#	ARTICLE	IF	CITATIONS
1	Role of dietary patterns and acculturation in cancer risk and mortality among postmenopausal Hispanic women: results from the Women's Health Initiative (WHI). Zeitschrift Fur Gesundheitswissenschaften, 2022, 30, 811-822.	1.6	13
2	Implementing Community-Based Prostate Cancer Education in Rural South Carolina: a Collaborative Approach Through a Statewide Cancer Alliance. Journal of Cancer Education, 2022, 37, 163-168.	1.3	4
3	The Isocaloric Substitution of Plant-Based and Animal-Based Protein in Relation to Aging-Related Health Outcomes: A Systematic Review. Nutrients, 2022, 14, 272.	4.1	8
4	Neighborhood deprivation and risk of mortality among men with prostate cancer: Findings from a long-term follow-up study. Prostate, 2022, , .	2.3	10
5	The association between meat and fish intake by preparation methods and breast cancer in the Carolina Breast Cancer Study (CBCS). Breast Cancer Research and Treatment, 2022, 193, 187-201.	2.5	3
6	Recreational and occupational physical activity in relation to prostate cancer aggressiveness: the North Carolina-Louisiana Prostate Cancer Project (PCaP). Cancer Causes and Control, 2022, , .	1.8	1
7	Rural-Urban and racial/ethnic trends and disparities in early-onset and average-onset colorectal cancer. Cancer, 2021, 127, 239-248.	4.1	22
8	Dietary inflammatory potential, oxidative balance score, and risk of breast cancer: Findings from the Sister Study. International Journal of Cancer, 2021, 149, 615-626.	5.1	24
9	Dietary Advanced Glycation End-Products and Mortality after Breast Cancer in the Women's Health Initiative. Cancer Epidemiology Biomarkers and Prevention, 2021, 30, 2217-2226.	2.5	13
10	Post-cancer diagnosis dietary inflammatory potential is associated with survival among women diagnosed with colorectal cancer in the Women's Health Initiative. European Journal of Nutrition, 2020, 59, 965-977.	3.9	15
11	Day-to-day regularity in breakfast consumption is associated with weight status in a prospective cohort of women. International Journal of Obesity, 2020, 44, 186-194.	3.4	22
12	Dietary patterns and cancer risk. Nature Reviews Cancer, 2020, 20, 125-138.	28.4	150
13	Dietary Advanced Glycation End-products (AGE) and Risk of Breast Cancer in the Prostate, Lung, Colorectal and Ovarian Cancer Screening Trial (PLCO). Cancer Prevention Research, 2020, 13, 601-610.	1.5	30
14	Association among plasma 1,25(OH) 2 D, ratio of 1,25(OH) 2 D to 25(OH)D, and prostate cancer aggressiveness. Prostate, 2019, 79, 1117-1124.	2.3	19
15	Inflammatory Potential of Diet, Inflammation-Related Lifestyle Factors, and Risk of Pancreatic Cancer: Results from the NIH-AARP Diet and Health Study. Cancer Epidemiology Biomarkers and Prevention, 2019, 28, 1266-1270.	2.5	18
16	Adiposity does not modify the effect of the dietary inflammatory potential on type 2 diabetes incidence among a prospective cohort of men. Journal of Nutrition & Intermediary Metabolism, 2019, 16, 100095.	1.7	9
17	Dietary patterns based on the Mediterranean diet and DASH diet are inversely associated with high aggressive prostate cancer in PCaP. Annals of Epidemiology, 2019, 29, 16-22.e1.	1.9	32
18	Higher diet-dependent acid load is associated with risk of breast cancer: Findings from the sister study. International Journal of Cancer, 2019, 144, 1834-1843.	5.1	30

#	ARTICLE	IF	CITATIONS
19	Dietary inflammatory potential and risk of mortality in metabolically healthy and unhealthy phenotypes among overweight and obese adults. <i>Clinical Nutrition</i> , 2019, 38, 682-688.	5.0	55
20	Prostate Cancer Information Available in Health-Care Provider Offices: An Analysis of Content, Readability, and Cultural Sensitivity. <i>American Journal of Men's Health</i> , 2018, 12, 1160-1167.	1.6	13
21	A dietary pattern based on estrogen metabolism is associated with breast cancer risk in a prospective cohort of postmenopausal women. <i>International Journal of Cancer</i> , 2018, 143, 580-590.	5.1	14
22	An estrogen-related lifestyle score is associated with risk of postmenopausal breast cancer in the PLCO cohort. <i>Breast Cancer Research and Treatment</i> , 2018, 170, 613-622.	2.5	7
23	Inflammatory potential of diet and risk of pancreatic cancer in the Prostate, Lung, Colorectal and Ovarian (<sc>PLCO</sc>) Cancer Screening Trial. <i>International Journal of Cancer</i> , 2018, 142, 2461-2470.	5.1	28
24	Association between Post-Cancer Diagnosis Dietary Inflammatory Potential and Mortality among Invasive Breast Cancer Survivors in the Women's Health Initiative. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2018, 27, 454-463.	2.5	48
25	Statin use, high cholesterol and prostate cancer progression; results from HCaP&NC. <i>Prostate</i> , 2018, 78, 857-864.	2.3	7
26	Calcium, magnesium, and whole-milk intakes and high-aggressive prostate cancer in the North Carolina&Louisiana Prostate Cancer Project (PCaP). <i>American Journal of Clinical Nutrition</i> , 2018, 107, 799-807.	4.7	22
27	Proinflammatory diet is associated with increased risk of squamous cell head and neck cancer. <i>International Journal of Cancer</i> , 2018, 143, 1604-1610.	5.1	18
28	Talking About Your Prostate: Perspectives from Providers and Community Members. <i>Journal of Cancer Education</i> , 2018, 33, 1052-1060.	1.3	7
29	Proinflammatory Dietary Intake is Associated with Increased Risk of Colorectal Cancer: Results of a Case-Control Study in Argentina Using a Multilevel Modeling Approach. <i>Nutrition and Cancer</i> , 2018, 70, 61-68.	2.0	23
30	An Estrogen-Related Dietary Pattern and Postmenopausal Breast Cancer Risk in a Cohort of Women with a Family History of Breast Cancer. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2018, 27, 1223-1226.	2.5	4
31	Pancreatic cancer risk is modulated by inflammatory potential of diet and ABO genotype: a consortia-based evaluation and replication study. <i>Carcinogenesis</i> , 2018, 39, 1056-1067.	2.8	23
32	Renal cell carcinoma risk associated with lower intake of micronutrients. <i>Cancer Medicine</i> , 2018, 7, 4087-4097.	2.8	17
33	Dietary Inflammatory Index and Odds of Colorectal Cancer in a Case- Control Study from Iran. <i>Asian Pacific Journal of Cancer Prevention</i> , 2018, 19, 1999-2006.	1.2	8
34	Inflammatory potential of diet and all-cause, cardiovascular, and cancer mortality in National Health and Nutrition Examination Survey III Study. <i>European Journal of Nutrition</i> , 2017, 56, 683-692.	3.9	92
35	Dietary Inflammatory Index and Risk of Colorectal Adenoma Recurrence: A Pooled Analysis. <i>Nutrition and Cancer</i> , 2017, 69, 238-247.	2.0	18
36	Grilled, Barbecued, and Smoked Meat Intake and Survival Following Breast Cancer. <i>Journal of the National Cancer Institute</i> , 2017, 109, djw299.	6.3	31

#	ARTICLE	IF	CITATIONS
37	Dietary inflammatory index and odds of colorectal cancer in a case-control study from Jordan. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017, 42, 744-749.	1.9	22
38	The Dietary Inflammatory Index Is Associated with Colorectal Cancer Risk in the Multiethnic Cohort. <i>Journal of Nutrition</i> , 2017, 147, jn242529.	2.9	73
39	Biomarker-calibrated nutrient intake and healthy diet index associations with mortality risks among older and frail women from the Women's Health Initiative. <i>American Journal of Clinical Nutrition</i> , 2017, 105, 1399-1407.	4.7	32
40	Travel distance to screening facilities and completion of abnormal mammographic follow-up among disadvantaged women. <i>Annals of Epidemiology</i> , 2017, 27, 35-41.	1.9	11
41	Changes in the Inflammatory Potential of Diet Over Time and Risk of Colorectal Cancer in Postmenopausal Women. <i>American Journal of Epidemiology</i> , 2017, 186, 514-523.	3.4	25
42	The association between an inflammatory diet and global cognitive function and incident dementia in older women: The Women's Health Initiative Memory Study. <i>Alzheimer's and Dementia</i> , 2017, 13, 1187-1196.	0.8	83
43	Obesity Mediates the Association between Mediterranean Diet Consumption and Insulin Resistance and Inflammation in US Adults. <i>Journal of Nutrition</i> , 2017, 147, 563-571.	2.9	50
44	Dietary Inflammatory Index, Bone Mineral Density, and Risk of Fracture in Postmenopausal Women: Results From the Women's Health Initiative. <i>Journal of Bone and Mineral Research</i> , 2017, 32, 1136-1146.	2.8	76
45	Genetic polymorphisms of phase I metabolizing enzyme genes, their interaction with lifetime grilled and smoked meat intake, and breast cancer incidence. <i>Annals of Epidemiology</i> , 2017, 27, 208-214.e1.	1.9	15
46	A pooled analysis of dietary sugar/carbohydrate intake and esophageal and gastric cardia adenocarcinoma incidence and survival in the USA. <i>International Journal of Epidemiology</i> , 2017, 46, 1836-1846.	1.9	23
47	Dietary patterns and risk of pancreatic cancer: a systematic review. <i>Nutrition Reviews</i> , 2017, 75, 883-908.	5.8	64
48	Maternal inflammatory diet and adverse pregnancy outcomes: Circulating cytokines and genomic imprinting as potential regulators?. <i>Epigenetics</i> , 2017, 12, 688-697.	2.7	68
49	Case-control study of candidate gene methylation and adenomatous polyp formation. <i>International Journal of Colorectal Disease</i> , 2017, 32, 183-192.	2.2	12
50	Polycyclic aromatic hydrocarbons and postmenopausal breast cancer: An evaluation of effect measure modification by body mass index and weight change. <i>Environmental Research</i> , 2017, 152, 17-25.	7.5	24
51	Types of oral contraceptives and breast cancer survival among women enrolled in Medicaid: A competing-risk model. <i>Maturitas</i> , 2017, 95, 42-49.	2.4	4
52	Environmental Tobacco Smoke Exposure and Survival Following Breast Cancer. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2017, 26, 278-280.	2.5	2
53	Mediterranean diet, Dietary Approaches to Stop Hypertension (DASH) style diet, and metabolic health in U.S. adults. <i>Clinical Nutrition</i> , 2017, 36, 1301-1309.	5.0	71
54	An Integrated Approach to Addressing Chronic Disease Risk Factors in Financially Disadvantaged Women in South Carolina. <i>American Journal of Health Promotion</i> , 2017, 31, 325-332.	1.7	2

#	ARTICLE	IF	CITATIONS
55	Postdiagnosis Changes in Cigarette Smoking and Survival Following Breast Cancer. JNCI Cancer Spectrum, 2017, 1, .	2.9	27
56	Vehicular Trafficâ€Related Polycyclic Aromatic Hydrocarbon Exposure and Breast Cancer Incidence: The Long Island Breast Cancer Study Project (LIBCSP). Environmental Health Perspectives, 2016, 124, 30-38.	6.0	73
57	The National Veteran Sleep Disorder Study: Descriptive Epidemiology and Secular Trends, 2000â€2010. Sleep, 2016, 39, 1399-1410.	1.1	148
58	Longitudinal changes in the dietary inflammatory index: an assessment of the inflammatory potential of diet over time in postmenopausal women. European Journal of Clinical Nutrition, 2016, 70, 1374-1380.	2.9	27
59	Carotenoid intake and adipose tissue carotenoid levels in relation to prostate cancer aggressiveness among African-American and European-American men in the North Carolina-Louisiana prostate cancer project (PCaP). Prostate, 2016, 76, 1053-1066.	2.3	19
60	The Impact of Obesity on Surgical Outcome in Endometrial Cancer Patients: A Systematic Review. Journal of Gynecologic Surgery, 2016, 32, 149-157.	0.1	25
61	Polymorphisms in DNA repair genes, trafficâ€related polycyclic aromatic hydrocarbon exposure and breast cancer incidence. International Journal of Cancer, 2016, 139, 310-321.	5.1	28
62	Statin Use and Prostate Cancer Aggressiveness: Results from the Population-Based North Carolinaâ€Louisiana Prostate Cancer Project. Cancer Epidemiology Biomarkers and Prevention, 2016, 25, 670-677.	2.5	17
63	Association between dietary inflammatory potential and breast cancer incidence and death: results from the Womenâ€™s Health Initiative. British Journal of Cancer, 2016, 114, 1277-1285.	6.4	83
64	Intake of dietary antioxidants is inversely associated with biomarkers of oxidative stress among men with prostate cancer. British Journal of Nutrition, 2016, 115, 68-74.	2.3	20
65	Diet Quality and Mortality Risk in Metabolically Obese Normal-Weight Adults. Mayo Clinic Proceedings, 2016, 91, 1372-1383.	3.0	37
66	Patterns of change over time and history of the inflammatory potential of diet and risk of breast cancer among postmenopausal women. Breast Cancer Research and Treatment, 2016, 159, 139-149.	2.5	35
67	Effect of Physical Activity on Quality of Life as Perceived by Endometrial Cancer Survivors: A Systematic Review. International Journal of Gynecological Cancer, 2016, 26, 1727-1740.	2.5	14
68	Sources of polycyclic aromatic hydrocarbons are associated with gene-specific promoter methylation in women with breast cancer. Environmental Research, 2016, 145, 93-100.	7.5	52
69	Pancreatic cancer: associations of inflammatory potential of diet, cigarette smoking and long-standing diabetes. Carcinogenesis, 2016, 37, 481-490.	2.8	50
70	Exposure to multiple sources of polycyclic aromatic hydrocarbons and breast cancer incidence. Environment International, 2016, 89-90, 185-192.	10.0	122
71	Dietary Total Antioxidant Capacity is Inversely Associated with Prostate Cancer Aggressiveness in a Population-Based Study. Nutrition and Cancer, 2016, 68, 214-224.	2.0	23
72	Progestin and breast cancer risk: a systematic review. Breast Cancer Research and Treatment, 2016, 155, 3-12.	2.5	61

#	ARTICLE	IF	CITATIONS
73	Association between inflammatory potential of diet and mortality in the Iowa Women's Health study. European Journal of Nutrition, 2016, 55, 1491-1502.	3.9	70
74	Abstract 1760: Saturated fat intake and prostate cancer aggressiveness: Results from the population-based North Carolina-Louisiana prostate cancer project. , 2016, , .		1
75	Abstract 806: SNPs in vitamin D-related genes are associated with prostate cancer aggressiveness in the North Carolina-Louisiana Prostate Cancer Project (PCaP). , 2016, , .		0
76	Interaction between polyunsaturated fatty acids and genetic variants in relation to breast cancer incidence. , 2016, 1, .		1
77	The dietary inflammatory index is associated with colorectal cancer in the National Institutes of Health's American Association of Retired Persons Diet and Health Study. British Journal of Nutrition, 2015, 113, 1819-1827.	2.3	99
78	Inflammatory potential of diet and risk of colorectal cancer: a case-control study from Italy. British Journal of Nutrition, 2015, 114, 152-158.	2.3	74
79	Dietary, supplement, and adipose tissue tocopherol levels in relation to prostate cancer aggressiveness among African and European Americans: The North Carolina-Louisiana Prostate Cancer Project (PCaP). Prostate, 2015, 75, 1419-1435.	2.3	12
80	Association between Plasma 25-Hydroxyvitamin D, Ancestry and Aggressive Prostate Cancer among African Americans and European Americans in PCaP. PLoS ONE, 2015, 10, e0125151.	2.5	22
81	Thioredoxin 1 in Prostate Tissue Is Associated with Gleason Score, Erythrocyte Antioxidant Enzyme Activity, and Dietary Antioxidants. Prostate Cancer, 2015, 2015, 1-8.	0.6	8
82	Case-control study of the PERIOD3 clock gene length polymorphism and colorectal adenoma formation. Oncology Reports, 2015, 33, 935-941.	2.6	33
83	The association between dietary inflammatory index and risk of colorectal cancer among postmenopausal women: results from the Women's Health Initiative. Cancer Causes and Control, 2015, 26, 399-408.	1.8	169
84	Dietary Risk Reduction Factors for the Barrett's Esophagus-Esophageal Adenocarcinoma Continuum: A Review of the Recent Literature. Current Nutrition Reports, 2015, 4, 47-65.	4.3	8
85	Plasma carotenoids and tocopherols in relation to prostate-specific antigen (PSA) levels among men with biochemical recurrence of prostate cancer. Cancer Epidemiology, 2015, 39, 752-762.	1.9	27
86	Dietary flavonoid intake and Barrett's esophagus in western Washington State. Annals of Epidemiology, 2015, 25, 730-735.e2.	1.9	6
87	Genetic polymorphisms in DNA repair and oxidative stress pathways may modify the association between body size and postmenopausal breast cancer. Annals of Epidemiology, 2015, 25, 263-269.	1.9	8
88	Construct validation of the dietary inflammatory index among postmenopausal women. Annals of Epidemiology, 2015, 25, 398-405.	1.9	301
89	Dietary intake of fish, polyunsaturated fatty acids, and survival after breast cancer: A population-based follow-up study on Long Island, New York. Cancer, 2015, 121, 2244-2252.	4.1	28
90	Polyunsaturated fatty acid interactions and breast cancer incidence: a population-based case-control study on Long Island, New York. Annals of Epidemiology, 2015, 25, 929-935.	1.9	26

#	ARTICLE	IF	CITATIONS
91	Reply to E Archer and SN Blair. <i>Advances in Nutrition</i> , 2015, 6, 230-233.	6.4	12
92	Index-Based Dietary Patterns and Colorectal Cancer Risk: A Systematic Review. <i>Advances in Nutrition</i> , 2015, 6, 763-773.	6.4	64
93	Dietary inflammatory index and inflammatory gene interactions in relation to colorectal cancer risk in the Bellvitge colorectal cancer case-control study. <i>Genes and Nutrition</i> , 2015, 10, 447.	2.5	95
94	Vitamin D-related gene polymorphisms, plasma 25-hydroxyvitamin D, and breast cancer risk. <i>Cancer Causes and Control</i> , 2015, 26, 187-203.	1.8	60
95	A Healthy Lifestyle Index Is Associated With Reduced Risk of Colorectal Adenomatous Polyps Among Non-Users of Non-Steroidal Anti-Inflammatory Drugs. <i>Journal of Primary Prevention</i> , 2015, 36, 21-31.	1.6	21
96	Association between Dietary Inflammatory Potential and Breast Cancer Incidence and Mortality: Results from the Women's Health Initiative. <i>FASEB Journal</i> , 2015, 29, 260.5.	0.5	1
97	Abstract 1881: Dietary, supplement, and adipose tissue tocopherol levels in relation to prostate cancer aggressiveness among African- and European-Americans. , 2015, , .		0
98	A population-based dietary inflammatory index predicts levels of C-reactive protein in the Seasonal Variation of Blood Cholesterol Study (SEASONS). <i>Public Health Nutrition</i> , 2014, 17, 1825-1833.	2.2	510
99	Association of Filaggrin Variants with Asthma and Rhinitis: Is Eczema or Allergic Sensitization Status an Effect Modifier?. <i>International Archives of Allergy and Immunology</i> , 2014, 164, 308-318.	2.1	21
100	Indoor air pollution exposure from use of indoor stoves and fireplaces in association with breast cancer: a case-control study. <i>Environmental Health</i> , 2014, 13, 108.	4.0	35
101	Considering the Value of Dietary Assessment Data in Informing Nutrition-Related Health Policy. <i>Advances in Nutrition</i> , 2014, 5, 447-455.	6.4	126
102	Association of a Dietary Inflammatory Index With Inflammatory Indices and Metabolic Syndrome Among Police Officers. <i>Journal of Occupational and Environmental Medicine</i> , 2014, 56, 986-989.	1.7	254
103	Dietary Inflammatory Index Scores Differ by Shift Work Status. <i>Journal of Occupational and Environmental Medicine</i> , 2014, 56, 145-148.	1.7	69
