#	ARTICLE	IF	CITATIONS
1	Non-Acid Fluid Exposure and Esophageal Squamous Cell Carcinoma. <i>Digestive Diseases and Sciences</i> , 2022, 67, 2754-2762.	2.3	6
2	Dietary acid load and mortality from all causes, CVD and cancer: results from the Golestan Cohort Study. <i>British Journal of Nutrition</i> , 2022, 128, 237-243.	2.3	12
3	Urinary estrogen metabolites and gastric cancer risk among postmenopausal women. <i>Cancer Reports</i> , 2022, 5, e1574.	1.4	3
4	Opium use and risk of bladder cancer: a multi-centre case-referent study in Iran. <i>International Journal of Epidemiology</i> , 2022, 51, 830-838.	1.9	8
5	Cancer Incidence, Mortality, Years of Life Lost, Years Lived With Disability, and Disability-Adjusted Life Years for 29 Cancer Groups From 2010 to 2019. <i>JAMA Oncology</i> , 2022, 8, 420.	7.1	719
6	Prevalence, awareness, treatment, and control of hypertension based on ACC/AHA versus JNC7 guidelines in the PERSIAN cohort study. <i>Scientific Reports</i> , 2022, 12, 4057.	3.3	10
7	Meat consumption and risk of esophageal and gastric cancer in the Golestan Cohort Study, Iran. <i>International Journal of Cancer</i> , 2022, 151, 1005-1012.	5.1	11
8	Lead poisoning among asymptomatic individuals with a long-term history of opiate use in Golestan Cohort Study. <i>International Journal of Drug Policy</i> , 2022, 104, 103695.	3.3	7
9	Spatial environmental factors predict cardiovascular and all-cause mortality: Results of the SPACE study. <i>PLoS ONE</i> , 2022, 17, e0269650.	2.5	4
10	Consumption of Yoghurt and Other Dairy Products and Risk of Colorectal Cancer in Iran: The IROPICAN Study. <i>Nutrients</i> , 2022, 14, 2506.	4.1	6
11	Urinary nitrate and sodium in a high-risk area for upper gastrointestinal cancers: Golestan Cohort Study. <i>Environmental Research</i> , 2022, 214, 113906.	7.5	3
12	Association Between Serological Responses to Two Zoonotic Ruminant Pathogens and Esophageal Squamous Cell Carcinoma. <i>Vector-Borne and Zoonotic Diseases</i> , 2021, 21, 125-127.	1.5	1
13	Joint effect of diabetes and opiate use on all-cause and cause-specific mortality: the Golestan cohort study. <i>International Journal of Epidemiology</i> , 2021, 50, 314-324.	1.9	8
14	Opium use and the risk of head and neck squamous cell carcinoma. <i>International Journal of Cancer</i> , 2021, 148, 1066-1076.	5.1	21
15	Obesity and incident gastrointestinal cancers: overall body size or central obesity measures, which factor matters?. <i>European Journal of Cancer Prevention</i> , 2021, 30, 267-274.	1.3	3
16	Metabolomics reveals biomarkers of opioid use disorder. <i>Translational Psychiatry</i> , 2021, 11, 103.	4.8	13
17	Dietary quality using four dietary indices and lung cancer risk: the Golestan Cohort Study (GCS). <i>Cancer Causes and Control</i> , 2021, 32, 493-503.	1.8	12
18	Oral Health and Risk of Upper Gastrointestinal Cancers in a Large Prospective Study from a High-risk Region: Golestan Cohort Study. <i>Cancer Prevention Research</i> , 2021, 14, 709-718.	1.5	10

#	ARTICLE	IF	CITATIONS
19	Concentrations of Cotinine and 4-(Methylnitrosamino)-1-(3-Pyridyl)-1-Butanol (NNAL) in U.S. Non-Daily Cigarette Smokers. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2021, 30, 1165-1174.	2.5	10
20	Red Meat Consumption and Risk of Nonalcoholic Fatty Liver Disease in a Population With Low Meat Consumption: The Golestan Cohort Study. <i>American Journal of Gastroenterology</i> , 2021, 116, 1667-1675.	0.4	27
21	Untargeted Metabolomics Reveals Biological Markers for Opioid Use Disorder Diagnosis and Intervention Strategies. <i>Biological Psychiatry</i> , 2021, 89, S343.	1.3	0
22	Associations between Biomarkers of Exposure and Lung Cancer Risk among Exclusive Cigarette Smokers in the Golestan Cohort Study. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 7349.	2.6	5
23	Indoor wood combustion, carcinogenic exposure and esophageal cancer in southwest Kenya. <i>Environment International</i> , 2021, 152, 106485.	10.0	16
24	Microbiome and Cancers of the Esophagus: A Review. <i>Microorganisms</i> , 2021, 9, 1764.	3.6	11
25	Colorectal cancer in the Linxian China Nutrition Intervention Trial: Risk factors and intervention results. <i>PLoS ONE</i> , 2021, 16, e0255322.	2.5	8
26	Long-term opiate use and risk of cardiovascular mortality: results from the Golestan Cohort Study. <i>European Journal of Preventive Cardiology</i> , 2021, 28, 98-106.	1.8	13
27	Comparison of fecal and oral collection methods for studies of the human microbiota in two Iranian cohorts. <i>BMC Microbiology</i> , 2021, 21, 324.	3.3	4
28	A prospective study of tea drinking temperature and risk of esophageal squamous cell carcinoma. <i>International Journal of Cancer</i> , 2020, 146, 18-25.	5.1	57
29	The global, regional, and national burden of stomach cancer in 195 countries, 1990–2017: a systematic analysis for the Global Burden of Disease study 2017. <i>The Lancet Gastroenterology and Hepatology</i> , 2020, 5, 42-54.	8.1	390
30	Peripheral blood blast rate of clearance is an independent predictor of clinical response and outcomes in acute myeloid leukaemia. <i>British Journal of Haematology</i> , 2020, 188, 881-887.	2.5	7
31	Methylated DNA Markers of Esophageal Squamous Cancer and Dysplasia: An International Study. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2020, 29, 2642-2650.	2.5	7
32	Carcinogenicity of opium consumption. <i>Lancet Oncology</i> , The, 2020, 21, 1407-1408.	10.7	30
33	Predicting the risk of esophageal high-grade lesions in opportunistic screening. <i>Gastrointestinal Endoscopy</i> , 2020, 92, 1136-1137.	1.0	1
34	Mapping geographical inequalities in oral rehydration therapy coverage in low-income and middle-income countries, 2000–17. <i>The Lancet Global Health</i> , 2020, 8, e1038-e1060.	6.3	23
35	Mapping geographical inequalities in access to drinking water and sanitation facilities in low-income and middle-income countries, 2000–17. <i>The Lancet Global Health</i> , 2020, 8, e1162-e1185.	6.3	91
36	Untargeted Metabolomics: Biochemical Perturbations in Golestan Cohort Study Opium Users Inform Intervention Strategies. <i>Frontiers in Nutrition</i> , 2020, 7, 584585.	3.7	18

#	ARTICLE	IF	CITATIONS
37	Habitual dietary intake of flavonoids and all-cause and cause-specific mortality: Golestan cohort study. <i>Nutrition Journal</i> , 2020, 19, 108.	3.4	8
38	Mapping geographical inequalities in childhood diarrhoeal morbidity and mortality in low-income and middle-income countries, 2000â€“17: analysis for the Global Burden of Disease Study 2017. <i>Lancet</i> , The, 2020, 395, 1779-1801.	13.7	72
39	Household Fuel Use and the Risk of Gastrointestinal Cancers: The Golestan Cohort Study. <i>Environmental Health Perspectives</i> , 2020, 128, 67002.	6.0	19
40	Red Meat Consumption and Risk of Nonalcoholic Fatty Liver Disease in a Population with Low Red Meat Consumption. <i>Current Developments in Nutrition</i> , 2020, 4, nzaa061_041.	0.3	5
41	The global, regional, and national burden of gastro-oesophageal reflux disease in 195 countries and territories, 1990â€“2017: a systematic analysis for the Global Burden of Disease Study 2017. <i>The Lancet Gastroenterology and Hepatology</i> , 2020, 5, 561-581.	8.1	69
42	Urinary TERT promoter mutations are detectable up to 10 years prior to clinical diagnosis of bladder cancer: Evidence from the Golestan Cohort Study. <i>EBioMedicine</i> , 2020, 53, 102643.	6.1	51
43	The global, regional, and national burden of cirrhosis by cause in 195 countries and territories, 1990â€“2017: a systematic analysis for the Global Burden of Disease Study 2017. <i>The Lancet Gastroenterology and Hepatology</i> , 2020, 5, 245-266.	8.1	823
44	Opium use and subsequent incidence of cancer: results from the Golestan Cohort Study. <i>The Lancet Global Health</i> , 2020, 8, e649-e660.	6.3	59
45	The global, regional, and national burden of oesophageal cancer and its attributable risk factors in 195 countries and territories, 1990â€“2017: a systematic analysis for the Global Burden of Disease Study 2017. <i>The Lancet Gastroenterology and Hepatology</i> , 2020, 5, 582-597.	8.1	241
46	The first clusters of Middle East respiratory syndrome coronavirus in Oman: Time to act. <i>Journal of Infection and Public Health</i> , 2020, 13, 679-686.	4.1	6
47	Opiate and Tobacco Use and Exposure to Carcinogens and Toxicants in the Golestan Cohort Study. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2020, 29, 650-658.	2.5	23
48	The Khuzestan Comprehensive Health Study (KCHS): Methodology and Profile of Participants. <i>Archives of Iranian Medicine</i> , 2020, 23, 653-657.	0.6	7
49	Substitution of dietary protein sources in relation to colorectal cancer risk in the NIH-AARP cohort study. <i>Cancer Causes and Control</i> , 2019, 30, 1127-1135.	1.8	10
50	Author's reply to comment on "A prospective study of tea drinking temperature" by Islami et al</i>.. <i>International Journal of Cancer</i> , 2019, 145, 2888-2889.	5.1	0
51	Nut and Peanut Butter Consumption and Mortality in the National Institutes of Health-AARP Diet and Health Study. <i>Nutrients</i> , 2019, 11, 1508.	4.1	27
52	The global, regional, and national burden of colorectal cancer and its attributable risk factors in 195 countries and territories, 1990â€“2017: a systematic analysis for the Global Burden of Disease Study 2017. <i>The Lancet Gastroenterology and Hepatology</i> , 2019, 4, 913-933.	8.1	259
53	Effectiveness of polypill for primary and secondary prevention of cardiovascular diseases (PolyIran): a pragmatic, cluster-randomised trial. <i>Lancet</i> , The, 2019, 394, 672-683.	13.7	197
54	Turmeric, Pepper, Cinnamon, and Saffron Consumption and Mortality. <i>Journal of the American Heart Association</i> , 2019, 8, .	3.7	9

#	ARTICLE	IF	CITATIONS
55	Potato consumption and the risk of overall and cause specific mortality in the NIH-AARP study. PLoS ONE, 2019, 14, e0216348.	2.5	12
56	Adherence to the Dietary Approaches to Stop Hypertension (DASH) diet and risk of total and cause-specific mortality: results from the Golestan Cohort Study. International Journal of Epidemiology, 2019, 48, 1824-1838.	1.9	23
57	The application of six dietary scores to a Middle Eastern population: a comparative analysis of mortality in a prospective study. European Journal of Epidemiology, 2019, 34, 371-382.	5.7	27
58	Individual and Combined Effects of Environmental Risk Factors for Esophageal Cancer Based on Results From the Golestan Cohort Study. Gastroenterology, 2019, 156, 1416-1427.	1.3	123
59	Urinary Biomarkers of Carcinogenic Exposure among Cigarette, Waterpipe, and Smokeless Tobacco Users and Never Users of Tobacco in the Golestan Cohort Study. Cancer Epidemiology Biomarkers and Prevention, 2019, 28, 337-347.	2.5	34
60	Metabolomics Analysis of Opiate Abusers from Golestan Cohort Study (GCS). FASEB Journal, 2019, 33, lb235.	0.5	0
61	Completeness and Accuracy of Death Registry Data in Golestan, Iran. Archives of Iranian Medicine, 2019, 22, 1-6.	0.6	13
62	Comparing Anthropometric Indicators of Visceral and General Adiposity as Determinants of Overall and Cardiovascular Mortality. Archives of Iranian Medicine, 2019, 22, 301-309.	0.6	6
63	An Exploratory Study of Units of Reporting Opium Use in Iran: Implications for Epidemiologic Studies. Archives of Iranian Medicine, 2019, 22, 541-545.	0.6	9
64	Urinary Concentrations of Polycyclic Aromatic Hydrocarbon Metabolites in Matã Drinkers in Rio Grande do Sul, Brazil. Cancer Epidemiology Biomarkers and Prevention, 2018, 27, 331-337.	2.5	10
65	Prospective Epidemiological Research Studies in Iran (the PERSIAN Cohort Study): Rationale, Objectives, and Design. American Journal of Epidemiology, 2018, 187, 647-655.	3.4	366
66	Opium Use and Risk of Pancreatic Cancer: A Prospective Cohort Study. Cancer Epidemiology Biomarkers and Prevention, 2018, 27, 268-273.	2.5	22
67	Causes of premature death and their associated risk factors in the Golestan Cohort Study, Iran. BMJ Open, 2018, 8, e021479.	1.9	26
68	Risk factors of colorectal cancer in Linxian, China: A nutrition intervention trial with 30 years follow-up. Annals of Oncology, 2018, 29, v56.	1.2	1
69	Nut consumption and the risk of oesophageal squamous cell carcinoma in the Golestan Cohort Study. British Journal of Cancer, 2018, 119, 176-181.	6.4	11
70	Anatomical subsite can modify the association between meat and meat compounds and risk of colorectal adenocarcinoma: Findings from three large US cohorts. International Journal of Cancer, 2018, 143, 2261-2270.	5.1	21
71	Peripheral Blood Blast Clearance As an Independent Predictor of Clinical Response and Outcomes in Acute Myeloid Leukemia. Blood, 2018, 132, 2684-2684.	1.4	0
72	Nut consumption and total and cause-specific mortality: results from the Golestan Cohort Study. International Journal of Epidemiology, 2017, 46, dyv365.	1.9	38

#	ARTICLE	IF	CITATIONS
73	White rice intake and incidence of type-2 diabetes: analysis of two prospective cohort studies from Iran. <i>BMC Public Health</i> , 2017, 17, 133.	2.9	56
74	Oral health and mortality in the Golestan Cohort Study. <i>International Journal of Epidemiology</i> , 2017, 46, 2028-2035.	1.9	27
75	International cancer seminars: a focus on esophageal squamous cell carcinoma. <i>Annals of Oncology</i> , 2017, 28, 2086-2093.	1.2	149
76	Mortality from respiratory diseases associated with opium use: a population-based cohort study. <i>Thorax</i> , 2017, 72, 1028-1034.	5.6	24
77	Hazards of cigarettes, smokeless tobacco and waterpipe in a Middle Eastern Population: a Cohort Study of 50â€¦000 individuals from Iran. <i>Tobacco Control</i> , 2017, 26, 674-682.	3.2	38
78	The association between waterpipe smoking and gastroesophageal reflux disease. <i>International Journal of Epidemiology</i> , 2017, 46, 1968-1977.	1.9	10
79	Nut and peanut butter consumption and the risk of esophageal and gastric cancer subtypes. <i>American Journal of Clinical Nutrition</i> , 2017, 106, 858-864.	4.7	23
80	Toenail mineral concentration and risk of esophageal squamous cell carcinoma, results from the Golestan Cohort Study. <i>Cancer Medicine</i> , 2017, 6, 3052-3059.	2.8	16
81	Mortality from different causes associated with meat, heme iron, nitrates, and nitrites in the NIH-AARP Diet and Health Study: population based cohort study. <i>BMJ: British Medical Journal</i> , 2017, 357, j1957.	2.3	201
82	Prevalence and Correlates of Gastroesophageal Reflux Disease in Southern Iran: Pars Cohort Study. <i>Middle East Journal of Digestive Diseases</i> , 2017, 9, 129-138.	0.4	6
83	Hydroxylated Dimeric Naphthoquinones Increase the Generation of Reactive Oxygen Species, Induce Apoptosis of Acute Myeloid Leukemia Cells and Are Not Substrates of the Multidrug Resistance Proteins ABCB1 and ABCG2. <i>Pharmaceuticals</i> , 2016, 9, 4.	3.8	9
84	Food preparation methods, drinking water source, and esophageal squamous cell carcinoma in the high-risk area of Golestan, Northeast Iran. <i>European Journal of Cancer Prevention</i> , 2016, 25, 123-129.	1.3	29
85	Hypertension and mortality in the Golestan Cohort Study: A prospective study of 50â€¦000 adults in Iran. <i>Journal of Human Hypertension</i> , 2016, 30, 260-267.	2.2	21
86	The Combined Effects of Healthy Lifestyle Behaviors on All-Cause Mortality: The Golestan Cohort Study. <i>Archives of Iranian Medicine</i> , 2016, 19, 752-761.	0.6	5
87	The Clinical Performance of an Office-Based Risk Scoring System for Fatal Cardiovascular Diseases in North-East of Iran. <i>PLoS ONE</i> , 2015, 10, e0126779.	2.5	14
88	Mortality and cancer in relation to ABO blood group phenotypes in the Golestan Cohort Study. <i>BMC Medicine</i> , 2015, 13, 8.	5.5	44
89	Presence of isocitrate dehydrogenase mutations may predict clinical response to hypomethylating agents in patients with acute myeloid leukemia. <i>American Journal of Hematology</i> , 2015, 90, E77-9.	4.1	69
90	Cancer Risk After Pernicious Anemia in the US Elderly Population. <i>Clinical Gastroenterology and Hepatology</i> , 2015, 13, 2282-2289.e4.	4.4	143

#	ARTICLE	IF	CITATIONS
91	Polymorphisms in EGFR and IL28B are associated with spontaneous clearance in an HCV-infected Iranian population. <i>Genes and Immunity</i> , 2015, 16, 514-518.	4.1	8
92	Dietary intake of minerals and risk of esophageal squamous cell carcinoma: results from the Golestan Cohort Study. <i>American Journal of Clinical Nutrition</i> , 2015, 102, 102-108.	4.7	61
93	Multiplex <i>H. pylori</i> Serology and Risk of Gastric Cardia and Noncardia Adenocarcinomas. <i>Cancer Research</i> , 2015, 75, 4876-4883.	0.9	39
94	Polypill for the prevention of cardiovascular disease (PolyIran): study design and rationale for a pragmatic cluster randomized controlled trial. <i>European Journal of Preventive Cardiology</i> , 2015, 22, 1609-1617.	1.8	26
95	Shear bond strength of metal brackets to feldspathic porcelain treated by Nd:YAG laser and hydrofluoric acid. <i>Lasers in Medical Science</i> , 2015, 30, 837-841.	2.1	35
96	Heart Disease Is Associated With Anthropometric Indices and Change in Body Size Perception Over the Life Course: The Golestan Cohort Study. <i>Global Heart</i> , 2015, 10, 245.	2.3	4
97	Risk of Gastric Cancer by Water Source: Evidence from the Golestan Case-Control Study. <i>PLoS ONE</i> , 2015, 10, e0128491.	2.5	18
98	Cardiovascular disease mortality and years of life lost attributable to non-optimal systolic blood pressure and hypertension in northeastern Iran. <i>Archives of Iranian Medicine</i> , 2015, 18, 144-52.	0.6	10
99	Determinants of Gastroesophageal Reflux Disease, Including Hookah Smoking and Opium Use—A Cross-Sectional Analysis of 50,000 Individuals. <i>PLoS ONE</i> , 2014, 9, e89256.	2.5	30
100	Pilot study of cytological testing for oesophageal squamous cell dysplasia in a high-risk area in Northern Iran. <i>British Journal of Cancer</i> , 2014, 111, 2235-2241.	6.4	35
101	A Prospective Cohort Study of Body Size and Risk of Head and Neck Cancers in the NIH AARP Diet and Health Study. <i>Cancer Epidemiology Biomarkers and Prevention</i> , 2014, 23, 2422-2429.	2.5	21
102	Predicting the risk of squamous dysplasia and esophageal squamous cell carcinoma using minimum classification error method. <i>Computers in Biology and Medicine</i> , 2014, 45, 51-57.	7.0	10
103	Neglected role of hookah and opium in gastric carcinogenesis: A cohort study on risk factors and attributable fractions. <i>International Journal of Cancer</i> , 2014, 134, 181-188.	5.1	69
104	Impact of body size and physical activity during adolescence and adult life on overall and cause-specific mortality in a large cohort study from Iran. <i>European Journal of Epidemiology</i> , 2014, 29, 95-109.	5.7	31
105	Cooking Methods and Esophageal Squamous Cell Carcinoma in High-Risk Areas of Iran. <i>Nutrition and Cancer</i> , 2014, 66, 500-505.	2.0	19
106	Oesophageal squamous cell carcinoma in high-risk Chinese populations: Possible role for vascular epithelial growth factor A. <i>European Journal of Cancer</i> , 2014, 50, 2855-2865.	2.8	9
107	Presence of Isocitrate Dehydrogenase (IDH) Mutations May Predict Clinical Response to Hypomethylating Agents in Patients with Acute Myeloid Leukemia (AML). <i>Blood</i> , 2014, 124, 3724-3724.	1.4	1
108	Endoscopic screening for precancerous lesions of the esophagus in a high risk area in Northern Iran. <i>Archives of Iranian Medicine</i> , 2014, 17, 246-52.	0.6	19
