#	ARTICLE	IF	CITATIONS
1	Pleasantness and magnitude of tonal content of electric vehicle interior sounds containing subharmonics. <i>Applied Acoustics</i> , 2022, 185, 108442.	3.3	4
2	Modelling suppression and comodulation masking release using the dual-resonance nonlinear filter. <i>JASA Express Letters</i> , 2022, 2, 014401.	1.1	0
3	Simulation of cochlea implant stimulation considering dispersive properties of the environment. <i>Journal of Applied Physics</i> , 2022, 131, 144701.	2.5	0
4	Rumbling, humming, booming – Perception of vehicle interior noise at low engine speeds. <i>Applied Acoustics</i> , 2022, 197, 108915.	3.3	1
5	Temporal Loudness Weights Are Frequency Specific. <i>Frontiers in Psychology</i> , 2021, 12, 588571.	2.1	1
6	Effect of Contralateral Noise on Speech Intelligibility. <i>Neuroscience</i> , 2021, 459, 59-69.	2.3	2
7	Influence parameters on the perceived magnitude of tonal content of electric vehicle interior sounds. <i>Applied Acoustics</i> , 2021, 181, 108155.	3.3	7
8	A notched-noise precursor affects both diotic and dichotic notched-noise masking. <i>Acta Acustica</i> , 2021, 5, 43.	1.0	0
9	Is infrasound perceived by the auditory system through distortions?. <i>Acta Acustica</i> , 2021, 5, 4.	1.0	4
10	Temporal loudness weights: Primacy effects, loudness dominance and their interaction. <i>PLoS ONE</i> , 2021, 16, e0261001.	2.5	0
11	Binaural frequency selectivity in humans. <i>European Journal of Neuroscience</i> , 2020, 51, 1179-1190.	2.6	6
12	The effect of silent gaps on temporal weights in loudness judgments. <i>Hearing Research</i> , 2020, 395, 108028.	2.0	2
13	Comodulation masking release with random variations of flanking-band center frequencies. <i>Journal of the Acoustical Society of America</i> , 2020, 148, 692-700.	1.1	1
14	Spectral integration of infrasound at threshold. <i>Journal of the Acoustical Society of America</i> , 2020, 147, EL259-EL263.	1.1	6
15	Comodulation detection difference and binaural unmasking. <i>Journal of the Acoustical Society of America</i> , 2019, 146, EL106-EL110.	1.1	1
16	Harmony Perception in Prelingually Deaf, Juvenile Cochlear Implant Users. <i>Frontiers in Neuroscience</i> , 2019, 13, 466.	2.8	9
17	Comparison of the lattice-Boltzmann model with the finite-difference time-domain method for electrostatics. <i>Physical Review E</i> , 2019, 99, 033301.	2.1	12
18	Temporal weights in loudness: Investigation of the effects of background noise and sound level. <i>PLoS ONE</i> , 2019, 14, e0223075.	2.5	3

#	ARTICLE	IF	CITATIONS
19	Auditory sensitivity in survivors of torture, political violence and flight—An exploratory study on risks and opportunities of music therapy. <i>Arts in Psychotherapy</i> , 2018, 58, 33-41.	1.2	3
20	Temporal weights in the perception of sound intensity: Effects of sound duration and number of temporal segments. <i>Journal of the Acoustical Society of America</i> , 2018, 143, 943-953.	1.1	12
21	On the Pitch Strength of Bandpass Noise in Normal-Hearing and Hearing-Impaired Listeners. <i>Trends in Hearing</i> , 2018, 22, 233121651878706.	1.3	2
22	Evaluation of a model of temporal weights in loudness judgments. <i>Journal of the Acoustical Society of America</i> , 2018, 144, EL119-EL124.	1.1	2
23	Simultaneous acquisition of 40- and 80-Hz auditory steady-state responses for a direct comparison of response amplitude, residual noise and signal-to-noise ratio. <i>European Archives of Oto-Rhino-Laryngology</i> , 2018, 275, 2601-2605.	1.6	3
24	Comodulation masking release in the inferior colliculus by combined signal enhancement and masker reduction. <i>Journal of Neurophysiology</i> , 2017, 117, 853-867.	1.8	5
25	Characteristics of spectro-temporal modulation frequency selectivity in humans. <i>Journal of the Acoustical Society of America</i> , 2017, 141, 1887-1895.	1.1	4
26	Effect of efferent activation on binaural frequency selectivity. <i>Hearing Research</i> , 2017, 350, 152-159.	2.0	6
27	Modeling off-frequency binaural masking for short- and long-duration signals. <i>Journal of the Acoustical Society of America</i> , 2017, 142, EL205-EL210.	1.1	1
28	Effect of duration and gating of the signal on the binaural masking level difference for narrowband and broadband maskers. <i>Journal of the Acoustical Society of America</i> , 2017, 142, EL258-EL263.	1.1	2
29	Stable lattice Boltzmann model for Maxwell equations in media. <i>Physical Review E</i> , 2017, 96, 063306.	2.1	6
30	A Nonlinear Transmission Line Model of the Cochlea With Temporal Integration Accounts for Duration Effects in Threshold Fine Structure. <i>Acta Acustica United With Acustica</i> , 2017, 103, 721-724.	0.8	2
31	On the influence of sensorineural hearing loss on the pitch strength of bandpass noise. <i>Proceedings of Meetings on Acoustics</i> , 2016, , .	0.3	0
32	Role of the Duration of Sharpness in the Perceived Quality of Impulsive Vehicle Sounds. <i>Acta Acustica United With Acustica</i> , 2016, 102, 119-128.	0.8	8
33	Absence of direction-specific cross-modal visual-auditory adaptation in motion-onset event-related potentials. <i>European Journal of Neuroscience</i> , 2016, 43, 66-77.	2.6	3
34	Mid-bandwidth loudness depression in hearing-impaired listeners. <i>Journal of the Acoustical Society of America</i> , 2016, 139, 2334-2341.	1.1	1
35	Thermo-acoustic performance of full engine encapsulations — A numerical, experimental and psychoacoustic study. <i>Applied Acoustics</i> , 2016, 102, 79-87.	3.3	19
36	Interaction of Object Binding Cues in Binaural Masking Pattern Experiments. <i>Advances in Experimental Medicine and Biology</i> , 2016, 894, 249-256.	1.6	2

#	ARTICLE	IF	CITATIONS
37	Comodulation masking release in an off-frequency masking paradigm. Journal of the Acoustical Society of America, 2015, 138, 1194-1205.	1.1	1
38	Perceptual space, pleasantness and periodicity of multi-tone sounds. Journal of the Acoustical Society of America, 2015, 138, 288-298.	1.1	6
39	Categorical scaling of partial loudness in a condition of masking release. Journal of the Acoustical Society of America, 2015, 138, 904-915.	1.1	4
40	Spectro-Temporal Characteristics Affecting the Loudness of Technical Sounds: Data and Model Predictions. Acta Acustica United With Acustica, 2015, 101, 1145-1156.	0.8	9
41	Spectro-temporal modulation masking patterns reveal frequency selectivity. Journal of the Acoustical Society of America, 2015, 137, 714-723.	1.1	7
42	Binaural spectral resolution as a function of interaural masker correlation. Journal of the Acoustical Society of America, 2014, 135, 1993-2001.	1.1	1
43	Loudness of subcritical sounds as a function of bandwidth, center frequency, and level. Journal of the Acoustical Society of America, 2014, 135, 1313-1320.	1.1	8
44	Modeling Temporal Integration of Loudness. Acta Acustica United With Acustica, 2014, 100, 184-187.	0.8	9
45	Interaural-phase discrimination in notched noise. Journal of the Acoustical Society of America, 2014, 136, 2367-2369.	1.1	0
46	40-Hz multiple auditory steady-state responses to narrow-band chirps in sedated and anaesthetized infants. International Journal of Pediatric Otorhinolaryngology, 2014, 78, 762-768.	1.0	28
47	Off-Frequency BMLD: The Role of Monaural Processing. Advances in Experimental Medicine and Biology, 2013, 787, 293-301.	1.6	1
48	Cortical Representation of the Combination of Monaural and Binaural Unmasking. Advances in Experimental Medicine and Biology, 2013, 787, 435-442.	1.6	3
49	Can Comodulation Masking Release Occur When Frequency Changes Could Promote Perceptual Segregation of the On-Frequency and Flanking Bands?. Advances in Experimental Medicine and Biology, 2013, 787, 475-482.	1.6	1
50	Auditory brainstem responses to broad-band chirps: Amplitude growth functions in sedated and anaesthetised infants. International Journal of Pediatric Otorhinolaryngology, 2013, 77, 49-53.	1.0	32
51	Masking Release for Sweeping Masker Components with Correlated Envelopes. JARO - Journal of the Association for Research in Otolaryngology, 2013, 14, 139-147.	1.8	3
52	Modelling detection thresholds for sounds repeated at different delays. Hearing Research, 2013, 296, 83-95.	2.0	12
53	Objective measures of binaural masking level differences and comodulation masking release based on late auditory evoked potentials. Hearing Research, 2013, 306, 21-28.	2.0	13
54	Sorted averaging improves quality of auditory steady-state responses. Journal of Neuroscience Methods, 2013, 216, 28-32.	2.5	6

#	ARTICLE	IF	CITATIONS
55	Binaural notched-noise masking and auditory-filter shape. Journal of the Acoustical Society of America, 2013, 133, 2262-2271.	1.1	9
56	Relation between loudness in categorical units and loudness in phons and sones. Journal of the Acoustical Society of America, 2013, 133, EL314-EL319.	1.1	21
57	Loudness of sounds with a subcritical bandwidth: A challenge to current loudness models?. Journal of the Acoustical Society of America, 2013, 134, EL334-EL339.	1.1	3
58	Direction-specific adaptation of motion-onset auditory evoked potentials. European Journal of Neuroscience, 2013, 38, 2557-2565.	2.6	6
59	Temporal integration near threshold fine structure - The role of cochlear processing. Proceedings of Meetings on Acoustics, 2013, , .	0.3	0
60	Loudness of Speech and Speech-Like Signals. Acta Acustica United With Acustica, 2013, 99, 268-282.	0.8	16
61	Loudness of complex time-varying sounds ? A challenge for current loudness models. Proceedings of Meetings on Acoustics, 2013, , .	0.3	7
62	Suprathreshold perception under a masking release condition using categorical scaling. Proceedings of Meetings on Acoustics, 2013, , .	0.3	1
63	Spectral loudness summation: from the 60s to the present. Proceedings of Meetings on Acoustics, 2013, , .	0.3	0
64	Increased intensity discrimination thresholds in tinnitus subjects with a normal audiogram. Journal of the Acoustical Society of America, 2012, 132, EL196-EL201.	1.1	28
65	Modulation cues influence binaural masking-level difference in masking-pattern experiments. Journal of the Acoustical Society of America, 2012, 131, EL223-EL228.	1.1	13
66	Suprathreshold Perception of Tonal Components in Noise Under Conditions of Masking Release. Acta Acustica United With Acustica, 2012, 98, 451-460.	0.8	9
67	Effects of sequential streaming on auditory masking using psychoacoustics and auditory evoked potentials. Hearing Research, 2012, 285, 77-85.	2.0	5
68	Fast Hearing-Threshold Estimation Using Multiple Auditory Steady-State Responses with Narrow-Band Chirps and Adaptive Stimulus Patterns. Scientific World Journal, The, 2012, 2012, 1-7.	2.1	36
69	Spectro-Temporal Weighting of Loudness. PLoS ONE, 2012, 7, e50184.	2.5	24
70	The Magnitude of Tonal Content. A Review. Acta Acustica United With Acustica, 2011, 97, 355-363.	0.8	19
71	Cochlear Fine Structureâ€”Implications for Modulation Processing at the Level of the Cochlea. , 2011, , .		2
72	Spectral loudness summation of nonsimultaneous tone pulses. Journal of the Acoustical Society of America, 2011, 130, 3905-3915.	1.1	7

#	ARTICLE	IF	CITATIONS
73	Comparison of loudness models for time-varying sounds. Acta Acustica United With Acustica, 2010, 96, 383-396.	0.8	30
74	Temporal resolution and temporal integration. , 2010, , .		3
75	Monaural and binaural frequency selectivity in hearing-impaired subjects. International Journal of Audiology, 2010, 49, 357-367.	1.7	18
76	Suppression and comodulation masking release in normal-hearing and hearing-impaired listeners. Journal of the Acoustical Society of America, 2010, 128, 300-309.	1.1	18
77	Journal of the Acoustical Society of America, 2010, 128, 1870-1883.	1.1	55
78	Cortical representation of release from auditory masking. NeuroImage, 2010, 49, 835-842.	4.2	14
79	Threshold fine structure affects amplitude modulation perception. Journal of the Acoustical Society of America, 2009, 125, EL33-EL38.	1.1	7
80	The role of across-frequency processes in dichotic listening conditions. Journal of the Acoustical Society of America, 2009, 126, 3188-3198.	1.1	13
81	Investigating possible mechanisms behind the effect of threshold fine structure on amplitude modulation perception. Journal of the Acoustical Society of America, 2009, 126, 2490-2500.	1.1	5
82	Combination of masking releases for different center frequencies and masker amplitude statistics. Journal of the Acoustical Society of America, 2009, 126, 2479-2489.	1.1	11
83	Temporal weighting in loudness of broadband and narrowband signals. Journal of the Acoustical Society of America, 2009, 126, 951-954.	1.1	15
84	Superposition of masking releases. Journal of Computational Neuroscience, 2009, 26, 393-407.	1.0	15
85	Comodulation masking release for regular and irregular modulators. Hearing Research, 2009, 253, 97-106.	2.0	11
86	Modeling Temporal Effects of Spectral Loudness Summation. Acta Acustica United With Acustica, 2009, 95, 1112-1122.	0.8	21
87	Peripheral and central aspects of auditory across-frequency processing. Brain Research, 2008, 1220, 246-255.	2.2	19
88	Rebound depolarization in single units of the ventral cochlear nucleus: A contribution to grouping by common onset?. Neuroscience, 2008, 154, 139-146.	2.3	7
89	Spatial dissociation of changes of level and signal-to-noise ratio in auditory cortex for tones in noise. NeuroImage, 2008, 43, 321-328.	4.2	28
90	Automatic screening and detection of threshold fine structure. International Journal of Audiology, 2008, 47, 520-532.	1.7	17

#	ARTICLE	IF	CITATIONS
91	Spectral loudness summation for sequences of short noise bursts. Journal of the Acoustical Society of America, 2008, 123, 925-934.	1.1	8
92	The role of the auditory periphery in comodulation detection difference and comodulation masking release. Biological Cybernetics, 2007, 97, 397-411.	1.3	17
93	Spectral loudness summation as a function of duration for hearing-impaired listeners. International Journal of Audiology, 2006, 45, 287-294.	1.7	11
94	The temporal representation of the delay of iterated rippled noise with positive or negative gain by chopper units in the cochlear nucleus. Hearing Research, 2006, 216-217, 43-51.	2.0	5
95	Role of suppression and retro-cochlear processes in comodulation masking release. Journal of the Acoustical Society of America, 2006, 120, 3843-3852.	1.1	25
96	Spectral loudness summation for short and long signals as a function of level. Journal of the Acoustical Society of America, 2006, 119, 2919-2928.	1.1	30
97	Temporal Representation of the Delay of Iterated Rippled Noise in the Dorsal Cochlear Nucleus. Journal of Neurophysiology, 2005, 93, 2766-2776.	1.8	10
98	Responses of Dorsal Cochlear Nucleus Neurons to Signals in the Presence of Modulated Maskers. Journal of Neuroscience, 2004, 24, 5789-5797.	3.6	45
99	The psychophysics and physiology of comodulation masking release. Experimental Brain Research, 2003, 153, 405-417.	1.5	96
100	Modulation masking produced by complex tone modulators. Journal of the Acoustical Society of America, 2003, 114, 2135-2146.	1.1	19
101	Modeling the influence of inherent envelope fluctuations in simultaneous masking experiments. Journal of the Acoustical Society of America, 2002, 111, 1018-1025.	1.1	18
102	Spectro-temporal processing in the envelope-frequency domain. Journal of the Acoustical Society of America, 2002, 112, 2921-2931.	1.1	76
103	Spectral loudness summation as a function of duration. Journal of the Acoustical Society of America, 2002, 111, 1349-1358.	1.1	37
104	Within-channel cues in comodulation masking release (CMR): Experiments and model predictions using a modulation-filterbank model. Journal of the Acoustical Society of America, 1999, 106, 2733-2745.	1.1	90
105	Intrinsic envelope fluctuations and modulation-detection thresholds for narrow-band noise carriers. Journal of the Acoustical Society of America, 1999, 106, 2752-2760.	1.1	93
106	MODELING ACROSS-FREQUENCY PROCESSING OF AMPLITUDE MODULATION. , 1999, , 229-234.		4
107	TEMPORAL ASPECTS OF LOUDNESS SUMMATION. , 1999, , 97-100.		0
108	Modeling comodulation masking release (CMR) effects with a single-channel analysis. Journal of the Acoustical Society of America, 1996, 100, 2625-2625.	1.1	1
