## Nicolas A Crossley

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/3861112/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	The incidence of non-affective psychotic disorders in Chile between 2005 and 2018: results from a national register of over 30 000 cases. Psychological Medicine, 2022, 52, 914-923.	4.5	9
2	Effects of socioeconomic status in cognition of people with schizophrenia: results from a Latin American collaboration network with 1175 subjects. Psychological Medicine, 2022, 52, 2177-2188.	4.5	13
3	Physical and mental health impact of COVID-19 on children, adolescents, and their families: The Collaborative Outcomes study on Health and Functioning during Infection Times - Children and Adolescents (COH-FIT-C&A). Journal of Affective Disorders, 2022, 299, 367-376.	4.1	33
4	Functional Dysconnectivity in Ventral Striatocortical Systems in 22q11.2 Deletion Syndrome. Schizophrenia Bulletin, 2022, 48, 485-494.	4.3	2
5	Gender, age and geographical representation over the past 50 years of schizophrenia research. Psychiatry Research, 2022, 307, 114279.	3.3	3
6	Genetic variants associated with longitudinal changes in brain structure across the lifespan. Nature Neuroscience, 2022, 25, 421-432.	14.8	75
7	The enduring gap in educational attainment in schizophrenia according to the past 50 years of published research: a systematic review and meta-analysis. Lancet Psychiatry,the, 2022, 9, 565-573.	7.4	12
8	Childhood adversity increases risk of psychotic experiences in patients with substance use disorder. Psychiatry Research, 2022, 316, 114733.	3.3	4
9	Implementation of early psychosis services in Latin America: A scoping review. Microbial Biotechnology, 2021, 15, 1104-1114.	1.7	17
10	ls treatment-resistant schizophrenia associated with distinct neurobiological callosal connectivity abnormalities?. CNS Spectrums, 2021, 26, 545-549.	1.2	4
11	Integrated metastate functional connectivity networks predict change in symptom severity in clinical high risk for psychosis. Human Brain Mapping, 2021, 42, 439-451.	3.6	2
12	Structural brain abnormalities in schizophrenia in adverse environments: examining the effect of poverty and violence in six Latin American cities. British Journal of Psychiatry, 2021, 218, 112-118.	2.8	10
13	Pharmacogenetics in Psychiatry: Perceived Value and Opinions in a Chilean Sample of Practitioners. Frontiers in Pharmacology, 2021, 12, 657985.	3.5	4
14	Interactions between hippocampal activity and striatal dopamine in people at clinical high risk for psychosis: relationship to adverse outcomes. Neuropsychopharmacology, 2021, 46, 1468-1474.	5.4	25
15	Regional brain atrophy is related to social cognition impairment in multiple sclerosis. Arquivos De Neuro-Psiquiatria, 2021, 79, 666-675.	0.8	0
16	The ascending arousal system promotes optimal performance through mesoscale network integration in a visuospatial attentional task. Network Neuroscience, 2021, 5, 890-910.	2.6	15
17	Predictors of clozapine discontinuation at 2†years in treatment-resistant schizophrenia. Schizophrenia Research, 2021, 235, 102-108.	2.0	6
18	Abnormal nodal and global network organization in resting state functional MRI from subjects with the 22q11 deletion syndrome. Scientific Reports, 2021, 11, 21623.	3.3	2

NICOLAS A CROSSLEY

#	Article	IF	CITATIONS
19	Diversity matters: opportunities in the study of the genetics of psychotic disorders in low- and middle-income countries in Latin America. Revista Brasileira De Psiquiatria, 2021, 43, 631-637.	1.7	10
20	How mental health care should change as a consequence of the COVID-19 pandemic. Lancet Psychiatry,the, 2020, 7, 813-824.	7.4	1,101
21	Social cognition in Multiple Sclerosis is associated to changes in brain connectivity: A resting-state fMRI study. Multiple Sclerosis and Related Disorders, 2020, 45, 102333.	2.0	10
22	Transitions between human functional brain networks reveal complex, cost-efficient and behaviorally-relevant temporal paths. NeuroImage, 2020, 219, 117027.	4.2	19
23	Mapping Subcortical Brain Alterations in 22q11.2 Deletion Syndrome: Effects of Deletion Size and Convergence With Idiopathic Neuropsychiatric Illness. American Journal of Psychiatry, 2020, 177, 589-600.	7.2	55
24	Resting state fMRI based multilayer network configuration in patients with schizophrenia. NeuroImage: Clinical, 2020, 25, 102169.	2.7	46
25	A pupil size, eye-tracking and neuropsychological dataset from ADHD children during a cognitive task. Scientific Data, 2019, 6, 25.	5.3	18
26	Association Between Fractional Amplitude of Low-Frequency Spontaneous Fluctuation and Degree Centrality in Children and Adolescents. Brain Connectivity, 2019, 9, 379-387.	1.7	6
27	Using fMRI connectivity to define a treatment-resistant form of post-traumatic stress disorder. Science Translational Medicine, 2019, 11, .	12.4	65
28	Clozapine-associated neutropenia in Latin America. International Clinical Psychopharmacology, 2019, 34, 257-263.	1.7	6
29	High prevalence of metabolic alterations in Latin American patients at initial stages of psychosis. Microbial Biotechnology, 2019, 13, 1382-1388.	1.7	5
30	Associations between children's family environment, spontaneous brain oscillations, and emotional and behavioral problems. European Child and Adolescent Psychiatry, 2019, 28, 835-845.	4.7	9
31	Imaging Social and Environmental Factors as Modulators of Brain Dysfunction: Time to Focus on Developing Non-Western Societies. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2019, 4, 8-15.	1.5	14
32	Early treatment resistance in a Latin-American cohort of patients with schizophrenia. Schizophrenia Research, 2018, 199, 380-385.	2.0	12
33	Association between abnormal brain functional connectivity in children and psychopathology: A study based on graph theory and machine learning. World Journal of Biological Psychiatry, 2018, 19, 119-129.	2.6	13
34	The Genetics of Endophenotypes of Neurofunction to Understand Schizophrenia (GENUS) consortium: A collaborative cognitive and neuroimaging genetics project. Schizophrenia Research, 2018, 195, 306-317.	2.0	17
35	Structural Network Disorganization in Subjects at Clinical High Risk for Psychosis. Schizophrenia Bulletin, 2017, 43, sbw110.	4.3	38
36	Coordinated brain development: exploring the synchrony between changes in grey and white matter during childhood maturation. Brain Imaging and Behavior, 2017, 11, 808-817.	2.1	19

NICOLAS A CROSSLEY

#	Article	IF	CITATIONS
37	Using neuroimaging to help predict the onset of psychosis. NeuroImage, 2017, 145, 209-217.	4.2	54
38	Connectomic correlates of response to treatment in first-episode psychosis. Brain, 2017, 140, 487-496.	7.6	47
39	Network-Level Dysconnectivity in Drug-NaÃ <sup>-</sup> ve First-Episode Psychosis: Dissociating Transdiagnostic and Diagnosis-Specific Alterations. Neuropsychopharmacology, 2017, 42, 933-940.	5.4	45
40	Whole-Brain Atrophy Differences between Progressive Supranuclear Palsy and Idiopathic Parkinson's Disease. Frontiers in Aging Neuroscience, 2016, 8, 218.	3.4	7
41	Connectome hubs at resting state in children and adolescents: Reproducibility and psychopathological correlation. Developmental Cognitive Neuroscience, 2016, 20, 2-11.	4.0	13
42	HPA-axis function and grey matter volume reductions: imaging the diathesis-stress model in individuals at ultra-high risk of psychosis. Translational Psychiatry, 2016, 6, e797-e797.	4.8	24
43	Increased Global Functional Connectivity Correlates with LSD-Induced Ego Dissolution. Current Biology, 2016, 26, 1043-1050.	3.9	371
44	Meta-connectomics: human brain network and connectivity meta-analyses. Psychological Medicine, 2016, 46, 897-907.	4.5	44
45	Authors' reply. British Journal of Psychiatry, 2016, 208, 298-299.	2.8	Ο
46	Default mode network maturation and psychopathology in children and adolescents. Journal of Child Psychology and Psychiatry and Allied Disciplines, 2016, 57, 55-64.	5.2	31
47	Altered Hub Functioning and Compensatory Activations in the Connectome: A Meta-Analysis of Functional Neuroimaging Studies in Schizophrenia. Schizophrenia Bulletin, 2016, 42, 434-442.	4.3	72
48	Deep sleep divides the cortex into opposite modes of anatomical–functional coupling. Brain Structure and Function, 2016, 221, 4221-4234.	2.3	51
49	Temporal stability of network centrality in control and default mode networks: Specific associations with externalizing psychopathology in children and adolescents. Human Brain Mapping, 2015, 36, 4926-4937.	3.6	25
50	Structural covariance in schizophrenia and first-episode psychosis: An approach based on graph analysis. Journal of Psychiatric Research, 2015, 71, 89-96.	3.1	28
51	Neuroimaging distinction between neurological and psychiatric disorders. British Journal of Psychiatry, 2015, 207, 429-434.	2.8	39
52	Decreased centrality of subcortical regions during the transition to adolescence: A functional connectivity study. NeuroImage, 2015, 104, 44-51.	4.2	43
53	Quantitative Prediction of Individual Psychopathology in Trauma Survivors Using Resting-State fMRI. Neuropsychopharmacology, 2014, 39, 681-687.	5.4	69
54	The hubs of the human connectome are generally implicated in the anatomy of brain disorders. Brain, 2014, 137, 2382-2395.	7.6	971

#	Article	IF	CITATIONS
55	Age effects on the default mode and control networks in typically developing children. Journal of Psychiatric Research, 2014, 58, 89-95.	3.1	74
56	Cognitive relevance of the community structure of the human brain functional coactivation network. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 11583-11588.	7.1	422
57	Neurophysiological Alterations in the Prepsychotic Phases. Current Pharmaceutical Design, 2012, 18, 479-485.	1.9	7
58	Gray matter alterations related to P300 abnormalities in subjects at high risk for psychosis: Longitudinal MRI-EEG study. NeuroImage, 2011, 55, 320-328.	4.2	52
59	White matter alterations related to P300 abnormalities in individuals at high risk for psychosis: an MRl–EEG study. Journal of Psychiatry and Neuroscience, 2011, 36, 239-248.	2.4	46
60	Efficacy of atypical <i>v.</i> typical antipsychotics in the treatment of early psychosis: meta-analysis. British Journal of Psychiatry, 2010, 196, 434-439.	2.8	126
61	Superior temporal lobe dysfunction and frontotemporal dysconnectivity in subjects at risk of psychosis and in firstâ€episode psychosis. Human Brain Mapping, 2009, 30, 4129-4137.	3.6	189
62	Empirical Evidence of Bias in the Design of Experimental Stroke Studies. Stroke, 2008, 39, 929-934.	2.0	214
