#	Article	IF	CITATIONS
1	Nighttime compression supports improved selfâ€management of breast cancer–related lymphedema: A multicenter randomized controlled trial. Cancer, 2022, 128, 587-596.	4.1	8
2	Exercise Recommendation for People With Bone Metastases: Expert Consensus for Health Care Providers and Exercise Professionals. JCO Oncology Practice, 2022, 18, e697-e709.	2.9	44
3	Decongestive progressive resistance exercise with an adjustable compression wrap for breast cancer-related lymphoedema (DREAM): protocol for a randomised controlled trial. BMJ Open, 2022, 12, e053165.	1.9	0
4	A Cancer Exercise Toolkit Developed Using Co-Design: Mixed Methods Study. JMIR Cancer, 2022, 8, e34903.	2.4	10
5	Update to the Canadian clinical practice guideline for best-practice management of breast cancer–related lymphedema: study protocol. CMAJ Open, 2022, 10, E338-E347.	2.4	0
6	Facilitators and barriers to centre- and home-based exercise training in breast cancer patients - a swiss tertiary centre experience. European Journal of Preventive Cardiology, 2022, 29, .	1.8	0
7	Exercise for people with bone metastases: MASCC endorsed clinical recommendations developed by the International Bone Metastases Exercise Working Group. Supportive Care in Cancer, 2022, 30, 7061-7065.	2.2	4
8	Recruitment strategies and design considerations in a trial of resistance training to prevent dose-limiting toxicities in colon cancer patients undergoing chemotherapy. Contemporary Clinical Trials, 2021, 101, 106242.	1.8	13
9	The Exercise Oncology Knowledge Mobilization Initiative: An International Modified Delphi Study. Frontiers in Oncology, 2021, 11, 713199.	2.8	8
10	Exercise for individuals with bone metastases: A systematic review. Critical Reviews in Oncology/Hematology, 2021, 166, 103433.	4.4	33
11	Attention to principles of exercise training: an updated systematic review of randomized controlled trials in cancers other than breast and prostate. BMC Cancer, 2021, 21, 1179.	2.6	19
12	A Hypothesis-Generating Study Using Electrophysiology to Examine Cognitive Function in Colon Cancer Patients. Archives of Clinical Neuropsychology, 2020, 35, 226-232.	0.5	2
13	Exploring tensions within young breast cancer survivors' physical activity, nutrition and weight management beliefs and practices. Disability and Rehabilitation, 2020, 42, 685-691.	1.8	12
14	Exercising in Isolation? The Role of Telehealth in Exercise Oncology During the COVID-19 Pandemic and Beyond. Physical Therapy, 2020, 100, 1713-1716.	2.4	67
15	Patient and Medical Oncologists' Perspectives on Prescribed Lifestyle Intervention—Experiences of Women with Breast Cancer and Providers. Journal of Clinical Medicine, 2020, 9, 2815.	2.4	7
16	Exercise training affects hemodynamics not cardiac function during anthracycline-based chemotherapy. Breast Cancer Research and Treatment, 2020, 184, 75-85.	2,5	12
17	Shared concern with current breast cancer rehabilitation services: a focus group study of survivors' and professionals' experiences and preferences for rehabilitation care delivery. BMJ Open, 2020, 10, e037280.	1.9	6
18	Study protocol of the Aerobic exercise and CogniTIVe functioning in women with breAsT cancEr (ACTIVATE) trial: a two-arm, two-centre randomized controlled trial, BMC Cancer, 2020, 20, 711	2.6	1

#	Article	IF	CITATIONS
19	Self-Managed Surveillance for Breast Cancer–Related Upper Body Issues: A Feasibility and Reliability Study. Physical Therapy, 2020, 100, 468-476.	2.4	7
20	The Effect of Exercise on Cancer-Related Cognitive Impairment and Applications for Physical Therapy: Systematic Review of Randomized Controlled Trials. Physical Therapy, 2020, 100, 523-542.	2.4	84
21	Utilizing RE-AIM to examine the translational potential of Project MOVE, a novel intervention for increasing physical activity levels in breast cancer survivors. Translational Behavioral Medicine, 2019, 9, 646-655.	2.4	11
22	Factors associated with exercise preferences, barriers and facilitators of prostate cancer survivors. European Journal of Cancer Care, 2019, 28, e13135.	1.5	22
23	Effect of Exercise on Taxane Chemotherapy–Induced Peripheral Neuropathy in Women With Breast Cancer: A Randomized Controlled Trial. Clinical Breast Cancer, 2019, 19, 411-422.	2.4	49
24	Exercise is medicine in oncology: Engaging clinicians to help patients move through cancer. Ca-A Cancer Journal for Clinicians, 2019, 69, 468-484.	329.8	412
25	An international perspective on integrating physiotherapists in oncology care. Journal of Physiotherapy, 2019, 65, 186-188.	1.7	15
26	Nutrition and Cancer Prevention: Why is the Evidence Lost in Translation?. Advances in Nutrition, 2019, 10, 410-418.	6.4	17
27	A preliminary trial examining a â€real world' approach for increasing physical activity among breast cancer survivors: findings from project MOVE. BMC Cancer, 2019, 19, 272.	2.6	10
28	Impact of exercise on chemotherapy completion rate: A systematic review of the evidence and recommendations for future exercise oncology research. Critical Reviews in Oncology/Hematology, 2019, 136, 79-85.	4.4	68
29	Development and Evaluation of the Breast Cancer Online Rehabilitation (BRECOR) Program for Self-managed Upper-Body Rehabilitation for Women With Breast Cancer. Rehabilitation Oncology, 2019, 37, 104-113.	0.5	3
30	An Executive Summary of Reports From an International Multidisciplinary Roundtable on Exercise and Cancer: Evidence, Guidelines, and Implementation. Rehabilitation Oncology, 2019, 37, 144-152.	0.5	29
31	Exercise Guidelines for Cancer Survivors: Consensus Statement from International Multidisciplinary Roundtable. Medicine and Science in Sports and Exercise, 2019, 51, 2375-2390.	0.4	1,443
32	American College of Sports Medicine Roundtable Report on Physical Activity, Sedentary Behavior, and Cancer Prevention and Control. Medicine and Science in Sports and Exercise, 2019, 51, 2391-2402.	0.4	455
33	A Longitudinal Study of the Association of Clinical Indices of Cardiovascular Autonomic Function with Breast Cancer Treatment and Exercise Training. Oncologist, 2019, 24, 273-284.	3.7	28
34	Self-Measured Arm Circumference in Women With Breast Cancer Is Reliable and Valid. Physical Therapy, 2019, 99, 240-253.	2.4	16
35	Updated systematic review of exercise studies in breast cancer survivors: attention to the principles of exercise training. British Journal of Sports Medicine, 2019, 53, 504-512.	6.7	85
36	Prospective surveillance and targeted physiotherapy for arm morbidity after breast cancer surgery: a pilot randomized controlled trial. Clinical Rehabilitation, 2018, 32, 811-826.	2.2	27

#	Article	IF	CITATIONS
37	Predictors of attendance to an oncologist-referred exercise program for women with breast cancer. Supportive Care in Cancer, 2018, 26, 3297-3306.	2.2	15
38	Acceptability and satisfaction of project MOVE: A pragmatic feasibility trial aimed at increasing physical activity in female breast cancer survivors. Psycho-Oncology, 2018, 27, 1251-1256.	2.3	9
39	Effect of aerobic exercise on cancerâ€associated cognitive impairment: A proofâ€ofâ€concept <scp>RCT</scp> . Psycho-Oncology, 2018, 27, 53-60.	2.3	64
40	Effectiveness of Oncologist-Referred Exercise and Healthy Eating Programming as a Part of Supportive Adjuvant Care for Early Breast Cancer. Oncologist, 2018, 23, 105-115.	3.7	44
41	Exercise Prescription and Adherence for Breast Cancer. Medicine and Science in Sports and Exercise, 2018, 50, 177-186.	0.4	61
42	The effect of an aerobic exercise bout 24Âh prior to each doxorubicin treatment for breast cancer on markers of cardiotoxicity and treatment symptoms: a RCT. Breast Cancer Research and Treatment, 2018, 167, 719-729.	2.5	67
43	Exercise as part of routine cancer care. Lancet Oncology, The, 2018, 19, e433-e436.	10.7	48
44	Determining activity count cut-points for measurement of physical activity using the Actiwatch2 accelerometer. Physiology and Behavior, 2017, 173, 95-100.	2.1	22
45	A Systematic Review of the Effect of Lifestyle Interventions on Adipose Tissue Gene Expression: Implications for Carcinogenesis. Obesity, 2017, 25, S40-S51.	3.0	27
46	Exploring genetic influences underlying acute aerobic exercise effects on motor learning. Scientific Reports, 2017, 7, 12123.	3.3	24
47	Protective effects of acute exercise prior to doxorubicin on cardiac function of breast cancer patients: A proof-of-concept RCT. International Journal of Cardiology, 2017, 245, 263-270.	1.7	48
48	Smartphone-Enabled Health Coaching Intervention (iMOVE) to Promote Long-Term Maintenance of Physical Activity in Breast Cancer Survivors: Protocol for a Feasibility Pilot Randomized Controlled Trial. JMIR Research Protocols, 2017, 6, e165.	1.0	29
49	Fee-for-Service Cancer Rehabilitation Programs Improve Health-Related Quality of Life. Current Oncology, 2016, 23, 233-240.	2.2	8
50	Promoting Motor Cortical Plasticity with Acute Aerobic Exercise: A Role for Cerebellar Circuits. Neural Plasticity, 2016, 2016, 1-12.	2.2	52
51	The Effect of an Acute Bout of Moderate-Intensity Aerobic Exercise on Motor Learning of a Continuous Tracking Task. PLoS ONE, 2016, 11, e0150039.	2.5	69
52	Effective Translation of Research to Practice: Hospital-Based Rehabilitation Program Improves Health-Related Physical Fitness and Quality of Life of Cancer Survivors. Journal of the National Comprehensive Cancer Network: JNCCN, 2016, 14, 1555-1562.	4.9	15
53	Efficacy of night-time compression for breast cancer related lymphedema (LYNC): protocol for a multi-centre, randomized controlled efficacy trial. BMC Cancer, 2016, 16, 601.	2.6	10
54	Dietary Weight Loss, Exercise, and Oxidative Stress in Postmenopausal Women: A Randomized Controlled Trial. Cancer Prevention Research, 2016, 9, 835-843.	1.5	34

#	Article	IF	CITATIONS
55	Innovative approach for increasing physical activity among breast cancer survivors: protocol for Project MOVE, a quasi-experimental study. BMJ Open, 2016, 6, e012533.	1.9	11
56	Clinically Relevant Physical Benefits of Exercise Interventions in Breast Cancer Survivors. Current Oncology Reports, 2016, 18, 12.	4.0	33
57	Associations of sex steroid hormones with mortality in women with breast cancer. Breast Cancer Research and Treatment, 2016, 155, 559-567.	2.5	19
58	Altered neural activation during prepotent response inhibition in breast cancer survivors treated with chemotherapy: an fMRI study. Brain Imaging and Behavior, 2016, 10, 840-848.	2.1	15
59	Sustained attention abnormalities in breast cancer survivors with cognitive deficits post chemotherapy: An electrophysiological study. Clinical Neurophysiology, 2016, 127, 369-378.	1.5	33
60	The utility of cardiac stress testing for detection of cardiovascular disease in breast cancer survivors: a systematic review. International Journal of Women's Health, 2015, 7, 127.	2.6	22
61	Health-related physical fitness assessment in a community-based cancer rehabilitation setting. Supportive Care in Cancer, 2015, 23, 2525-2533.	2.2	9
62	A single bout of high-intensity aerobic exercise facilitates response to paired associative stimulation and promotes sequence-specific implicit motor learning. Journal of Applied Physiology, 2014, 117, 1325-1336.	2.5	181
63	Lateral trunk lean gait modification increases the energy cost of treadmill walking in those with knee osteoarthritis. Osteoarthritis and Cartilage, 2014, 22, 203-209.	1.3	24
64	Exercise training and immune crosstalk in breast cancer microenvironment: exploring the paradigms of exercise-induced immune modulation and exercise-induced myokines. American Journal of Translational Research (discontinued), 2014, 6, 422-38.	0.0	12
65	Reliability and validity of the Performance Recorder 1 for measuring isometric knee flexor and extensor strength. Physiotherapy Theory and Practice, 2013, 29, 639-647.	1.3	13
66	Cardiorespiratory and neuromuscular deconditioning in fatigued and non-fatigued breast cancer survivors. Supportive Care in Cancer, 2013, 21, 873-881.	2.2	45
67	Exercise to improve obesity-related biomarkers in breast cancer survivors. Physical Therapy Reviews, 2013, 18, 149-150.	0.8	1
68	Gene Expression Changes in Adipose Tissue with Diet- and/or Exercise-Induced Weight Loss. Cancer Prevention Research, 2013, 6, 217-231.	1.5	59
69	The Effect of Prospective Monitoring and Early Physiotherapy Intervention on Arm Morbidity Following Surgery for Breast Cancer: A Pilot Study. Physiotherapy Canada Physiotherapie Canada, 2013, 65, 183-191.	0.6	24
70	Clinical practice guidelines for breast cancer rehabilitation. Cancer, 2012, 118, 2312-2324.	4.1	112
71	Review of exercise studies in breast cancer survivors: attention to principles of exercise training. British Journal of Sports Medicine, 2012, 46, 909-916.	6.7	120
72	Feasibility of a Lifestyle Intervention on Body Weight and Serum Biomarkers in Breast Cancer Survivors with Overweight and Obesity. Journal of the Academy of Nutrition and Dietetics, 2012, 112, 559-567.	0.8	79

#	Article	IF	CITATIONS
73	A prospective model of care for breast cancer rehabilitation: Function. Cancer, 2012, 118, 2300-2311.	4.1	82
74	A prospective model of care for breast cancer rehabilitation: Bone health and arthralgias. Cancer, 2012, 118, 2288-2299.	4.1	39
75	A prospective model of care for breast cancer rehabilitation: Postoperative and postreconstructive issues. Cancer, 2012, 118, 2226-2236.	4.1	86
76	A prospective surveillance model for rehabilitation for women with breast cancer. Cancer, 2012, 118, 2191-2200.	4.1	227
77	Exercise and Biomarkers for Cancer Prevention Studies. Journal of Nutrition, 2007, 137, 161S-169S.	2.9	103
78	Effects of exercise on breast cancer patients and survivors: a systematic review and meta-analysis. Cmaj, 2006, 175, 34-41.	2.0	883
79	Exercise Preferences of Endometrial Cancer Survivors. Cancer Nursing, 2006, 29, 259-265.	1.5	72
