citing authors

#	ARTICLE	IF	CITATIONS
1	Consensus on Shared Measures of Mobility and Cognition: From the Canadian Consortium on Neurodegeneration in Aging (CCNA). <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2019, 74, 897-909.	3.6	125
2	Poor Social Network, Not Living Alone, Is Associated With Incidence of Adverse Health Outcomes in Older Adults. <i>Journal of the American Medical Directors Association</i> , 2019, 20, 1438-1443.	2.5	75
3	Age-related self-overestimation of step-over ability in healthy older adults and its relationship to fall risk. <i>BMC Geriatrics</i> , 2013, 13, 44.	2.7	71
4	Long-term effects of an intergenerational program on functional capacity in older adults: Results from a seven-year follow-up of the REPRINTS study. <i>Archives of Gerontology and Geriatrics</i> , 2016, 64, 13-20.	3.0	63
5	Observational Evidence of the Association Between Handgrip Strength, Hand Dexterity, and Cognitive Performance in Community-Dwelling Older Adults: A Systematic Review. <i>Journal of Epidemiology</i> , 2018, 28, 373-381.	2.4	58
6	Co-existence of social isolation and homebound status increase the risk of all-cause mortality. <i>International Psychogeriatrics</i> , 2019, 31, 703-711.	1.0	50
7	Multiple impacts of an intergenerational program in Japan: Evidence from the Research on Productivity through Intergenerational Sympathy Project. <i>Geriatrics and Gerontology International</i> , 2016, 16, 98-109.	1.5	46
8	Regional Cerebral Glucose Metabolism and Gait Speed in Healthy Community-Dwelling Older Women. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2014, 69, 1519-1527.	3.6	35
9	Entorhinal Cortex Volume Is Associated With Dual-Task Gait Cost Among Older Adults With MCI: Results From the Gait and Brain Study. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2019, 74, 698-704.	3.6	35
10	Hand dexterity, not handgrip strength, is associated with executive function in Japanese community-dwelling older adults: a cross-sectional study. <i>BMC Geriatrics</i> , 2018, 18, 192.	2.7	32
11	Cognitive intervention through a training program for picture book reading in community-dwelling older adults: a randomized controlled trial. <i>BMC Geriatrics</i> , 2014, 14, 122.	2.7	31
12	Older adults with fear of falling show deficits in motor imagery of gait. <i>Journal of Nutrition, Health and Aging</i> , 2017, 21, 721-726.	3.3	30
13	Who is mentally healthy? Mental health profiles of Japanese social networking service users with a focus on LINE, Facebook, Twitter, and Instagram. <i>PLoS ONE</i> , 2021, 16, e0246090.	2.5	28
14	Locomotive and non-locomotive activities evaluated with a triaxial accelerometer in adults and elderly individuals. <i>Aging Clinical and Experimental Research</i> , 2013, 25, 637-643.	2.9	24
15	Apolipoprotein E4 Allele and Gait Performance in Mild Cognitive Impairment: Results From the Gait and Brain Study. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2017, 72, 1676-1682.	3.6	24
16	Reference values of gait parameters measured with a plantar pressure platform in community-dwelling older Japanese adults. <i>Clinical Interventions in Aging</i> , 2019, Volume 14, 1265-1276.	2.9	24
17	Can You Ride a Bicycle? The Ability to Ride a Bicycle Prevents Reduced Social Function in Older Adults With Mobility Limitation. <i>Journal of Epidemiology</i> , 2016, 26, 307-314.	2.4	21
18	Fear of falling, but not gait impairment, predicts subjective memory complaints in cognitively intact older adults. <i>Geriatrics and Gerontology International</i> , 2017, 17, 1125-1131.	1.5	21

#	ARTICLE	IF	CITATIONS
19	Effects of a comprehensive intervention program, including hot bathing, on overweight adults: A randomized controlled trial. <i>Geriatrics and Gerontology International</i> , 2013, 13, 638-645.	1.5	20
20	The neural substrate of gait and executive function relationship in elderly women: A PET study. <i>Geriatrics and Gerontology International</i> , 2017, 17, 1873-1880.	1.5	19
21	Preventive effects of an intergenerational program on age-related hippocampal atrophy in older adults: The REPRINTS study. <i>International Journal of Geriatric Psychiatry</i> , 2018, 33, e264-e272.	2.7	19
22	Association between Hypometabolism in the Supplementary Motor Area and Fear of Falling in Older Adults. <i>Frontiers in Aging Neuroscience</i> , 2017, 9, 251.	3.4	18
23	Characteristics for gait parameters of community-dwelling elderly Japanese with lower cognitive function. <i>PLoS ONE</i> , 2019, 14, e0212646.	2.5	18
24	Influential factors affecting age-related self-overestimation of step-over ability: Focusing on frequency of going outdoors and executive function. <i>Archives of Gerontology and Geriatrics</i> , 2014, 59, 577-583.	3.0	17
25	<scp>MMSE</scp> Cutoff Discriminates Hippocampal Atrophy: Neural Evidence for the Cutoff of 24 Points. <i>Journal of the American Geriatrics Society</i> , 2021, 69, 839-841.	2.6	15
26	Hearing loss and increased gait variability among older adults. <i>Gait and Posture</i> , 2021, 87, 54-58.	1.4	14
27	Self-estimation of physical ability in stepping over an obstacle is not mediated by visual height perception: a comparison between young and older adults. <i>Psychological Research</i> , 2017, 81, 740-749.	1.7	12
28	Serum Parathyroid Hormone but Not Vitamin D Is Associated with Impaired Gait in Community-Dwelling Older Adults. <i>Journal of the American Geriatrics Society</i> , 2016, 64, 2606-2608.	2.6	11
29	Influence of co-existing social isolation and homebound status on medical care utilization and expenditure among older adults in Japan. <i>Archives of Gerontology and Geriatrics</i> , 2021, 93, 104286.	3.0	10
30	Association of age-related cognitive and obstacle avoidance performances. <i>Scientific Reports</i> , 2021, 11, 12552.	3.3	10
31	Effect of Aging and Sex on Circulating MicroRNAs in Humans. <i>Advances in Aging Research</i> , 2014, 03, 152-159.	0.4	10
32	Changes in self-estimated step-over ability among older adults: A 3-year follow-up study. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2020, 76, 2003-2012.	3.9	9
33	Association of Eating Alone With Depression Among Older Adults Living Alone: Role of Poor Social Networks. <i>Journal of Epidemiology</i> , 2021, 31, 297-300.	2.4	9
34	Depression, Fear of Falling, Cognition and Falls. , 2020, , 49-66.		9
35	Overlap Between Apolipoprotein E μ 4 Allele and Slowing Gait Results in Cognitive Impairment. <i>Frontiers in Aging Neuroscience</i> , 2019, 11, 247.	3.4	8
36	Is unwilling volunteering protective for functional decline? The interactive effects of volunteer willingness and engagement on health in a 3-year longitudinal study of Japanese older adults. <i>Geriatrics and Gerontology International</i> , 2019, 19, 673-678.	1.5	8

#	ARTICLE	IF	CITATIONS
37	Reliability and construct validity of a novel motor-cognitive dual-task test: A Stepping Trail Making Test. <i>Geriatrics and Gerontology International</i> , 2020, 20, 291-296.	1.5	8
38	Effects of an unsupervised Nordic walking intervention on cognitive and physical function among older women engaging in volunteer activity. <i>Journal of Exercise Science and Fitness</i> , 2021, 19, 209-215.	2.2	8
39	Neural correlates of older adults' self-overestimation of stepping-over ability. <i>Age</i> , 2016, 38, 351-361.	3.0	7
40	Gait and Age-Related Hearing Loss Interactions on Global Cognition and Falls. <i>Laryngoscope</i> , 2022, 132, 857-863.	2.0	7
41	Neural basis for the relationship between frequency of going outdoors and depressive mood in older adults. <i>International Journal of Geriatric Psychiatry</i> , 2017, 32, 589-595.	2.7	6
42	Differences in the association between white matter hyperintensities and gait performance among older adults with and without cognitive impairment. <i>Geriatrics and Gerontology International</i> , 2021, 21, 313-320.	1.5	6
43	Immediate beneficial effects of self-monitoring body movements for upright postural stability in young healthy individuals. <i>Journal of Bodywork and Movement Therapies</i> , 2012, 16, 244-250.	1.2	5
44	Social Contact with Family and Non-Family Members Differentially Affects Physical Activity: A Parallel Latent Growth Curve Modeling Approach. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 2313.	2.6	5
45	Motor Imagery Deficits in High-Functioning Older Adults and Its Impact on Fear of Falling and Falls. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2021, 76, e228-e234.	3.6	5
46	A combined stepping and visual tracking task predicts cognitive decline in older adults better than gait or visual tracking tasks alone: a prospective study. <i>Aging Clinical and Experimental Research</i> , 2021, 33, 1865-1873.	2.9	4
47	Effects of a comprehensive intervention program, including hot bathing, on physical function in community-dwelling healthy older adults: a pilot randomized controlled trial. <i>Aging Clinical and Experimental Research</i> , 2013, 25, 453-461.	2.9	3
48	An Epidemiological Study of the Risk Factors of Bicycle-Related Falls Among Japanese Older Adults. <i>Journal of Epidemiology</i> , 2019, 29, 487-490.	2.4	2
