	Promoting physical activity in Australian general practices: a randomised trial of health promotion advice versus hypertension management. <i>Patient Education and Counseling</i> , 2005, 56, 283-290.	1.0	31
47	Exploring the feasibility and acceptability of using Internet technology to promote physical activity within a defined community. <i>Health Promotion Journal of Australia</i> , 2005, 16, 82-84.	0.6	21
48	Reliability and validity of a brief physical activity assessment for use by family doctors * Commentary. <i>British Journal of Sports Medicine</i> , 2005, 39, 294-297.	3.1	183
49	Website physical activity interventions: preferences of potential users. <i>Health Education Research</i> , 2005, 21, 560-566.	1.0	53
50	Engagement and retention of participants in a physical activity website. <i>Preventive Medicine</i> , 2005, 40, 54-59.	1.6	134
51	Prospective Study of Physical Activity and Depressive Symptoms in Middle-Aged Women. <i>American Journal of Preventive Medicine</i> , 2005, 29, 265-272.	1.6	205
52	Screening for Physical Activity in Family Practice Evaluation of Two Brief Assessment Tools. <i>American Journal of Preventive Medicine</i> , 2005, 29, 256-264.	1.6	170
53	Estimating physical activity level: the role of domestic activities. <i>Journal of Epidemiology and Community Health</i> , 2004, 58, 466-467.	2.0	30
54	Associations of Location and Perceived Environmental Attributes with Walking in Neighborhoods. <i>American Journal of Health Promotion</i> , 2004, 18, 239-242.	0.9	142

#	ARTICLE	IF	CITATIONS
55	Challenges and opportunities for promoting physical activity in the workplace. <i>Journal of Science and Medicine in Sport</i> , 2004, 7, 60-66.	0.6	115
56	Mediated approaches for influencing physical activity: update of the evidence on mass media, print, telephone and website delivery of interventions. <i>Journal of Science and Medicine in Sport</i> , 2004, 7, 74-80.	0.6	101
57	Changes in neighborhood walking are related to changes in perceptions of environmental attributes. <i>Annals of Behavioral Medicine</i> , 2004, 27, 60-67.	1.7	197
58	Trial of print and telephone delivered interventions to influence walking. <i>Preventive Medicine</i> , 2004, 39, 635-641.	1.6	35
59	Physical activity promotion in primary care. <i>American Journal of Preventive Medicine</i> , 2004, 27, 297-303.	1.6	47
60	Reaching Out to Promote Physical Activity in Australia: A Statewide Randomized Controlled Trial of a Stage-Targeted Intervention. <i>American Journal of Health Promotion</i> , 2004, 18, 283-287.	0.9	41
61	Population-based randomized controlled trial of a stage-targeted physical activity intervention. <i>Annals of Behavioral Medicine</i> , 2003, 25, 194-202.	1.7	69
62	Print versus website physical activity programs. <i>American Journal of Preventive Medicine</i> , 2003, 25, 88-94.	1.6	176
63	International Physical Activity Questionnaire: 12-Country Reliability and Validity. <i>Medicine and Science in Sports and Exercise</i> , 2003, 35, 1381-1395.	0.2	14,285
64	Can motivational signs prompt increases in incidental physical activity in an Australian health-care facility?. <i>Health Education Research</i> , 2002, 17, 743-749.	1.0	71
65	Perceptions of the Physical Environment, Stage of Change for Physical Activity, and Walking among Australian Adults. <i>Research Quarterly for Exercise and Sport</i> , 2002, 73, 146-155.	0.8	82
