#	ARTICLE	IF	CITATIONS
1	Thalamic T-Type Calcium Channels as Targets for Hypnotics and General Anesthetics. <i>International Journal of Molecular Sciences</i> , 2022, 23, 2349.	4.1	5
2	The T-type calcium channel isoform Cav3.1 is a target for the hypnotic effect of the anaesthetic neurosteroid (3 β ,5 α ,17 β)-3-hydroxyandrostane-17-carbonitrile. <i>British Journal of Anaesthesia</i> , 2021, 126, 245-255.	3.4	16
3	Different roles of T-type calcium channel isoforms in hypnosis induced by an endogenous neurosteroid epipregnanolone. <i>Neuropharmacology</i> , 2021, 197, 108739.	4.1	3
4	Global genetic deletion of CaV3.3 channels facilitates anaesthetic induction and enhances isoflurane-sparing effects of T-type calcium channel blockers. <i>Scientific Reports</i> , 2020, 10, 21510.	3.3	5
5	A novel phospho-modulatory mechanism contributes to the calcium-dependent regulation of T-type Ca ²⁺ channels. <i>Scientific Reports</i> , 2019, 9, 15642.	3.3	4
6	Alterations in Oscillatory Behavior of Central Medial Thalamic Neurons Demonstrate a Key Role of CaV3.1 Isoform of T-Channels During Isoflurane-Induced Anesthesia. <i>Cerebral Cortex</i> , 2019, 29, 4679-4696.	2.9	24
7	Neonatal general anesthesia causes lasting alterations in excitatory and inhibitory synaptic transmission in the ventrobasal thalamus of adolescent female rats. <i>Neurobiology of Disease</i> , 2019, 127, 472-481.	4.4	24
8	Pharmacological Antagonism of T-Type Calcium Channels Constrains Rebound Burst Firing in Two Distinct Subpopulations of GABA Neurons in the Rat Ventral Tegmental Area: Implications for α -Lipoic Acid. <i>Frontiers in Pharmacology</i> , 2019, 10, 1402.	3.5	2
9	CaV3.1 isoform of T-type calcium channels supports excitability of rat and mouse ventral tegmental area neurons. <i>Neuropharmacology</i> , 2018, 135, 343-354.	4.1	13
10	Cytosolic ATP Relieves Voltage-Dependent Inactivation of T-Type Calcium Channels and Facilitates Excitability of Neurons in the Rat Central Medial Thalamus. <i>ENeuro</i> , 2018, 5, ENEURO.0016-18.2018.	1.9	11
