NAOKI TAKASAKA

#	Article	lF	CITATIONS
1	Insufficient autophagy in idiopathic pulmonary fibrosis. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2013, 304, L56-L69.	2.9	259
2	PARK2-mediated mitophagy is involved in regulation of HBEC senescence in COPD pathogenesis. Autophagy, 2015, 11, 547-559.	9.1	206
3	Insufficient autophagy promotes bronchial epithelial cell senescence in chronic obstructive pulmonary disease. Oncolmmunology, 2012, 1, 630-641.	4.6	199
4	Metformin attenuates lung fibrosis development via NOX4 suppression. Respiratory Research, 2016, 17, 107.	3.6	178
5	Mitochondrial fragmentation in cigarette smoke-induced bronchial epithelial cell senescence. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2013, 305, L737-L746.	2.9	167
6	Autophagy Induction by SIRT6 through Attenuation of Insulin-like Growth Factor Signaling Is Involved in the Regulation of Human Bronchial Epithelial Cell Senescence. Journal of Immunology, 2014, 192, 958-968.	0.8	156
7	Cellular senescence and autophagy in the pathogenesis of chronic obstructive pulmonary disease (COPD) and idiopathic pulmonary fibrosis (IPF). Respiratory Investigation, 2016, 54, 397-406.	1.8	113
8	Involvement of PARK2-Mediated Mitophagy in Idiopathic Pulmonary Fibrosis Pathogenesis. Journal of Immunology, 2016, 197, 504-516.	0.8	102
9	Integrin αvβ8–expressing tumor cells evade host immunity by regulating TGF-β activation in immune cells. JCI Insight, 2018, 3, .	5.0	82
10	Involvement of Creatine Kinase B in Cigarette Smoke–Induced Bronchial Epithelial Cell Senescence. American Journal of Respiratory Cell and Molecular Biology, 2012, 46, 306-312.	2.9	47
11	Role of IL-17A in murine models of COPD airway disease. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2017, 312, L122-L130.	2.9	45
12	Pathogens in COPD exacerbations identified by comprehensive real-time PCR plus older methods. International Journal of COPD, 2015, 10, 2009.	2.3	38
13	Increased levels of prostaglandin Eâ~'major urinary metabolite (PGE-MUM) in chronic fibrosing interstitial pneumonia. Respiratory Medicine, 2017, 122, 43-50.	2.9	27
14	Cigarette Smoke Exposure Worsens Endotoxin-Induced Lung Injury and Pulmonary Edema in Mice. Nicotine and Tobacco Research, 2017, 19, 1033-1039.	2.6	26
15	Insulin-Dependent Phosphatidylinositol 3-Kinase/Akt and ERK Signaling Pathways Inhibit TLR3-Mediated Human Bronchial Epithelial Cell Apoptosis. Journal of Immunology, 2011, 187, 510-519.	0.8	25
16	Apoptosis inhibitor of macrophage (AIM) expression in alveolar macrophages in COPD. Respiratory Research, 2013, 14, 30.	3.6	23
17	Cigarette smoke exposure worsens acute lung injury in antibiotic-treated bacterial pneumonia in mice. American Journal of Physiology - Lung Cellular and Molecular Physiology, 2018, 315, L25-L40.	2.9	20
18	Identification of pathogens by comprehensive real-time PCR versus conventional methods in community-acquired pneumonia in Japanese adults. Infectious Diseases, 2016, 48, 782-788.	2.8	19

ΝΑΟΚΙ ΤΑΚΑSAKA

#	Article	IF	CITATIONS
19	A tumor-specific mechanism of T <sub>reg</sub> enrichment mediated by the integrin αvβ8. Science Immunology, 2021, 6, .	11.9	17
20	Impact of emphysema on sputum culture conversion in male patients with pulmonary tuberculosis: a retrospective analysis. BMC Pulmonary Medicine, 2020, 20, 287.	2.0	3
21	Impact of emphysema on the prognosis of Mycobacterium avium complex pulmonary disease. Respiratory Medicine, 2022, 192, 106738.	2.9	2
22	Solitary pulmonary nodule caused by pulmonary Mycobacterium lentiflavum infection. Respiratory Medicine Case Reports, 2021, 34, 101510.	0.4	1
23	Allergic bronchopulmonary aspergillosis in a patient with ankylosing spondylitis treated with adalimumab. Respirology Case Reports, 2021, 9, e00805.	0.6	1
24	Pathogenesis of COPD 4 – Cell Death, Senescence, and Autophagy: Is There a Possibility of Developing New Drugs from the Standpoint of This Pathogenetic Mechanism?. Respiratory Disease Series, 2017, , 95-111.	0.0	1
