#	ARTICLE	IF	CITATIONS
1	The Lancet Psychiatry Commission: a blueprint for protecting physical health in people with mental illness. <i>Lancet Psychiatry</i> , 2019, 6, 675-712.	7.4	815
2	The efficacy of smartphone-based mental health interventions for depressive symptoms: a meta-analysis of randomized controlled trials. <i>World Psychiatry</i> , 2017, 16, 287-298.	10.4	755
3	Can smartphone mental health interventions reduce symptoms of anxiety? A meta-analysis of randomized controlled trials. <i>Journal of Affective Disorders</i> , 2017, 218, 15-22.	4.1	552
4	The Effects of Dietary Improvement on Symptoms of Depression and Anxiety: A Meta-Analysis of Randomized Controlled Trials. <i>Psychosomatic Medicine</i> , 2019, 81, 265-280.	2.0	312
5	Exercise as Medicine for Mental and Substance Use Disorders: A Meta-review of the Benefits for Neuropsychiatric and Cognitive Outcomes. <i>Sports Medicine</i> , 2020, 50, 151-170.	6.5	222
6	The impact of pharmacological and non-pharmacological interventions to improve physical health outcomes in people with schizophrenia: a meta-review of meta-analyses of randomized controlled trials. <i>World Psychiatry</i> , 2019, 18, 53-66.	10.4	153
7	Exercise as an intervention for first-episode psychosis: a feasibility study. <i>Microbial Biotechnology</i> , 2018, 12, 307-315.	1.7	91
8	Cardiometabolic risk factors in young people at ultra-high risk for psychosis: A systematic review and meta-analysis. <i>Schizophrenia Research</i> , 2016, 170, 290-300.	2.0	84
9	Does exercise improve sleep quality in individuals with mental illness? A systematic review and meta-analysis. <i>Journal of Psychiatric Research</i> , 2019, 109, 96-106.	3.1	83
10	The Emerging Imperative for a Consensus Approach Toward the Rating and Clinical Recommendation of Mental Health Apps. <i>Journal of Nervous and Mental Disease</i> , 2018, 206, 662-666.	1.0	80
11	Nutritional Deficiencies and Clinical Correlates in First-Episode Psychosis: A Systematic Review and Meta-analysis. <i>Schizophrenia Bulletin</i> , 2018, 44, 1275-1292.	4.3	61
12	The effects and determinants of exercise participation in first-episode psychosis: a qualitative study. <i>BMC Psychiatry</i> , 2016, 16, 36.	2.6	58
13	The pro-cognitive mechanisms of physical exercise in people with schizophrenia. <i>British Journal of Pharmacology</i> , 2017, 174, 3161-3172.	5.4	57
14	Cannabis use and symptom severity in individuals at ultra high risk for psychosis: a meta-analysis. <i>Acta Psychiatrica Scandinavica</i> , 2017, 136, 5-15.	4.5	54
15	Digital Technologies in the Treatment of Anxiety: Recent Innovations and Future Directions. <i>Current Psychiatry Reports</i> , 2018, 20, 44.	4.5	49
16	Metacognitive beliefs in the at-risk mental state: A systematic review and meta-analysis. <i>Behaviour Research and Therapy</i> , 2017, 90, 25-31.	3.1	41
17	Substance use in youth at risk for psychosis. <i>Schizophrenia Research</i> , 2017, 181, 23-29.	2.0	41
18	Physical health promotion for young people at ultra-high risk for psychosis: An application of the COM model and behaviour-change wheel. <i>International Journal of Mental Health Nursing</i> , 2016, 25, 536-545.	3.8	36

#	ARTICLE	IF	CITATIONS
19	Monitoring of physical health in services for young people at ultra-high risk of psychosis. <i>Microbial Biotechnology</i> , 2018, 12, 153-159.	1.7	26
20	Examining the physical health and lifestyle of young people at ultra-high risk for psychosis: A qualitative study involving service users, parents and clinicians. <i>Psychiatry Research</i> , 2017, 255, 87-93.	3.3	24
21	Preferences and motivations for exercise in early psychosis. <i>Acta Psychiatrica Scandinavica</i> , 2016, 134, 83-84.	4.5	23
22	Long-term maintenance and effects of exercise in early psychosis. <i>Microbial Biotechnology</i> , 2018, 12, 578-585.	1.7	23
23	What does recovery mean to young people with mental health difficulties? â€œ â€œItâ€™s not this magical unspoken thing, itâ€™s just recoveryâ€. <i>Journal of Mental Health</i> , 2020, 29, 464-472.	1.9	23
24	Challenges in implementing an exercise intervention within residential psychiatric care: A mixed methods study. <i>Mental Health and Physical Activity</i> , 2017, 12, 141-146.	1.8	18
25	The clinical and behavioral cardiometabolic risk of children and young people on mental health inpatient units: A systematic review and meta-analysis. <i>General Hospital Psychiatry</i> , 2021, 70, 80-97.	2.4	11
26	Exploring functional impairment in young people at ultra-high risk for psychosis: A qualitative study. <i>Microbial Biotechnology</i> , 2019, 13, 789-797.	1.7	10
27	Physical health interventions on adolescent mental health inpatient units: A systematic review and call to action. <i>Microbial Biotechnology</i> , 2021, 15, 439-448.	1.7	9
28	The Impact of Pharmacological and Non-Pharmacological Interventions to Improve Physical Health Outcomes in People With Schizophrenia: A Meta-Review of Meta-Analyses of Randomized Controlled Trials. <i>Focus (American Psychiatric Publishing)</i> , 2021, 19, 116-128.	0.8	7
29	Exercise interventions in child and adolescent mental health care: An overview of the evidence and recommendations for implementation. <i>JCPP Advances</i> , 2021, 1, e12031.	2.4	6
30	Evaluation of the physical health of adolescent in-patients in generic and secure services: retrospective case-note review. <i>BJPsych Bulletin</i> , 2020, 44, 95-102.	1.1	4
31	Ultra-high risk phase: A missed opportunity for physical health care. <i>Microbial Biotechnology</i> , 2018, 12, 267-268.	1.7	2
32	The role of lifestyle interventions to address sleep as a modifiable cardiometabolic risk factor in youth with at-risk mental states. <i>Schizophrenia Research</i> , 2018, 192, 475-476.	2.0	1
33	Physical health promotion in people with schizophrenia: why we should consider the ultra high-risk state. <i>Acta Psychiatrica Scandinavica</i> , 2016, 133, 166-167.	4.5	0
34	Lifestyle factors may be linked to symptoms of metabolic syndrome in people at risk for psychosis. <i>Schizophrenia Research</i> , 2017, 183, 47-48.	2.0	0
