#	ARTICLE	IF	CITATIONS
1	Is Telerehabilitation a Viable Option for People With Low Back Pain? Associations Between Telerehabilitation and Outcomes During the COVID-19 Pandemic. <i>Physical Therapy</i> , 2022, 102, .	2.4	11
2	Upper Quadrant Edema Patient-Reported Outcome Measure Is Reliable, Valid, and Efficient for Patients With Lymphatic and Venous Disorders. <i>Physical Therapy</i> , 2021, 101, .	2.4	5
3	Telerehabilitation During the COVID-19 Pandemic in Outpatient Rehabilitation Settings: A Descriptive Study. <i>Physical Therapy</i> , 2021, 101, .	2.4	74
4	The Lower Extremity Physical Function Patient-Reported Outcome Measure Was Reliable, Valid, and Efficient for Patients With Musculoskeletal Impairments. <i>Archives of Physical Medicine and Rehabilitation</i> , 2021, 102, 1576-1587.	0.9	8
5	Association between changes in function among patients with lumbar impairments classified according to the STarT Back Screening Tool and managed by McKenzie credentialed physiotherapists. <i>Physiotherapy Theory and Practice</i> , 2020, 36, 589-597.	1.3	6
6	Associations between interim patient-reported outcome measures and functional status at discharge from rehabilitation for non-specific lumbar impairments. <i>Quality of Life Research</i> , 2020, 29, 439-451.	3.1	4
7	Cognitive behavioural interventions, and function and pain outcomes among patients with chronic neck pain managed with the McKenzie approach. <i>Musculoskeletal Care</i> , 2020, 18, 46-52.	1.4	4
8	Clinical Interpretation of the Neck Functional Status Computerized Adaptive Test. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2019, 49, 875-886.	3.5	9
9	Directional preference, cognitive behavioural interventions, and outcomes among patients with chronic low back pain. <i>Physiotherapy Research International</i> , 2019, 24, e1773.	1.5	2
10	Directional preference and functional outcomes among subjects classified at high psychosocial risk using STarT. <i>Physiotherapy Research International</i> , 2018, 23, e1711.	1.5	4
11	Impact of Risk Adjustment on Provider Ranking for Patients With Low Back Pain Receiving Physical Therapy. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2018, 48, 637-648.	3.5	21
12	Criteria for Recommending a Patient Self-Report Functional Outcome. <i>Archives of Physical Medicine and Rehabilitation</i> , 2017, 98, 191-192.	0.9	0
13	Effect of Adding McKenzie Syndrome, Centralization, Directional Preference, and Psychosocial Classification Variables to a Risk-Adjusted Model Predicting Functional Status Outcomes for Patients With Lumbar Impairments. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2016, 46, 726-741.	3.5	13
14	Letters. <i>Spine</i> , 2015, 40, 666.	2.0	0
15	The Development and Psychometric Properties of the Patient Self-Report Neck Functional Status Questionnaire (NFSQ). <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2015, 45, 683-692.	3.5	10
16	Lumbar Computerized Adaptive Test and Modified Oswestry Low Back Pain Disability Questionnaire: Relative Validity and Important Change. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2012, 42, 541-551.	3.5	26
17	Change in Psychosocial Distress Associated With Pain and Functional Status Outcomes in Patients With Lumbar Impairments Referred to Physical Therapy Services. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2011, 41, 969-980.	3.5	23
18	Using Intake and Change in Multiple Psychosocial Measures to Predict Functional Status Outcomes in People With Lumbar Spine Syndromes: A Preliminary Analysis. <i>Physical Therapy</i> , 2011, 91, 1812-1825.	2.4	17

#	ARTICLE	IF	CITATIONS
19	Clinician's ability to identify neck and low back interventions: an inter-rater chance-corrected agreement pilot study. <i>Journal of Manual and Manipulative Therapy</i> , 2011, 19, 172-181.	1.2	10
20	Association Between Directional Preference and Centralization in Patients With Low Back Pain. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2011, 41, 22-31.	3.5	57
21	Computerized Adaptive Test for Patients With Lumbar Spine Impairments Produced Valid and Responsive Measures of Function. <i>Spine</i> , 2010, 35, 2157-2164.	2.0	49
22	Authors' response. <i>Journal of Manual and Manipulative Therapy</i> , 2010, 18, 209-210.	1.2	0
23	Prevalence of classification methods for patients with lumbar impairments using the McKenzie syndromes, pain pattern, manipulation, and stabilization clinical prediction rules. <i>Journal of Manual and Manipulative Therapy</i> , 2010, 18, 197-204.	1.2	20
24	Clinical Outcomes for Patients Classified by Fear-Avoidance Beliefs and Centralization Phenomenon. <i>Archives of Physical Medicine and Rehabilitation</i> , 2009, 90, 768-777.	0.9	61
25	Centralization: Prevalence and Effect on Treatment Outcomes Using a Standardized Operational Definition and Measurement Method. <i>Journal of Orthopaedic and Sports Physical Therapy</i> , 2008, 38, 116-125.	3.5	61
26	Simulated computerized adaptive test for patients with lumbar spine impairments was efficient and produced valid measures of function. <i>Journal of Clinical Epidemiology</i> , 2006, 59, 947-956.	5.0	83
27	Categorizing Patients With Occupational Low Back Pain by Use of the Quebec Task Force Classification System Versus Pain Pattern Classification Procedures: Discriminant and Predictive Validity. <i>Physical Therapy</i> , 2004, 84, 243-254.	2.4	80
28	Categorizing patients with occupational low back pain by use of the Quebec Task Force Classification system versus pain pattern classification procedures: discriminant and predictive validity. <i>Physical Therapy</i> , 2004, 84, 243-54.	2.4	28
29	Discriminant Validity and Relative Precision for Classifying Patients With Nonspecific Neck and Back Pain by Anatomic Pain Patterns. <i>Spine</i> , 2003, 28, 161-166.	2.0	91
30	A Descriptive Study of the Centralization Phenomenon. <i>Spine</i> , 1999, 24, 676-683.	2.0	224
31	The association between self-efficacy on function and pain outcomes among patients with chronic low back pain managed using the McKenzie approach: a prospective cohort study. <i>Journal of Manual and Manipulative Therapy</i> , 0, , 1-8.	1.2	1
