#	ARTICLE	IF	CITATIONS
1	Impact of the clinical use of artificial intelligence-assisted neoplasia detection for colonoscopy: a large-scale prospective, propensity score-matched study (with video). <i>Gastrointestinal Endoscopy</i> , 2022, 95, 155-163.	0.5	19
2	Impact of non-curative endoscopic submucosal dissection on short- and long-term outcome of subsequent laparoscopic gastrectomy for pT1 gastric cancer. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2022, 36, 3985-3993.	1.3	2
3	Evaluation in real-time use of artificial intelligence during colonoscopy to predict relapse of ulcerative colitis: a prospective study. <i>Gastrointestinal Endoscopy</i> , 2022, 95, 747-756.e2.	0.5	23
4	A technique for constructing diverting loop ileostomy to prevent outlet obstruction after rectal resection and total colectomy: a retrospective single-center study. <i>Surgery Today</i> , 2022, 52, 587-594.	0.7	6
5	Progress in magnifying colonoscopy: Road to optical biopsy. <i>Digestive Endoscopy</i> , 2022, 34, 91-94.	1.3	1
6	Tumor Location as a Prognostic Factor in T1 Colorectal Cancer. <i>Journal of the Anus, Rectum and Colon</i> , 2022, 6, 9-15.	0.4	6
7	Current problems and perspectives of pathological risk factors for lymph node metastasis in T1 colorectal cancer: Systematic review. <i>Digestive Endoscopy</i> , 2022, 34, 901-912.	1.3	26
8	Early colorectal lesion (depressed type) detected using artificial intelligence. <i>Endoscopy</i> , 2022, , .	1.0	1
9	Challenges in artificial intelligence for polyp detection. <i>Digestive Endoscopy</i> , 2022, 34, 870-871.	1.3	2
10	Changes in halitosis value before and after <i>Helicobacter pylori</i> eradication: A single-institutional prospective study. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2022, 37, 928-932.	1.4	5
11	Cost-effectiveness of artificial intelligence for screening colonoscopy: a modelling study. <i>The Lancet Digital Health</i> , 2022, 4, e436-e444.	5.9	78
12	Real-Time Artificial Intelligence-Based Optical Diagnosis of Neoplastic Polyps during Colonoscopy. , 2022, 1, .		36
13	Use of advanced endoscopic technology for optical characterization of neoplasia in patients with ulcerative colitis: Systematic review. <i>Digestive Endoscopy</i> , 2022, 34, 1297-1310.	1.3	4
14	Novel "resect and analysis" approach for T2 colorectal cancer with use of artificial intelligence. <i>Gastrointestinal Endoscopy</i> , 2022, 96, 665-672.e1.	0.5	8
15	Artificial intelligence for disease diagnosis: the criterion standard challenge. <i>Gastrointestinal Endoscopy</i> , 2022, 96, 370-372.	0.5	5
16	Impact of artificial intelligence on colorectal polyp detection for early-career endoscopists: an international comparative study. <i>Scandinavian Journal of Gastroenterology</i> , 2022, 57, 1272-1277.	0.6	3
17	Endoscopic full-thickness resection for complex colorectal lesions " what's the next step?. <i>Scandinavian Journal of Gastroenterology</i> , 2022, 57, 1531-1532.	0.6	1
18	Establishing key research questions for the implementation of artificial intelligence in colonoscopy: a modified Delphi method. <i>Endoscopy</i> , 2021, 53, 893-901.	1.0	35

#	ARTICLE	IF	CITATIONS
19	Randomised comparison of postpolypectomy surveillance intervals following a two-round baseline colonoscopy: the Japan Polyp Study Workgroup. <i>Gut</i> , 2021, 70, 1469-1478.	6.1	30
20	Association of Dietary Fatty Acid Intake With the Development of Ulcerative Colitis: A Multicenter Case-Control Study in Japan. <i>Inflammatory Bowel Diseases</i> , 2021, 27, 617-628.	0.9	8
21	Development of a computer-aided detection system for colonoscopy and a publicly accessible large colonoscopy video database (with video). <i>Gastrointestinal Endoscopy</i> , 2021, 93, 960-967.e3.	0.5	111
22	Current status and future perspective on artificial intelligence for lower endoscopy. <i>Digestive Endoscopy</i> , 2021, 33, 273-284.	1.3	25
23	Artificial intelligence in colonoscopy –Now on the market. What's next?. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2021, 36, 7-11.	1.4	40
24	Artificial Intelligence System to Determine Risk of T1 Colorectal Cancer Metastasis to Lymph Node. <i>Gastroenterology</i> , 2021, 160, 1075-1084.e2.	0.6	99
25	Artificial intelligence and computer-aided diagnosis for colonoscopy: where do we stand now?. <i>Translational Gastroenterology and Hepatology</i> , 2021, 6, 0-0.	1.5	4
26	Obesity is not a risk factor for either mortality or complications after laparoscopic cholecystectomy for cholecystitis. <i>Scientific Reports</i> , 2021, 11, 2384.	1.6	8
27	Efficacy and safety of oral sulfate solution for bowel preparation in Japanese patients undergoing colonoscopy: Noninferiority-based, randomized, controlled study. <i>Digestive Endoscopy</i> , 2021, 33, 1131-1138.	1.3	9
28	Combined endocytoscopy with pit pattern diagnosis in ulcerative colitis-associated neoplasia: Pilot study. <i>Digestive Endoscopy</i> , 2021, , .	1.3	12
29	Unsupervised colonoscopic depth estimation by domain translations with a Lambertian-reflection keeping auxiliary task. <i>International Journal of Computer Assisted Radiology and Surgery</i> , 2021, 16, 989-1001.	1.7	7
30	Artificial intelligence-assisted colonic endocytoscopy for cancer recognition: a multicenter study. <i>Endoscopy International Open</i> , 2021, 09, E1004-E1011.	0.9	14
31	Gastric cancer metastasis to the transverse colon requiring differentiation from early-stage colorectal cancer. <i>Progress of Digestive Endoscopy</i> , 2021, 98, 123-124.	0.0	0
32	Clinical Efficacy of Endocytoscopy for Gastrointestinal Endoscopy. <i>Clinical Endoscopy</i> , 2021, 54, 455-463.	0.6	8
33	Reply. <i>Gastroenterology</i> , 2021, 161, 733-734.	0.6	0
34	Clinical and endoscopic characteristics of post-colonoscopy colorectal cancers detected within 10 years after a previous negative examination. <i>Endoscopy International Open</i> , 2021, 09, E1472-E1479.	0.9	1
35	Challenge to the "impossible". <i>Gastrointestinal Endoscopy</i> , 2021, 94, 639-640.	0.5	1
36	Binary polyp-size classification based on deep-learned spatial information. <i>International Journal of Computer Assisted Radiology and Surgery</i> , 2021, 16, 1817-1828.	1.7	9

#	ARTICLE	IF	CITATIONS
37	Short- and long-term outcomes of self-expanding metallic stent placement vs. emergency surgery for malignant colorectal obstruction. <i>Molecular and Clinical Oncology</i> , 2021, 14, 63.	0.4	3
38	Can artificial intelligence help to detect dysplasia in patients with ulcerative colitis?. <i>Endoscopy</i> , 2021, 53, E273-E274.	1.0	25
39	Risk Stratification of T1 Colorectal Cancer Metastasis to Lymph Nodes: Current Status and Perspective. <i>Gut and Liver</i> , 2021, 15, 818-826.	1.4	20
40	Therapeutic Importance of Endoscopic Pathology Versus Magnetic Resonance Imaging Findings for T1 Rectal Cancer: A Case Report. <i>International Surgery</i> , 2021, 105, 88-91.	0.0	0
41	Artificial Intelligence for Diagnosing Colorectal Lesion. <i>Nippon Laser Igakkaishi</i> , 2021, , .	0.0	0
42	Image-Enhanced Capsule Endoscopy Improves the Identification of Small Intestinal Lesions. <i>Diagnostics</i> , 2021, 11, 2122.	1.3	5
43	Beyond complete endoscopic healing: goblet appearance using an endocytoscope to predict future sustained clinical remission in ulcerative colitis. <i>Digestive Endoscopy</i> , 2021, , .	1.3	13
44	Clinicopathological features of small T1 colorectal cancers. <i>World Journal of Clinical Cases</i> , 2021, 9, 10088-10097.	0.3	1
45	Identification of a small, depressed type of colorectal invasive cancer by an artificial intelligence-assisted detection system. <i>Endoscopy</i> , 2021, , .	1.0	1
46	Letter: the combination of histologic remission and Mayo endoscopic score 1 as a suitable therapeutic target in ulcerative colitis. <i>Alimentary Pharmacology and Therapeutics</i> , 2021, 53, 955-956.	1.9	1
47	A Diminutive Invasive Sigmoid Colon Tumor Observed by Endocytoscopy. <i>Clinical Gastroenterology and Hepatology</i> , 2020, 18, e103.	2.4	0
48	Artificial Intelligence-assisted System Improves Endoscopic Identification of Colorectal Neoplasms. <i>Clinical Gastroenterology and Hepatology</i> , 2020, 18, 1874-1881.e2.	2.4	167
49	Artificial intelligence for magnifying endoscopy, endocytoscopy, and confocal laser endomicroscopy of the colorectum. <i>Techniques and Innovations in Gastrointestinal Endoscopy</i> , 2020, 22, 56-60.	0.4	1
50	Endocytoscopy. , 2020, , 45-51.		0
51	Predictors of invasive cancer of large laterally spreading colorectal tumors: A multicenter study in Japan. <i>JGH Open</i> , 2020, 4, 83-89.	0.7	8
52	Endocytoscopy for the differential diagnosis of colorectal low-grade adenoma: a novel possibility for the "resect and discard" strategy. <i>Gastrointestinal Endoscopy</i> , 2020, 91, 676-683.	0.5	13
53	A novel Lugol's iodine staining technique to visualize the upper margin of the surgical anal canal intraoperatively for Hirschsprung disease: a case series. <i>BMC Surgery</i> , 2020, 20, 317.	0.6	1
54	Robust endocytoscopic image classification based on higher-order symmetric tensor analysis and multi-scale topological statistics. <i>International Journal of Computer Assisted Radiology and Surgery</i> , 2020, 15, 2049-2059.	1.7	1

#	ARTICLE	IF	CITATIONS
55	Left-sided location is a risk factor for lymph node metastasis of T1 colorectal cancer: a single-center retrospective study. <i>International Journal of Colorectal Disease</i> , 2020, 35, 1911-1919.	1.0	20
56	Can artificial intelligence standardise colonoscopy quality?. <i>The Lancet Gastroenterology and Hepatology</i> , 2020, 5, 331-332.	3.7	5
57	Endocytoscopic intramucosal capillary network changes and crypt architecture abnormalities can predict relapse in patients with an ulcerative colitis Mayo endoscopic score of 1. <i>Digestive Endoscopy</i> , 2020, 32, 1082-1091.	1.3	11
58	Efficacy of screening using annual fecal immunochemical test alone versus combined with one-time colonoscopy in reducing colorectal cancer mortality: the Akita Japan population-based colonoscopy screening trial (Akita pop-colon trial). <i>International Journal of Colorectal Disease</i> , 2020, 35, 933-939.	1.0	16
59	Propensity-score-matched analysis of short- and long-term outcomes in patients with an ileocolic artery crossing anterior vs posterior to the superior mesenteric vein during curative resection for right-sided colon cancer. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2020, 34, 5384-5392.	1.3	8
60	How Far Will Clinical Application of AI Applications Advance for Colorectal Cancer Diagnosis?. <i>Journal of the Anus, Rectum and Colon</i> , 2020, 4, 47-50.	0.4	3
61	Artificial Intelligence for Colorectal Polyp Detection and Characterization. <i>Current Treatment Options in Gastroenterology</i> , 2020, 18, 200-211.	0.3	7
62	Cost savings in colonoscopy with artificial intelligence-aided polyp diagnosis: an add-on analysis of a clinical trial (withAvideo). <i>Gastrointestinal Endoscopy</i> , 2020, 92, 905-911.e1.	0.5	95
63	Treatment policy for colonic laterally spreading tumors based on each clinicopathologic feature of 4 subtypes: actual status of pseudo-depressed type. <i>Gastrointestinal Endoscopy</i> , 2020, 92, 1083-1094.e6.	0.5	15
64	Endocytoscopy with NBI has the potential to correctly diagnose diminutive colorectal polyps that are difficult to diagnose using conventional NBI. <i>Endoscopy International Open</i> , 2020, 08, E360-E367.	0.9	7
65	Depressed Colorectal Cancer: A New Paradigm in Early Colorectal Cancer. <i>Clinical and Translational Gastroenterology</i> , 2020, 11, e00269.	1.3	7
66	A Dental Instrument Swallowed during Dental Treatment was Successfully Removed from the Ascending Colon Using Laparoscopic Surgery. <i>Nihon Rinsho Geka Gakkai Zasshi (Journal of Japan)</i> Tj ETQq0 0 0 rgB0,0 Overlock 10 Tf 50		
67	Small invasive colon cancer with adenoma observed by endocytoscopy: A case report. <i>World Journal of Gastrointestinal Endoscopy</i> , 2020, 12, 304-309.	0.4	2
68	Oncogenic splicing abnormalities induced by DEAD ÆBox Helicase 56 amplification in colorectal cancer. <i>Cancer Science</i> , 2019, 110, 3132-3144.	1.7	61
69	Simultaneous detection and characterization of diminutive polyps with the use of artificial intelligence during colonoscopy. <i>VideoGIE</i> , 2019, 4, 7-10.	0.3	51
70	Quality assurance of computer-aided detection and diagnosis in colonoscopy. <i>Gastrointestinal Endoscopy</i> , 2019, 90, 55-63.	0.5	104
71	Two cases of colitis-associated neoplasia observed with endocytoscopy. <i>Digestive Endoscopy</i> , 2019, 31, 43-44.	1.3	3
72	Artificial intelligence for early gastric cancer: early promise and the path ahead. <i>Gastrointestinal Endoscopy</i> , 2019, 89, 816-817.	0.5	18

#	ARTICLE	IF	CITATIONS
73	The ability of positron emission tomography/computed tomography to detect synchronous colonic cancers in patients with obstructive colorectal cancer. <i>Molecular and Clinical Oncology</i> , 2019, 10, 425-429.	0.4	4
74	Stable polypâ€cscene classification via subsampling and residual learning from an imbalanced large dataset. <i>Healthcare Technology Letters</i> , 2019, 6, 237-242.	1.9	5
75	Fully automated diagnostic system with artificial intelligence using endocytoscopy to identify the presence of histologic inflammation associated with ulcerative colitis (with video). <i>Gastrointestinal Endoscopy</i> , 2019, 89, 408-415.	0.5	165
76	Artificial intelligence and colonoscopy: Current status and future perspectives. <i>Digestive Endoscopy</i> , 2019, 31, 363-371.	1.3	108
77	Artificial intelligence and upper gastrointestinal endoscopy: Current status and future perspective. <i>Digestive Endoscopy</i> , 2019, 31, 378-388.	1.3	100
78	Potential of artificial intelligenceâ€cassisted colonoscopy using an endocytoscope (with video). <i>Digestive Endoscopy</i> , 2018, 30, 52-53.	1.3	22
79	Validation study for development of the Japan NBI Expert Team classification of colorectal lesions. <i>Digestive Endoscopy</i> , 2018, 30, 642-651.	1.3	93
80	Artificial Intelligence-Assisted Polyp Detection for Colonoscopy: Initial Experience. <i>Gastroenterology</i> , 2018, 154, 2027-2029.e3.	0.6	281
81	Artificial intelligence may help in predicting the need for additional surgery after endoscopic resection of T1 colorectal cancer. <i>Endoscopy</i> , 2018, 50, 230-240.	1.0	100
82	Narrow band imaging efficiency in evaluation of mucosal healing/relapse of ulcerative colitis. <i>Endoscopy International Open</i> , 2018, 06, E518-E523.	0.9	24
83	Diminutive intramucosal invasive (Tis) sigmoid colon carcinoma. <i>Clinical Journal of Gastroenterology</i> , 2018, 11, 359-363.	0.4	4
84	Safety and curability of laparoscopic gastrectomy in elderly patients with gastric cancer. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2018, 32, 4277-4283.	1.3	24
85	White light-emitting contrast image capsule endoscopy for visualization of small intestine lesions: a pilot study. <i>Endoscopy International Open</i> , 2018, 06, E315-E321.	0.9	6
86	The impact of stromal Hic-5 on the tumorigenesis of colorectal cancer through lysyl oxidase induction and stromal remodeling. <i>Oncogene</i> , 2018, 37, 1205-1219.	2.6	27
87	High Serum CA19-9 Concentration Predicts Poor Prognosis in Elderly Patients with Stage IV Colorectal Cancer. <i>Gastrointestinal Tumors</i> , 2018, 5, 117-124.	0.3	6
88	Clinicopathological features of T1 colorectal carcinomas with skip lymphovascular invasion. <i>Oncology Letters</i> , 2018, 16, 7264-7270.	0.8	4
89	Insertability comparison of passive bending single-balloon prototype versus standard single-balloon enteroscopy: a multicenter randomized non-blinded trial. <i>Endoscopy International Open</i> , 2018, 06, E1184-E1189.	0.9	2
90	Detecting colorectal polyps via machine learning. <i>Nature Biomedical Engineering</i> , 2018, 2, 713-714.	11.6	24

#	ARTICLE	IF	CITATIONS
91	Expression of matrix metalloproteinase-7 correlates with the invasion of T1 colorectal carcinoma. <i>Oncology Letters</i> , 2018, 15, 3614-3620.	0.8	1
92	New-generation full-spectrum endoscopy versus standard forward-viewing colonoscopy: a multicenter, randomized, tandem colonoscopy trial (J-FUSE Study). <i>Gastrointestinal Endoscopy</i> , 2018, 88, 854-864.	0.5	34
93	Risk factors of recurrence in T1 colorectal cancers treated by endoscopic resection alone or surgical resection with lymph node dissection. <i>International Journal of Colorectal Disease</i> , 2018, 33, 1029-1038.	1.0	22
94	Endocytoscopic findings of colorectal neuroendocrine tumors (with video). <i>Endoscopy International Open</i> , 2018, 06, E589-E593.	0.9	1
95	Real-Time Use of Artificial Intelligence in Identification of Diminutive Polyps During Colonoscopy. <i>Annals of Internal Medicine</i> , 2018, 169, 357.	2.0	391
96	Comparison of Surgeon Stress and Workload between Reduced-port and Laparoscopic Cholecystectomy : A Prospective Study. <i>The Showa University Journal of Medical Sciences</i> , 2018, 30, 371-379.	0.1	0
97	A Case of Bowel Obstruction with Multiple Diverticula in the Small Intestine Requiring Resection. <i>Nihon Rinsho Geka Gakkai Zasshi (Journal of Japan Surgical Association)</i> , 2018, 79, 1870-1873.	0.0	0
98	Comparative clinicopathological characteristics of colon and rectal T1 carcinoma. <i>Oncology Letters</i> , 2017, 13, 805-810.	0.8	14
99	In vivo detection of desmoplastic reaction using endocytoscopy: A new diagnostic marker of submucosal or more extensive invasion in colorectal carcinoma. <i>Molecular and Clinical Oncology</i> , 2017, 6, 291-295.	0.4	4
100	Accuracy of computer-aided diagnosis based on narrow-band imaging endocytoscopy for diagnosing colorectal lesions: comparison with experts. <i>International Journal of Computer Assisted Radiology and Surgery</i> , 2017, 12, 757-766.	1.7	65
101	Accuracy of diagnosing invasive colorectal cancer using computer-aided endocytoscopy. <i>Endoscopy</i> , 2017, 49, 798-802.	1.0	109
102	Patient gender as a factor associated with lymph node metastasis in T1 colorectal cancer: A systematic review and meta-analysis. <i>Molecular and Clinical Oncology</i> , 2017, 6, 517-524.	0.4	16
103	The role of microvessel density, lymph node metastasis, and tumor size as prognostic factors of distant metastasis in colorectal cancer. <i>Oncology Letters</i> , 2017, 13, 4327-4333.	0.8	21
104	Management and risk factor of stenosis after endoscopic submucosal dissection for colorectal neoplasms. <i>Gastrointestinal Endoscopy</i> , 2017, 86, 358-369.	0.5	39
105	Classification of nuclear morphology in endocytoscopy of colorectal neoplasms. <i>Gastrointestinal Endoscopy</i> , 2017, 85, 628-638.	0.5	15
106	A novel ability of endocytoscopy to diagnose histological grade of differentiation in T1 colorectal carcinomas. <i>Endoscopy</i> , 2017, 50, 69-74.	1.0	9
107	The concept of "Semi-clean colon"™ using the pit pattern classification system has the potential to be acceptable in combination with a 3-year surveillance colonoscopy. <i>Oncology Letters</i> , 2017, 14, 2735-2742.	0.8	7
108	Use of endocytoscopy for identification of sessile serrated adenoma/polyps and hyperplastic polyps by quantitative image analysis of the luminal areas. <i>Endoscopy International Open</i> , 2017, 05, E769-E774.	0.9	5

#	ARTICLE	IF	CITATIONS
109	Retrospective analysis of large bowel obstruction or perforation caused by oral preparation for colonoscopy. <i>Endoscopy International Open</i> , 2017, 05, E471-E476.	0.9	6
110	Computer-aided diagnosis for colonoscopy. <i>Endoscopy</i> , 2017, 49, 813-819.	1.0	130
111	Comprehensive genomic sequencing detects important genetic differences between right-sided and left-sided colorectal cancer. <i>Oncotarget</i> , 2017, 8, 93567-93579.	0.8	26
112	Single-Incision Laparoscopic Cholecystectomy Using a Dome-Down Approach for a Patient with Left-Sided Gallbladder. <i>The Showa University Journal of Medical Sciences</i> , 2017, 29, 451-456.	0.1	0
113	The necessity of colorectal cancer screening for elderly patients. <i>Translational Gastroenterology and Hepatology</i> , 2017, 2, 19-19.	1.5	3
114	Laparoscopic Extirpation of a Schwannoma in the Lateral Pelvic Space. <i>Case Reports in Surgery</i> , 2016, 2016, 1-4.	0.2	4
115	Pedunculated gastric neuroendocrine tumor: a case report. <i>Endoscopy International Open</i> , 2016, 04, E1136-E1139.	0.9	0
116	Analysis of Risk Factors for Colonic Diverticular Bleeding: A Matched Case-Control Study. <i>Gut and Liver</i> , 2016, 10, 244.	1.4	18
117	Spontaneously ruptured hepatic cyst treated with laparoscopic deroofing and cystobiliary communication closure: A case report. <i>Asian Journal of Endoscopic Surgery</i> , 2016, 9, 208-210.	0.4	12
118	Prospective, randomized, placebo-controlled trial evaluating the efficacy and safety of propofol sedation by anesthesiologists and gastroenterologist-led teams using computer-assisted personalized sedation during upper and lower gastrointestinal endoscopy. <i>Digestive Endoscopy</i> , 2016, 28, 657-664.	1.3	12
119	Positive detection of exfoliated colon cancer cells on linear stapler cartridges was associated with depth of tumor invasion and preoperative bowel preparation in colon cancer. <i>World Journal of Surgical Oncology</i> , 2016, 14, 233.	0.8	7
120	Magnifying chromoendoscopic and endocytoscopic findings of juvenile polyps in the colon and rectum. <i>Oncology Letters</i> , 2016, 11, 237-242.	0.8	4
121	Morphology as a risk factor for the malignant potential of T2 colorectal cancer. <i>Molecular and Clinical Oncology</i> , 2016, 5, 223-226.	0.4	4
122	Genomic landscape of colorectal cancer in Japan: clinical implications of comprehensive genomic sequencing for precision medicine. <i>Genome Medicine</i> , 2016, 8, 136.	3.6	64
123	Evaluation of microvascular findings of deeply invasive colorectal cancer by endocytoscopy with narrow-band imaging. <i>Endoscopy International Open</i> , 2016, 04, E1280-E1285.	0.9	10
124	Comparison of the endocytoscopic and clinicopathologic features of colorectal neoplasms. <i>Endoscopy International Open</i> , 2016, 04, E397-E402.	0.9	5
125	Characterization of Colorectal Lesions Using a Computer-Aided Diagnostic System for Narrow-Band Imaging Endocytoscopy. <i>Gastroenterology</i> , 2016, 150, 1531-1532.e3.	0.6	158
126	Impact of an automated system for endocytoscopic diagnosis of small colorectal lesions: an international web-based study. <i>Endoscopy</i> , 2016, 48, 1110-1118.	1.0	98
