#	ARTICLE	IF	CITATIONS
1	Decreased mesolimbic dopamine signaling underlies the waning of maternal caregiving across the postpartum period in rats. <i>Psychopharmacology</i> , 2020, 237, 1107-1119.	3.1	9
2	Depression-related disturbances in rat maternal behaviour are associated with altered monoamine levels within mesocorticolimbic structures. <i>Journal of Neuroendocrinology</i> , 2019, 31, e12766.	2.6	11
3	Structural and Functional Plasticity in the Maternal Brain Circuitry. <i>New Directions for Child and Adolescent Development</i> , 2016, 2016, 23-46.	2.2	20
4	Neuroanatomical and neurochemical basis of parenting: Dynamic coordination of motivational, affective and cognitive processes. <i>Hormones and Behavior</i> , 2016, 77, 72-85.	2.1	59
5	Parenting Behavior. , 2015, , 2371-2437.		14
6	Affective, Cognitive, and Motivational Processes of Maternal Care. <i>Advances in Neurobiology</i> , 2015, 10, 199-217.	1.8	3
7	Melanin-concentrating hormone in the medial preoptic area reduces active components of maternal behavior in rats. <i>Peptides</i> , 2014, 58, 20-25.	2.4	40
8	New theoretical and experimental approaches on maternal motivation in mammals. <i>Neuroscience and Biobehavioral Reviews</i> , 2013, 37, 1860-1874.	6.1	73
9	Flexibility and adaptation of the neural substrate that supports maternal behavior in mammals. <i>Neuroscience and Biobehavioral Reviews</i> , 2013, 37, 1875-1892.	6.1	80
10	Effect of the adenosine A2A receptor antagonist MSX-3 on motivational disruptions of maternal behavior induced by dopamine antagonism in the early postpartum rat. <i>Psychopharmacology</i> , 2011, 213, 69-79.	3.1	30
11	The changing role of the medial preoptic area in the regulation of maternal behavior across the postpartum period: Facilitation followed by inhibition. <i>Behavioural Brain Research</i> , 2009, 205, 238-248.	2.2	69
12	Characterization of maternal motivation in the lactating rat: Contrasts between early and late postpartum responses. <i>Hormones and Behavior</i> , 2008, 54, 294-301.	2.1	46
13	Demanding pups improve maternal behavioral impairments in sensitized and haloperidol-treated lactating female rats. <i>Behavioural Brain Research</i> , 2006, 175, 139-148.	2.2	65
