NEENA MODI

#	Article	IF	CITATIONS
1	Breastfeeding after cesarean delivery: a systematic review and meta-analysis of world literature. American Journal of Clinical Nutrition, 2012, 95, 1113-1135.	4.7	390
2	Preterm Birth and the Metabolic Syndrome in Adult Life: A Systematic Review and Meta-analysis. Pediatrics, 2013, 131, e1240-e1263.	2.1	353
3	Preterm birth–associated neurodevelopmental impairment estimates at regional and global levels for 2010. Pediatric Research, 2013, 74, 17-34.	2.3	337
4	Altered Adiposity after Extremely Preterm Birth. Pediatric Research, 2005, 57, 211-215.	2.3	261
5	Effect of breastfeeding compared with formula feeding on infant body composition: a systematic review and meta-analysis. American Journal of Clinical Nutrition, 2012, 95, 656-669.	4.7	217
6	Neonatal Outcomes of Very Low Birth Weight and Very Preterm Neonates: An International Comparison. Journal of Pediatrics, 2016, 177, 144-152.e6.	1.8	184
7	Incidence of neonatal necrotising enterocolitis in high-income countries: a systematic review. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2018, 103, F182-F189.	2.8	173
8	The health implications of birth by Caesarean section. Biological Reviews, 2012, 87, 229-243.	10.4	161
9	Risk Factors for Hospital Admission with RSV Bronchiolitis in England: A Population-Based Birth Cohort Study. PLoS ONE, 2014, 9, e89186.	2.5	156
10	The Influence of Maternal Body Mass Index on Infant Adiposity and Hepatic Lipid Content. Pediatric Research, 2011, 70, 287-291.	2.3	145
11	Trends in Outcomes for Neonates Born Very Preterm and Very Low Birth Weight in 11 High-Income Countries. Journal of Pediatrics, 2019, 215, 32-40.e14.	1.8	142
12	Survival in Very Preterm Infants: An International Comparison of 10 National Neonatal Networks. Pediatrics, 2017, 140, .	2.1	140
13	Mode of Delivery and Offspring Body Mass Index, Overweight and Obesity in Adult Life: A Systematic Review and Meta-Analysis. PLoS ONE, 2014, 9, e87896.	2.5	140
14	Survival of very preterm infants admitted to neonatal care in England 2008–2014: time trends and regional variation. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2018, 103, F208-F215.	2.8	137
15	Granulocyte-macrophage colony stimulating factor administered as prophylaxis for reduction of sepsis in extremely preterm, small for gestational age neonates (the PROGRAMS trial): a single-blind, multicentre, randomised controlled trial. Lancet, The, 2009, 373, 226-233.	13.7	134
16	Strengthening the Reporting of Observational Studies in Epidemiology for Newborn Infection (STROBE-NI): an extension of the STROBE statement for neonatal infection research. Lancet Infectious Diseases, The, 2016, 16, e202-e213.	9.1	120
17	Core outcomes in neonatology: development of a core outcome set for neonatal research. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2020, 105, 425-431.	2.8	107
18	Neonatal brain injuries in England: population-based incidence derived from routinely recorded clinical data held in the National Neonatal Research Database. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2018, 103, F301-F306.	2.8	106

#	Article	lF	CITATIONS
19	Distribution of Adipose Tissue in the Newborn. Pediatric Research, 2004, 55, 437-441.	2.3	105
20	Birth weight and longitudinal growth in infants born below 32â€weeks' gestation: a UK population study. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2014, 99, F34-F40.	2.8	99
21	Incidence and enteral feed antecedents of severe neonatal necrotising enterocolitis across neonatal networks in England, 2012–13: a whole-population surveillance study. The Lancet Gastroenterology and Hepatology, 2017, 2, 43-51.	8.1	93
22	Whole Body Magnetic Resonance Imaging of Healthy Newborn Infants Demonstrates Increased Central Adiposity in Asian Indians. Pediatric Research, 2009, 65, 584-587.	2.3	92
23	Nutritional Evaluation and Optimisation in Neonates: a randomized, double-blind controlled trial of amino acid regimen and intravenous lipid composition in preterm parenteral nutrition. American Journal of Clinical Nutrition, 2016, 103, 1443-1452.	4.7	89
24	Scoping review shows wide variation in the definitions of bronchopulmonary dysplasia in preterm infants and calls for a consensus. Acta Paediatrica, International Journal of Paediatrics, 2017, 106, 366-374.	1.5	88
25	Effect of Maternal Body Mass Index on Hormones in Breast Milk: A Systematic Review. PLoS ONE, 2014, 9, e115043.	2.5	87
26	Diabetes in pregnancy and infant adiposity: systematic review and meta-analysis. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2017, 102, F65-F72.	2.8	83
27	Development of a Gestational Age–Specific Case Definition for Neonatal Necrotizing Enterocolitis. JAMA Pediatrics, 2017, 171, 256.	6.2	82
28	Multiplatform characterization of dynamic changes in breast milk during lactation. Electrophoresis, 2015, 36, 2269-2285.	2.4	79
29	Association of early postnatal transfer and birth outside a tertiary hospital with mortality and severe brain injury in extremely preterm infants: observational cohort study with propensity score matching. BMJ: British Medical Journal, 2019, 367, 15678.	2.3	76
30	Developing, implementing and disseminating a core outcome set for neonatal medicine. BMJ Paediatrics Open, 2017, 1, e000048.	1.4	72
31	Determinants of Adiposity during Preweaning Postnatal Growth in Appropriately Grown and Growth-Restricted Term Infants. Pediatric Research, 2006, 60, 345-348.	2.3	69
32	Respiratory Management of Extremely Preterm Infants: An International Survey. Neonatology, 2018, 114, 28-36.	2.0	69
33	Developmental Assessments in Preterm Children: A Meta-analysis. Pediatrics, 2016, 138, .	2.1	63
34	The International Network for Evaluating Outcomes of very low birth weight, very preterm neonates (iNeo): a protocol for collaborative comparisons of international health services for quality improvement in neonatal care. BMC Pediatrics, 2014, 14, 110.	1.7	61
35	Guidance on clinical research involving infants, children and young people: an update for researchers and research ethics committees. Archives of Disease in Childhood, 2014, 99, 887-891.	1.9	58
36	Estimating neonatal length of stay for babies born very preterm. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2019, 104, F182-F186.	2.8	57

#	Article	IF	CITATIONS
37	The long-term effects of birth by caesarean section: The case for a randomised controlled trial. Early Human Development, 2012, 88, 943-949.	1.8	55
38	The United Kingdom National Neonatal Research Database: A validation study. PLoS ONE, 2018, 13, e0201815.	2.5	55
39	A healthy nation: strengthening child health research in the UK. Lancet, The, 2013, 381, 73-87.	13.7	53
40	Association of Maternal Diabetes With Neonatal Outcomes of Very Preterm and Very Low-Birth-Weight Infants. JAMA Pediatrics, 2018, 172, 867.	6.2	52
41	Evaluation of Early Childhood Social-Communication Difficulties in Children Born Preterm Using the Quantitative Checklist for Autism inÂToddlers. Journal of Pediatrics, 2014, 164, 26-33.e1.	1.8	48
42	Building resilient societies after COVID-19: the case for investing in maternal, neonatal, and child health. Lancet Public Health, The, 2020, 5, e624-e627.	10.0	47
43	International variations and trends in the treatment for retinopathy of prematurity. British Journal of Ophthalmology, 2017, 101, 1399-1404.	3.9	46
44	A randomised, double-blind, controlled trial of the effect of prebiotic oligosaccharides on enteral tolerance in preterm infants (ISRCTN77444690). Pediatric Research, 2010, 68, 1.	2.3	42
45	Development of Early Adiposity in Infants of Mothers With Gestational Diabetes Mellitus. Diabetes Care, 2016, 39, 1045-1051.	8.6	40
46	Elective caesarean sections—risks to the infant. Lancet, The, 2009, 374, 675-676.	13.7	38
47	Role of human milk oligosaccharides in Group B Streptococcus colonisation. Clinical and Translational Immunology, 2016, 5, e99.	3.8	38
48	Impact of maternal BMI and sampling strategy on the concentration of leptin, insulin, ghrelin and resistin in breast milk across a single feed: a longitudinal cohort study. BMJ Open, 2016, 6, e010778.	1.9	36
49	Quality of routine hospital birth records and the feasibility of their use for creating birth cohorts. Journal of Public Health, 2013, 35, 298-307.	1.8	35
50	Clinical implications of postnatal alterations in body water distribution. Seminars in Fetal and Neonatal Medicine, 2003, 8, 301-306.	2.7	34
51	Equity in coronavirus disease 2019 vaccine development and deployment. American Journal of Obstetrics and Gynecology, 2021, 224, 423-427.	1.3	34
52	Parent, patient and clinician perceptions of outcomes during and following neonatal care: a systematic review of qualitative research. BMJ Paediatrics Open, 2018, 2, e000343.	1.4	32
53	Assessing the impact of preterm nutrition. Early Human Development, 2007, 83, 813-818.	1.8	30
54	Parent, child and public involvement in child health research: core value not just an optional extra. Pediatric Research, 2019, 85, 2-3.	2.3	30

#	Article	IF	CITATIONS
55	The influence of postnatal respiratory adaptation on sodium handling in preterm neonates. Early Human Development, 1990, 21, 11-20.	1.8	29
56	Ultrasound Estimates of Visceral and Subcutaneous-Abdominal Adipose Tissues in Infancy. Journal of Obesity, 2013, 2013, 1-9.	2.7	28
57	Preterm nutritional intake and MRI phenotype at term age: a prospective observational study. BMJ Open, 2014, 4, e005390.	1.9	27
58	Clinical and molecular evidence of accelerated ageing following very preterm birth. Pediatric Research, 2020, 87, 1005-1010.	2.3	27
59	Inconsistent outcome reporting in large neonatal trials: a systematic review. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2020, 105, 69-75.	2.8	25
60	Avoiding hypernatraemic dehydration in healthy term infants. Archives of Disease in Childhood, 2007, 92, 474-475.	1.9	21
61	A randomised trial of granulocyte-macrophage colony-stimulating factor for neonatal sepsis: childhood outcomes at 5â€years. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2015, 100, F320-F326.	2.8	21
62	Macronutrient content of donor milk from a regional human milk bank: variation with donor mother–infant characteristics. British Journal of Nutrition, 2019, 122, 1155-1167.	2.3	21
63	Recent advances in the genetics of preterm birth. Annals of Human Genetics, 2020, 84, 205-213.	0.8	21
64	Probiotics and Necrotising Enterocolitis: The Devil (as Always) Is in the Detail. Neonatology, 2014, 105, 71-73.	2.0	20
65	Birthweight and patterns of postnatal weight gain in very and extremely preterm babies in England and Wales, 2008–19: a cohort study. The Lancet Child and Adolescent Health, 2021, 5, 719-728.	5.6	19
66	National neonatal data to support specialist care and improve infant outcomes. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2013, 98, F175-F180.	2.8	18
67	Countryâ€Specific vs. Common Birthweightâ€forâ€Gestational Age References to Identify Small for Gestational Age Infants Born at 24–28 weeks: An International Study. Paediatric and Perinatal Epidemiology, 2016, 30, 450-461.	1.7	18
68	Evaluating preterm care across Europe using the eNewborn European Network database. Pediatric Research, 2020, 88, 484-495.	2.3	18
69	Developing routinely recorded clinical data from electronic patient records as a national resource to improve neonatal health care: the Medicines for Neonates research programme. Programme Grants for Applied Research, 2019, 7, 1-396.	1.0	17
70	Ethical Pitfalls in Neonatal Comparative Effectiveness Trials. Neonatology, 2014, 105, 350-351.	2.0	16
71	The International Network for Evaluating Outcomes (iNeo) of neonates: evolution, progress and opportunities. Translational Pediatrics, 2019, 8, 170-181.	1.2	16
72	The WHEAT pilot trial—WithHolding Enteral feeds Around packed red cell Transfusion to prevent necrotising enterocolitis in preterm neonates: a multicentre, electronic patient record (EPR), randomised controlled point-of-care pilot trial. BMJ Open, 2019, 9, e033543.	1.9	16

#	Article	IF	CITATIONS
73	Changes in neonatal admissions, care processes and outcomes in England and Wales during the COVID-19 pandemic: a whole population cohort study. BMJ Open, 2021, 11, e054410.	1.9	16
74	Adiposity and hepatic lipid in healthy full-term, breastfed, and formula-fed human infants: a prospective short-term longitudinal cohort study. American Journal of Clinical Nutrition, 2014, 99, 1034-1040.	4.7	15
75	Information technology infrastructure, quality improvement and research: the UK National Neonatal Research Database. Translational Pediatrics, 2019, 8, 193-198.	1.2	15
76	A systematic review of administrative and clinical databases of infants admitted to neonatal units. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2017, 102, F270-F276.	2.8	14
77	Neonatal Outcomes of Very Preterm or Very Low Birth Weight Triplets. Pediatrics, 2018, 142, .	2.1	14
78	Variations in Neonatal Length of Stay of Babies Born Extremely Preterm: An International Comparison Between iNeo Networks. Journal of Pediatrics, 2021, 233, 26-32.e6.	1.8	14
79	A framework to address key issues of neonatal service configuration in England: the NeoNet multimethods study. Health Services and Delivery Research, 2018, 6, 1-160.	1.4	14
80	Child health care: adequate training for all UK GPs is long overdue. British Journal of General Practice, 2016, 66, 228-229.	1.4	13
81	Impact of breast milk intake on body composition at term in very preterm babies: secondary analysis of the Nutritional Evaluation and Optimisation in Neonates randomised controlled trial. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2019, 104, F306-F312.	2.8	13
82	A randomised controlled trial of high vs low volume initiation and rapid vs slow advancement of milk feeds in infants with birthweights ≤000 g in a resource-limited setting. Paediatrics and International Child Health, 2016, 36, 288-295.	1.0	12
83	Sharing Data to Accelerate Medicine Development and Improve Neonatal Care: Data Standards and Harmonized Definitions. Journal of Pediatrics, 2018, 203, 437-441.e1.	1.8	12
84	Changing clinical characteristics of infants treated for hypoxic-ischaemic encephalopathy in England, Wales and Scotland: a population-based study using the National Neonatal Research Database. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2021, 106, 501-508.	2.8	12
85	Inter-center variability in neonatal outcomes of preterm infants: A longitudinal evaluation of 298 neonatal units in 11 countries. Seminars in Fetal and Neonatal Medicine, 2021, 26, 101196.	2.3	12
86	Clinician enteral feeding preferences for very preterm babies in the UK. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2015, 100, F372-F373.	2.8	11
87	Health systems should be publicly funded and publicly provided. BMJ: British Medical Journal, 2018, 362, k3580.	2.3	11
88	Adult outcomes after preterm birth. Postgraduate Medical Journal, 2020, 96, 619-622.	1.8	11
89	The use of routinely collected patient data for research: A critical review. Health (United Kingdom), 2012, 16, 448-463.	1.5	10
90	Management and outcomes of neonates with down syndrome admitted to neonatal units. Birth Defects Research Part A: Clinical and Molecular Teratology, 2016, 106, 468-474.	1.6	10

#	Article	IF	CITATIONS
91	Neonatal randomised point-of-care trials are feasible and acceptable in the UK: results from two national surveys. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2016, 101, 86-87.	2.8	10
92	Validity of neurodevelopmental outcomes of children born very preterm assessed during routine clinical follow-up in England. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2018, 103, F479-F484.	2.8	10
93	Unit-Level Variations in Healthcare Professionals' Availability for Preterm Neonates <29 Weeks' Gestation: An International Survey. Neonatology, 2019, 116, 347-355.	2.0	10
94	Identification of variation in nutritional practice in neonatal units in England and association with clinical outcomes using agnostic machine learning. Scientific Reports, 2021, 11, 7178.	3.3	10
95	Development of a Pipeline for Exploratory Metabolic Profiling of Infant Urine. Journal of Proteome Research, 2016, 15, 3432-3440.	3.7	9
96	Developing core outcome set for women's, newborn, and child health: the CROWN Initiative. Pediatric Research, 2018, 84, 316-317.	2.3	9
97	Incorporating parent, former patient and clinician perspectives in the design of a national UK double-cluster, randomised controlled trial addressing uncertainties in preterm nutrition. BMJ Paediatrics Open, 2021, 5, e001112.	1.4	9
98	Neonatal outcomes of extremely preterm twins by sex pairing: an international cohort study. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2021, 106, 17-24.	2.8	9
99	Modelling Neonatal Care Pathways for Babies Born Preterm: An Application of Multistate Modelling. PLoS ONE, 2016, 11, e0165202.	2.5	9
100	Covid-19 treatments and vaccines must be evaluated in pregnancy. BMJ, The, 2021, 375, n2377.	6.0	9
101	Comparison of UK paediatric consultants' participation in child health research between 2011 and 2015. Archives of Disease in Childhood, 2017, 102, 702-706.	1.9	8
102	Improving clinical paediatric research and learning from COVID-19: recommendations by the Conect4Children expertÂadvice group. Pediatric Research, 2022, 91, 1069-1077.	2.3	8
103	The effect of the neonatal Continuous Negative Extrathoracic Pressure (CNEP) trial enquiries on research in the UK: Table 1. Archives of Disease in Childhood, 2011, 96, 500-504.	1.9	7
104	The future of pediatric research: European perspective. Pediatric Research, 2017, 81, 138-139.	2.3	7
105	eNewborn: The Information Technology Revolution and Challenges for Neonatal Networks. Neonatology, 2017, 111, 388-397.	2.0	7
106	Challenges in Advancing Necrotizing Enterocolitis Research. Clinics in Perinatology, 2019, 46, 19-27.	2.1	7
107	Cervical ripening at home or in-hospital—prospective cohort study and process evaluation (CHOICE) study: a protocol. BMJ Open, 2021, 11, e050452.	1.9	7
108	Nutritional Evaluation and Optimisation in Neonates (NEON) trial of amino acid regimen and intravenous lipid composition in preterm parenteral nutrition: a randomised double-blind controlled trial. Efficacy and Mechanism Evaluation, 2016, 3, 1-80.	0.7	7
