#	Article	IF	CITATIONS
1	Saturation in qualitative research: exploring its conceptualization and operationalization. Quality and Quantity, 2018, 52, 1893-1907.	3.7	5,196
2	Measuring the population impact of knee pain and disability with the Western Ontario and McMaster Universities Osteoarthritis Index (WOMAC). Pain, 2002, 100, 55-64.	4.2	205
3	Patterns of Consent in Epidemiologic Research: Evidence from Over 25,000 Responders. American Journal of Epidemiology, 2004, 159, 1087-1094.	3.4	160
4	The extent, quality and impact of patient and public involvement in primary care research: a mixed methods study. Research Involvement and Engagement, 2018, 4, 16.	2.9	87
5	Interrater Reliability of Scoring of Pain Drawings in a Self-Report Health Survey. Spine, 2005, 30, E455-E458.	2.0	74
6	Patient and public involvement in primary care research - an example of ensuring its sustainability. Research Involvement and Engagement, 2016, 2, 1.	2.9	71
7	Therapeutic alliance facilitates adherence to physiotherapy-led exercise and physical activity for older adults with knee pain: a longitudinal qualitative study. Journal of Physiotherapy, 2020, 66, 45-53.	1.7	56
8	Implementing the NICE osteoarthritis guidelines: a mixed methods study and cluster randomised trial of a model osteoarthritis consultation in primary care - the Management of OsteoArthritis In Consultations (MOSAICS) study protocol. Implementation Science, 2014, 9, 95.	6.9	53
9	"Heating Is More Important Than Food― Journal of Housing for the Elderly, 2006, 20, 95-108.	0.7	50
10	Uptake of the NICE osteoarthritis guidelines in primary care: a survey of older adults with joint pain. BMC Musculoskeletal Disorders, 2018, 19, 295.	1.9	47
11	Delays between the onset of symptoms and first rheumatology consultation in patients with rheumatoid arthritis in the UK: an observational study. BMJ Open, 2019, 9, e024361.	1.9	43
12	Integrating quantitative and qualitative data and findings when undertaking randomised controlled trials. BMJ Open, 2019, 9, e032081.	1.9	42
13	A multicentre, pragmatic, parallel group, randomised controlled trial to compare the clinical and cost-effectiveness of three physiotherapy-led exercise interventions for knee osteoarthritis in older adults: the BEEP trial protocol (ISRCTN: 93634563). BMC Musculoskeletal Disorders, 2014, 15, 254.	1.9	38
14	Rethinking â€~risk' and self-management for chronic illness. Social Theory and Health, 2012, 10, 78-99.	1.8	34
15	Lay models of self-management: how do people manage knee osteoarthritis in context?. Chronic Illness, 2011, 7, 185-200.	1.5	32
16	A prospective study of the consulting behaviour of older people with knee pain. British Journal of General Practice, 2006, 56, 269-76.	1.4	31
17	Mobile medics? The mobility of doctors in the European Economic Area. Health Policy, 2000, 54, 45-64.	3.0	28
18	Sustaining patient and public involvement in research: A case study of a research centre. Journal of Care Services Management, 2013, 7, 146-154.	0.1	26

#	Article	IF	CITATIONS
19	Identifying and managing osteoporosis before and after COVID-19: rise of the remote consultation?. Osteoporosis International, 2020, 31, 1629-1632.	3.1	24
20	Exploration of GPs' views and use of the fit note: a qualitative study in primary care. British Journal of General Practice, 2012, 62, e363-e370.	1.4	22
21	Mobilising the experiential knowledge of clinicians, patients and carers for applied health-care research. Contemporary Social Science, 2013, 8, 307-320.	1.9	22
22	Patient-reported quality indicators for osteoarthritis: a patient and public generated self-report measure for primary care. Research Involvement and Engagement, 2016, 2, 5.	2.9	22
23	Acceptability of bisphosphonates among patients, clinicians and managers: a systematic review and framework synthesis. BMJ Open, 2020, 10, e040634.	1.9	22
24	Clinical effectiveness of one ultrasound guided intra-articular corticosteroid and local anaesthetic injection in addition to advice and education for hip osteoarthritis (HIT trial): single blind, parallel group, three arm, randomised controlled trial. BMJ, The, 2022, 377, e068446.	6.0	21
25	'I suppose that depends on how I was feeling at the time': perspectives on questionnaires measuring quality of life and musculoskeletal pain. Journal of Health Services Research and Policy, 2006, 11, 81-88.	1.7	19
26	Introducing Evidence Through Research "Push― Qualitative Health Research, 2015, 25, 1560-1575.	2.1	19
27	Evaluation of a computer-assisted data entry procedure (including Teleform) for large-scale mailed surveys. Computers in Biology and Medicine, 2003, 33, 425-437.	7.0	18
28	Designing a placebo device: involving service users in clinical trial design. Health Expectations, 2013, 16, e100-e110.	2.6	16
29	The association between comorbidity and physical activity levels in people with osteoarthritis: Secondary analysis from two randomised controlled trials. Osteoarthritis and Cartilage Open, 2020, 2, 100057.	2.0	16
30	Understanding Help Seeking for Chronic Joint Pain. Qualitative Health Research, 2014, 24, 957-968.	2.1	15
31	The relative importance of perceived doctor's attitude on the decision to consult for symptomatic osteoarthritis: a choice-based conjoint analysis study. BMJ Open, 2015, 5, e009625.	1.9	15
32	Quality and effectiveness of osteoporosis treatment decision aids: a systematic review and environmental scan. Osteoporosis International, 2020, 31, 1837-1851.	3.1	13
33	'Walking like John Wayne': open-format diaries of people with knee pain and disability. Chronic Illness, 2006, 2, 21-26.	1.5	13
34	â€~…I've Found Once the Weight Had Gone Off, I've Had a Few Twinges, But Nothing Like Before'. Exploring Weight and Selfâ€Management of Knee Pain. Musculoskeletal Care, 2014, 12, 63-73.	1.4	10
35	Understanding the uptake of a clinical innovation for osteoarthritis in primary care: a qualitative study of knowledge mobilisation using the i-PARIHS framework. Implementation Science, 2020, 15, 95.	6.9	10
36	Evaluation of quality and readability of online patient information on osteoporosis and osteoporosis drug treatment and recommendations for improvement. Osteoporosis International, 2021, 32, 1567-1584.	3.1	9

#	Article	IF	CITATIONS
37	The attitudes towards, and beliefs about, physical activity in people with osteoarthritis and comorbidity: A qualitative investigation. Musculoskeletal Care, 2022, 20, 167-179.	1.4	8
38	Acceptability of, and preferences for, remote consulting during COVID-19 among older patients with two common long-term musculoskeletal conditions: findings from three qualitative studies and recommendations for practice. BMC Musculoskeletal Disorders, 2022, 23, 312.	1.9	8
39	Risk and selfâ€managing chronic joint pain: looking beyond individual lifestyles and behaviour. Sociology of Health and Illness, 2015, 37, 888-903.	2.1	7
40	The development and initial validation of a questionnaire to measure helpâ€seeking behaviour in patients with new onset rheumatoid arthritis. Health Expectations, 2015, 18, 2340-2355.	2.6	7
41	A randomised controlled trial of the clinical and cost-effectiveness of ultrasound-guided intra-articular corticosteroid and local anaesthetic injections: the hip injection trial (HIT) protocol. BMC Musculoskeletal Disorders, 2018, 19, 218.	1.9	7
42	Developing a model Fracture Liaison Service consultation with patients, carers and clinicians: a Delphi survey to inform content of the iFraP complex consultation intervention. Archives of Osteoporosis, 2021, 16, 58.	2.4	7
43	Acceptability of nurse-led reviews for inflammatory rheumatological conditions: A qualitative study. Journal of Multimorbidity and Comorbidity, 2021, 11, 263355652110024.	2.2	6
44	Improving uptake of Fracture Prevention drug treatments: a protocol for Development of a consultation intervention (iFraP-D). BMJ Open, 2021, 11, e048811.	1.9	6
45	Improving the Care of People with Long-Term Conditions in Primary Care: Protocol for the Enhance Pilot Trial. Journal of Comorbidity, 2015, 5, 135-149.	3.9	5
46	The INCLUDE study. Journal of Comorbidity, 2018, 8, 2235042X1879237.	3.9	5
47	Postal surveys in primary care: the hidden burden. Health Expectations, 2001, 4, 253-259.	2.6	3
48	Integrating case-finding and initial management for osteoarthritis, anxiety, and depression into primary care long-term condition reviews: results from the ENHANCE pilot trial. Family Practice, 2022, 39, 592-602.	1.9	3
49	Clinical and cost-effectiveness of bracing in symptomatic knee osteoarthritis management: protocol for a multicentre, primary care, randomised, parallel-group, superiority trial. BMJ Open, 2021, 11, e048196.	1.9	1
50	Reflections on becoming a person with musculoskeletal pain: A patient diary. Social Theory and Health, 2009, 7, 100-116.	1.8	0
51	115â€fPublic Priority Setting for Research in Osteoporosis. Rheumatology, 2016, , .	1.9	0
52	E059 Development of a nurse-led integrated care review based in primary care to identify and improve the management of co-morbidities in patients with inflammatory rheumatological conditions: the INCLUDE study. Rheumatology, 2019, 58, .	1.9	0
53	P117â€∫Exploring experiences of Fracture Liaison Services and perceptions of a new decision tool to support patient and clinician decisions: a focus group study. Rheumatology, 2021, 60, .	1.9	0
54	P118â $\in$ fCo-design of a model Fracture Liaison Service consultation: a Delphi survey with patients and clinicians. Rheumatology, 2021, 60, .	1.9	0
