#	ARTICLE	IF	CITATIONS
1	The acceptability and effect of a culturally-tailored dance intervention to promote physical activity in women of South Asian origin at risk of diabetes in the Netherlandsâ€™ A mixed-methods feasibility study. PLoS ONE, 2022, 17, e0264191.	2.5	4
2	Facilitators and barriers for the implementation of exercise as medicine in routine clinical care in Dutch university medical centres: a mixed methodology study on cliniciansâ€™ perceptions. BMJ Open, 2022, 12, e052920.	1.9	6
3	The association between well-being and a large variation of accelerometer-assessed physical activity and sedentary behavior measures. Mental Health and Physical Activity, 2022, , 100446.	1.8	0
4	Barriers and facilitators influencing the implementation of the occupational health intervention â€œDynamic Workâ€™: a qualitative study. BMC Public Health, 2022, 22, 947.	2.9	0
5	The effectiveness of physical activity interventions using activity trackers during or after inpatient care: a systematic review and meta-analysis of randomized controlled trials. International Journal of Behavioral Nutrition and Physical Activity, 2022, 19, .	4.6	9
6	Mixed-methods process evaluation of the Dynamic Work study: A multicomponent intervention for office workers to reduce sitting time. Applied Ergonomics, 2022, 104, 103823.	3.1	0
7	The First Global Physical Activity and Sedentary Behavior Guidelines for People Living With Disability. Journal of Physical Activity and Health, 2021, 18, 86-93.	2.0	93
8	Response to â€œCommentary on: The First Global Physical Activity and Sedentary Behavior Guidelines for People Living With Disabilityâ€™. Journal of Physical Activity and Health, 2021, 18, 350-351.	2.0	5
9	Striking the Right Balance: Evidence to Inform Combined Physical Activity and Sedentary Behavior Recommendations. Journal of Physical Activity and Health, 2021, 18, 631-637.	2.0	24
10	Participation of people living with disabilities in physical activity: a global perspective. Lancet, The, 2021, 398, 443-455.	13.7	183
11	Efficacy, characteristics, behavioural models and behaviour change strategies, of non-workplace interventions specifically targeting sedentary behaviour; a systematic review and meta-analysis of randomised control trials in healthy ambulatory adults. PLoS ONE, 2021, 16, e0256828.	2.5	7
12	Enabling physical activity for people living with disabilities â€œ Authors' reply. Lancet, The, 2021, 398, 2074.	13.7	1
13	Contributions of changes in physical activity, sedentary time, diet and body weight to changes in cardiometabolic risk. International Journal of Behavioral Nutrition and Physical Activity, 2021, 18, 166.	4.6	3
14	Cost-Effectiveness and Return-on-Investment of the Dynamic Work Intervention Compared With Usual Practice to Reduce Sedentary Behavior. Journal of Occupational and Environmental Medicine, 2020, 62, e449-e456.	1.7	11
15	World Health Organization 2020 guidelines on physical activity and sedentary behaviour. British Journal of Sports Medicine, 2020, 54, 1451-1462.	6.7	4,050
16	New global guidelines on sedentary behaviour and health for adults: broadening the behavioural targets. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 151.	4.6	121
17	Invest in physical activity to protect and promote health: the 2020 WHO guidelines on physical activity and sedentary behaviour. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 145.	4.6	29
18	Advancing the global physical activity agenda: recommendations for future research by the 2020 WHO physical activity and sedentary behavior guidelines development group. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 143.	4.6	166

#	ARTICLE	IF	CITATIONS
19	The user and non-user perspective: Experiences of office workers with long-term access to sit-stand workstations. <i>PLoS ONE</i> , 2020, 15, e0236582.	2.5	7
20	Natural Patterns of Sitting, Standing and Stepping During and Outside Work – Differences between Habitual Users and Non-Users of Sit-Stand Workstations. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 4075.	2.6	6
21	Variations in accelerometry measured physical activity and sedentary time across Europe – harmonized analyses of 47,497 children and adolescents. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2020, 17, 38.	4.6	176
22	Heritability of objectively assessed and self-reported sedentary behavior. <i>Scandinavian Journal of Medicine and Science in Sports</i> , 2020, 30, 1237-1247.	2.9	6
23	Five-year cost-effectiveness analysis of the European Fans in Training (EuroFIT) physical activity intervention for men versus no intervention. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2020, 17, 30.	4.6	5
24	Digitally enabled aged care and neurological rehabilitation to enhance outcomes with Activity and MObility UsiNg Technology (AMOUNT) in Australia: A randomised controlled trial. <i>PLoS Medicine</i> , 2020, 17, e1003029.	8.4	23
25	Effectiveness of the multi-component dynamic work intervention to reduce sitting time in office workers – Results from a pragmatic cluster randomised controlled trial. <i>Applied Ergonomics</i> , 2020, 84, 103027.	3.1	24
26	Engagement, Acceptability, Usability, and Preliminary Efficacy of a Self-Monitoring Mobile Health Intervention to Reduce Sedentary Behavior in Belgian Older Adults: Mixed Methods Study. <i>JMIR MHealth and UHealth</i> , 2020, 8, e18653.	3.7	20
27	Implementing Individually Tailored Prescription of Physical Activity in Routine Clinical Care: Protocol of the Physicians Implement Exercise = Medicine (PIE=M) Development and Implementation Project. <i>JMIR Research Protocols</i> , 2020, 9, e19397.	1.0	8

45	Effectiveness of interventions using self-monitoring to reduce sedentary behavior in adults: a systematic review and meta-analysis. International Journal of Behavioral Nutrition and Physical Activity, 2019, 16, 63.	4.6	100
46	Time trends between 2002 and 2017 in correlates of self-reported sitting time in European adults. PLoS ONE, 2019, 14, e0225228.	2.5	15
47	The evolution of time use approaches for understanding activities of daily living in a public health context. BMC Public Health, 2019, 19, 451.	2.9	3
48	Prevalence and correlates of domain-specific sedentary time of adults in the Netherlands: findings from the 2006 Dutch time use survey. BMC Public Health, 2019, 19, 538.	2.9	10
49	Road map towards a harmonized pan-European surveillance of obesity-related lifestyle behaviours and their determinants in children and adolescents. International Journal of Public Health, 2019, 64, 615-623.	2.3	11
50	Daily sedentary time and physical activity as assessed by accelerometry and their correlates in older adults. European Review of Aging and Physical Activity, 2019, 16, 3.	2.9	29
51	Feasibility, Validity, and Responsiveness of Self-Report and Objective Measures of Physical Activity in Patients With Chronic Pain. PM and R, 2019, 11, 858-867.	1.6	5
52	Physical workload and obesity have a synergistic effect on work ability among construction workers. International Archives of Occupational and Environmental Health, 2019, 92, 855-864.	2.3	21
53	The effect of a programme to improve men's sedentary time and physical activity: The European Fans in Training (EuroFIT) randomised controlled trial. PLoS Medicine, 2019, 16, e1002736.	8.4	61
54	The Dynamic Work study: study protocol of a cluster randomized controlled trial of an occupational health intervention aimed at reducing sitting time in office workers. BMC Public Health, 2019, 19, 188.	2.9	9

#	ARTICLE	IF	CITATIONS
55	Time trends between 2002 and 2017 in correlates of self-reported sitting time in European adults. , 2019, 14, e0225228.		0
56	Time trends between 2002 and 2017 in correlates of self-reported sitting time in European adults. , 2019, 14, e0225228.		0
