|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Prepregnancy handling of antineoplastic drugs and risk of miscarriage in female nurses. <i>Annals of Epidemiology</i> , 2021, 53, 95-102.e2.                                                                                                                    | 0.9 | 10        |
| 2  | Prepregnancy body mass index and spina bifida: Potential contributions of bias. <i>Birth Defects Research</i> , 2021, 113, 633-643.                                                                                                                             | 0.8 | 1         |
| 3  | Occupational exposure to high-level disinfectants and risk of miscarriage among nurses. <i>Occupational and Environmental Medicine</i> , 2021, 78, 731-737.                                                                                                     | 1.3 | 3         |
| 4  | Characteristics of Women with Urinary Tract Infection in Pregnancy. <i>Journal of Women's Health</i> , 2021, 30, 1556-1564.                                                                                                                                     | 1.5 | 11        |
| 5  | RE: "A DIVERSE AND INCLUSIVE ACADEMIC MEMBERSHIP FOR ALL" American <i>Journal of Epidemiology</i> , 2021, 190, 949-949.                                                                                                                                         | 1.6 | 1         |
| 6  | Anti-Müllerian hormone levels in nurses working night shifts. <i>Archives of Environmental and Occupational Health</i> , 2020, 75, 136-143.                                                                                                                     | 0.7 | 0         |
| 7  | Night shift work and cardiovascular disease biomarkers in female nurses. <i>American Journal of Industrial Medicine</i> , 2020, 63, 240-248.                                                                                                                    | 1.0 | 15        |
| 8  | Improving Diversity and Promoting Inclusion in the Society for Epidemiologic Research Through Choice of Conference Location. <i>American Journal of Epidemiology</i> , 2020, 189, 1030-1032.                                                                    | 1.6 | 6         |
| 9  | Folate intake, markers of folate status and oral clefts: An updated set of systematic reviews and meta-analyses. <i>Birth Defects Research</i> , 2020, 112, 1699-1719.                                                                                          | 0.8 | 25        |
| 10 | Nonfatal Violent Workplace Crime Characteristics and Rates by Occupation " United States, 2007"2015. <i>Morbidity and Mortality Weekly Report</i> , 2020, 69, 324-328.                                                                                          | 9.0 | 6         |
| 11 | Maternal Occupational Oil Mist Exposure and Birth Defects, National Birth Defects Prevention Study, 1997"2011. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 1560.                                                       | 1.2 | 7         |
| 12 | Administration of antineoplastic drugs and fecundity in female nurses. <i>American Journal of Industrial Medicine</i> , 2019, 62, 672-679.                                                                                                                      | 1.0 | 4         |
| 13 | CE: Original Research: Antineoplastic Drug Administration by Pregnant and Nonpregnant Nurses: An Exploration of the Use of Protective Gloves and Gowns. <i>American Journal of Nursing</i> , 2019, 119, 28-35.                                                  | 0.2 | 17        |
| 14 | Structure and Control of Healthy Worker Effects in Studies of Pregnancy Outcomes. <i>American Journal of Epidemiology</i> , 2019, 188, 562-569.                                                                                                                 | 1.6 | 8         |
| 15 | Multiple bias analysis using logistic regression: an example from the National Birth Defects Prevention Study. <i>Annals of Epidemiology</i> , 2018, 28, 510-514.                                                                                               | 0.9 | 10        |
| 16 | Infection prevention and control training and capacity building during the Ebola epidemic in Guinea. <i>PLoS ONE</i> , 2018, 13, e0193291.                                                                                                                      | 1.1 | 22        |
| 17 | Agreement between two methods for retrospective assessment of occupational exposure intensity to six chlorinated solvents: Data from The National Birth Defects Prevention Study. <i>Journal of Occupational and Environmental Hygiene</i> , 2017, 14, 389-396. | 0.4 | 5         |
| 18 | Genetic Interactions in Nonsyndromic Orofacial Clefts in Europe"EUROCRAN Study. <i>Cleft Palate-Craniofacial Journal</i> , 2017, 54, 623-630.                                                                                                                   | 0.5 | 18        |

| #  | ARTICLE                                                                                                                                                                                                                | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Factors affecting workforce participation and healthy worker biases in U.S. women and men. <i>Annals of Epidemiology</i> , 2017, 27, 558-562.e2.                                                                       | 0.9 | 10        |
| 20 | “Will my work affect my pregnancy?” Resources for anticipating and answering patients’ questions. <i>American Journal of Obstetrics and Gynecology</i> , 2016, 214, 597-602.                                           | 0.7 | 15        |
| 21 | Impact of Missing Data for Body Mass Index in an Epidemiologic Study. <i>Maternal and Child Health Journal</i> , 2016, 20, 1497-1505.                                                                                  | 0.7 | 13        |
| 22 | Occupational risk factors for endometriosis in a cohort of flight attendants. <i>Scandinavian Journal of Work, Environment and Health</i> , 2016, 42, 52-60.                                                           | 1.7 | 5         |
| 23 | Bias from Differential Exposure Measurement Error in a Study of Flight Attendants. <i>Aerospace Medicine and Human Performance</i> , 2015, 86, 990-993.                                                                | 0.2 | 2         |
| 24 | Inequities in Workplace Secondhand Smoke Exposure Among Nonsmoking Women of Reproductive Age. <i>American Journal of Public Health</i> , 2015, 105, e33-e40.                                                           | 1.5 | 4         |
| 25 | Adjusting for Bias Due to Incomplete Case Ascertainment in Case-Control Studies of Birth Defects. <i>American Journal of Epidemiology</i> , 2015, 181, 595-607.                                                        | 1.6 | 17        |
| 26 | Ebola Virus Disease in Health Care Workers – Guinea, 2014. <i>Morbidity and Mortality Weekly Report</i> , 2015, 64, 1083-1087.                                                                                         | 9.0 | 28        |
| 27 | Work schedule and physically demanding work in relation to menstrual function: the Nurses’ Health Study 3. <i>Scandinavian Journal of Work, Environment and Health</i> , 2015, 41, 194-203.                            | 1.7 | 54        |
| 28 | Injuries and Illnesses Among American Red Cross Responders – United States, 2008–2012. <i>Disaster Medicine and Public Health Preparedness</i> , 2014, 8, 404-410.                                                     | 0.7 | 5         |
| 29 | Piloting a computer assisted telephone interview: the FUCHSIA Women’s Study. <i>BMC Women's Health</i> , 2014, 14, 149.                                                                                                | 0.8 | 8         |
| 30 | Potential Sensitivity of Bias Analysis Results to Incorrect Assumptions of Nondifferential or Differential Binary Exposure Misclassification. <i>Epidemiology</i> , 2014, 25, 902-909.                                 | 1.2 | 25        |
| 31 | Prenatal diagnosis of nonsyndromic congenital heart defects. <i>Prenatal Diagnosis</i> , 2014, 34, 214-222.                                                                                                            | 1.1 | 43        |
| 32 | Causal Pie Bingo!. <i>Epidemiology</i> , 2013, 24, 331.                                                                                                                                                                | 1.2 | 18        |
| 33 | The endothelial protein C receptor (PROCR) Ser219Gly variant and risk of common thrombotic disorders: a HuGE review and meta-analysis of evidence from observational studies. <i>Blood</i> , 2012, 119, 2392-2400.     | 0.6 | 56        |
| 34 | Pregnancy termination following prenatal diagnosis of anencephaly or spina bifida: A systematic review of the literature. <i>Birth Defects Research Part A: Clinical and Molecular Teratology</i> , 2012, 94, 857-863. | 1.6 | 67        |
| 35 | Dependence of Confounding on the Target Population: A Modification of Causal Graphs to Account for Co-Action. <i>Annals of Epidemiology</i> , 2011, 21, 698-705.                                                       | 0.9 | 7         |
| 36 | Human Papillomavirus Infection and Anxiety: Analyses in Women with Low-Grade Cervical Cytological Abnormalities Unaware of Their Infection Status. <i>PLoS ONE</i> , 2011, 6, e21046.                                  | 1.1 | 15        |

| #  | ARTICLE                                                                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | The Factor XII $\alpha$ 1 Variant and Risk of Common Thrombotic Disorders: A HuGE Review and Meta-Analysis of Evidence From Observational Studies. <i>American Journal of Epidemiology</i> , 2011, 173, 136-144.                                                         | 1.6 | 21        |
| 38 | Non-genetic risk factors for holoprosencephaly. <i>American Journal of Medical Genetics, Part C: Seminars in Medical Genetics</i> , 2010, 154C, 73-85.                                                                                                                   | 0.7 | 64        |
| 39 | Strengthening the Reporting of Genetic Association Studies (STREGA) – An Extension of the STROBE Statement. <i>PLoS Medicine</i> , 2009, 6, e1000022.                                                                                                                    | 3.9 | 411       |
| 40 | Strengthening the Reporting of Genetic Association Studies (STREGA) – an extension of the STROBE statement. <i>Genetic Epidemiology</i> , 2009, 33, 581-598.                                                                                                             | 0.6 | 211       |
| 41 | Segregation analysis of cleft lip with or without cleft palate in the First Nations (Amerindian) people of British Columbia and review of isolated cleft palate etiologies. <i>Birth Defects Research Part A: Clinical and Molecular Teratology</i> , 2009, 85, 568-573. | 1.6 | 9         |
| 42 | Strengthening the reporting of genetic association studies (STREGA): an extension of the STROBE Statement. <i>Human Genetics</i> , 2009, 125, 131-151.                                                                                                                   | 1.8 | 167       |
| 43 | Strengthening the reporting of genetic association studies (STREGA): an extension of the STROBE statement. <i>European Journal of Epidemiology</i> , 2009, 24, 37-55.                                                                                                    | 2.5 | 41        |
| 44 | Prenatal diagnosis of orofacial clefts, National Birth Defects Prevention Study, 1998–2004. <i>Prenatal Diagnosis</i> , 2009, 29, 833-839.                                                                                                                               | 1.1 | 21        |
| 45 | Strengthening the Reporting of Genetic Association studies (STREGA) – an extension of the STROBE statement. <i>European Journal of Clinical Investigation</i> , 2009, 39, 247-266.                                                                                       | 1.7 | 216       |
| 46 | Strengthening the reporting of genetic association studies (STREGA) – an extension of the strengthening the reporting of observational studies in epidemiology (STROBE) statement. <i>Journal of Clinical Epidemiology</i> , 2009, 62, 597-608.e4.                       | 2.4 | 98        |
| 47 | Strengthening the Reporting of Genetic Association studies (STREGA) – an extension of the STROBE statement. , 2009, , 188-214.                                                                                                                                           |     | 2         |
| 48 | Folate intake, markers of folate status and oral clefts: is the evidence converging?. <i>International Journal of Epidemiology</i> , 2008, 37, 1041-1058.                                                                                                                | 0.9 | 134       |
