#	ARTICLE	IF	CITATIONS
1	The Association of Contemporary Screen Behaviours with Physical Activity, Sedentary Behaviour and Sleep in Adolescents: a Cross-sectional Analysis of the Millennium Cohort Study. <i>International Journal of Behavioral Medicine</i> , 2023, 30, 122-132.	1.7	3
2	International trends in screen-based behaviours from 2012 to 2019. <i>Preventive Medicine</i> , 2022, 154, 106909.	3.4	7
3	Microbiota composition is moderately associated with greenspace composition in a UK cohort of twins. <i>Science of the Total Environment</i> , 2022, 813, 152321.	8.0	7
4	“People don't get cancer, families do”: Co-development of a social physical activity intervention for people recently affected by a cancer diagnosis. <i>European Journal of Cancer Care</i> , 2022, 31, .	1.5	5
5	Food Sales and Adult Weight Status: Results of a Cross-Sectional Study in England. <i>Nutrients</i> , 2022, 14, 1745.	4.1	0
6	Quantitative Environmental Equity Analysis of Perceived Accessibility to Urban Parks in Osaka Prefecture, Japan. <i>Applied Spatial Analysis and Policy</i> , 2021, 14, 337-354.	2.0	17
7	From evidence to practice: Developing best practice guidelines for the delivery of activities to people living with moderate to advanced dementia using a pragmatic observational study. <i>Dementia</i> , 2021, 20, 1604-1616.	2.0	3
8	Using point-of-sale data to examine tobacco pricing across neighbourhoods in Scotland. <i>Tobacco Control</i> , 2021, 30, 168-176.	3.2	4
9	Cross-sectional and prospective associations between active living environments and accelerometer-assessed physical activity in the EPIC-Norfolk cohort. <i>Health and Place</i> , 2021, 67, 102490.	3.3	3
10	Exploring influences on evaluation practice: a case study of a national physical activity programme. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2021, 18, 31.	4.6	4
11	Influences on the Uptake of Health and Well-being Apps and Curated App Portals: Think-Along and Interview Study. <i>JMIR MHealth and UHealth</i> , 2021, 9, e27173.	3.7	16
12	Feasibility of investigating methylphenidate for the treatment of sarcoidosis-associated fatigue (the Tj ETQqO O O rgBT /Overlock 10 Tf 5 Research, 2021, 8, e000814.	3.0	3
13	Age-related change in sedentary behavior during childhood and adolescence: A systematic review and meta-analysis. <i>Obesity Reviews</i> , 2021, 22, e13263.	6.5	21
14	Understanding Uptake of Digital Health Products: Methodology Tutorial for a Discrete Choice Experiment Using the Bayesian Efficient Design. <i>Journal of Medical Internet Research</i> , 2021, 23, e32365.	4.3	13
15	An online family-based self-monitoring and goal-setting intervention to improve children's physical activity: the FRESH feasibility trial and three-arm pilot RCT. <i>Public Health Research</i> , 2021, 9, 1-116.	1.3	1
16	The socio-ecological determinants of change in school travel mode over the transition from childhood to adolescence and the association with physical activity intensity. <i>Health and Place</i> , 2021, 72, 102667.	3.3	2
17	Perceptions of Factors Influencing Engagement With Health and Well-being Apps in the United Kingdom: Qualitative Interview Study. <i>JMIR MHealth and UHealth</i> , 2021, 9, e29098.	3.7	20
18	A systems approach to the exploration of research activity and relationships within a local authority. <i>Health Research Policy and Systems</i> , 2021, 19, 137.	2.8	2

#	ARTICLE	IF	CITATIONS
19	Science-based analysis for climate action: how HSBC Bank uses the EnROADS climate policy simulation. <i>System Dynamics Review</i> , 2021, 37, 333-352.	1.9	4
20	Residential neighbourhood greenspace is associated with reduced risk of cardiovascular disease: A prospective cohort study. <i>PLoS ONE</i> , 2020, 15, e0226524.	2.5	42
21	Digital screen use for a road safety campaign message was not associated with road safety awareness of passers-by: A quasi-experimental study. <i>Journal of Safety Research</i> , 2020, 72, 61-66.	3.6	3
22	Spatial Lifecourse Epidemiology Reporting Standards (ISLE-ReSt) statement. <i>Health and Place</i> , 2020, 61, 102243.	3.3	57
23	The Climate Action Simulation. <i>Simulation and Gaming</i> , 2020, 51, 114-140.	1.9	50
24	A whole family-based physical activity promotion intervention: findings from the families reporting every step to health (FRESH) pilot randomised controlled trial. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2020, 17, 120.	4.6	17
25	A systematic review of the use and reporting of evaluation frameworks within evaluations of physical activity interventions. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2020, 17, 107.	4.6	18
26	Embedding Physical Activity into the Healthcare Curriculum – A Case Study. <i>Education for Primary Care</i> , 2020, 31, 176-179.	0.6	5
27	A scoping review of evaluation frameworks and their applicability to real-world physical activity and dietary change programme evaluation. <i>BMC Public Health</i> , 2020, 20, 1000.	2.9	21
28	Influences on the Uptake of and Engagement With Health and Well-Being Smartphone Apps: Systematic Review. <i>Journal of Medical Internet Research</i> , 2020, 22, e17572.	4.3	126
29	Title is missing!. , 2020, 15, e0226524.		0
30	Title is missing!. , 2020, 15, e0226524.		0
31	Title is missing!. , 2020, 15, e0226524.		0
32	Title is missing!. , 2020, 15, e0226524.		0
33	Title is missing!. , 2020, 15, e0226524.		0
34	Heat exposure assessment based on individual daily mobility patterns in Dhaka, Bangladesh. <i>Computers, Environment and Urban Systems</i> , 2019, 77, 101367.	7.1	11
35	Primary care referral for knee MRI in the United Kingdom: Association with demography and subsequent surgical intervention. <i>Journal of Magnetic Resonance Imaging</i> , 2019, 49, e176-e182.	3.4	0
36	Nature-Based Interventions for Improving Health and Wellbeing: The Purpose, the People and the Outcomes. <i>Sports</i> , 2019, 7, 141.	1.7	143

#	ARTICLE	IF	CITATIONS
37	The development and feasibility of a randomised family-based physical activity promotion intervention: the Families Reporting Every Step to Health (FRESH) study. Pilot and Feasibility Studies, 2019, 5, 21.	1.2	16
38	A systematic review of just-in-time adaptive interventions (JITAs) to promote physical activity. International Journal of Behavioral Nutrition and Physical Activity, 2019, 16, 31.	4.6	183
39	Improving primary care Access in Context and Theory (I-ACT trial): a theory-informed randomised cluster feasibility trial using a realist perspective. Trials, 2019, 20, 193.	1.6	2
40	Whole family-based physical activity promotion intervention: the Families Reporting Every Step to Health pilot randomised controlled trial protocol. BMJ Open, 2019, 9, e030902.	1.9	5
41	The development of an index of rural deprivation: A case study of Norfolk, England. Social Science and Medicine, 2019, 227, 93-103.	3.8	23
42	Geographical access to GPs and modes of cancer diagnosis in England: a cross-sectional study. Family Practice, 2019, 36, 284-290.	1.9	13
43	An evaluation of the effects of lowering blood alcohol concentration limits for drivers on the rates of road traffic accidents and alcohol consumption: a natural experiment. Lancet, The, 2019, 393, 321-329.	13.7	37
44	Impact of legislation to reduce the drink-drive limit on road traffic accidents and alcohol consumption in Scotland: a natural experiment study. Public Health Research, 2019, 7, 1-46.	1.3	2
45	Descriptive epidemiology of changes in objectively measured sedentary behaviour and physical activity: six-year follow-up of the EPIC-Norfolk cohort. International Journal of Behavioral Nutrition and Physical Activity, 2018, 15, 122.	4.6	16
46	Ratcheting ambition to limit warming to 1.5°C – trade-offs between emission reductions and carbon dioxide removal. Environmental Research Letters, 2018, 13, 064028.	5.2	56
47	Access to primary care for socio-economically disadvantaged older people in rural areas: exploring realist theory using structural equation modelling in a linked dataset. BMC Medical Research Methodology, 2018, 18, 57.	3.1	11
48	The health benefits of the great outdoors: A systematic review and meta-analysis of greenspace exposure and health outcomes. Environmental Research, 2018, 166, 628-637.	7.5	881
49	Longitudinal associations between weather, season, and mode of commuting to school among Spanish youths. Scandinavian Journal of Medicine and Science in Sports, 2018, 28, 2677-2685.	2.9	9
50	Access to primary care for socio-economically disadvantaged older people in rural areas: A qualitative study. PLoS ONE, 2018, 13, e0193952.	2.5	27
51	Measuring activity in patients with sarcoidosis - a pilot trial of two wrist-worn accelerometer devices. Sarcoidosis Vasculitis and Diffuse Lung Diseases, 2018, 35, 62-68.	0.2	0
52	The Built Environment and Cognitive Disorders: Results From the Cognitive Function and Ageing Study II. American Journal of Preventive Medicine, 2017, 53, 25-32.	3.0	68
53	A systematic review of the physical activity assessment tools used in primary care. Family Practice, 2017, 34, 384-391.	1.9	19
54	The association between air pollution and type 2 diabetes in a large cross-sectional study in Leicester: The CHAMPIONS Study. Environment International, 2017, 104, 41-47.	10.0	30

#	ARTICLE	IF	CITATIONS
55	Micro-scale environment and mental health in later life: Results from the Cognitive Function and Ageing Study II (CFAS II). <i>Journal of Affective Disorders</i> , 2017, 218, 359-364.	4.1	12
56	Changes in diet from age 10 to 14 years and prospective associations with school lunch choice. <i>Appetite</i> , 2017, 116, 259-267.	3.7	14
57	Changes in physical activity following total hip or knee arthroplasty: a matched case-control study from the EPIC-Norfolk cohort. <i>Clinical Rehabilitation</i> , 2017, 31, 1548-1557.	2.2	9
58	Seasonality in swimming and cycling: Exploring a limitation of accelerometer based studies. <i>Preventive Medicine Reports</i> , 2017, 7, 16-19.	1.8	8
59	Impact of travel time and rurality on presentation and outcomes of symptomatic colorectal cancer: a cross-sectional cohort study in primary care. <i>British Journal of General Practice</i> , 2017, 67, e460-e466.	1.4	24
60	Is foreign direct investment good for health in low and middle income countries? An instrumental variable approach. <i>Social Science and Medicine</i> , 2017, 181, 74-82.	3.8	52
61	Dog ownership supports the maintenance of physical activity during poor weather in older English adults: cross-sectional results from the EPIC Norfolk cohort. <i>Journal of Epidemiology and Community Health</i> , 2017, 71, 905-911.	3.7	38
62	Recruiting adult participants to physical activity intervention studies using sport: a systematic review. <i>BMJ Open Sport and Exercise Medicine</i> , 2017, 3, e000231.	2.9	32
63	Weather and children's physical activity; how and why do relationships vary between countries?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 74.	4.6	74
64	Feasibility study of a randomised controlled trial to investigate the treatment of sarcoidosis-associated fatigue with methylphenidate (FaST-MP): a study protocol. <i>BMJ Open</i> , 2017, 7, e018532.	1.9	6
65	Weather, day length and physical activity in older adults: Cross-sectional results from the European Prospective Investigation into Cancer and Nutrition (EPIC) Norfolk Cohort. <i>PLoS ONE</i> , 2017, 12, e0177767.	2.5	45
66	Missed opportunities in the evaluation of public health interventions: a case study of physical activity programmes. <i>BMC Public Health</i> , 2017, 17, 674.	2.9	13
67	Does home neighbourhood supportiveness influence the location more than volume of adolescent's physical activity? An observational study using global positioning systems. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2017, 14, 149.	4.6	6
68	How effective is community physical activity promotion in areas of deprivation for inactive adults with cardiovascular disease risk and/or mental health concerns? Study protocol for a pragmatic observational evaluation of the 'Active Herts' physical activity programme. <i>BMJ Open</i> , 2017, 7, e017783.	1.9	10
69	Health impacts of the M74 urban motorway extension: a mixed-method natural experimental study. <i>Public Health Research</i> , 2017, 5, 1-164.	1.3	8
70	A systematic review of health service interventions to reduce use of unplanned health care in rural areas. <i>Journal of Evaluation in Clinical Practice</i> , 2016, 22, 145-155.	1.8	10
71	Land use mix and five-year mortality in later life: Results from the Cognitive Function and Ageing Study. <i>Health and Place</i> , 2016, 38, 54-60.	3.3	14
72	Walking groups in socioeconomically deprived communities: A qualitative study using photo elicitation. <i>Health and Place</i> , 2016, 39, 26-33.	3.3	26

#	ARTICLE	IF	CITATIONS
73	School grounds and physical activity: Associations at secondary schools, and over the transition from primary to secondary schools. <i>Health and Place</i> , 2016, 39, 34-42.	3.3	14
74	Gamification of active travel to school: A pilot evaluation of the Beat the Street physical activity intervention. <i>Health and Place</i> , 2016, 39, 62-69.	3.3	70
75	How can GPS technology help us better understand exposure to the food environment? A systematic review. <i>SSM - Population Health</i> , 2016, 2, 196-205.	2.7	56
76	Geographical disparities in access to cancer management and treatment services in England. <i>Health and Place</i> , 2016, 42, 11-18.	3.3	34
77	Promoting physical activity interventions in communities with poor health and socio-economic profiles: A process evaluation of the implementation of a new walking group scheme. <i>Social Science and Medicine</i> , 2016, 169, 77-85.	3.8	26
78	Neighbourhood greenspace is associated with a slower decline in physical activity in older adults: A prospective cohort study. <i>SSM - Population Health</i> , 2016, 2, 683-691.	2.7	54
79	Residential neighbourhood greenspace is associated with reduced risk of incident diabetes in older people: a prospective cohort study. <i>BMC Public Health</i> , 2016, 16, 1171.	2.9	80
80	Perceived and Objectively Measured Environmental Correlates of Domain-Specific Physical Activity in Older English Adults. <i>Journal of Aging and Physical Activity</i> , 2016, 24, 599-616.	1.0	15
81	Access to primary care for socioeconomically disadvantaged older people in rural areas: a realist review. <i>BMJ Open</i> , 2016, 6, e010652.	1.9	55
82	The relationship between unhealthy food sales, socio-economic deprivation and childhood weight status: results of a cross-sectional study in England. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2016, 13, 21.	4.6	30
83	School policies, programmes and facilities, and objectively measured sedentary time, LPA and MVPA: associations in secondary school and over the transition from primary to secondary school. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2016, 13, 54.	4.6	33
84	The relationship between international trade and non-nutritional health outcomes: A systematic review of quantitative studies. <i>Social Science and Medicine</i> , 2016, 152, 9-17.	3.8	24
85	A novel methodology for identifying environmental exposures using GPS data. <i>International Journal of Geographical Information Science</i> , 2016, , 1-17.	4.8	5
86	Health impacts of the Cambridgeshire Guided Busway: a natural experimental study. <i>Public Health Research</i> , 2016, 4, 1-154.	1.3	33
87	Improving access to high-quality primary care for socioeconomically disadvantaged older people in rural areas: a mixed method study protocol: Figure A1. <i>BMJ Open</i> , 2015, 5, e009104.	1.9	13
88	Older people, the natural environment and common mental disorders: cross-sectional results from the Cognitive Function and Ageing Study. <i>BMJ Open</i> , 2015, 5, e007936.	1.9	48
89	Weekend opening in primary care: analysis of the General Practice Patient Survey. <i>British Journal of General Practice</i> , 2015, 65, e792-e798.	1.4	15
90	Community environment, cognitive impairment and dementia in later life: results from the Cognitive Function and Ageing Study. <i>Age and Ageing</i> , 2015, 44, 1005-1011.	1.6	77

#	ARTICLE	IF	CITATIONS
91	A spatial equity analysis of a public health intervention: a case study of an outdoor walking group provider within local authorities in England. <i>International Journal for Equity in Health</i> , 2015, 14, 106.	3.5	15
92	An assessment of the relevance of the home neighbourhood for understanding environmental influences on physical activity: how far from home do people roam?. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 100.	4.6	60
93	Associations between BMI and home, school and route environmental exposures estimated using GPS and GIS: do we see evidence of selective daily mobility bias in children?. <i>International Journal of Health Geographics</i> , 2015, 14, 8.	2.5	57
94	Is there evidence that walking groups have health benefits? A systematic review and meta-analysis. <i>British Journal of Sports Medicine</i> , 2015, 49, 710-715.	6.7	275
95	“Used to be as fit as a linnet” Beliefs, attitudes, and environmental supportiveness for physical activity in former mining areas in the North-East of England. <i>Social Science and Medicine</i> , 2015, 126, 110-118.	3.8	7
96	Change in objectively measured physical activity during the transition to adolescence. <i>British Journal of Sports Medicine</i> , 2015, 49, 730-736.	6.7	175
97	A longitudinal study of the distance that young people walk to school. <i>Health and Place</i> , 2015, 31, 133-137.	3.3	84
98	Are GIS-modelled routes a useful proxy for the actual routes followed by commuters?. <i>Journal of Transport and Health</i> , 2015, 2, 219-229.	2.2	35
99	The changing relationship between rainfall and children’s physical activity in spring and summer: a longitudinal study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 41.	4.6	25
100	Hydrogen bonding and molecular orientation at the liquid-vapour interface of water. <i>Physical Chemistry Chemical Physics</i> , 2015, 17, 8660-8669.	2.8	36
101	Signature properties of water: Their molecular electronic origins. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2015, 112, 6341-6346.	7.1	44
102	Sociospatial patterning of the use of new transport infrastructure: Walking, cycling and bus travel on the Cambridgeshire guided busway. <i>Journal of Transport and Health</i> , 2015, 2, 199-211.	2.2	18
103	The association between neighbourhood greenspace and type 2 diabetes in a large cross-sectional study. <i>BMJ Open</i> , 2014, 4, e006076.	1.9	89
104	Does walking explain associations between access to greenspace and lower mortality?. <i>Social Science and Medicine</i> , 2014, 107, 9-17.	3.8	89
105	How is post-industrial decline associated with the geography of physical activity? Evidence from the Health Survey for England. <i>Social Science and Medicine</i> , 2014, 104, 88-97.	3.8	11
106	How can planning add value to obesity prevention programmes? A qualitative study of planning and planners in the Healthy Towns programme in England. <i>Health and Place</i> , 2014, 30, 120-126.	3.3	5
107	Lost in translation? Theory, policy and practice in systems-based environmental approaches to obesity prevention in the Healthy Towns programme in England. <i>Health and Place</i> , 2014, 29, 60-66.	3.3	25
108	Is change in environmental supportiveness between primary and secondary school associated with a decline in children’s physical activity levels?. <i>Health and Place</i> , 2014, 29, 171-178.	3.3	15

#	ARTICLE	IF	CITATIONS
109	How well do modelled routes to school record the environments children are exposed to?: a cross-sectional comparison of GIS-modelled and GPS-measured routes to school. <i>International Journal of Health Geographics</i> , 2014, 13, 5.	2.5	62
110	Independent mobility on the journey to school: A joint cross-sectional and prospective exploration of social and physical environmental influences. <i>Journal of Transport and Health</i> , 2014, 1, 25-32.	2.2	76
111	Understanding the relationship between food environments, deprivation and childhood overweight and obesity: Evidence from a cross sectional England-wide study. <i>Health and Place</i> , 2014, 27, 68-76.	3.3	93
112	Social and geographic factors affecting the occurrence of cancer of unknown primary (CUP).. <i>Journal of Clinical Oncology</i> , 2014, 32, e17505-e17505.	1.6	0
113	Individual, socio-cultural and environmental predictors of uptake and maintenance of active commuting in children: longitudinal results from the SPEEDY study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2013, 10, 83.	4.6	73
114	Predictors of change differ for moderate and vigorous intensity physical activity and for weekdays and weekends: a longitudinal analysis. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2013, 10, 69.	4.6	39
115	Towards a better understanding of the relationship between greenspace and health: Development of a theoretical framework. <i>Landscape and Urban Planning</i> , 2013, 118, 62-69.	7.5	343
116	Developing and testing a street audit tool using Google Street View to measure environmental supportiveness for physical activity. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2013, 10, 103.	4.6	139
117	Children's sedentary behaviour: descriptive epidemiology and associations with objectively-measured sedentary time. <i>BMC Public Health</i> , 2013, 13, 1092.	2.9	40
118	Quantum Drude oscillator model of atoms and molecules: Many-body polarization and dispersion interactions for atomistic simulation. <i>Physical Review B</i> , 2013, 87, .	3.2	65
119	Association between diet and physical activity and sedentary behaviours in 9-10-year-old British White children. <i>Public Health</i> , 2013, 127, 231-240.	2.9	15
120	Is environmental setting associated with the intensity and duration of children's physical activity? Findings from the SPEEDY GPS study. <i>Health and Place</i> , 2013, 20, 62-65.	3.3	59
121	Family and home influences on children's after-school and weekend physical activity. <i>European Journal of Public Health</i> , 2013, 23, 805-810.	0.3	88
122	Food and drink consumption at school lunchtime: the impact of lunch type and contribution to overall intake in British 9-10-year-old children. <i>Public Health Nutrition</i> , 2013, 16, 1132-1139.	2.2	31
123	Breakfast consumption and daily physical activity in 9-10-year-old British children. <i>Public Health Nutrition</i> , 2013, 16, 1281-1290.	2.2	30
124	Neighbourhood, Route and Workplace-Related Environmental Characteristics Predict Adults' Mode of Travel to Work. <i>PLoS ONE</i> , 2013, 8, e67575.	2.5	68
125	Social and geographical factors affecting access to treatment of colorectal cancer: a cancer registry study. <i>BMJ Open</i> , 2012, 2, e000410.	1.9	39
126	Is a change in mode of travel to school associated with a change in overall physical activity levels in children? Longitudinal results from the SPEEDY study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 134.	4.6	30

#	ARTICLE	IF	CITATIONS
127	School related factors and 1yr change in physical activity amongst 9-11 year old English schoolchildren. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 153.	4.6	27
128	Virtual city models for assessing environmental equity of access to sunlight: a case study of Kyoto, Japan. <i>International Journal of Geographical Information Science</i> , 2012, 26, 1-13.	4.8	37
129	Road traffic crashes and the protective effect of road curvature over small areas. <i>Health and Place</i> , 2012, 18, 315-320.	3.3	10
130	A framework for understanding school based physical environmental influences on childhood obesity. <i>Health and Place</i> , 2012, 18, 639-648.	3.3	53
131	What can global positioning systems tell us about the contribution of different types of urban greenspace to children's physical activity?. <i>Health and Place</i> , 2012, 18, 586-594.	3.3	131
132	Is active travel to non-school destinations associated with physical activity in primary school children?. <i>Preventive Medicine</i> , 2012, 54, 224-228.	3.4	33
133	Local Food Outlets, Weight Status, and Dietary Intake. <i>American Journal of Preventive Medicine</i> , 2011, 40, 405-410.	3.0	96
134	The Influence of Distance to School on the Associations Between Active Commuting and Physical Activity. <i>Pediatric Exercise Science</i> , 2011, 23, 72-86.	1.0	43
135	Environmental correlates of adiposity in 9-10 year old children: Considering home and school neighbourhoods and routes to school. <i>Social Science and Medicine</i> , 2011, 72, 1411-1419.	3.8	62
