citing authors

#	ARTICLE	IF	CITATIONS
1	Long- and short-term temporal variability in cloud condensation nuclei spectra over a wide supersaturation range in the Southern Great Plains site. <i>Atmospheric Chemistry and Physics</i> , 2022, 22, 6197-6215.	4.9	1
2	Emissions of Reactive Nitrogen From Western U.S. Wildfires During Summer 2018. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2020JD032657.	3.3	41
3	Observations of Clouds, Aerosols, Precipitation, and Surface Radiation over the Southern Ocean: An Overview of CAPRICORN, MARCUS, MICRE, and SOCRATES. <i>Bulletin of the American Meteorological Society</i> , 2021, 102, E894-E928.	3.3	103
4	Dilution impacts on smoke aging: evidence in Biomass Burning Observation Project (BBOP) data. <i>Atmospheric Chemistry and Physics</i> , 2021, 21, 6839-6855.	4.9	23
5	Emissions of Trace Organic Gases From Western U.S. Wildfires Based on WEâ€CAN Aircraft Measurements. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2020JD033838.	3.3	54
6	Empirical Insights Into the Fate of Ammonia in Western U.S. Wildfire Smoke Plumes. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2020JD033730.	3.3	12
7	Is Ice Formation by Sea Spray Particles at Cirrus Temperatures Controlled by Crystalline Salts?. <i>ACS Earth and Space Chemistry</i> , 2021, 5, 2196-2211.	2.7	8
8	Utilizing a Storm-Generating Hotspot to Study Convective Cloud Transitions: The CACTI Experiment. <i>Bulletin of the American Meteorological Society</i> , 2021, 102, E1597-E1620.	3.3	30
9	Biomass Burning Smoke and Its Influence on Clouds Over the Western U. S.. <i>Geophysical Research Letters</i> , 2021, 48, e2021GL094224.	4.0	13
10	Visualization of the seasonal shift of a variety of airborne pollens in western Tokyo. <i>Science of the Total Environment</i> , 2021, 788, 147623.	8.0	13
11	Observations of Ice Nucleating Particles in the Free Troposphere From Western US Wildfires. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2020JD033752.	3.3	24
12	Constraining Aerosol Phase Function Using Dualâ€View Geostationary Satellites. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2021JD035209.	3.3	3
13	Ice Nucleating Particle Connections to Regional Argentinian Land Surface Emissions and Weather During the Cloud, Aerosol, and Complex Terrain Interactions Experiment. <i>Journal of Geophysical Research D: Atmospheres</i> , 2021, 126, e2021JD035186.	3.3	13
14	A Decadal Climatology of Chemical, Physical, and Optical Properties of Ambient Smoke in the Western and Southeastern United States. <i>Journal of Geophysical Research D: Atmospheres</i> , 2020, 125, e2019JD031372.	3.3	19
15	The contribution of black carbon to global ice nucleating particle concentrations relevant to mixed-phase clouds. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 22705-22711.	7.1	43
16	Quantification of organic aerosol and brown carbon evolution in fresh wildfire plumes. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 29469-29477.	7.1	100
17	Airborne bacteria confirm the pristine nature of the Southern Ocean boundary layer. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2020, 117, 13275-13282.	7.1	48
18	A fast visible-wavelength 3D radiative transfer model for numerical weather prediction visualization and forward modeling. <i>Atmospheric Measurement Techniques</i> , 2020, 13, 3235-3261.	3.1	3

#	ARTICLE	IF	CITATIONS
19	Thawing permafrost: an overlooked source of seeds for Arctic cloud formation. <i>Environmental Research Letters</i> , 2020, 15, 084022.	5.2	33
20	Cloud–Aerosol–Turbulence Interactions: Science Priorities and Concepts for a Large-Scale Laboratory Facility. <i>Bulletin of the American Meteorological Society</i> , 2020, 101, E1026-E1035.	3.3	16
21	Aging Effects on Biomass Burning Aerosol Mass and Composition: A Critical Review of Field and Laboratory Studies. <i>Environmental Science &amp; Technology</i> , 2019, 53, 10007-10022.	10.0	116
22	Seasonal Changes of Airborne Bacterial Communities Over Tokyo and Influence of Local Meteorology. <i>Frontiers in Microbiology</i> , 2019, 10, 1572.	3.5	67
23	The influence of simulated surface dust lofting and atmospheric loading on radiative forcing. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 10279-10301.	4.9	9
24	Direct Online Mass Spectrometry Measurements of Ice Nucleating Particles at a California Coastal Site. <i>Journal of Geophysical Research D: Atmospheres</i> , 2019, 124, 12157-12172.	3.3	21
25	Characteristics of Ice Nucleating Particles in and Around California Winter Storms. <i>Journal of Geophysical Research D: Atmospheres</i> , 2019, 124, 11530-11551.	3.3	17
26	&lt;i>A Tale of Two Dust Storms&lt;/i>: analysis of a complex dust event in the Middle East. <i>Atmospheric Measurement Techniques</i> , 2019, 12, 5101-5118.	3.1	14
27	100 Years of Progress in Cloud Physics, Aerosols, and Aerosol Chemistry Research. <i>Meteorological Monographs</i> , 2019, 59, 11.1-11.72.	5.0	35
28	Emission and Evolution of Submicron Organic Aerosol in Smoke from Wildfires in the Western United States. <i>ACS Earth and Space Chemistry</i> , 2019, 3, 1237-1247.	2.7	99
29	Classification of aerosol population type and cloud condensation nuclei properties in a coastal California littoral environment using an unsupervised cluster model. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 6931-6947.	4.9	4
30	More Than Emissions and Chemistry: Fire Size, Dilution, and Background Aerosol Also Greatly Influence Near-Field Biomass Burning Aerosol Aging. <i>Journal of Geophysical Research D: Atmospheres</i> , 2019, 124, 5589-5611.	3.3	45
31	Quantifying aerosol size distributions and their temporal variability in the Southern Great Plains, USA. <i>Atmospheric Chemistry and Physics</i> , 2019, 19, 11985-12006.	4.9	13
32	Temperature- and Humidity-Dependent Phase States of Secondary Organic Aerosols. <i>Geophysical Research Letters</i> , 2019, 46, 1005-1013.	4.0	53
33	Sources of PM <sub>2.5</sub> ; carbonaceous aerosol in Riyadh, Saudi Arabia. <i>Atmospheric Chemistry and Physics</i> , 2018, 18, 3969-3985.	4.9	28
34	Agricultural harvesting emissions of ice-nucleating particles. <i>Atmospheric Chemistry and Physics</i> , 2018, 18, 13755-13771.	4.9	53
35	Use of the Single Particle Soot Photometer (SP2) as a pre-filter for ice nucleation measurements: effect of particle mixing state and determination of SP2 conditions to fully vaporize refractory black carbon. <i>Atmospheric Measurement Techniques</i> , 2018, 11, 3007-3020.	3.1	5
36	Observations of Ice Nucleating Particles Over Southern Ocean Waters. <i>Geophysical Research Letters</i> , 2018, 45, 11,989.	4.0	110

#	ARTICLE	IF	CITATIONS
37	A Mesocosm Double Feature: Insights into the Chemical Makeup of Marine Ice Nucleating Particles. <i>Journals of the Atmospheric Sciences</i> , 2018, 75, 2405-2423.	1.7	67
38	Marine and Terrestrial Organic Ice-Nucleating Particles in Pristine Marine to Continentally Influenced Northeast Atlantic Air Masses. <i>Journal of Geophysical Research D: Atmospheres</i> , 2018, 123, 6196-6212.	3.3	98
39	Hygroscopicity of Organic Compounds as a Function of Carbon Chain Length and Carboxyl, Hydroperoxy, and Carbonyl Functional Groups. <i>Journal of Physical Chemistry A</i> , 2017, 121, 5164-5174.	2.5	21
40	The Microphysical Roles of Lower-Tropospheric versus Midtropospheric Aerosol Particles in Mature-Stage MCS Precipitation. <i>Journals of the Atmospheric Sciences</i> , 2017, 74, 3657-3678.	1.7	34
41	A Dynamic Link between Ice Nucleating Particles Released in Nascent Sea Spray Aerosol and Oceanic Biological Activity during Two Mesocosm Experiments. <i>Journals of the Atmospheric Sciences</i> , 2017, 74, 151-166.	1.7	93
42	Comparative measurements of ambient atmospheric concentrations of ice nucleating particles using multiple immersion freezing methods and a continuous flow diffusion chamber. <i>Atmospheric Chemistry and Physics</i> , 2017, 17, 11227-11245.	4.9	73
43	Size-resolved aerosol and cloud condensation nuclei (CCN) properties in the remote marine South China Sea – Part 1: Observations and source classification. <i>Atmospheric Chemistry and Physics</i> , 2017, 17, 1105-1123.	4.9	28
44	Transport of pollution to a remote coastal site during gap flow from California's interior: impacts on aerosol composition, clouds, and radiative balance. <i>Atmospheric Chemistry and Physics</i> , 2017, 17, 1491-1509.	4.9	20
45	Secondary organic aerosol formation in biomass-burning plumes: theoretical analysis of lab studies and ambient plumes. <i>Atmospheric Chemistry and Physics</i> , 2017, 17, 5459-5475.	4.9	61
46	Prediction of cloud condensation nuclei activity for organic compounds using functional group contribution methods. <i>Geoscientific Model Development</i> , 2016, 9, 111-124.	3.6	40
47	The microphysical contributions to and evolution of latent heating profiles in two MC3E MCSs. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 7913-7935.	3.3	28
48	Improving our fundamental understanding of the role of aerosol-cloud interactions in the climate system. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 5781-5790.	7.1	479
49	Measurements and source apportionment of particle-associated polycyclic aromatic hydrocarbons in ambient air in Riyadh, Saudi Arabia. <i>Atmospheric Environment</i> , 2016, 137, 186-198.	4.1	33
50	Rapidly evolving ultrafine and fine mode biomass smoke physical properties: Comparing laboratory and field results. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 5750-5768.	3.3	27
51	Hygroscopic growth and cloud droplet activation of xanthan gum as a proxy for marine hydrogels. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 11,803.	3.3	18
52	Ice-nucleating particle emissions from biomass combustion and the potential importance of soot aerosol. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 5888-5903.	3.3	42
53	Aerosol effects on the anvil characteristics of mesoscale convective systems. <i>Journal of Geophysical Research D: Atmospheres</i> , 2016, 121, 10,880.	3.3	26
54	Aerosol meteorology of Maritime Continent for the 2012 7SEAS southwest monsoon intensive study – Part 2: Philippine receptor observations of fine-scale aerosol behavior. <i>Atmospheric Chemistry and Physics</i> , 2016, 16, 14057-14078.	4.9	38

#	ARTICLE	IF	CITATIONS
55	Sources of organic ice nucleating particles in soils. <i>Atmospheric Chemistry and Physics</i> , 2016, 16, 7195-7211.	4.9	137
56	Ice nucleating particle emissions from photochemically aged diesel and biodiesel exhaust. <i>Geophysical Research Letters</i> , 2016, 43, 5524-5531.	4.0	45
57	Quantification of online removal of refractory black carbon using laser-induced incandescence in the single particle soot photometer. <i>Aerosol Science and Technology</i> , 2016, 50, 679-692.	3.1	6
58	Contribution of Biomass Burning to Carbonaceous Aerosols in Mexico City during May 2013. <i>Aerosol and Air Quality Research</i> , 2016, 16, 114-124.	2.1	11
59	Investigation of particle and vapor wall-loss effects on controlled wood-smoke smog-chamber experiments. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 11027-11045.	4.9	39
60	Observations and analysis of organic aerosol evolution in some prescribed fire smoke plumes. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 6323-6335.	4.9	78
61	Investigating types and sources of organic aerosol in Rocky Mountain National Park using aerosol mass spectrometry. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 737-752.	4.9	19
62	Integrating laboratory and field data to quantify the immersion freezing ice nucleation activity of mineral dust particles. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 393-409.	4.9	315
63	Atmospheric Processes and Their Controlling Influence on Cloud Condensation Nuclei Activity. <i>Chemical Reviews</i> , 2015, 115, 4199-4217.	47.7	185
64	Corrigendum to "Size-resolved observations of refractory black carbon particles in cloud droplets at a marine boundary layer site" published in <i>Atmos. Chem. Phys.</i> , 15, 1367-1383, 2015. <i>Atmospheric Chemistry and Physics</i> , 2015, 15, 1487-1487.	4.9	0
65	Mesoscale Vortex Development during Extreme Precipitation: Colorado, September 2013. <i>Monthly Weather Review</i> , 2015, 143, 4943-4962.	1.4	12
66	Droplet activation of wet particles: development of the Wet CCN approach. <i>Atmospheric Measurement Techniques</i> , 2014, 7, 2227-2241.	3.1	5
67	A New Method to Determine the Number Concentrations of Refractory Black Carbon Ice Nucleating Particles. <i>Aerosol Science and Technology</i> , 2014, 48, 1264-1275.	3.1	14
68	Impacts of nonrefractory material on light absorption by aerosols emitted from biomass burning. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014, 119, 12,272.	3.3	69
69	Gas-phase reactive nitrogen near Grand Teton National Park: Impacts of transport, anthropogenic emissions, and biomass burning. <i>Atmospheric Environment</i> , 2014, 89, 749-756.	4.1	31
70	Influence of Functional Groups on Organic Aerosol Cloud Condensation Nucleus Activity. <i>Environmental Science &amp; Technology</i> , 2014, 48, 10182-10190.	10.0	99
71	Organic aerosol emission ratios from the laboratory combustion of biomass fuels. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014, 119, 12,850.	3.3	31
72	Aerosol emissions from prescribed fires in the United States: A synthesis of laboratory and aircraft measurements. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014, 119, 11,826-11,849.	3.3	116

#	ARTICLE	IF	CITATIONS
73	Characteristics of atmospheric ice nucleating particles associated with biomass burning in the US: Prescribed burns and wildfires. <i>Journal of Geophysical Research D: Atmospheres</i> , 2014, 119, 10458-10470.	3.3	73
74	Airborne characterization of smoke marker ratios from prescribed burning. <i>Atmospheric Chemistry and Physics</i> , 2014, 14, 10535-10545.	4.9	47
75	Size-resolved aerosol composition and its link to hygroscopicity at a forested site in Colorado. <i>Atmospheric Chemistry and Physics</i> , 2014, 14, 2657-2667.	4.9	62
76	Overview of the Manitou Experimental Forest Observatory: site description and selected science results from 2008 to 2013. <i>Atmospheric Chemistry and Physics</i> , 2014, 14, 6345-6367.	4.9	62
77	Organic matter matters for ice nuclei of agricultural soil origin. <i>Atmospheric Chemistry and Physics</i> , 2014, 14, 8521-8531.	4.9	117
78	Trace gas emissions from combustion of peat, crop residue, domestic biofuels, grasses, and other fuels: configuration and Fourier transform infrared (FTIR) component of the fourth Fire Lab at Missoula Experiment (FLAME-4). <i>Atmospheric Chemistry and Physics</i> , 2014, 14, 9727-9754.	4.9	188
79	Aerosol single scattering albedo dependence on biomass combustion efficiency: Laboratory and field studies. <i>Geophysical Research Letters</i> , 2014, 41, 742-748.	4.0	85
80	Observations of atmospheric reactive nitrogen species in Rocky Mountain National Park and across northern Colorado. <i>Atmospheric Environment</i> , 2013, 64, 66-76.	4.1	71
81	Size resolved measurements of springtime aerosol particles over the northern South China Sea. <i>Atmospheric Environment</i> , 2013, 78, 134-143.	4.1	33
82	Analysis of source regions for smoke events in Singapore for the 2009 El Nino burning season. <i>Atmospheric Environment</i> , 2013, 78, 219-230.	4.1	45
83	Cloud nucleating activities of water-soluble semi-volatile organic compounds. , 2013, , .		0
84	Investigation of ice nucleation properties of mineral and soil particles. , 2013, , .		0
85	Observations of ice nuclei associated with biomass burning. , 2013, , .		0
86	Aerosol species concentrations and source apportionment of ammonia at Rocky Mountain National Park. <i>Journal of the Air and Waste Management Association</i> , 2013, 63, 1245-1263.	1.9	19
87	Biological aerosol particles as a key determinant of ice nuclei populations in a forest ecosystem. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 10,100.	3.3	144
88	A seasonal nitrogen deposition budget for Rocky Mountain National Park. <i>Ecological Applications</i> , 2013, 23, 1156-1169.	3.8	58
89	The impact of rain on ice nuclei populations at a forested site in Colorado. <i>Geophysical Research Letters</i> , 2013, 40, 227-231.	4.0	110
90	A single parameter representation of hygroscopic growth and cloud condensation nucleus activity " Part 3: Including surfactant partitioning. <i>Atmospheric Chemistry and Physics</i> , 2013, 13, 1081-1091.	4.9	110

#	ARTICLE	IF	CITATIONS
91	Measurements of reactive trace gases and variable O <sub>3</sub> formation rates in some South Carolina biomass burning plumes. <i>Atmospheric Chemistry and Physics</i> , 2013, 13, 1141-1165.	4.9	170
92	High concentrations of biological aerosol particles and ice nuclei during and after rain. <i>Atmospheric Chemistry and Physics</i> , 2013, 13, 6151-6164.	4.9	355
93	Vertical structure of aerosols, temperature, and moisture associated with an intense African dust event observed over the eastern Caribbean. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 4623-4643.	3.3	28
94	Gas-particle partitioning of primary organic aerosol emissions: 3. Biomass burning. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 11,327.	3.3	178
95	Atmospheric concentrations and deposition of reactive nitrogen in Grand Teton National Park. <i>Journal of Geophysical Research D: Atmospheres</i> , 2013, 118, 11,875.	3.3	19
96	Biomass burning as a potential source for atmospheric ice nuclei: Western wildfires and prescribed burns. <i>Geophysical Research Letters</i> , 2012, 39, .	4.0	49
97	Hygroscopicity frequency distributions of secondary organic aerosols. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	44
98	An annual cycle of size-resolved aerosol hygroscopicity at a forested site in Colorado. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	65
99	Critical reflectance derived from MODIS: Application for the retrieval of aerosol absorption over desert regions. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	15
100	Impacts of chemical reactivity on ice nucleation of kaolinite particles: A case study of levoglucosan and sulfuric acid. <i>Geophysical Research Letters</i> , 2012, 39, .	4.0	46
101	Biogenic ice nuclei in boundary layer air over two U.S. High Plains agricultural regions. <i>Journal of Geophysical Research</i> , 2012, 117, .	3.3	79
102	Corrigendum to "Laboratory investigations of the impact of mineral dust aerosol on cold cloud formation" published in <i>Atmos. Chem. Phys.</i> , 10, 11955-11968, 2010. <i>Atmospheric Chemistry and Physics</i> , 2011, 11, 4025-4025.	4.9	3
103	Chemical and physical transformations of organic aerosol from the photo-oxidation of open biomass burning emissions in an environmental chamber. <i>Atmospheric Chemistry and Physics</i> , 2011, 11, 7669-7686.	4.9	329
104	Development of wildland fire particulate smoke marker to organic carbon emission ratios for the conterminous United States. <i>Atmospheric Environment</i> , 2011, 45, 395-403.	4.1	22
105	Determining contributions of biomass burning and other sources to fine particle contemporary carbon in the western United States. <i>Atmospheric Environment</i> , 2011, 45, 1986-1993.	4.1	45
106	Chemical Smoke Marker Emissions During Flaming and Smoldering Phases of Laboratory Open Burning of Wildland Fuels. <i>Aerosol Science and Technology</i> , 2010, 44, i-v.	3.1	156
107	The role of the particle size distribution in assessing aerosol composition effects on simulated droplet activation. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 5435-5447.	4.9	36
108	Optical closure experiments for biomass smoke aerosols. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 9017-9026.	4.9	45

#	ARTICLE	IF	CITATIONS
109	Irreversible loss of ice nucleation active sites in mineral dust particles caused by sulphuric acid condensation. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 11471-11487.	4.9	175
110	Laboratory investigations of the impact of mineral dust aerosol on cold cloud formation. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 11955-11968.	4.9	98
111	Towards closing the gap between hygroscopic growth and CCN activation for secondary organic aerosols – Part 3: Influence of the chemical composition on the hygroscopic properties and volatile fractions of aerosols. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 3775-3785.	4.9	58
112	Water uptake and chemical composition of fresh aerosols generated in open burning of biomass. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 5165-5178.	4.9	104
113	Deposition of reactive nitrogen during the Rocky Mountain Airborne Nitrogen and Sulfur (RoMANS) study. <i>Environmental Pollution</i> , 2010, 158, 862-872.	7.5	71
114	Brown carbon in tar balls from smoldering biomass combustion. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 6363-6370.	4.9	427
115	Predicting global atmospheric ice nuclei distributions and their impacts on climate. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2010, 107, 11217-11222.	7.1	945
116	Measured and modeled humidification factors of fresh smoke particles from biomass burning: role of inorganic constituents. <i>Atmospheric Chemistry and Physics</i> , 2010, 10, 6179-6194.	4.9	33
117	Impact of Particle Generation Method on the Apparent Hygroscopicity of Insoluble Mineral Particles. <i>Aerosol Science and Technology</i> , 2010, 44, 830-846.	3.1	44
118	Ice Initiation by Aerosol Particles: Measured and Predicted Ice Nuclei Concentrations versus Measured Ice Crystal Concentrations in an Orographic Wave Cloud. <i>Journals of the Atmospheric Sciences</i> , 2010, 67, 2417-2436.	1.7	96
119	Observations of ice nucleation by ambient aerosol in the homogeneous freezing regime. <i>Geophysical Research Letters</i> , 2010, 37, .	4.0	15
120	Biomass burning smoke aerosol properties measured during Fire Laboratory at Missoula Experiments (FLAME). <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	150
121	Satellite observations cap the atmospheric organic aerosol budget. <i>Geophysical Research Letters</i> , 2010, 37, .	4.0	82
122	Chemical processing does not always impair heterogeneous ice nucleation of mineral dust particles. <i>Geophysical Research Letters</i> , 2010, 37, .	4.0	102
123	Using High Time Resolution Aerosol and Number Size Distribution Measurements to Estimate Atmospheric Extinction. <i>Journal of the Air and Waste Management Association</i> , 2009, 59, 1049-1060.	1.9	11
124	Relative roles of biogenic emissions and Saharan dust as ice nuclei in the Amazon basin. <i>Nature Geoscience</i> , 2009, 2, 402-405.	12.9	282
125	Ice nuclei characteristics from M-PACE and their relation to ice formation in clouds. <i>Tellus, Series B: Chemical and Physical Meteorology</i> , 2009, 61, 436-448.	1.6	114
126	Hygroscopicity and cloud droplet activation of mineral dust aerosol. <i>Geophysical Research Letters</i> , 2009, 36, .	4.0	159
