#	ARTICLE	IF	CITATIONS
1	Gene discovery and polygenic prediction from a genome-wide association study of educational attainment in 1.1 million individuals. <i>Nature Genetics</i> , 2018, 50, 1112-1121.	21.4	1,835
2	Redefine statistical significance. <i>Nature Human Behaviour</i> , 2018, 2, 6-10.	12.0	1,763
3	Genome-wide association study identifies 74 loci associated with educational attainment. <i>Nature</i> , 2016, 533, 539-542.	27.8	1,204
4	Genetic variants associated with subjective well-being, depressive symptoms, and neuroticism identified through genome-wide analyses. <i>Nature Genetics</i> , 2016, 48, 624-633.	21.4	870
5	CWAS of 126,559 Individuals Identifies Genetic Variants Associated with Educational Attainment. <i>Science</i> , 2013, 340, 1467-1471.	12.6	750
6	Multi-trait analysis of genome-wide association summary statistics using MTAG. <i>Nature Genetics</i> , 2018, 50, 229-237.	21.4	700
7	Genome-wide association analyses of risk tolerance and risky behaviors in over 1 million individuals identify hundreds of loci and shared genetic influences. <i>Nature Genetics</i> , 2019, 51, 245-257.	21.4	536
8	Polygenic risk scores for schizophrenia and bipolar disorder predict creativity. <i>Nature Neuroscience</i> , 2015, 18, 953-955.	14.8	351
9	Genome-wide analysis identifies 12 loci influencing human reproductive behavior. <i>Nature Genetics</i> , 2016, 48, 1462-1472.	21.4	284
10	Common genetic variants associated with cognitive performance identified using the proxy-phenotype method. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2014, 111, 13790-13794.	7.1	244
11	The genetic architecture of economic and political preferences. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2012, 109, 8026-8031.	7.1	225
12	Most Reported Genetic Associations With General Intelligence Are Probably False Positives. <i>Psychological Science</i> , 2012, 23, 1314-1323.	3.3	221
13	Polygenic prediction of educational attainment within and between families from genome-wide association analyses in 3 million individuals. <i>Nature Genetics</i> , 2022, 54, 437-449.	21.4	215
14	Beyond Happiness and Satisfaction: Toward Well-Being Indices Based on Stated Preference. <i>American Economic Review</i> , 2014, 104, 2698-2735.	8.5	185
15	Directional dominance on stature and cognition in diverse human populations. <i>Nature</i> , 2015, 523, 459-462.	27.8	173
16	The Promises and Pitfalls of Genoeconomics. <i>Annual Review of Economics</i> , 2012, 4, 627-662.	5.5	168
17	Three Recommendations for Improving the Use of $p$ -Values. <i>American Statistician</i> , 2019, 73, 186-191.	1.6	152
18	Within-sibship genome-wide association analyses decrease bias in estimates of direct genetic effects. <i>Nature Genetics</i> , 2022, 54, 581-592.	21.4	142

#	ARTICLE	IF	CITATIONS
19	Can Marginal Rates of Substitution Be Inferred from Happiness Data? Evidence from Residency Choices. American Economic Review, 2014, 104, 3498-3528.	8.5	118
20	Problems with Using Polygenic Scores to Select Embryos. New England Journal of Medicine, 2021, 385, 78-86.	27.0	105
21	Imprint of assortative mating on the human genome. Nature Human Behaviour, 2018, 2, 948-954.	12.0	97
22	Replicability and Robustness of Genome-Wide-Association Studies for Behavioral Traits. Psychological Science, 2014, 25, 1975-1986.	3.3	92
23	Errors in probabilistic reasoning and judgment biases. Handbook of Behavioral Economics, 2019, 2, 69-186.	3.7	89
24	Molecular genetics and subjective well-being. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 9692-9697.	7.1	82
25	A consensus-based transparency checklist. Nature Human Behaviour, 2020, 4, 4-6.	12.0	79
26	Genomic analysis of diet composition finds novel loci and associations with health and lifestyle. Molecular Psychiatry, 2021, 26, 2056-2069.	7.9	79
27	Resource profile and user guide of the Polygenic Index Repository. Nature Human Behaviour, 2021, 5, 1744-1758.	12.0	63
28	A MODEL OF NONBELIEF IN THE LAW OF LARGE NUMBERS. Journal of the European Economic Association, 2016, 14, 515-544.	3.5	56
29	Why It Is Hard to Find Genes Associated With Social Science Traits: Theoretical and Empirical Considerations. American Journal of Public Health, 2013, 103, S152-S166.	2.7	52
30	The Molecular Genetic Architecture of Self-Employment. PLoS ONE, 2013, 8, e60542.	2.5	41
31	No Evidence That Experiencing Physical Warmth Promotes Interpersonal Warmth. Social Psychology, 2019, 50, 127-132.	0.7	31
32	Genetic Variation Associated with Differential Educational Attainment in Adults Has Anticipated Associations with School Performance in Children. PLoS ONE, 2014, 9, e100248.	2.5	31
33	Mendelian imputation of parental genotypes improves estimates of direct genetic effects. Nature Genetics, 2022, 54, 897-905.	21.4	31
34	Consensus-based guidance for conducting and reporting multi-analyst studies. ELife, 2021, 10, .	6.0	22
35	Predicting mid-life capital formation with pre-school delay of gratification and life-course measures of self-regulation. Journal of Economic Behavior and Organization, 2020, 179, 743-756.	2.0	16
36	Distributional Preferences, Reciprocity-Like Behavior, and Efficiency in Bilateral Exchange. American Economic Journal: Microeconomics, 2015, 7, 70-98.	1.2	9

#	ARTICLE	IF	CITATIONS
37	Aggregating Local Preferences to Guide Marginal Policy Adjustments. American Economic Review, 2013, 103, 605-610.	8.5	8
38	The relationship between the normalized gradient addition mechanism and quadratic voting. Public Choice, 2017, 172, 233-263.	1.7	1
