#	ARTICLE	IF	CITATIONS
1	Mendelian Randomization With Repeated Measures of a Time-varying Exposure. <i>Epidemiology</i> , 2022, 33, 84-94.	2.7	9
2	Patterns of handgun divestment among handgun owners in California. <i>Injury Epidemiology</i> , 2022, 9, 2.	1.8	2
3	Invited Commentary: Conducting and Emulating Trials to Study Effects of Social Interventions. <i>American Journal of Epidemiology</i> , 2022, 191, 1453-1456.	3.4	4
4	Suicide Deaths Among Women in California Living With Handgun Owners vs Those Living With Other Adults in Handgun-Free Homes, 2004-2016. <i>JAMA Psychiatry</i> , 2022, 79, 582.	11.0	14
5	Iron, folic acid, and multiple micronutrient supplementation strategies during pregnancy and adverse birth outcomes in Botswana. <i>The Lancet Global Health</i> , 2022, 10, e850-e861.	6.3	13
6	Firearm access and adolescent suicide risk: toward a clearer understanding of effect size. <i>Injury Prevention</i> , 2021, 27, 264-270.	2.4	29
7	Hypothetical blood-pressure-lowering interventions and risk of stroke and dementia. <i>European Journal of Epidemiology</i> , 2021, 36, 69-79.	5.7	13
8	Mendelian randomisation approaches to the study of prenatal exposures: A systematic review. <i>Paediatric and Perinatal Epidemiology</i> , 2021, 35, 130-142.	1.7	12
9	Are Mendelian randomization investigations immune from bias due to reverse causation?. <i>European Journal of Epidemiology</i> , 2021, 36, 253-257.	5.7	57
10	Actionable druggable genome-wide Mendelian randomization identifies repurposing opportunities for COVID-19. <i>Nature Medicine</i> , 2021, 27, 668-676.	30.7	120
11	Diemer and Swanson Reply to "Considerations Before Using Pandemic as Instrument". <i>American Journal of Epidemiology</i> , 2021, 190, 2280-2283.	3.4	2
12	Strengthening the reporting of observational studies in epidemiology using mendelian randomisation (STROBE-MR): explanation and elaboration. <i>BMJ</i> , The, 2021, 375, n2233.	6.0	408
13	Strengthening the Reporting of Observational Studies in Epidemiology Using Mendelian Randomization. <i>JAMA - Journal of the American Medical Association</i> , 2021, 326, 1614.	7.4	829
14	Instrumental variable estimation for a time-varying treatment and a time-to-event outcome via structural nested cumulative failure time models. <i>BMC Medical Research Methodology</i> , 2021, 21, 258.	3.1	11
15	The Lived Experiences of Epidemiologists in 2020. <i>Epidemiology</i> , 2021, 32, 131-131.	2.7	2
16	Application of the Instrumental Inequalities to a Mendelian Randomization Study With Multiple Proposed Instruments. <i>Epidemiology</i> , 2020, 31, 65-74.	2.7	17
17	Commentary: Mendelian randomization with multiple exposures: the importance of thinking about time. <i>International Journal of Epidemiology</i> , 2020, 49, 1158-1162.	1.9	15
18	Emulating a target trial of statin use and risk of dementia using cohort data. <i>Neurology</i> , 2020, 95, e1322-e1332.	1.1	19

#	ARTICLE	IF	CITATIONS
19	Assembly of the LongSHOT cohort: public record linkage on a grand scale. <i>Injury Prevention</i> , 2020, 26, 153-158.	2.4	6
20	Handgun Ownership and Suicide in California. <i>New England Journal of Medicine</i> , 2020, 382, 2220-2229.	27.0	142
21	E-Values for Mendelian Randomization. <i>Epidemiology</i> , 2020, 31, e23-e24.	2.7	7
22	Prediction meets causal inference: the role of treatment in clinical prediction models. <i>European Journal of Epidemiology</i> , 2020, 35, 619-630.	5.7	49
23	Effect heterogeneity and variable selection for standardizing causal effects to a target population. <i>European Journal of Epidemiology</i> , 2019, 34, 1119-1129.	5.7	9
24	Interpretation and Potential Biases of Mendelian Randomization Estimates With Time-Varying Exposures. <i>American Journal of Epidemiology</i> , 2019, 188, 231-238.	3.4	106
25	Methodological Challenges When Studying Distance to Care as an Exposure in Health Research. <i>American Journal of Epidemiology</i> , 2019, 188, 1674-1681.	3.4	9
26	Prenatal exposure to non-steroidal anti-inflammatory drugs (NSAIDs) and neurodevelopmental outcomes in children. <i>Pharmacoepidemiology and Drug Safety</i> , 2019, 28, 452-459.	1.9	6
27	A Practical Guide to Selection Bias in Instrumental Variable Analyses. <i>Epidemiology</i> , 2019, 30, 345-349.	2.7	27
28	The Course of Eating Disorders Involving Bingeing and Purging Among Adolescent Girls: Prevalence, Stability, and Transitions. <i>Journal of Adolescent Health</i> , 2019, 64, 165-171.	2.5	50
29	Causal null hypotheses of sustained treatment strategies: What can be tested with an instrumental variable?. <i>European Journal of Epidemiology</i> , 2018, 33, 723-728.	5.7	33
30	The challenging interpretation of instrumental variable estimates under monotonicity. <i>International Journal of Epidemiology</i> , 2018, 47, 1289-1297.	1.9	45
31	The mediating role of the venules between smoking and ischemic stroke. <i>European Journal of Epidemiology</i> , 2018, 33, 1219-1228.	5.7	13
32	The Choice of Effect Measure for Binary Outcomes: Introducing Counterfactual Outcome State Transition Parameters. <i>Epidemiologic Methods</i> , 2018, 7, .	0.9	9
33	Patients and investigators prefer measures of absolute risk in subgroups for pragmatic randomized trials. <i>Journal of Clinical Epidemiology</i> , 2018, 103, 10-21.	5.0	30
34	Understanding the Assumptions Underlying Instrumental Variable Analyses: a Brief Review of Falsification Strategies and Related Tools. <i>Current Epidemiology Reports</i> , 2018, 5, 214-220.	2.4	104
35	Partial Identification of the Average Treatment Effect Using Instrumental Variables: Review of Methods for Binary Instruments, Treatments, and Outcomes. <i>Journal of the American Statistical Association</i> , 2018, 113, 933-947.	3.1	59
36	Nature as a Trialist?. <i>Epidemiology</i> , 2017, 28, 653-659.	2.7	115

#	ARTICLE	IF	CITATIONS
37	Characteristics of seeking treatment among U.S. adolescents with eating disorders. <i>International Journal of Eating Disorders</i> , 2017, 50, 826-833.	4.0	77
38	Commentary. <i>Epidemiology</i> , 2017, 28, 43-46.	2.7	14
39	Target trial emulation: teaching epidemiology and beyond. <i>European Journal of Epidemiology</i> , 2017, 32, 473-475.	5.7	66
40	Instrumental Variable Analyses in Pharmacoepidemiology: What Target Trials Do We Emulate?. <i>Current Epidemiology Reports</i> , 2017, 4, 281-287.	2.4	15
41	Examining the utility of narrowing anorexia nervosa subtypes for adults. <i>Comprehensive Psychiatry</i> , 2016, 67, 54-58.	3.1	20
42	10-year trajectories of depressive symptoms and risk of dementia: a population-based study. <i>Lancet Psychiatry</i> , 2016, 3, 628-635.	7.4	210
43	Mid- to Late-Life Trajectories of Blood Pressure and the Risk of Stroke. <i>Hypertension</i> , 2016, 67, 1126-1132.	2.7	50
44	Amyloid- $\beta$ transmission or unexamined bias?. <i>Nature</i> , 2016, 537, E7-E9.	27.8	4
45	Predicting persistence to antidepressant treatment in administrative claims data: Considering the influence of refill delays and prior persistence on other medications. <i>Journal of Affective Disorders</i> , 2016, 196, 138-147.	4.1	19
46	Commentary: Considerations for the use of registry data to study adolescent eating disorders. <i>International Journal of Epidemiology</i> , 2016, 45, 488-490.	1.9	13
47	Male Eating Disorder Symptom Patterns and Health Correlates From 13 to 26 Years of Age. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2016, 55, 693-700.e2.	0.5	58
48	Dosing of Selective Serotonin Reuptake Inhibitors Among Children and Adults Before and After the FDA Black-Box Warning. <i>Psychiatric Services</i> , 2016, 67, 302-309.	2.0	18
49	Communicating causality. <i>European Journal of Epidemiology</i> , 2015, 30, 1073-1075.	5.7	7
50	Bounding the per-protocol effect in randomized trials: an application to colorectal cancer screening. <i>Trials</i> , 2015, 16, 541.	1.6	22
51	Methodological considerations in assessing the effectiveness of antidepressant medication continuation during pregnancy using administrative data. <i>Pharmacoepidemiology and Drug Safety</i> , 2015, 24, 934-942.	1.9	33
52	Definition and Evaluation of the Monotonicity Condition for Preference-based Instruments. <i>Epidemiology</i> , 2015, 26, 414-420.	2.7	32
53	Toward a Clearer Portrayal of Confounding Bias in Instrumental Variable Applications. <i>Epidemiology</i> , 2015, 26, 498-504.	2.7	59
54	Adolescent Eating Disorders Predict Psychiatric, High-Risk Behaviors and Weight Outcomes in Young Adulthood. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2015, 54, 652-659.e1.	0.5	165

#	ARTICLE	IF	CITATIONS
55	Antidepressant Dose and Risk of Deliberate Self-harm—Reply. <i>JAMA Internal Medicine</i> , 2015, 175, 464.	5.1	3
56	Selecting on Treatment: A Pervasive Form of Bias in Instrumental Variable Analyses. <i>American Journal of Epidemiology</i> , 2015, 181, 191-197.	3.4	52
57	A latent class analysis to empirically describe eating disorders through developmental stages. <i>International Journal of Eating Disorders</i> , 2014, 47, 762-772.	4.0	25
58	Prospective Associations of Concerns About Physique and the Development of Obesity, Binge Drinking, and Drug Use Among Adolescent Boys and Young Adult Men. <i>JAMA Pediatrics</i> , 2014, 168, 34.	6.2	100
59	Assessing eating disorder symptoms in adolescence: Is there a role for multiple informants?. <i>International Journal of Eating Disorders</i> , 2014, 47, 475-482.	4.0	30
60	Antidepressant Dose, Age, and the Risk of Deliberate Self-harm. <i>JAMA Internal Medicine</i> , 2014, 174, 899.	5.1	76
61	What are we missing? The costs versus benefits of skip rule designs. <i>International Journal of Methods in Psychiatric Research</i> , 2014, 23, 474-485.	2.1	24
62	Suicidal behavior in adolescents and adults with bulimia nervosa. <i>Comprehensive Psychiatry</i> , 2014, 55, 1534-1539.	3.1	58
63	Think Globally, Act Globally: An Epidemiologist's Perspective on Instrumental Variable Estimation. <i>Statistical Science</i> , 2014, 29, 371-374.	2.8	38
64	Analysis of partially observed clustered data using generalized estimating equations and multiple imputation. <i>The Stata Journal</i> , 2014, 14, 863-883.	2.2	35
65	Association between exposure to suicide and suicidality outcomes in youth. <i>Cmaj</i> , 2013, 185, 870-877.	2.0	103
66	The contribution of stress to the comorbidity of migraine and major depression: results from a prospective cohort study. <i>BMJ Open</i> , 2013, 3, e002057.	1.9	36
67	Commentary. <i>Epidemiology</i> , 2013, 24, 370-374.	2.7	154
68	Prospective Association of Common Eating Disorders and Adverse Outcomes. <i>Pediatrics</i> , 2012, 130, e289-e295.	2.1	157
69	Change in binge eating and binge eating disorder associated with migration from Mexico to the US. <i>Journal of Psychiatric Research</i> , 2012, 46, 31-37.	3.1	30
70	A Monte Carlo investigation of factors influencing latent class analysis: An application to eating disorder research. <i>International Journal of Eating Disorders</i> , 2012, 45, 677-684.	4.0	79
71	Examining the stability of DSM-IV and empirically derived eating disorder classification: Implications for DSM-5. <i>Journal of Consulting and Clinical Psychology</i> , 2011, 79, 777-783.	2.0	20
72	Prevalence and Correlates of Eating Disorders in Adolescents. <i>Archives of General Psychiatry</i> , 2011, 68, 714.	12.3	1,252

#	ARTICLE	IF	CITATIONS
73	Lifetime Prevalence of Mental Disorders in U.S. Adolescents: Results from the National Comorbidity Survey Replication—Adolescent Supplement (NCS-A). <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2010, 49, 980-989.	0.5	4,750
74	Increased Mortality in Bulimia Nervosa and Other Eating Disorders. <i>American Journal of Psychiatry</i> , 2009, 166, 1342-1346.	7.2	457
