#	Article	IF	Citations
1	Patients With Bicuspid Aortic Stenosis Undergoing Transcatheter Aortic Valve Replacement: A Systematic Review and Meta-Analysis. Frontiers in Cardiovascular Medicine, 2022, 9, 794850.	2.4	2
2	Relationship of body fat and left ventricular hypertrophy with the risk of all-cause death in patients with coronary artery disease.. Journal of Geriatric Cardiology, 2022, 19, 218-226.	0.2	2
3	MARCH5 restores endothelial cell function against ischaemic/hypoxia injury via Akt/eNOS pathway. Journal of Cellular and Molecular Medicine, 2021, 25, 3182-3193.	3.6	6
4	Activating transcription factor 4 regulates angiogenesis under lipid overload via methionine adenosyltransferase 2Aâ€mediated endothelial epigenetic alteration. FASEB Journal, 2021, 35, e21612.	0.5	3
5	Variation of computed tomographic angiographyâ€"based fractional flow reserve after transcatheter aortic valve implantation. European Radiology, 2021, 31, 6220-6229.	4.5	1
6	Sodium Lactate Accelerates M2 Macrophage Polarization and Improves Cardiac Function after Myocardial Infarction in Mice. Cardiovascular Therapeutics, 2021, 2021, 1-10.	2.5	20
7	Renal function as a predictor of outcomes in patients with hypertrophic cardiomyopathy: A cohort study of a hospitalized population. Clinica Chimica Acta, 2021, 512, 92-99.	1.1	5
8	Clinical characteristics and in-hospital outcomes of patients receiving contemporary intensive cardiac care: retrospective study from a large centre in China. Journal of Geriatric Cardiology, 2021, 18, 94-103.	0.2	2
9	Hypertension is a risk factor for adverse outcomes in patients with coronavirus disease 2019: a cohort study. Annals of Medicine, 2020, 52, 361-366.	3.8	19
10	Association of fine particulate matter exposure with acute noncardiovascular critical illnesses and in-hospital outcomes in patients receiving intensive cardiac care. BMC Public Health, 2020, 20, 610.	2.9	2
11	Acute myocardial injury is common in patients with COVID-19 and impairs their prognosis. Heart, 2020, 106, 1154-1159.	2.9	162
12	Influence of Gender on Clinical Characteristics and Outcomes in Chinese Patients With Hypertrophic Cardiomyopathy. American Journal of the Medical Sciences, 2020, 360, 517-524.	1.1	8
13	Virtual fractional flow reserve and virtual coronary stent guided percutaneous coronary intervention. Cardiology Journal, 2020, 27, 318-319.	1.2	2
14	The impact of renal function on the prognostic value of N-terminal proâ€"B-type natriuretic peptide in patients with coronary artery disease. Cardiology Journal, 2020, 26, 696-703.	1.2	1
15	The bifunctional SDFâ€1â€AnxA5 fusion protein protects cardiac function after myocardial infarction. Journal of Cellular and Molecular Medicine, 2019, 23, 7673-7684.	3.6	22
16	The triglyceride paradox in the mortality of coronary artery disease. Lipids in Health and Disease, 2019, 18, 21.	3.0	17
17	Influence of age on the effect of reduced renal function on outcomes in patients with coronary artery disease. BMC Public Health, 2019, 19, 205.	2.9	2
18	No modifying effect of nutritional status on statins therapy in relation to all-cause death in older patients with coronary artery disease. Aging Clinical and Experimental Research, 2018, 30, 1071-1077.	2.9	1

#	Article	IF	Citations
19	Efficacy of Different Types of Exercise-Based Cardiac Rehabilitation on Coronary Heart Disease: a Network Meta-analysis. Journal of General Internal Medicine, 2018, 33, 2201-2209.	2.6	36
20	The impact of age on the implementation of evidence-based medications in patients with coronary artery disease and its prognostic significance: a retrospective cohort study. BMC Public Health, 2018, 18, 150.	2.9	11
21	Characterization of Recombinant Adeno-Associated Viral Transduction and Safety Profiles in Cardiomyocytes. Cellular Physiology and Biochemistry, 2018, 48, 1894-1900.	1.6	11
22	CHADS2, CHA2DS2-VASc and R2CHADS2 scores predict mortality in patients with coronary artery disease. Internal and Emergency Medicine, 2017, 12, 479-486.	2.0	25
23	Trends in prescribing rate of statins at discharge and modifiable factors in patients with atherosclerotic cardiovascular disease. Internal and Emergency Medicine, 2017, 12, 1121-1129.	2.0	9
24	Body Composition and Mortality in Coronary Artery Disease With Mild Renal Insufficiency in Chinese Patients. , 2017, 27, 187-193.		5
25	The correlation between serum total bilirubin and outcomes in patients with different subtypes of coronary artery disease. Clinica Chimica Acta, 2017, 465, 101-105.	1.1	29
26	Relation of premature atrial complexes with stroke and death: Systematic review and metaâ€analysis. Clinical Cardiology, 2017, 40, 962-969.	1.8	30
27	The influence of metabolic syndrome and diabetes mellitus on the N-terminal pro-B-type natriuretic peptide level and its prognostic performance in patients with coronary artery disease. Coronary Artery Disease, 2017, 28, 159-165.	0.7	1
28	Fibrinogen is related to long-term mortality in Chinese patients with acute coronary syndrome but failed to enhance the prognostic value of the GRACE score. Oncotarget, 2017, 8, 20622-20629.	1.8	7
29	The influence of body composition on renal function in patients with coronary artery disease and its prognostic significance: a retrospective cohort study. Cardiovascular Diabetology, 2016, 15, 106.	6.8	9
30	The Prognosis of Patients With Nonobstructive Coronary Artery Disease Versus Normal Arteries Determined by Invasive Coronary Angiography or Computed Tomography Coronary Angiography. Medicine (United States), 2016, 95, e3117.	1.0	28
31	The influence of age on the clinical implications of N-terminal pro-B-type natriuretic peptide in acute coronary syndrome. Internal and Emergency Medicine, 2016, 11, 1077-1086.	2.0	4
32	Relation between serum calcium levels and mortality in patients with coronary artery disease. European Heart Journal Supplements, 2016, 18, F39-F39.	0.1	1
33	Influence of Renal Insufficiency on the Prescription of Evidence-Based Medicines in Patients With Coronary Artery Disease and Its Prognostic Significance. Medicine (United States), 2016, 95, e2740.	1.0	3
34	Admission Serum Calcium Levels Improve the GRACE Risk Score Prediction of Hospital Mortality in Patients With Acute Coronary Syndrome. Clinical Cardiology, 2016, 39, 516-523.	1.8	27
35	Understanding the controversy surrounding the correlation between fibrinogen level and prognosis of coronary artery diseaseâ€"The role of the subtypes of coronary artery disease. International Journal of Cardiology, 2016, 222, 968-972.	1.7	3
36	Relation between admission plasma fibrinogen levels and mortality in Chinese patients with coronary artery disease. Scientific Reports, 2016, 6, 30506.	3.3	17

#	Article	IF	Citations
37	The additional prognostic performance of natriuretic peptides, nitrite/nitrate and superoxide dismutase on top of the GRACE score in STEMI patients. International Journal of Cardiology, 2016, 215, 37.	1.7	0
38	The effect of activated clotting time values for patients undergoing percutaneous coronary intervention: A systematic review and meta-analysis. Thrombosis Research, 2016, 144, 202-209.	1.7	5
39	Gender Disparity in the Safety and Efficacy of Radial and Femoral Access for Coronary Intervention. Angiology, 2016, 67, 810-819.	1.8	16
40	The influence of body composition on the N-terminal pro-B-type natriuretic peptide level and its prognostic performance in patients with acute coronary syndrome: a cohort study. Cardiovascular Diabetology, 2016, 15, 58.	6.8	9
41	Renal insufficiency and mortality in coronary artery disease with reduced ejection fraction. European Journal of Internal Medicine, 2016, 29, 78-87.	2.2	1
42	Comments on Li et al. HbA1c and all-cause mortality risk among patients with type 2 diabetes. International Journal of Cardiology. 2015; 202:490â€“496. International Journal of Cardiology, 2016, 203, 445-446.	1.7	1
43	Nutritional state predicts all-cause death independent of comorbidities in geriatric patients with coronary artery disease. Journal of Nutrition, Health and Aging, 2016, 20, 199-204.	3.3	11
44	Increased interventricular septum wall thickness predicts allâ€cause death in patients with coronary artery disease. Internal Medicine Journal, 2015, 45, 275-283.	0.8	12
45	Association Between Bisphosphonates Therapy and Incident Myocardial Infarction. Journal of Cardiovascular Pharmacology, 2015, 66, 468-477.	1.9	4
46	Meta-Analysis of Relation Between Oral Î²-Blocker Therapy and Outcomes in Patients With Acute Myocardial Infarction Who Underwent Percutaneous Coronary Intervention. American Journal of Cardiology, 2015, 115, 1529-1538.	1.6	68
47	Relation between admission serum potassium levels and long-term mortality in acute coronary syndrome. Internal and Emergency Medicine, 2015, 10, 927-935.	2.0	19
48	Lean mass index, body fat and survival in Chinese patients with coronary artery disease. QJM - Monthly Journal of the Association of Physicians, 2015, 108, 641-647.	0.5	13
49	Heparin is Not Inferior to Bivalirudin in Percutaneous Coronary Interventionâ€"Focusing on the Effect of Glycoprotein IIb/IIIa Inhibitor Use. Angiology, 2015, 66, 845-855.	1.8	8
50	Inappropriate left ventricular mass and poor outcomes in patients with angina pectoris and normal ejection fraction. Coronary Artery Disease, 2015, 26, 163-169.	0.7	3
51	Target lesion calcification and risk of adverse outcomes in patients with drug-eluting stents. Herz, 2015, 40, 1097-1106.	1.1	6
52	The efficacy and safety of prehospital therapeutic hypothermia in patients with out-of-hospital cardiac arrest: A systematic review and meta-analysis. Resuscitation, 2015, 96, 170-179.	3.0	22
53	Subclassification of left ventricular hypertrophy based on dilation stratifies coronary artery disease patients with distinct risk. European Journal of Clinical Investigation, 2014, 44, 893-901.	3.4	14
