#	ARTICLE	IF	CITATIONS
1	Profits and pandemics: prevention of harmful effects of tobacco, alcohol, and ultra-processed food and drink industries. <i>Lancet, The</i> , 2013, 381, 670-679.	6.3	1,248
2	The UN Decade of Nutrition, the NOVA food classification and the trouble with ultra-processing. <i>Public Health Nutrition</i> , 2018, 21, 5-17.	1.1	1,155
3	Ultra-processed foods: what they are and how to identify them. <i>Public Health Nutrition</i> , 2019, 22, 936-941.	1.1	1,067
4	Ultra-processed products are becoming dominant in the global food system. <i>Obesity Reviews</i> , 2013, 14, 21-28.	3.1	1,059
5	Trends of obesity and underweight in older children and adolescents in the United States, Brazil, China, and Russia. <i>American Journal of Clinical Nutrition</i> , 2002, 75, 971-977.	2.2	995
6	Chronic non-communicable diseases in Brazil: burden and current challenges. <i>Lancet, The</i> , 2011, 377, 1949-1961.	6.3	979
7	Increasing consumption of ultra-processed foods and likely impact on human health: evidence from Brazil. <i>Public Health Nutrition</i> , 2010, 14, 5-13.	1.1	699
8	Maternal and child health in Brazil: progress and challenges. <i>Lancet, The</i> , 2011, 377, 1863-1876.	6.3	677
9	Consumption of ultra-processed foods and cancer risk: results from NutriNet-Sant� prospective cohort. <i>BMJ: British Medical Journal</i> , 2018, 360, k322.	2.4	605
10	A new classification of foods based on the extent and purpose of their processing. <i>Cadernos De Saude Publica</i> , 2010, 26, 2039-2049.	0.4	535
11	Ultra-processed food intake and risk of cardiovascular disease: prospective cohort study (NutriNet-Sant�). <i>BMJ: British Medical Journal</i> , 2019, 365, l1451.	2.4	512
12	Ultra-processed foods and added sugars in the US diet: evidence from a nationally representative cross-sectional study. <i>BMJ Open</i> , 2016, 6, e009892.	0.8	511
13	Overweight exceeds underweight among women in most developing countries. <i>American Journal of Clinical Nutrition</i> , 2005, 81, 714-721.	2.2	480
14	The dual burden household and the nutrition transition paradox. <i>International Journal of Obesity</i> , 2005, 29, 129-136.	1.6	444
15	Consumption of ultra-processed foods predicts diet quality in Canada. <i>Appetite</i> , 2017, 108, 512-520.	1.8	420
16	Consumption of ultra-processed foods and obesity in Brazilian adolescents and adults. <i>Preventive Medicine</i> , 2015, 81, 9-15.	1.6	419
17	<sc>INFORMAS</sc> (<sc>I</sc>nternational <sc>N</sc>etwork for <sc>F</sc>ood and) Tj ETQq1 1 0.784314 rgBT /Over	3.1	415
18	Nutrition and health. The issue is not food, nor nutrients, so much as processing. <i>Public Health Nutrition</i> , 2009, 12, 729-731.	1.1	410

#	ARTICLE	IF	CITATIONS
19	Household availability of ultra-processed foods and obesity in nineteen European countries. <i>Public Health Nutrition</i> , 2018, 21, 18-26.	1.1	387
20	Health conditions and health-policy innovations in Brazil: the way forward. <i>Lancet, The</i> , 2011, 377, 2042-2053.	6.3	370
21	The share of ultra-processed foods and the overall nutritional quality of diets in the US: evidence from a nationally representative cross-sectional study. <i>Population Health Metrics</i> , 2017, 15, 6.	1.3	365
22	Ultra-Processed Food Consumption and Chronic Non-Communicable Diseases-Related Dietary Nutrient Profile in the UK (2008â€“2014). <i>Nutrients</i> , 2018, 10, 587.	1.7	365
23	Obesity and inequities in health in the developing world. <i>International Journal of Obesity</i> , 2004, 28, 1181-1186.	1.6	349
24	Consumption of ultra-processed foods and likely impact on human health. Evidence from Canada. <i>Public Health Nutrition</i> , 2013, 16, 2240-2248.	1.1	328
25	Food Classification Systems Based on Food Processing: Significance and Implications for Policies and Actions: A Systematic Literature Review and Assessment. <i>Current Obesity Reports</i> , 2014, 3, 256-272.	3.5	316
26	Ultra-Processed Food Products and Obesity in Brazilian Households (2008â€“2009). <i>PLoS ONE</i> , 2014, 9, e92752.	1.1	313
27	Participacao crescente de produtos ultraprocessados na dieta brasileira (1987-2009). <i>Revista De Saude Publica</i> , 2013, 47, 656-665.	0.7	304
28	Consumption of ultra-processed foods and associated sociodemographic factors in the USA between 2007 and 2012: evidence from a nationally representative cross-sectional study. <i>BMJ Open</i> , 2018, 8, e020574.	0.8	293
29	Ultra-processed foods and the nutritional dietary profile in Brazil. <i>Revista De Saude Publica</i> , 2015, 49, 38.	0.7	285
30	Call for emergency action to limit global temperature increases, restore biodiversity, and protect health. <i>BMJ, The</i> , 2021, 374, n1734.	3.0	272
31	The share of ultra-processed foods determines the overall nutritional quality of diets in Brazil. <i>Public Health Nutrition</i> , 2018, 21, 94-102.	1.1	267
32	Ultra-processed food consumption and excess weight among US adults. <i>British Journal of Nutrition</i> , 2018, 120, 90-100.	1.2	265
33	Ultraprocessed Food Consumption and Risk of Type 2 Diabetes Among Participants of the NutriNet-SantÃ© Prospective Cohort. <i>JAMA Internal Medicine</i> , 2020, 180, 283.	2.6	257
34	Shifting obesity trends in Brazil. <i>European Journal of Clinical Nutrition</i> , 2000, 54, 342-346.	1.3	248
35	Income-Specific Trends in Obesity in Brazil: 1975â€“2003. <i>American Journal of Public Health</i> , 2007, 97, 1808-1812.	1.5	244
36	Independent Effects of Income and Education on the Risk of Obesity in the Brazilian Adult Population. <i>Journal of Nutrition</i> , 2001, 131, 881S-886S.	1.3	236

#	ARTICLE	IF	CITATIONS
37	The Burden of Disease From Undernutrition and Overnutrition in Countries Undergoing Rapid Nutrition Transition: A View From Brazil. <i>American Journal of Public Health</i> , 2004, 94, 433-434.	1.5	214
38	Dietary guidelines to nourish humanity and the planet in the twenty-first century. A blueprint from Brazil. <i>Public Health Nutrition</i> , 2015, 18, 2311-2322.	1.1	214
39	Global trends in ultraprocessed food and drink product sales and their association with adult body mass index trajectories. <i>Obesity Reviews</i> , 2019, 20, 10-19.	3.1	213
40	Ultra-processed foods and added sugars in the Chilean diet (2010). <i>Public Health Nutrition</i> , 2018, 21, 125-133.	1.1	203
41	Overweight and Underweight Coexist within Households in Brazil, China and Russia. <i>Journal of Nutrition</i> , 2000, 130, 2965-2971.	1.3	202
42	The Impact of Transnational "Big Food" Companies on the South: A View from Brazil. <i>PLoS Medicine</i> , 2012, 9, e1001252.	3.9	200
43	Impact of ultra-processed foods on micronutrient content in the Brazilian diet. <i>Revista De Saude Publica</i> , 2015, 49, 1-8.	0.7	200
44	Part I. What has happened in terms of some of the unique elements of shift in diet, activity, obesity, and other measures of morbidity and mortality within different regions of the world?. <i>Public Health Nutrition</i> , 2002, 5, 105-112.	1.1	186
45	Population-based evidence of a strong decline in the prevalence of smokers in Brazil (1989-2003). <i>Bulletin of the World Health Organization</i> , 2007, 85, 527-534.	1.5	184
46	Narrowing socioeconomic inequality in child stunting: the Brazilian experience, 1974-2007. <i>Bulletin of the World Health Organization</i> , 2010, 88, 305-311.	1.5	184
47	Monitoring and benchmarking government policies and actions to improve the healthiness of food environments: a proposed Government Healthy Food Environment Policy Index. <i>Obesity Reviews</i> , 2013, 14, 24-37.	3.1	181
48	Causas do declínio da desnutrição infantil no Brasil, 1996-2007. <i>Revista De Saude Publica</i> , 2009, 43, 35-43.	0.7	176
49	Processed and Ultra-processed Food Products: Consumption Trends in Canada from 1938 to 2011. <i>Canadian Journal of Dietetic Practice and Research</i> , 2014, 75, 15-21.	0.5	175
50	Consumption of ultra-processed foods and obesity in Canada. <i>Canadian Journal of Public Health</i> , 2019, 110, 4-14.	1.1	163
51	Fifty years of the <i>Revista de Saude Pública</i> . <i>Revista De Saude Publica</i> , 2016, 50, 1.	0.7	151
52	Nutrition transition and double burden of undernutrition and excess of weight in Brazil. <i>American Journal of Clinical Nutrition</i> , 2014, 100, 1617S-1622S.	2.2	144
53	Ultra-processed foods and recommended intake levels of nutrients linked to non-communicable diseases in Australia: evidence from a nationally representative cross-sectional study. <i>BMJ Open</i> , 2019, 9, e029544.	0.8	144
54	Monitoring the price and affordability of foods and diets globally. <i>Obesity Reviews</i> , 2013, 14, 82-95.	3.1	142

#	ARTICLE	IF	CITATIONS
55	Dietary share of ultra-processed foods and metabolic syndrome in the US adult population. Preventive Medicine, 2019, 125, 40-48.	1.6	142
56	Ultra-processed food intake in association with BMI change and risk of overweight and obesity: A prospective analysis of the French NutriNet-Santé cohort. PLoS Medicine, 2020, 17, e1003256.	3.9	140
57	Towards unified and impactful policies to reduce ultra-processed food consumption and promote healthier eating. Lancet Diabetes and Endocrinology, 2021, 9, 462-470.	5.5	138
58	Is There a Lag Globally in Overweight Trends for Children Compared with Adults?. Obesity, 2006, 14, 1846-1853.	1.5	134
59	Distribuição regional e socioeconômica da disponibilidade domiciliar de alimentos no Brasil em 2008-2009. Revista De Saude Publica, 2012, 46, 06-15.	0.7	130
60	Vigilância de Fatores de Risco para Doenças Crônicas por Inquérito Telefônico nas capitais dos 26 estados brasileiros e no Distrito Federal (2006). Revista Brasileira De Epidemiologia, 2008, 11, 20-37.	0.3	124
61	Ultra-processed food consumption and risk of obesity: a prospective cohort study of UK Biobank. European Journal of Nutrition, 2021, 60, 2169-2180.	1.8	123
62	Ultra-processed food consumption and indicators of obesity in the United Kingdom population (2008-2016). PLoS ONE, 2020, 15, e0232676.	1.1	119
63	Tendência secular da anemia na infância na cidade de São Paulo (1984-1996). Revista De Saude Publica, 2000, 34, 62-72.	0.7	118
64	Tendência secular da desnutrição e da obesidade na infância na cidade de São Paulo (1974-1996). Revista De Saude Publica, 2000, 34, 52-61.	0.7	115
65	Ultra-processed foods and the limits of product reformulation. Public Health Nutrition, 2018, 21, 247-252.	1.1	115
66	Association Between Ultra-Processed Food Consumption and Functional Gastrointestinal Disorders: Results From the French NutriNet-Santé Cohort. American Journal of Gastroenterology, 2018, 113, 1217-1228.	0.2	106
67	Recent Trends in Maternal, Newborn, and Child Health in Brazil: Progress Toward Millennium Development Goals 4 and 5. American Journal of Public Health, 2010, 100, 1877-1889.	1.5	101
68	Monitoring the impacts of trade agreements on food environments. Obesity Reviews, 2013, 14, 120-134.	3.1	94
69	Assessing the health impact of transnational corporations: its importance and a framework. Globalization and Health, 2016, 12, 27.	2.4	94
70	Fruit and vegetable intake by Brazilian adults, 2003. Cadernos De Saude Publica, 2005, 21, S19-S24.	0.4	93
71	Associations between Consumption of Ultra-Processed Foods and Intake of Nutrients Related to Chronic Non-Communicable Diseases in Mexico. Journal of the Academy of Nutrition and Dietetics, 2019, 119, 1852-1865.	0.4	93
72	Ultra-processed food consumption among US adults from 2001 to 2018. American Journal of Clinical Nutrition, 2022, 115, 211-221.	2.2	92

#	ARTICLE	IF	CITATIONS
73	Ultra-processed food consumption and type 2 diabetes incidence: A prospective cohort study. <i>Clinical Nutrition</i> , 2021, 40, 3608-3614.	2.3	90
74	Ultra-processed foods, protein leverage and energy intake in the USA. <i>Public Health Nutrition</i> , 2018, 21, 114-124.	1.1	86
75	Artificially Sweetened Beverages and the Response to the Global Obesity Crisis. <i>PLoS Medicine</i> , 2017, 14, e1002195.	3.9	83
76	Monitoring food and non-alcoholic beverage promotions to children. <i>Obesity Reviews</i> , 2013, 14, 59-69.	3.1	82
77	Current Food Classifications in Epidemiological Studies Do Not Enable Solid Nutritional Recommendations for Preventing Diet-Related Chronic Diseases: The Impact of Food Processing. <i>Advances in Nutrition</i> , 2015, 6, 629-638.	2.9	81
78	Ultra-processed food consumption and obesity in the Australian adult population. <i>Nutrition and Diabetes</i> , 2020, 10, 39.	1.5	80
79	Monitoring the health-related labelling of foods and non-alcoholic beverages in retail settings. <i>Obesity Reviews</i> , 2013, 14, 70-81.	3.1	77
80	The Snack Attack. <i>American Journal of Public Health</i> , 2010, 100, 975-981.	1.5	76
81	International differences in cost and consumption of ready-to-consume food and drink products: United Kingdom and Brazil, 2008-2009. <i>Global Public Health</i> , 2013, 8, 845-856.	1.0	74
82	Renda familiar, preço de alimentos e aquisição domiciliar de frutas e hortaliças no Brasil. <i>Revista De Saude Publica</i> , 2010, 44, 1014-1020.	0.7	73
83	Mudanças alimentares na coorte NutriNet Brasil durante a pandemia de covid-19. <i>Revista De Saude Publica</i> , 2020, 54, 91.	0.7	73
84	Tendência secular do peso ao nascer na cidade de São Paulo (1976-1998). <i>Revista De Saude Publica</i> , 2000, 34, 26-40.	0.7	72
85	Comparing Different Policy Scenarios to Reduce the Consumption of Ultra-Processed Foods in UK: Impact on Cardiovascular Disease Mortality Using a Modelling Approach. <i>PLoS ONE</i> , 2015, 10, e0118353.	1.1	72
86	What Brazil is doing to promote healthy diets and active lifestyles. <i>Public Health Nutrition</i> , 2002, 5, 263-267.	1.1	71
87	Ultra-processed foods and excessive free sugar intake in the UK: a nationally representative cross-sectional study. <i>BMJ Open</i> , 2019, 9, e027546.	0.8	71
88	Individual and contextual determinants of exclusive breast-feeding in São Paulo, Brazil: a multilevel analysis. <i>Public Health Nutrition</i> , 2006, 9, 40-46.	1.1	70
89	Monitoring and benchmarking population diet quality globally: a stepwise approach. <i>Obesity Reviews</i> , 2013, 14, 135-149.	3.1	70
90	Monitoring the levels of important nutrients in the food supply. <i>Obesity Reviews</i> , 2013, 14, 49-58.	3.1	69

#	ARTICLE	IF	CITATIONS
91	A tendência da prática da amamentação no Brasil nas décadas de 70 e 80. <i>Revista Brasileira De Epidemiologia</i> , 1998, 1, 40-49.	0.3	69
92	Processed and ultra-processed foods are associated with lower-quality nutrient profiles in children from Colombia. <i>Public Health Nutrition</i> , 2018, 21, 142-147.	1.1	65
93	A proposed approach to monitor private-sector policies and practices related to food environments, obesity and non-communicable disease prevention. <i>Obesity Reviews</i> , 2013, 14, 38-48.	3.1	64
94	Sugar-Sweetened Beverage Taxes in Brazil. <i>American Journal of Public Health</i> , 2012, 102, 178-183.	1.5	63
95	Ultra-Processed Food Consumption among the Paediatric Population: An Overview and Call to Action from the European Childhood Obesity Group. <i>Annals of Nutrition and Metabolism</i> , 2020, 76, 109-113.	1.0	63
96	Sugar and artificially sweetened beverage consumption and adiposity changes: National longitudinal study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2015, 12, 137.	2.0	62
97	Consumption of ultra-processed foods and its association with added sugar content in the diets of US children, NHANES 2009-2014. <i>Pediatric Obesity</i> , 2019, 14, e12563.	1.4	61
98	Tendência secular das parasitoses intestinais na infância na cidade de São Paulo (1984-1996). <i>Revista De Saude Publica</i> , 2000, 34, 73-82.	0.7	60
99	Causas do declínio acelerado da desnutrição infantil no Nordeste do Brasil (1986-1996-2006). <i>Revista De Saude Publica</i> , 2010, 44, 17-27.	0.7	60
100	Added sugars and ultra-processed foods in Spanish households (1990-2010). <i>European Journal of Clinical Nutrition</i> , 2018, 72, 1404-1412.	1.3	60
101	Trends in prevalence of overweight and obesity in adults in 26 Brazilian state capitals and the Federal District from 2006 to 2012. <i>Revista Brasileira De Epidemiologia</i> , 2014, 17, 267-276.	0.3	58
102	Ultraprocessed food consumption and dietary nutrient profiles associated with obesity: A multicountry study of children and adolescents. <i>Obesity Reviews</i> , 2022, 23, e13387.	3.1	57
103	Health impact modelling of different travel patterns on physical activity, air pollution and road injuries for São Paulo, Brazil. <i>Environment International</i> , 2017, 108, 22-31.	4.8	56
104	Association between dietary contribution of ultra-processed foods and urinary concentrations of phthalates and bisphenol in a nationally representative sample of the US population aged 6 years and older. <i>PLoS ONE</i> , 2020, 15, e0236738.	1.1	56
105	Brazilian obesity prevention and control initiatives. <i>Obesity Reviews</i> , 2013, 14, 88-95.	3.1	55
